TravelMate 4060 Series

Service Guide

Service guide files and updates are available on the ACER/CSD web; for more information, please refer to http://csd.acer.com.tw

PRINTED IN TAIWAN

Revision History

Please refer to the table below for the updates made on TravelMate 4060 service guide.

Date	Chapter	Updates
200512/27	Chapter 1	Revise memory specification to 533MHz on page 19.
2006/01/17	Chapter 1	Update LCD panel specification on page 25.
2006/02/15	Chapter 3	Revise disassembling SOP on chapter 3.

Conventions

The following conventions are used in this manual:

SCREEN MESSAGES	Denotes actual messages that appear on screen.
NOTE	Gives bits and pieces of additional information related to the current topic.
WARNING	Alerts you to any damage that might result from doing or not doing specific actions.
CAUTION	Gives precautionary measures to avoid possible hardware or software problems.
IMPORTANT	Reminds you to do specific actions relevant to the accomplishment of procedures.

Preface

Before using this information and the product it supports, please read the following general information.

- 1. This Service Guide provides you with all technical information relating to the BASIC CONFIGURATION decided for Acer's "global" product offering. To better fit local market requirements and enhance product competitiveness, your regional office MAY have decided to extend the functionality of a machine (e.g. add-on card, modem, or extra memory capability). These LOCALIZED FEATURES will NOT be covered in this generic service guide. In such cases, please contact your regional offices or the responsible personnel/channel to provide you with further technical details.
- 2. Please note WHEN ORDERING FRU PARTS, that you should check the most up-to-date information available on your regional web or channel. If, for whatever reason, a part number change is made, it will not be noted in the printed Service Guide. For ACER-AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code to those given in the FRU list of this printed Service Guide. You MUST use the list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

System Introduction

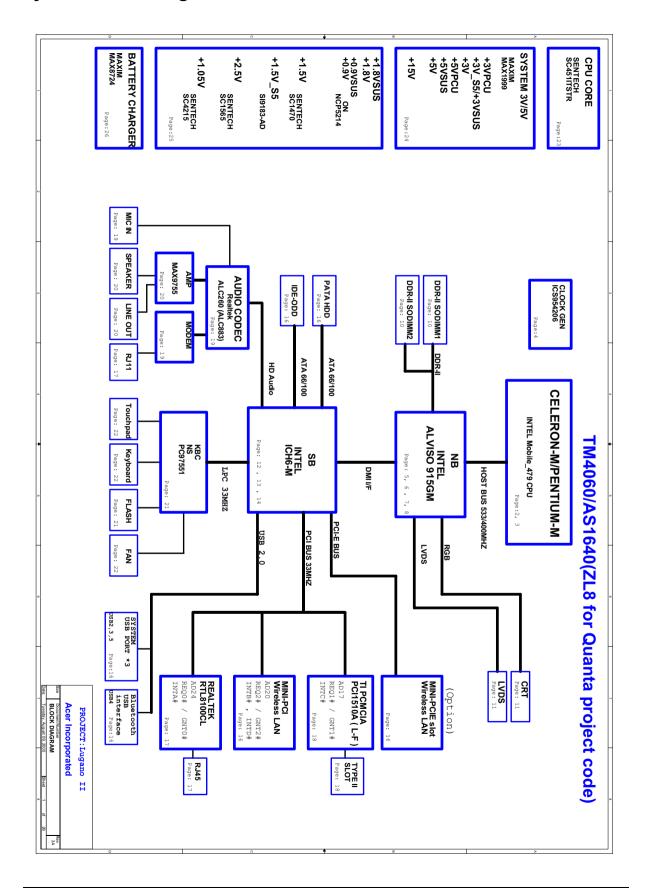

Features

This computer was designed with the user in mind. Here are just a few of its many features:

Platforn	n	
		Intel $^{\circledR}$ Pentium $^{\circledR}$ M 730/740/750/760/770/780 processor (2MB L2 cache, 1.60/1.73/1.86/2/2.13/ 2.26 GHz, 533 MHz FSB)
		Intel [®] Pentium [®] M 725 processor (2MB L2 Cache, 1.60 GHz, 400 MHz FSB)
		Intel Celeron M processor 360/370/380 (1 MB L2 cache, 1.40/1.50/1.60 GHz, 400 MHz FSB)
		Chipset: Intel [®] 915GM
Memory	,	
incino,		256 MB/512 MB of DDRII 533 memory, upgradeable to 2 GB with dual so DIMM modules
Data sto	orage	
		40/60/80/100 GB ATA/100 hard disk
		DVD-Dual double-layer drive
		DVD/CD-RW combo drive
Display	and	graphics
		Color Thin-Film Transistor (TFT) LCD displaying at
		15" XGA (1024 X 768)
Acer	· Grid\	 15.4" WXGA (1280 X 800) supporting simultaneous multi-window viewing on dual displays via /ista
		Intel $^{\circledR}$ 915GM integrated 3D graphics, featuring Intel Graphics Media Accelerator 900 and up to 128 MB of shared memory
		Microsoft [®] DirectX [®] 7.0 and dual independent display support
		MPEG-2/DVD hardware-assisted capability
		Simultaneous LCD and CRT display with LCD panel resolution at 70 Hz
Commu	ınicat	tion
		Modem: 56K ITU V.92 modem with PTT approval; Wake-on-Ring ready
		LAN: 10/100 Mbps Fast Ethernet; Wake-on-LAN ready
		Wireless LAN (optional): integrated miniPCl Acer InviLink TM 802.11b/g Wi-Fi CERTIFIED TM solution
		Acer SignalUP wireless technology support
		Wireless PAN (optional): integrated Bluetooth®
Audio		
		Audio system with two built-in speakers
		Sound Blaster Pro TM and MS-Sound compatible
		Built-in microphone

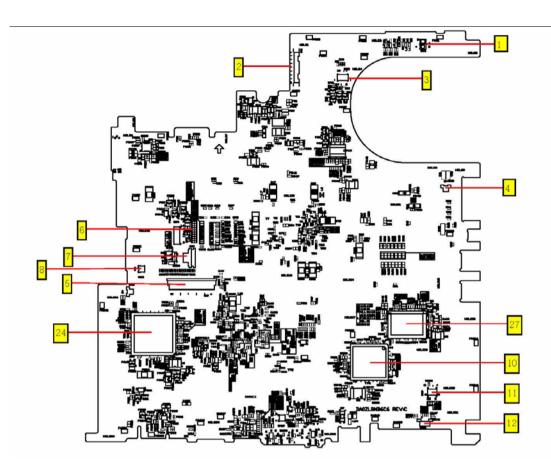

Input devices 88-/89-key Acer FineTouch™ keyboard Touchpad with 4-way integrated scroll button Four easy-launch buttons Two front-panel buttons: wireless LED-button and Bluetooth® LED-button I/O interface Three USB 2.0 ports Ethernet (RJ-45) port Modem (RJ-11) port External display (VGA) port Microphone Line-in jack Headphones/speaker/line-out port One Type II PC Card slot DC-in jack for AC adaptor

Panel

This is a brief introduction to the I/O ports, the features and the indicators.

Front view

#	Item	Description
1	Display screen	Also called LCD (Liquid Crystal Display), displays computer output.
2	Microphone	Internal microphone for sound recording.
3	Keyboard	For entering data into you computer.
4	Palmrest	Comfortable support area for your hands when you use the computer.
5	Click buttons (Left, center and right)	The left and right buttons function like the left and right mouse buttons; the center button serves as a 4-way scroll button.
6	Touchpad	Touch-sensitive pointing device which functions like a computer mouse.
7	Status indicators	LEDs (Light Emitting Diodes) that turn on and off to show the status of the computer and its functions and components.
8	Easy-Launch buttons	Buttons for launching frequently used programs.
9	Power button	Turns the computer on and off.

Closed front view

#	Icon	Item/ Port	Description
1		Speakers	Left and right speakers deliver stereo audio output.
2	Ÿ	Power indicator	Lights up when the computer is on.
3	Ē	Battery indicator	Lights up when the battery is being charged.
4	*	Bluetooth communication button/indicator	Press to enable/disable the Bluetooth function. Indicates the status of Bluetooth communication (optional).
5	Ö	Wireless communication button/ indicator	Press to enable/disable the wireless function. Indicates the status of wireless LAN communication (optional).
6	((→))	Line-in jack	Accepts audio line-in devices (e.g., audio CD player, stereo walkman).
7	ر ه م	Microphone jack	Accepts inputs from external microphones.
8	ಣ	Speaker/Line-Out/Headphone jack	Connects to audio line-out devices (e.g., speakers, headphones).
9	•<	USB 2.0 port	Connects to Universal Serial Bus (USB) 2.0 devices (e.g., USB mouse, UsB camera).

Left view

#	Icon	Item/ Port	Description
1		Optical drive	Internal optical drive; accepts CDs or DVDs depending on the optical drive type.
2		LED indicator	Lights up when the optical drive is active.
3		Optical drive eject button	Ejects the optical drive tray from the drive.
4		Emergency eject hole	Ejects the optical drive tray when the computer is turned off.

Right view

#	lcon	Item/ Port	Description
1		PC Card slot eject button	Ejects the PC Card from the slot
2		PC card slot	Accepts one Type II CardBus PC Card.
3	•	Two USB 2.0 ports	Connects to Universal Serial Bus (USB) 2.0 devices (e.g., USB mouse, USB camera).
4	器	Network jack	Connects to an Ethernet 10/100 based network.
5	O	Modem jack	Connects to a phone line.
6		Ventilation slots	Enable the computer to stay cool, even after prolonged use.

Rear view

#	Icon	Port	Description
1	==	Power jack	Connects to an AC adaptor.
2		External display port	Connects to a display device (e.g., external monitor, LCD projector).
3	ĸ	Security keylock	Connects to a Kensington-compatible computer security lock.

Bottom view

#	Item	Description
1	Hard disc bay	Houses the computer's hard disc (secured by a screw).
2	Battery release latch	Unlatches the battery to remove the battery pack.
3	Battery bay	Houses the computer's battery pack.
4	Battery lock	Locks the battery in place.
5	Cooling fan	Helps keep the computer cool.
		Note: Do not cover or obstruct the opening of the fan.
6	Memory comparment	House the computer's main memory.

Indicators

The computer has three easy-to-read status icons on the upper-right above the keyboard, and four on the front panel.

Icon	Function	Description
A	Caps Lock	Lights when Caps Lock is activated.
1	Num Lock	Lights when Numeric Lock is activated.
3	Media activity	Indicates when the hard disk or optical drive is active.
; <u>†</u>	Power	Lights when the computer is on.
Ē	Battery	Lights when the battery is being charged.
*	Bluetooth	Indicates the status of Bluetooth communication.
Ö	Wireless LAN	Indicates the status of Bluetooth communication.

NOTE: 1. Charging: the light shows amber when the battery is charging.

NOTE: 2. Fully charged: light shows green when in AC mode.

Easy-Launch Buttons

Located at the upper-right, above the keyboard are four buttons. These buttons are called launch keys. They are mail, Web browser, Acer Empowering key " $\mathcal C$ ", and one user-programmable button.

Press " earrow " to run the Acer eManager. The mail and Web buttons are pre-set of email and internet programs, but can be reset by users. To set the Web browser, mail and programmable keys, run the Acer Launch Manager.

Launch key	Default application
P	User-programmable
	Acer eManager (user-programmable)
e	
Web browser	Internet browser (user-programmable)
Mail	Email application (user-programmable)

Using the keyboard

The keyboard has full-sized keys and an embedded keypad, separate cursor keys, two Windows keys and twelve function keys.

Lock keys and embedded numeric keypad

The keyboard has three lock keys which you can toggle on and off.

Lock key	Description
Caps Lock	When tis on, all alphabetic characters typed are in uppercase.
CAPS	
Num Lock <fn>+<f11></f11></fn>	When is on, the embedded keypad is in numeric mode. The keys function
NUM	as a calculator (complete with the arithmetic operators), -, *, and /). Use this mode when you need to do a lot of numeric data entry. A better solution would be to connect an external keypad.
Scroll Lock <fn>+<f12></f12></fn>	When is on, the screen moves one line up or down when you press the up
SCROLL LOCK	or down arrow keys respectively. does not work with some applications.

The embedded numeric keypad functions like a desktop numeric keypad. It is indicated by small characters located on the upper right corner of the keycaps. To simplify the keyboard legend, cursor-control key symbols are not printed on the keys.

Desired access	Num lock on	Num lock off
Number keys on embedded keypad	Type numbers in a normal manner.	
Cursor-control keys on embedded keypad	Hold <shift> while using cursor-control keys.</shift>	Hold <fn> while using cursor-control keys.</fn>
Main keyboard keys	Hold <fn> while typing letters on embedded keypad.</fn>	Type the letters in a normal manner.

Windows keys

The keyboard has two keys that perform Windows-specific functions.

Keys	Description
Windows logo key	Start button. Combinations with this key perform shortcut functions. Below are a few examples:
<i>25</i>	+ <tab> (Activates the next Taskbar button)</tab>
	+ <e> (Opens the My Computer window)</e>
	+ <f1> (Opens Help and Support)</f1>
	+ <f> (Opens the Find: All Files dialog box)</f>
	+ <r> (Opens the Run dialog box)</r>
	+ <m> (Minimizes all windows)</m>
	<shift>+ # +< M> (Undoes the minimize all windows)</shift>
Application key	This key has the same effect as clicking the right mouse button; it opens the application's context menu.

Hot Keys

The computer employs hot keys or key combinations to access most of the computer's controls like screen contrast and brightness, volume output and the BIOS Utility.

To activate hot keys, press and hold the **<Fn>** key before pressing the other key in the hot key combination.

Hot Key	lcon	Function	Description
Fn-Fi	?	Hotkey help	Displays a list of the hotkeys and their functions.
Fn-F2	8	Acer eSetting	Launches Acer eSetting in the eManager set by the Acer Empowering key

Hot Key	Icon	Function	Description
Fn-F3	♦	Power Management	Launches Power options.
Fn-F4	Z ^z	Sleep	Puts the computer in Sleep mode.
Fn-F5		Display toggle	Switches display output between the display screen, external monitor (if connected) and both the display screen and external monitor.
Fn-Fe	*	Screen blank	Turns the display screen backlight off to save power. Press any key to return.
Fn-F7		Touchpad Toggle	Turns the internal touchpad on and off.
Fn-F8	4/√ »	Speaker toggle	Turns the speakers on and off.
Fn-ſ∱	(1)	Volume up	Increases the sound volume.
Fn-₩	()	Volume down	Decreases the sound volume.
Fn-→	÷.	Brightness up	Increases the screen brightness.
Fn-" ←	:	Brightness down	Decreases the screen brightness.

Special keys

You can locate the Euro symbol at the upper-center (for European keyboard) and/or bottom-right (Chinese keyboard) of your keyboard. To type:

The Euro symbol

- 1. Open a text editor or word processor.
- 2. Either directly press the <Euro> key at the bottom-right of the keyboard (for Chinese keyboard), or hold <Alt Gr> and then press the <5> key at the upper-center of the keyboard.symbol at the upper-center of the keyboard (for European keyboard, you can use both method).

NOTE: Some fonts and software do not support the Euro symbol. Please refer to www.microsoft.com/typography/fag/fag12.htm for more information.

The US dollar sign

- 1. Open a text editor or word processor.
- 2. Either directly press the <Euro> key at the bottom-right of the keyboard (for Chinese keyboard), or hold <Shift> and then press the <4> key at the upper-center of the keyboard.symbol at the upper-center of the keyboard (for European keyboard, you can use both method).

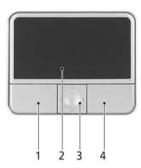

NOTE: This function varies according to the language settings.

Touchpad

The built-in touchpad is a pointing device that senses movement on its surface. This means the cursor responds as you move your finger on the surface of the touchpad. The central location on the palmrest provides optimum comfort and suuport.

Touchpad basics

The following items teach you how to use the touchpad:

- * Move your finger across the touchpad (2) to move the cursor.
- * Press the left (1) and right (4) buttons located on the edge of the touchpad to do selection and execution functions. These two buttons are similar to the left and right buttons on a mouse. Tapping on the touchapd is the same as clicking the left button.
- * Use the 4-way scroll (3) button to scroll up or down and move left or right a page. This button mimics your cursor pressing on the right scroll bar of Windows applications.

Function	Left button (1)	Right button (4)	Touchpad (2)	Center button (3)
Execute	Click twice quickly.		Tap twice (at the same speed as double-clicking a mouse button).	
Select	Click once.		Tap once.	
Drag	Click and hold, then use finger to drag the cursor on the touchpad.		Tap twice (at the same speed as double-clicking a mouse button); hold finger to the touchpad on the second tap and drag the cursor.	
Access context menu		Click once.		
Scroll				Click and hold to move up/down/left/right.

NOTE: Keep your fingers dry and clean when using the touchpad. Also keep the touchpad dry and clean. The touchpad is sensitive to finger movement, hence, the lighter the touch, the better the response. Taping harder will not increase the touchpad's responsiveness.

Hardware Specifications and Configurations

System Board Major Chip

Item	Controller
System core logic	Intel [®] 915GM+ICH6-M
Memory controller	Integrated in Intel [®] 915GM
Audio controller	RealTek ALC260 HD audio interface
	(Audio amplifer: Maxiam MAX9755)
PCMCIA controller for socket	TI PCI1510A
Video controller	built-in Intel [®] 915GM
Power and Keyboard controller	KBC NS97551
Wireless controller (mini PCI)	Intel (The controller is on the Wireless LAN card. Please look at the wireless LAN card for controller details).

Processor

Item	Specification
CPU type	Intel [®] Pentium [®] M 730/740/750/760/770/780 processor (2MB L2 cache, 1.60/1.73/1.86/2/2.13/2.26 GHz, 533 MHz FSB)
	Intel [®] Pentium [®] M 725 processor (2MB L2 Cache, 1.60 GHz, 400 MHz FSB)
	Intel $^{\circledR}$ Celeron $^{\circledR}$ M processor 360/370/380 (1 MB L2 cache, 1.40/1.50/1.60 GHz, 400 MHz FSB)
CPU package	Intel socketable 478 pins Micro-FCPGA
CPU core voltage	Low speed: 0.8V
	High speed: 1.5V
CPU I/O voltage	1.2V

BIOS

Item	Specification
BIOS vendor	Pheonix BIOS
BIOS Version	
BIOS ROM type	Flash ROM, SST39VF040
BIOS ROM size	512Kbyte
BIOS package	32 Pin PLCC-lead
Supported protocols	ACPI 2.0 (if available, at least 1.0b), SMBIOS 2.3, PCI 2.2, Boot Block, PXE 2.0, Mobile PC2001, Hard Disk Password, INT 13h Extensions, PCI Bus Power Management interface Specification, EI Torito-Bootable CD-ROM Format Specification V1.0, Simple Boot Flag 1.0

Second Level Cache

Item	Specification
Cache controller	Built-in CPU
Cache size	2MB for Intel [®] Pentium [®] M processor 1MB for Intel [®] Celeron [®] M processor
1st level cache control	Always Enabled
2nd level cache control	Always Enabled

Second Level Cache

Item	Specification
Cache scheme control	Fixed-in write back

System Memory

Item	Specification
Memory controller	built-in CPU
Onboard memory size	OMB
DIMM socket number	2 Sockets
Supports memory size per socket	256MB(min)/1024MB(max)
Supports maximum memory size	2GB with 2 SODIMM support
Supports DIMM type	DDRII
Supports DIMM Speed	533MHz
Supports DIMM voltage	1.8 V/0.9V
Supports DIMM package	200-pin so-DIMM
Memory module combinations	You can install memory modules in any combinations as long as they match the above specifications .

Memory Combinations

Slot 1	Slot 2	Total Memory
0MB	256MB	256MB
ОМВ	512MB	512MB
ОМВ	1024MB	1024MB
256MB	0MB	256MB
256MB	256MB	512MB
256MB	512MB	768MB
256MB	1024MB	1280MB
512MB	0MB	512MB
512MB	256MB	768MB
512MB	512MB	1024MB
512MB	1024MB	1536MB
1024MB	0MB	1024MB
1024MB	256MB	1280MB
1024MB	512MB	1536MB
1024MB	1024MB	2048MB (2G)

Above table lists some system memory configurations. You may combine DIMMs with various capacities to form other combinations.

LAN Interface

Item	Specification
Chipset	RealTek 8100CL
Supports LAN protocol	10/100
LAN connector type	RJ45
LAN connector location	Right side

Modem Interface

Item	Specification
Chipset	CS1037 Internal Agere Scorpio chipset (Scorpio+CSP1037B)
Fax modem data baud rate (bps)	14.4K
Data modem data baud rate (bps)	56K
Supports modem protocol	V.92MDC
Modem connector type	RJ11
Modem connector location	Right side

Wireless Module 802.11b/g (optional device)

Item	Specification
Chipset	
Data throughput	11M~54M bps
Protocol	802.11 b+g
Interface	Mini-PCI type II

Floppy Disk Drive Interface

Item	Specification		
Vendor & model name	There is no FDD module for this product		
Floppy Disk Specifications			
Media recognition	2DD (720KB)	2HD (1.2 MB, 3 mode)	2HD (1.44MB)
Sectors/track	9	15	18
Tracks	80	80	80
Data transfer rate (Kbit/s)	1 MB	1.6 MB	2 MB
Rotational speed (RPM)	300	360	300
Read/write heads	2		
Encoding method	MFM		
Power Requirement			
Input Voltage (V)	+5V

	copy-protected DVD discs, CD-ROM, CD audio, DVD-ROM and DVD-RAM, DVD-R/-RW, DVD+R/+RW and CD-R/-RW, DVD-ROM, DVD-R/+R, DVD-RW/+RW, 4.38GB DVD-RAM, CD-DA discs, CD-ROM discs, CD-R discs, CD-RW discs Write:
	CD-R, CD-RW, high-speed CD-RW, Ultra-speed CD-RW, DVD-R, DVD-RW, DVD+R, DVD+RW

DVD-RW Interface

Item	Specification
Loading mechanism	Load: Manual Release: (a) Electrical Release (Release Button) (b) Release by ATAPI command (c) Emergency Release
Power Requirement	
Input Voltage	5 V +/- 5 % (Operating)

Audio Interface

Item	Specification	
Audio Controller	Realtek ALC260 (Audio amplifier: Maxim MAX9755)	
Audio onboard or optional	Built-in	
Mono or Stereo	Stereo	
Resolution	18 bit stereo full duplex	
Compatibility	HD audio Interface; S/PDIF output for PCM or AC-3 content	
Sampling rate	1Hz resolution VSR (Variable Sampling Rate)	
Internal microphone	Yes	
Internal speaker / Quantity	Yes	
Supports PnP DMA channel	DMA channel 0	
	DMA channel 1	
Supports PnP IRQ	IRQ10, IRQ11	

Video Interface

ltem	Specification	
Vendor & Model Name	built-in Intel [®] 915GM	
Video memory size	up to 128MB for Aspire 3000/5000	
	up to 64MB for Aspire 3500	
Chip voltage	Core / 2.5V, 1.5V,	
Supports ZV (Zoomed Video) port	NO	
Graph interface	4X AGP (Accelerated Graphic Port) Bus	
Maximum resolution LCD	1600X1200 (UXGA)	
Maximum resolution CRT	2048X1536@60HZ	

Video Resolutions Mode

Monitor Resolution	Hz
2D Display Mode	
640x480	120
800x600	120
1024x768	120
1152X864	120
1280X1024	120
1600x1200	85
1920x1080*16:9	75
1920x1200	75
1920x1440	75

Video Resolutions Mode

Monitor Resolution	Hz
2048x1536	60

Resolution, colors and maximum refersh rate (Hz) in 256, 65K or 16.7M colors.

NOTE: 16:9 aspect ratio monitors are supported on 1920x1080 and 848x480 on Windows(R)XP, Windows(R) 2000 and Windows(R)ME. The complete list of resolutions depends on the driver version and operating system. NOTE: resolutions are limited by the performance of the attached monitor.

USB Port

Item	Specification	
USB Compliancy Level	2.0	
OHCI	USB 2.0	
Number of USB port	3	
Location	Two on the right side; one on the front side	
Serial port function control	Enable/Disable by BIOS Setup	

PCMCIA Port

Item	Specification
PCMCIA controller	TI PCI1510A
Supports card type	Type II (No Tpye III)
Number of slots	One type II
Access location	Right side
Supports ZV (Zoomed Video) port	NO
Supports 32 bit CardBus	Yes (IRQ17)

Keyboard

Item	Specification	
Keyboard controller	KBC NS97551	
Keyboard vendor	Darfon	
Total number of keypads	88-/89-key	
Windows keys	Yes	
Internal & external keyboard work simultaneously	Yes	

Battery

ltem	Specification
Vendor & model name	SANYO
	PANASONIC
	PANASONIC (RoHS)
	SANYO LI-ION 4UR18650F-2-QC141
	SIMPPLO
	SONY
Battery Type	Lithium-ION
Pack capacity	4400mAH
Nominal voltage	14.8V
Number of battery cell	8

Battery

Item	Specification	
Package configuration	4S2P for Sanyo and Panasonic	
	4S1P for Sanyo QC141,SIMPPLO and SONY	
Package voltage	41.8V / 9.6V

AC Adapter

Item	Specification	
Vendor & model name	LITE-ON PA-1650-02QR	
	LI SHIN SLS0335A19A57LF	
	DELTA SADP-65KB	
Input Requirements		
Maximum input AC current	3.42A	
Inrush currenct	50A @ 115Vac	
	100A @ 230Vac	
Nominal frequency (Hz)	50-60	
Frequency variation range (Hz)	47-63	
Input voltage range (Vrms)	90V AC-264V AC	
Inrush current	The maximum inrush current will be less than 50A and 100A when the adapter is connected to 115Vac and 230Vac respectively.	

AC Adapter

Item	Specification	
Efficiency	It should provide an efficiency of 83% minimum, when measured at maximum load under 115Vac.	
Output Ratings (CV mode)		
DC output voltage	19V	
Noise + Ripple	300mVp-pmax (20 MHz bandwidth)	
Load	0(min) 3.16A(max)	
Output Ratings (CC mode)		
DC output voltage	19V +/-1.0V for CV mode	
Constant current mode	3.6 +/- 0.3A	
Dynamic Output Characteristics		
Turn-on delay time	3 sec (@ 115Vac)	
Hold up time	5ms (@115Vac, Full load)	
Over Voltage Protection (OVP)	24V	
Short circuit protection	3.9A max can be protected and output can be shorted without damage	
Electrostatic discharge (ESD)	15KV (at air discharge)	
	8KV (at contact discharge)	
Dielectric Withstand Voltage		
Primary to secondary	3000Vac	
Leakage current	0.25 mA max. (@ 254Vac, 60Hz)	
Regulatory Requirements	Safety Requirements:	
	1.The subject product rated 100-120V 60Hz must be listed under UL 1950 and certified with SCA Standard C22.2 No.950.	
	2.The subject product rated 200-240V 50Hz must comply with low voltage directive 73/23EEC.	
	EMI Requirements:	
	1.The subject product rated 100-120V 60Hz must meet the EMI requirements of FCC part 15, Subpart B for Class B Digital Device and get FCC Certification before marketing into USA and Canada.	
	2.The subject product rated 200-240V 50Hz must meet the EMC Directive 89/ 336/EEC.	
	3.The subject product rated 100-120V must meet the VCCI-2 EMI requirements.	

Power Management

ACPI Mode	Power Management
Mech. Off (G3)	All devices in the system are turned off completely.
Soft Off (G2/S5)	OS initiated shutdown. All devices int he sytem are turned off completely.
Working (G0/S0)	Individual devices such as the CPU and hard disk may be power managed in this state.
S3 Sleeping State	CPU set power down
	VGA suspend
	PCMCIA suspend
	Audio Power Down
	Hard Disk Power Down
	CD-ROM Power Down
	Super I/O Low Power mode
S4 Sleeping State	Also called Hibernate stats. System saves all system state and data onto disk prior to power off the whole system.

Environmental Requirements

Item	Specification	
Temperature		
Operating	+0~+35 °C	
Non-operating	-20~+65 °C	
Package storage	-20~+65 °C	
Humidity		
Operating	10% to 90% RH, non-condensing	
Non-operating	10% to 90% RH, non-condensing (Unpacked)	
Non-operating	10% to 90% RH, non-condensing (Storage package)	
Vibration		
Operating (unpacked)	Operation vibration: 1.0G ,X,Y,Zaxis, 30 minutes/axis	
Non-operating (unpacked)	5~27.1Hz: 0.6G	
	27.1~50Hz: 0.04mm (peak to peak)	
	50~500Hz: 2.0G	
Non-operating (packed)	5~62.6Hz: 0.51mm (peak to peak)	
	62.6~500Hz: 4.0G	

Mechanical Specification

Item	Specification
Dimensions	364(W) x 279(D) x 33.9/38.9 (H)mm
	14.3 3X 10.98x 1.33/1.53 inches
Weight	6.4 lbs (2.91kg) for 15" XGA LCD model
	6.5 lbs (2.94kg) for 15.4" WXGA LCD model
I/O Ports	Three USB 2.0 ports
	Ethernet (RJ-45) port
	Modem (RJ-11) port
	External display (VGA) port
	Microphone-in jack
	Line-in jack
	Headphones/speaker/line-out jack
	Type II PC Card slot
	DC-in jack for AC adaptor
Drive Bays	One
Indicators	LED indicator for keyboard hot key: Caps Lock, Scroll Lock, NUmber lock
	LED indicator for function indicator: System power-on, HDD/ODD, Wireless on/off, Arcade LED mode, DC-in, Battery/Charging indicator
Switch	Power

System Utilities

BIOS Setup Utility

The BIOS Setup Utility is a hardware configuration program built into your computer's BIOS (Basic Input/Output System).

Your computer is already properly configured and optimized, and you do not need to run this utility. However, if you encounter configuration problems, you may need to run Setup. Please also refer to Chapter 4 Troubleshooting when problem arises.

To activate the BIOS Utility, press [72] during POST (when "Press <F2> to enter Setup" message is prompted on the bottom of screen).

Press 🔁 to enter setup. The default parameter of F12 Boot Menu is set to "disabled". If you want to change boot device without entering BIOS Setup Utility, please set the parameter to "enabled".

Press <F12> during POST to enter multi-boot menu. In this menu, user can change boot device without entering BIOS SETUP Utility.

Chapter 2 28

Navigating the BIOS Utility

There are six menu options: Info., Main, System Devices, Security, Boot, and Exit.

Follow these instructions:

To choose a menu, use the cursor left/right keys (☐ ☐).
To choose a parameter, use the cursor up/down keys (♠↓).
To change the value of a parameter, press sor s.
A plus sign (+) indicates the item has sub-items. Press es to expand this item.
Press ESC while you are in any of the menu options to go to the Exit menu.
In any menu, you can load default settings by pressing . You can also press to save any changes made and exit the BIOS Setup Utility.

NOTE: You can change the value of a parameter if it is enclosed in square brackets. Navigation keys for a particular menu are shown on the bottom of the screen. Help for parameters are found in the Item Specific Help part of the screen. Read this carefully when making changes to parameter values. Please note that system information vary in models.

Information

PhoenixBIOS Setup Utility

Info. Main Security Boot Exit

CPU Type: Intel (R) Pentium (R) processor 1.73GHz

CPU Speed: 1733MHz

HDD Model Name: TOSHIBA MK1031GAS

HDD Serial Number: 751U0320S

ATAPI Device: HL-DT-ST DVD-RW GWA-4082N

System BIOS Version: 2A02

VGA BIOS Version: Alviso 1219

KBC Version: 1A16

Serial Number : LXT123456705290116EF00

Asset Tag Number: N/A

Produce Name Aspire 1640

Manufacturer Name: Acer

F1 Help ↑↓ Select Item F5/F6 Change Values F9 Setup Defaults
Esc Exit ←→ Select Menu Enter Select ▶ Sub-Menu F10 Save and Exit

NOTE: The system information is subject to different models.

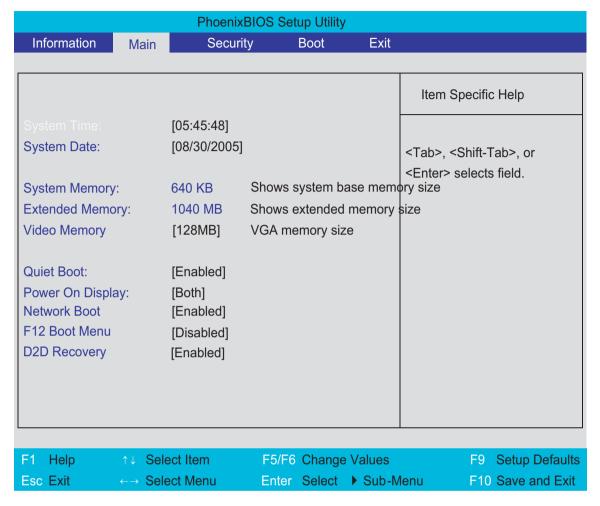

Parameter	Description
HDD Model Name	This field shows the model name of HDD installed on primary IDE master.
HDD Serial Number	This field displays the serial number of HDD installed on primary IDE master.
ATAPI Device	This field displays the mofel name of devices installed on secondary IDE master. The hard disk drive or optical drive model name is automatically detected by the system.
System BIOS Version	This field displays the BIOS version of the system.
VGA BIOS Version	This field displays the VGA BIOS version of this system.
KBC Version	This filed displays the KBC version of this system.
ATAPI Serial Number	This field shows the serial number of devices installed on secondary IDE master.
Serial Number	This field displays the serial number of this unit.
Asset Tag Number	An Asset Tag with 32 bytes will be stored in EEPROM. Default value is set as "000000000000000" (in binary code).

Chapter 2 30

Parameter	Description
UUID Number	This will be visible only when there is an internal LAN device present. UUID means Universally Unique ID, a method for computing object identifiers (OIDs). It uses the serial number in the local Ethernet card combined with the date and time to generate a 128 bit (16bytes) number. For Acer product, this field displays UUID number. A UUID string will be stored in the secured data area which is an alphanumeric string of maxium 16 bytes in length.

Main

The Main screen displays a summary of your computer hardware information, and also includes basic setup parameters. It allows the user to specify standard IBM PC AT system parameters.

NOTE: The screen above is for reference only. Actual values may differ.

Chapter 2 32

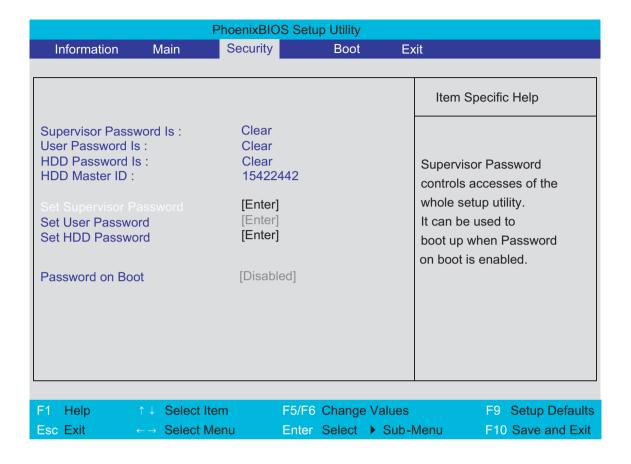

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

Parameter	Description	Format/Option	
System Time	Sets the system time. The hours are displayed with 24-hour format. Format: HH:MM:SS (hour:minute:second) System Tire		
System Date	Sets the system date. Format MM/DD/YYYY (month/day. year) System Date		
System Memory	This field reports the memory size of the system. Memory size is fixed to 640MB		
Extended Memory	This field reports the memory size of the extended memory in the system. Extended Memory size=Total memory size-1MB		
VGA Memory	Shows the VGA memory size. VGA Memory size=64/128MB		
Quiet Boot	Determines if Customer Logo will be displayed or not; shows Summary Screen is disabled or enabled. Enabled: Customer Logo is displayed, and Summary Screen is disabled. Disabled: Customer Logo is not displayed, and Summary Screen is enabled.	Option: Enabled or Disabled	
Power on display	Auto: During power process, the system will detect if any display device is connected on external video port. If any external display device is connected, the power on display will be in CRT (or projector) only mode. Otherwise it will be in LCD only mode. Both: Simultaneously enable both the integrated LCD screen and the system's external video port	Option: Both or Auto	
Network Boot	(for an external CRT or projector). Enables, disables the system boot from LAN	Ontion: Enabled or Disabled	
Network Boot	(remote server).	Option: Enabled or Disabled	
F12 Boot Menu	Enables, disables Boot Menu during POST.	Option: Disabled or Enabled	
D2D Recovery	Enables, disables D2D Recovery function. The function allows the user to create a hidden partition on hard disc drive to store operation system and restore the system to factory defaults.	Option: Enabled or Disabled	

NOTE: The sub-items under each device will not be shown if the device control is set to disable or auto. This is because the user is not allowed to control the settings in these cases.

Security

The Security screen contains parameters that help safeguard and protect your computer from unauthorized use

Chapter 2 34

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

Parameter	Description	Option
User Password Is	Shows the setting of the user password.	Clear or Set
Supervisor Password Is	Shows the setting of the Supervisor password. Please note that Supervisor Password controls access to the entire Setup. The Supervisor Password can be used to boot up when Password on boot is set to enabled.	Clear or Set
HDD Password Is	Shows the setting of the HDD password.	Clear or Set
Set User Password	Press Enter to set the user password. When user password is set, this password protects the BIOS Setup Utility from unauthorized access. The user can enter Setup menu only and does not have right to change the value of parameters.	
Set Supervisor Password	Press Enter to set the supervisor password. When set, this password protects the BIOS Setup Utility from unauthorized access. The user can not either enter the Setup menu nor change the value of parameters.	
Set HDD Password	Press Enter to set the HDD password.	
Primary Harddisk Security	This feature is available to user when Supervisor password is set. Password can be written on HDD only when Supervisor password or user password is set and password on HDD is set to enabled. Supervisor Password is written to HDD only when Supervisor password is being set. User password is written to HDD when both passwords are set. When both Supervisor and user password are present, both passwords can unlock the HDD.	Disabled or Enabled
Password on Boot	Defines whether a password is required or not while the events defined in this group happened. The following sub-options are all requires the Supervisor password for changes and should be grayed out if the user password was used to enter setup.	Disabled or Enabled

NOTE: When you are prompted to enter a password, you have three tries before the system halts. Don't forget your password. If you forget your password, you may have to return your notebook computer to your dealer to reset it.

NOTE: The User Password can chagne the following items in BIOS: System Date, System Time and Power on Display on Main menu, System Devices menu and Set User Password function on Security menu. Meanwhile, the Supervisor Password can change ALL settings in BIOS.

Setting a Password

Follow these steps as you set the user or the supervisor password:

1. Use the 1 and 1 keys to highlight the Set Supervisor Password parameter and press the key. The Set Supervisor Password box appears:

S	et Supervisor Pas	sword	
Enter N	ew Password]]
Confirm	n New Password]]

2. Type a password in the "Enter New Password" field. The password length can not exceeds 8 alphanumeric characters (A-Z, a-z, 0-9, not case sensitive). Retype the password in the "Confirm New Password" field.

IMPORTANT:Be very careful when typing your password because the characters do not appear on the screen.

- 3. Press ENTER .
 - After setting the password, the computer sets the User Password parameter to "Set".
- 4. If desired, you can opt to enable the Password on boot parameter.
- **5.** When you are done, press of to save the changes and exit the BIOS Setup Utility.

Removing a Password

Follow these steps:

1. Use the 1 and 1 keys to highlight the Set Supervisor Password parameter and press the key. The Set Password box appears:

Set Supervisor Passwo	ord	10
Enter current password	[]
Enter New Password	[]
Confirm New Password	[]

- 2. Type the current password in the Enter Current Password field and press [ENTER].
- **3.** Press twice **without** typing anything in the Enter New Password and Confirm New Password fields. The computer then sets the Supervisor Password parameter to "Clear".
- 4. When you have changed the settings, press 🖻 to save the changes and exit the BIOS Setup Utility.

Changing a Password

1. Use the n and keys to highlight the Set Supervisor Password parameter and press the key. The Set Password box appears:

Set Supervisor Passwo	rd	
Enter current password	[]
Enter New Password	[]
Confirm New Password	[]

2. Type the current password in the Enter Current Password field and press 🔤 .

Chapter 2 36

- 3. Type a password in the Enter New Password field. Retype the password in the Confirm New Password field.
- 4. Press et a. After setting the password, the computer sets the User Password parameter to "Set".
- 5. If desired, you can enable the Password on boot parameter.

If the verification is OK, the screen will display as following.

Setup Notice Changes have been saved. [continue]

The password setting is complete after the user presses ...

If the current password entered does not match the actual current password, the screen will show you the Setup Warning.

Setup Warning Invalid password Re-enter Password [continue]

If the new password and confirm new password strings do not match, the screen will display the following message.

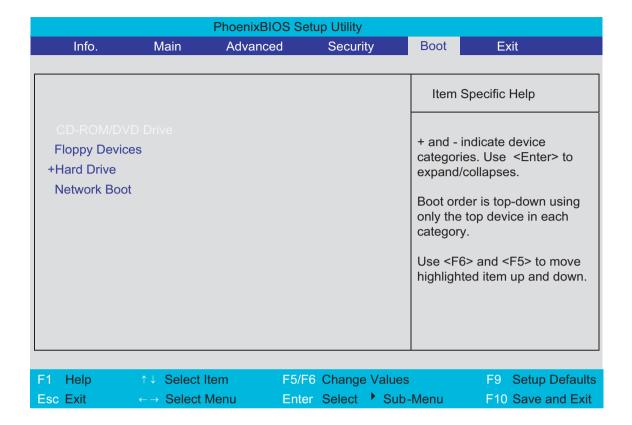

Setup Warning

Password do not match

Re-enter Password

Boot

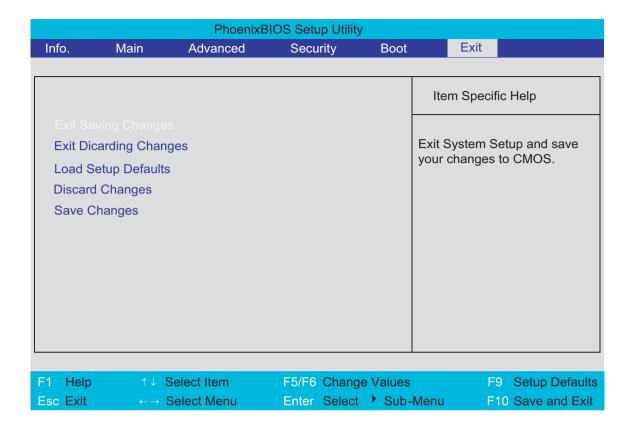

This menu allows the user to decide the order of boot devices to load the operating system. Bootable devices includes the distette drive in module bay, the onboard hard disk drive and the CD-ROM in module bay.

Chapter 2 38

Exit

The Exit screen contains parameters that help safeguard and protect your computer from unauthorized use.

The table below describes the parameters in this screen.

Parameter	Description
Exit Saving Changes	Exit System Setup and save your changes to CMOS.
Exit Discarding Changes	Exit utility without saving setup data to CMOS.
Load Setup Default	Load default values for all SETUP item.
Discard Changes	Load previous values from CMOS for all SETUP items.
Save Changes	Save Setup Data to CMOS.

BIOS Flash Utility

The BIOS flash memory update is required for the following conditions:

- New versions of system programs
- New features or options
- Restore a BIOS when it becomes corrupted.

Use the Phlash utility to update the system BIOS flash ROM.

NOTE: If you do not have a crisis recovery diskette at hand, then you should create a Crisis Recovery Diskette before you use the Phlash utility.

NOTE: Do not install memory-related drivers (XMS, EMS, DPMI) when you use the Phlash.

NOTE: Please use the AC adaptor power supply when you run the Phlash utility. If the battery pack does not contain enough power to finish BIOS flash, you may not boot the system because the BIOS is not completely loaded.

Create Crisis Recovery Diskette

- 1. Rename BIOS file of this product to BIOS.wph
- 2. Copy BIOS.wph file to crisis folder and overwrite the original BIOS.wph file.
- 3. Insert a blank floppy diskette to floppy drive.
- **4.** Run cs.bat and follow its instructions to create crisis recovery diskette.

Recover BIOS from Crisis Recovery Diskette

- 1. Insert the crisis recovery diskette to the floppy drive.
- 2. Use AC adaptor power supply.
- 3. Press Fn and ESC key together for more than two seconds when you power on the system.
- 4. The system will read the files inside the floppy diskette without backlight.
- **5.** After one to three minutes, the system will automatically reboot. Please do not shut down the system or remove the power supply.
- **6.** After step 1 to 5, you sould be able to recover BIOS already. Then you can see the LCD screen with the backlight is on.

Chapter 2 40

Machine Disassembly and Replacement

This chapter contains step-by-step procedures on how to disassemble the notebook computer for maintenance and troubleshooting.

To disassemble the computer, you need the following tools:

Wrist grounding strap and conductive mat for preventing electrostatic discharge
Flat-bladed screw driver
Phillips screw driver
Tweezers
Plastic Flat-bladed screw driver
Hexed Screw Driver

NOTE: The screws for the different components vary in size. During the disassembly process, group the screws with the corresponding components to avoid mismatch when putting back the components.

General Information

Before You Begin

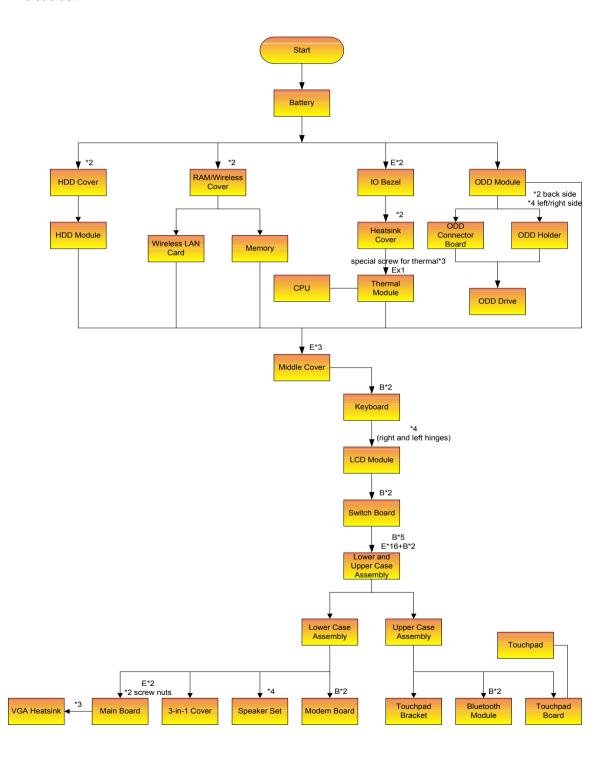

Before proceeding with the disassembly procedure, make sure that you do the following:

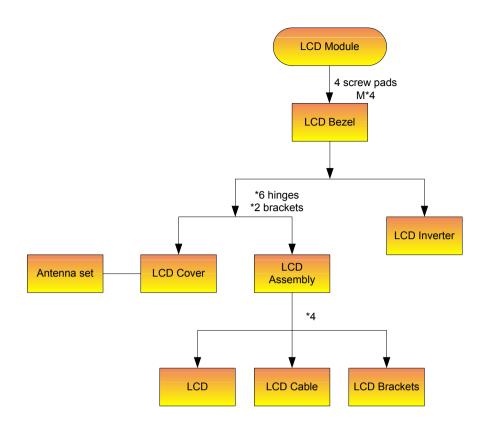

- 1. Turn off the power to the system and all peripherals.
- 2. Unplug the AC adapter and all power and signal cables from the system

NOTE: Aspire 9100 series product uses mylar or tape to fasten the FFC/FPC/connectors/cable, you may need to tear the tape or mylar before you disconnect different FFC/FPC/connectors.

Disassembly Procedure Flowchart

The flowchart on the succeeding page gives you a graphic representation on the entire disassembly sequence and instructs you on the components that need to be removed during servicing. For example, if you want to remove the main board, you must first remove the keyboard, then disassemble the inside assembly frame in that order.

Screw List

Item	Description
A	SCREW F040 9 5.0X5.0 9.5X(IO) R00
В	SCREW M2.0X0.4P+3FP ZK(NL)
С	SCREW M2.5 K 5/2 X0.85 4 ZK(NL)
D	SCREW M2.5X0.45+10K NIL
E	SCREW M2.5X0.45+8K ZBL
F	SCREW M2.5X0.45P+3F NI
G	SCREW M3.0X0.8P+3K NL

Removing the Battery Pack

- 1. Unlock the battery lock.
- 2. Slide the battery latch as shown.
- 3. Then remove the battery pack.

Removing the HDD Module/the Memory and the Wireless LAN Card/ the Thermal Module and the CPU/ODD Module and LCD Module

Removing the HDD Module

- 1. Remove the two screws holding the HDD cover.
- 2. Remove the HDD cover.

- 3. Remove the screw fastening the HDD module to the notebook.
- 4. Then detach the HDD module from the notebook.

Removing the Memory and the Wireless LAN Card

- 1. Remove the two screws that secure the RAM/Wireless cover.
- 2. Remove the RAM/Wireless cover.

- 3. Pop up the memory then remove it.
- 4. Disconnect the auxiliary and the main wireless antennae.
- 5. Pop the wireless LAN card then remove it.

Removing the Thermal Module and CPU

- 1. Remove the three screws holding the thermal door
- 2. Detach the thermal door.
- 3. Disconnect the fan cable from the main board.

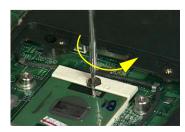

- 4. Remove the three screws fastening the thermal module.
- 5. Disconnect the fan cable.

NOTE: When you remove the screws fastening the thermal module, please follow the number order 3, 2, 1 on the thermal module. When you need to assemble the thermal module, fasten the screws as the order 1, 2, 3 on the thermal module.

- 6. Use a flat-bladed screwdriver to release the CPU lock.
- 7. Remove the CPU from the socket carefully.

Removing the ODD Module

- 1. Remove the three screws holding the middle cover.
- 2. Detach the middle cover carefully.
- 3. Then remove the two screws fastening the keyboard.

- 4. Turn over the keyboard as shown.
- 5. Disconnect the keyboard cable from the main board then remove the keyboard.

- 6. Remove the screw that fastens the ODD module.
- 7. Turn over the notebook computer then detach the ODD module carefully.

NOTE: When you reattach the ODD, please make sure you attach the ODD module completely to the main unit. Otherwise, you can not fasten the screw and the screw may damage the main board.

Removing the LCD Module

- 1. Remove the three screws holding the keyboard cover.
- 2. Open the LCD module as the picture shown then detach the keyboard cover from the main unit.

- 3. Remove the two screws that secure the keyboard as shown.
- **4.** Turn over the keyboard as shown and disconnect the keyboard cable then remove the keyboard.
- 5. Pull out the antenna set with a tweezers then take out the antenna set from the main unit.

- 6. Disconnect the LCD coaxial cable.
- 7. Remove the four screws holding the right and the left hinge. Two on each side.
- 8. Then detach the LCD module from the main unit.

Disassembling the Main Unit

Separate the Main Unit Into the Upper and the Lower Case Assembly

- 1. Remove the two screws holding the switch board.
- 2. Remove the switch board.
- 3. Disconnect the touchpad FFC from the main board.

- 4. Disconnect the bluetooth cable.
- 5. Remove the five screws that secure the upper case.
- 6. Remove the 17 screws on the bottom as shown.

- 7. Detach the upper case assembly and place it next to the lower case assembly.
- 8. Disconnect the microphone cable then remove the upper case assembly.

Disassembling the Upper Case Assembly

- 1. Disconnect the touchpad board to touchpad FFC.
- 2. Disconnect the touchpad board to main board FFC.
- 3. Then detach the touchpad board to main board FFC from the touchpad board.

- 4. Remove the three screws that secure the touchpad board.
- **5.** Remove the touchpad board from the upper case.
- 6. Disconnect the touchpad board to touchpad FFC.

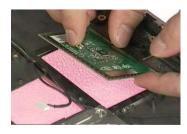

- 7. Remove the touchpad board to touchpad FFC from the uppwer case assembly.
- 8. Remove the four screws holding the touchpad bracket.
- 9. Detach the touchpad bracket from the upper case assembly.

- 10. Remove the touchpad from the upper case.
- 11. Remove the two screws that secure the bluetooth module.
- 12. Disconnect the bluetooth module then remove it.

Disassembling the Lower Case Assembly

1. Disconnect the MDC cable from the modem board.

- 2. Detach the MDC cable from the main board.
- 3. Remove the two screws holding the modem board then disconnect the modem board from the main board

- 4. Disconnect the speaker cable from the main board.
- 5. Remove the screw that secure the main board.

- 6. Remove the two screw nuts as shown.
- 7. The you can detach the main board from the upper case.
- 8. Remove the ttwo screws that fasten the N/B heatsink.

- 9. Remove the N/B heatsink from the main board as shown.
- **10.** Remove the card reader dummy card from the lower case. (For SKU with three-in-one card reader, please remove three in one cover).
- 11. Remove the two screws that secure the speaker set on one side.

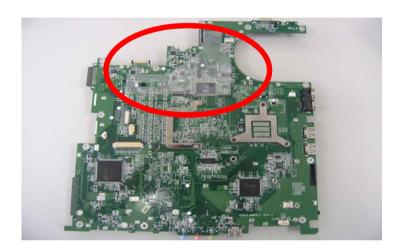

- **12.** Then remove another two screws holding the speaker set on the other side.
- 13. Then take out the speaker set from the lower case.

IMPORTANT:When assembling/disassembling the main board, whenever there is a mylar on the main board (see the highlighted with red below; the mylar is sami-transparent, film-like stuff), it should be transferred "if necessary" to the replacement main board. Because the main board mylar should be stuck to the main board to prevent the antenna cable and the main board components short circuit. The short could cause the main board or the antenna cable burned.

Disassembling the LCD Module

- 1. Remove the four screw caps as shown.
- 2. Remove the four screws holding the LCD bezel.
- 3. Then detach the LCD bezel from the LCD module.

- 4. Disconnect the inverter board then remove it.
- 5. Remove the three screws holding the right hinge.
- **6.** Then remove the three screws that secure the left hinge.

- 7. Remove one screw that secure the LCD bracket.
- 8. Remove another screw holding the LCD bracket on the other side.
- 9. Then detach the LCD panel from the LCD cover carefully.

- **10.** Remove the two screws holding the right bracket.
- 11. Then remove the right bracket.
- 12. Remove another two screws that tighten the left bracket.

- **13.** Remove the left bracket as the picture shows.
- **14.** Tear off the tape fastening the LCD cable.
- **15.** Tear off the the LCD cable fastening the LCD cable, then remove it..

Disassembling the External Modules

Disassembling the HDD Module

- 1. Remove the two screws holding the HDD bracket on one side.
- 2. Remove another two screws holding the HDD bracket on the other side.
- 3. Then take the hard disc drive out from the HDD bracket.

Disassembling the Optical Drive Module

- 1. Remove the four screws as the picture shows.
- 2. Remove the two screws that secure the optical disc drive and the ODD holder.

- 3. Push the ODD holder as shown.
- 4. Detach the ODD holder.
- 5. Disconnect the ODD connector board then remove it.

Troubleshooting

Use the following procedure as a guide for computer problems.

NOTE: The diagnostic tests are intended to test only Acer products. Non-Acer products, prototype cards, or modified options can give false errors and invalid system responses.

- 1. Obtain the failing symptoms in as much detail as possible.
- 2. Verify the symptoms by attempting to re-create the failure by running the diagnostic test or by repeating the same operation.
- 3. Use the following table with the verified symptom to determine which page to go to.

Go To
"Power System Check" on page 60.
"Power-On Self-Test (POST) Error Message" on page 63 "Undetermined Problems" on page 75
"Error Message List" on page 64
"Power-On Self-Test (POST) Error Message" on page 63
Use the customer-reported symptoms and go to "Power-On Self-Test (POST) Error Message" on page 63
"Intermittent Problems" on page 74 "Undetermined Problems" on page 75

Chapter 4 58

System Check Procedures

External Diskette Drive Check

Do the following to isolate the problem to a controller, driver, or diskette. A write-enabled, diagnostic diskette is required.

NOTE: Make sure that the diskette does not have more than one label attached to it. Multiple labels can cause damage to the drive or cause the drive to fail.

Do the following to select the test device.

- 1. Boot from the diagnostics diskette and start the diagnostics program.
- See if FDD Test is passed as the program runs to FDD Test.
- 3. Follow the instructions in the message window.

If an error occurs with the internal diskette drive, reconnect the diskette connector on the system board.

If the error still remains:

- Reconnect the external diskette drive/DVD-ROM module.
- 2. Replace the external diskette drive/CD-ROM module.
- 3. Replace the main board.

External CD-ROM Drive Check

Do the following to isolate the problem to a controller, drive, or CD-ROM. Make sure that the CD-ROM does not have any label attached to it. The label can cause damage to the drive or can cause the drive to fail.

Do the following to select the test device:

- 1. Boot from the diagnostics diskette and start the diagnostics program.
- 2. See if CD-ROM Test is passed when the program runs to CD-ROM Test.
- 3. Follow the instructions in the message window.

If an error occurs, reconnect the connector on the System board. If the error still remains:

- 1. Reconnect the external diskette drive/CD-ROM module.
- 2. Replace the external diskette drive/CD-ROM module.
- 3. Replace the main board.

Keyboard or Auxiliary Input Device Check

Remove the external keyboard if the internal keyboard is to be tested.

If the internal keyboard does not work or an unexpected character appears, make sure that the flexible cable extending from the keyboard is correctly seated in the connector on the system board.

If the keyboard cable connection is correct, run the Keyboard Test.

If the tests detect a keyboard problem, do the following one at a time to correct the problem. Do not replace a non-defective FRU:

- 1. Reconnect the keyboard cables.
- Replace the keyboard.
- 3. Replace the main board.

The following auxiliary input devices are supported by this computer:

Numeric keyp	ac
--------------	----

External keyboard

If any of these devices do not work, reconnect the cable connector and repeat the failing operation.

Memory check

Memory errors might stop system operations, show error messages on the screen, or hang the system.

- 1. Boot from the diagnostics diskette and start the doagmpstotics program (please refer to main board.
- 2. Go to the diagnostic memory in the test items.
- 3. Press F2 in the test items.
- 4. Follow the instructions in the message window.

NOTE: Make sure that the DIMM is fully installed into the connector. A loose connection can cause an error.

Power System Check

To verify the symptom of the problem, power on the computer using each of the following power sources:

- 1. Remove the battery pack.
- 2. Connect the power adapter and check that power is supplied.
- Disconnect the power adapter and install the charged battery pack; then check that power is supplied by the battery pack.

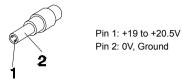

If you suspect a power problem, see the appropriate power supply check in the following list:

- "Check the Power Adapter" on page 61
- ☐ "Check the Battery Pack" on page 62

Chapter 4 60

Check the Power Adapter

Unplug the power adapter cable from the computer and measure the output voltage at the plug of the power adapter cable. See the following figure

- 1. If the voltage is not correct, replace the power adapter.
- **2.** If the voltage is within the range, do the following:
 - Replace the System board.
 - ☐ If the problem is not corrected, see "Undetermined Problems" on page 75.
 - ☐ If the voltage is not correct, go to the next step.

NOTE: An audible noise from the power adapter does not always indicate a defect.

- 3. If the power-on indicator does not light up, check the power cord of the power adapter for correct continuity and installation.
- 4. If the operational charge does not work, see "Check the Battery Pack" on page 62.

Check the Battery Pack

To check the battery pack, do the following:

From Software:

- Check out the Power Management in control Panel
- In Power Meter, confirm that if the parameters shown in the screen for Current Power Source and Total Battery Power Remaining are correct.
- 3. Repeat the steps 1 and 2, for both battery and adapter.
- 4. This helps you identify first the problem is on recharging or discharging.

From Hardware:

- 1. Power off the computer.
- 2. Remove the battery pack and measure the voltage between battery terminals 1(+) and 6(ground).
- 3. If the voltage is still less than 7.5 Vdc after recharging, replace the battery.

To check the battery charge operation, use a discharged battery pack or a battery pack that has less than 50% of the total power remaining when installed in the computer.

If the battery status indicator does not light up, remove the battery pack and let it return to room temperature. Re-install the battery pack.

If the charge indicator still does not light up, replace the battery pack. If the charge indicator still does not light up, replace the DC/DC charger board.

Touchpad Check

If the touchpad doesn't work, do the following actions one at a time to correct the problem. Do not replace a non-defective FRU:

- 1. Reconnect the touchpad cables.
- 2. Replace the touchpad.
- 3. Replace the system board.

After you use the touchpad, the pointer drifts on the screen for a short time. This self-acting pointer movement can occur when a slight, steady pressure is applied to the touchpad pointer. This symptom is not a hardware problem. No service actions are necessary if the pointer movement stops in a short period of time.

Chapter 4 62

Power-On Self-Test (POST) Error Message

The POST error message index lists the error message and their possible causes. The most likely cause is listed first.

NOTE: Perform the FRU replacement or actions in the sequence shown in FRU/Action column, if the FRU replacement does not solve the problem, put the original part back in the computer. Do not replace a non-defective FRU.

This index can also help you determine the next possible FRU to be replaced when servicing a computer.

If the symptom is not listed, see "Undetermined Problems" on page 75.

The following lists the error messages that the BIOS displays on the screen and the error symptoms classified by function.

NOTE: Most of the error messages occur during POST. Some of them display information about a hardware device, e.g., the amount of memory installed. Others may indicate a problem with a device, such as the way it has been configured.

NOTE: If the system fails after you make changes in the BIOS Setup Utility menus, reset the computer, enter Setup and install Setup defaults or correct the error.

Index of Error Messages

Error Code List

Error Codes	Error Messages	
006	Equipment Configuration Error	
	Causes:	
	CPU BIOS Update Code Mismatch	
	2. IDE Primary Channel Master Drive Error	
	(THe causes will be shown before "Equipment Configuration Error")	
010	Memory Error at xxxx:xxxx:xxxxh (R:xxxxh, W:xxxxh)	
070	Real Time Clock Error	
071	CMOS Battery Bad	
072	CMOS Checksum Error	
110	System disabled.	
	Incorrect password is specified.	
<no code="" error=""></no>	Battery critical LOW	
	In this situation BIOS will issue 4 short beeps then shut down system, no message will show.	
<no code="" error=""></no>	Thermal critical High	
	In this situation BIOS will shut down system, not show message.	

Error Message List

Error Messages	FRU/Action in Sequence
Failure Fixed Disk	Reconnect hard disk drive connector.
	"Load Default Settings" in BIOS Setup Utility.
	Hard disk drive
	System board
Stuck Key	see "Keyboard or Auxiliary Input Device Check" on page 59.
Keyboard error	see "Keyboard or Auxiliary Input Device Check" on page 59.
Keyboard Controller Failed	see "Keyboard or Auxiliary Input Device Check" on page 59.
Keyboard locked - Unlock key switch	Unlock external keyboard
Monitor type does not match CMOS - Run Setup	Run "Load Default Settings" in BIOS Setup Utility.
Shadow RAM Failed at offset: nnnn	BIOS ROM
	System board
System RAM Failed at offset: nnnn	DIMM
	System board
Extended RAM Failed at offset: nnnn	DIMM
	System board
System battery is dead - Replace and run Setup	Replace RTC battery and Run BIOS Setup Utility to reconfigure system time, then reboot system.
System CMOS checksum bad - Default	RTC battery
configuration used	Run BIOS Setup Utility to reconfigure system time, then reboot system.
System timer error	RTC battery
	Run BIOS Setup Utility to reconfigure system time, then reboot system.
	System board

Error Message List

Error Messages	FRU/Action in Sequence
Real time clock error	RTC battery
	Run BIOS Setup Utility to reconfigure system time, then reboot
	system.
	System board
Previous boot incomplete - Default configuration used	Run "Load Default Settings" in BIOS Setup Utility.
used	RTC battery
Manager de la format has DOOT different forma	System board
Memory size found by POST differed from CMOS	Run "Load Default Settings" in BIOS Setup Utility. DIMM
	System board
Diskette drive A error	
Diskette drive A error	Check the drive is defined with the proper diskette type in BIOS Setup Utility
	See "External Diskette Drive Check" on page 59.
Incorrect Drive A type - run SETUP	Check the drive is defined with the proper diskette type in BIOS
71	Setup Utility
System cache error - Cache disabled	System board
CPU ID:	System board
DMA Test Failed	DIMM
	System board
Software NMI Failed	DIMM
	System board
Fail-Safe Timer NMI Failed	DIMM
	System board
Device Address Conflict	Run "Load Default Settings" in BIOS Setup Utility.
	RTC battery
	System board
Allocation Error for device	Run "Load Default Settings" in BIOS Setup Utility.
	RTC battery
	System board
Failing Bits: nnnn	DIMM
	BIOS ROM
	System board
Fixed Disk n	None
Invalid System Configuration Data	BIOS ROM
	System board
I/O device IRQ conflict	Run "Load Default Settings" in BIOS Setup Utility.
	RTC battery
	System board
Operating system not found	Enter Setup and see if fixed disk and drive A: are properly identified.
	Diskette drive
	Hard disk drive
	System board

Error Message List

No beep Error Messages	FRU/Action in Sequence
No beep, power-on indicator turns off and LCD is blank.	Power source (battery pack and power adapter). See "Power System Check" on page 60.
	Ensure every connector is connected tightly and correctly.
	Reconnect the DIMM.
	LED board.
	System board.
No beep, power-on indicator turns on and LCD is blank.	Power source (battery pack and power adapter). See "Power System Check" on page 60.
	Reconnect the LCD connector
	Hard disk drive
	LCD inverter ID
	LCD cable
	LCD Inverter
	LCD
	System board
No beep, power-on indicator turns on and LCD is	Reconnect the LCD connectors.
blank. But you can see POST on an external	LCD inverter ID
CRT.	LCD cable
	LCD inverter

after opening the LCD.	LCD cover switch
	System board
Battery fuel gauge in Windows doesn't go higher	Remove battery pack and let it cool for 2 hours.
than 90%.	Refresh battery (continue use battery until power off, then charge battery).
	Battery pack
	System board

Power Management-Related Symptoms

Symptom / Error	Action in Sequence
System hangs intermittently.	Reconnect hard disk/CD-ROM drives.
	Hard disk connection board
	System board

Peripheral-Related Symptoms

Symptom / Error	Action in Sequence
System configuration does not match the installed devices.	Enter BIOS Setup Utility to execute "Load Default Settings", then reboot system.
	Reconnect hard disk/CD-ROM/diskette drives.
External display does not work correctly.	Press Fn+F5, LCD/CRT/Both display switching
	System board
USB does not work correctly	System board
Print problems.	Ensure the "Parallel Port" in the "Onboard Devices Configuration" of BIOS Setup Utility is set to Enabled.
	Onboard Devices Configuration
	Run printer self-test.
	Printer driver
	Printer cable
	Printer
	System Board
Serial or parallel port device problems.	Ensure the "Serial Port" in the Devices Configuration" of BIOS Setup Utility is set to Enabled.
	Device driver
	Device cable
	Device
	System board

Keyboard/Touchpad-Related Symptoms

Symptom / Error	Action in Sequence
Keyboard (one or more keys) does not work.	Reconnect the keyboard cable.
	Keyboard
	System board
Touchpad does not work.	Reconnect touchpad cable.
	Touchpad board
	System board

Modem-Related Symptoms

Symptom / Error	Action in Sequence	
Internal modem does not work correctly.	Modem phone port	
	modem combo board	
	System board	

NOTE: If you cannot find a symptom or an error in this list and the problem remains, see "Undetermined Problems" on page 75.

Intermittent Problems

Intermittent system hang problems can be caused by a variety of reasons that have nothing to do with a hardware defect, such as: cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a recurring problem exists.

When analyzing an intermittent problem, do the following:

- 1. Run the advanced diagnostic test for the system board in loop mode at least 10 times.
- 2. If no error is detected, do not replace any FRU.
- 3. If any error is detected, replace the FRU. Rerun the test to verify that there are no more errors.

Undetermined Problems

The diagnostic problems does not identify which adapter or device failed, which installed devices are incorrect, whether a short circuit is suspected, or whether the system is inoperative.

Follow these procedures to isolate the failing FRU (do not isolate non-defective FRU).

NOTE: Verify that all attached devices are supported by the computer.

NOTE: Verify that the power supply being used at the time of the failure is operating correctly. (See "Power System Check" on page 60):

- 1. Power-off the computer.
- 2. Visually check them for damage. If any problems are found, replace the FRU.
- 3. Remove or disconnect all of the following devices:

Non-Acer devices
Printer, mouse, and other external devices
Battery pack
Hard disk drive
DIMM
CD-ROM/Diskette drive Module
PC Cards

- 4. Power-on the computer.
- **5.** Determine if the problem has changed.
- 6. If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
- 7. If the problem remains, replace the following FRU one at a time. Do not replace a non-defective FRU:
 - System boardLCD assembly

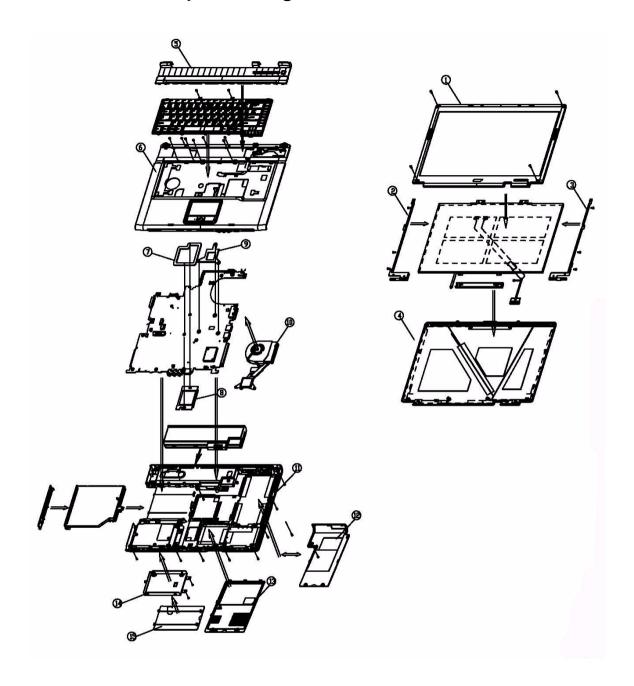

FRU (Field Replaceable Unit) List

This chapter gives you the FRU (Field Replaceable Unit) listing in global configurations of TravelMate 4060. Refer to this chapter whenever ordering for parts to repair or for RMA (Return Merchandise Authorization).

Please note that WHEN ORDERING FRU PARTS, you should check the most up-to-date information available on your regional web or channel. For whatever reasons a part number change is made, it will not be noted on the printed Service Guide. For ACER AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code from those given in the FRU list of this printed Service Guide. You MUST use the local FRU list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

NOTE: To scrap or to return the defective parts, you should follow the local government ordinance or regulations on how to dispose it properly, or follow the rules set by your regional Acer office on how to return it.
