Preface

Conventions

The following conventions are used in this manual:

**Warning**

Indicates a potential for personal injury.

**Caution**

Indicates a potential loss of data or damage to equipment.

**Important**

Indicates information that is important to know for the proper completion of a procedure, choice of an option, or completing a task.

General information

Before using this information and the product it supports, read the following general information.

This service guide provides you with all technical information relating to the basic configuration decided for Acer's global product offering. To better fit local market requirements and enhance product competitiveness, your regional office may have decided to extend the functionality of a machine (such as add-on cards, modems, or extra memory capabilities). These localized features are not covered in this generic service guide. In such cases, contact your regional offices or the responsible personnel/channel to provide you with further technical details.

When ordering FRU parts: Check the most up-to-date information available on your regional web or channel. If, for whatever reason, a part number change is made, it may not be noted in this printed service guide.

Acer-authorized Service Providers: Your Acer office may have a different part number code to those given in the FRU list of this printed service guide. You must use the list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

Features

Platform

- Processor
 - Intel Core i3 Processors: 330M (2.13 GHz), M620 (2.5 GHz), 350M (2.26 GHz)
 - Intel Core i5 Processors: 430M (2.26 GHz), 520M (2.4 GHz), 540M (2.53 GHz)
 - Intel Core i7 Processors: 620M (2.66 GHz)
- Core logic: Mobile Intel HM55 Express Chipset
- Wireless: Intel WiFi Link 5300/5100, Atheros b/g/n

System memory

- DDR3 SO-DIMM
- Data rate supported: 800/1066/1333 MT/s
- Maximum memory: 4 GB (using two SO-DIMM modules)

Display and graphics

- 15.6" WXGA TFT LCD display panel
- VGA controller:
 - Discrete model: ATI Madison Pro / Park XT with DDR3-800 1 GB VRAM
 - UMA model: Integrated in the Mobile Intel HM55 Express Chipset
- Dual independent display support
- 16.7 million colors
- MPEG-2/DVD hardware-assisted capability (acceleration)
- MPEG-2/DVD decoding (for selected models)
- WMV9 (VC-1) support (acceleration)
- WMV9 (VC-1) and H.264 (AVC) decoding (for selected models)
- HDMI™ (High-Definition Multimedia Interface) with HDCP (High-bandwidth Digital Content Protection) support

Storage subsystem

- Industry standard 2.5" 160–640 GB hard disk drive
- Optical drive options:
 - Blu-ray Disc™/DVD-Super Multi double-layer drive
 - DVD-Super Multi double-layer drive
- 5-in-1 card reader, supporting Secure Digital™ (SD), MultiMediaCard (MMC), Memory Stick® (MS), Memory Stick PRO™ (MS PRO), xD-Picture Card™ (xD)

Input devices

- 99-, 100-, or 103-key keyboard, 2.5 mm (minimum) key travel
- Twelve function keys, four cursor keys, two Windows® keys
- Touchpad pointing device
- Capacitive touch keys

Audio

- Two built-in stereo speakers
- Built-in microphone on webcam
- Realtek ALC272 codec
- Supports Dolby Advanced Audio technology
- MS-Sound compatible

Communication

- Integrated webcam
- WLAN: Intel® WiFi Link 5300/5100 a/b/g/n, Atheros b/g/n
- WPAN: Bluetooth® 2.0+EDR (Enhanced Data Rate)
- LAN: 10/100/1000 Ethernet

I/O ports

- USB (four)
- External display (VGA) port
- Ethernet (RJ45)
- Modem (RJ11)
- Headphone/SPDIF Audio Out
- Microphone in
- DC in jack for AC adapter
- 5-in-1 card reader (SD™, MMC, MS, MS PRO, xD)
- HDMI™ port with HDCP support

Security

- Kensington lock slot
- BIOS-based user, supervisor, and HDD passwords

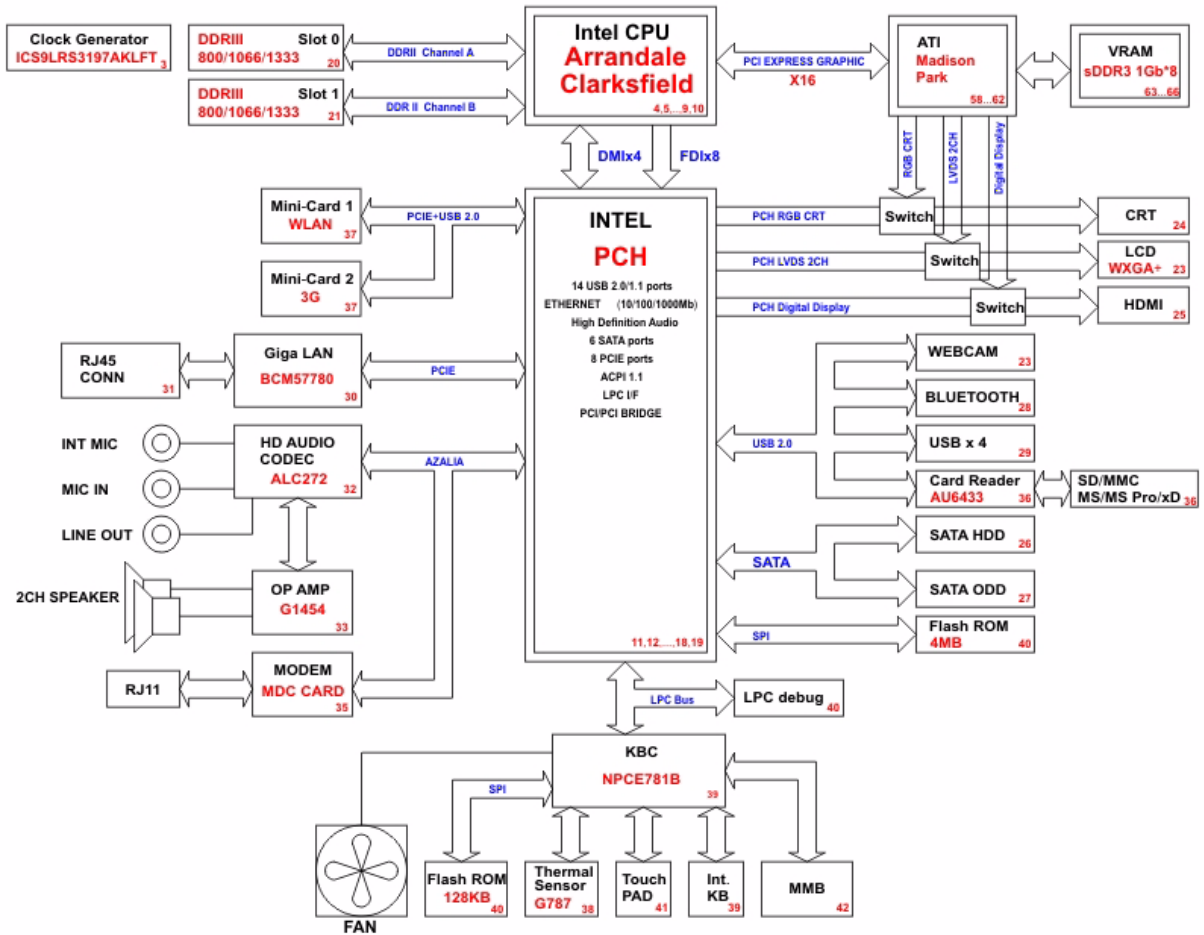

Physical specifications

- Dimensions: 372 × 259 × 26 / 37 mm (14.65 × 10.2 × 1.02 / 1.46 in)
- Weight: 3.1 kg (6.83 lb)

Environmental specifications

- Temperature
 - Operating: 32 °F to 90 °F (0 °C to 35 °C)
 - Non-operating: -4 °F to 140 °F (-20 °C to 60 °C)
- Humidity (non-condensing)
 - Operating: 10% to 90%
 - Non-operating: 5% to 95%

System block diagram

Hardware specifications and configurations

CPU

| Item | Specification |
|-------------|---|
| CPU type | <ul style="list-style-type: none"> ▫ Intel Core i3 Processors: 330M (2.13 GHz), M620 (2.5 GHz), 350M (2.26 GHz) ▫ Intel Core i5 Processors: 430M (2.26 GHz), 520M (2.4 GHz), 540M (2.53 GHz) ▫ Intel Core i7 Processors: 620M (2.66 GHz) |
| Core logic | Mobile Intel HM55 Express Chipset |
| Socket type | LGA 1156 (Socket H) |

Controllers

| Item | Controller |
|--------------------|---|
| Core logic | Mobile Intel HM55 Express Chipset |
| VGA | <ul style="list-style-type: none"> ▫ Discrete model: ATI Madison Pro / Park XT with DDR3-800 1 GB VRAM ▫ UMA model: Integrated in the Mobile Intel HM55 Express Chipset |
| LAN | Broadcom BCM57780 |
| USB 2.0 | Mobile Intel HM55 Express Chipset |
| Bluetooth | Broadcom BCM2046 |
| Wireless 802.11 | <ul style="list-style-type: none"> ▫ Intel WiFi Link 5100 ▫ Intel WiFi Link 5300 ▫ Atheros AR5B91/HB93 b/g/n ▫ Atheros XB63 b/g |
| Memory card reader | Alcor AU6433 |
| Audio codec | Realtek ALC272 |

BIOS

| Item | Specification |
|--------------|---------------|
| BIOS vendor | Phoenix |
| BIOS version | v1.06 |

| Item | Specification |
|-----------------------|--|
| Supported protocols | <ul style="list-style-type: none"> ▪ ACPI 1.0b/2.0/3.0 compliance ▪ PCI 2.2 ▪ System/HDD password ▪ Security Control ▪ INT 13H Extensions ▪ PnP BIOS 1.0a SMBIOS 2.4 ▪ BIOS Boot Specification ▪ Simple Boot Flag 1.0 ▪ Boot block ▪ PCI Bus Power Management Interface Specification ▪ USB Specification 1.1/2.0 ▪ IEEE 1394 1.0 ▪ USB/1394 CD-ROM Boot Up support ▪ PC Card Standard 1995 (PCMCIA 3.0 Compliant Device) ▪ IrDA 1.0 ▪ Intel AC97 CNR Specification ▪ WfM 2.0 ▪ PXE 2.1 ▪ Boot Integrity Service Application Program Interface (BIS) 1.0 ▪ PC99a and Mobile PC2001 Compliant |
| BIOS password control | Manually set |

Memory

| Item | Specification |
|------------------------------|---|
| Memory controller | Built-in |
| Memory size | 0 MB (no on-board memory) |
| SO-DIMM socket number | 2 sockets |
| Supports maximum memory size | 4 GB |
| Supports SO-DIMM type | DDR3 |
| Supports data rate | 800/1066/1333 MT/s |
| Supports SO-DIMM package | 204-pin SO-DIMM |
| Memory module combinations | You can install memory modules in any combination as long as they match the above specifications. |

Hard disk drive

| Item | | | | | | |
|--|--|--|--|--|------------------------------|--|

| Buffer Memory | 2MB | ▫ for CD/DVD: 2MB ▫ for BD: 4.5MB |
| Interface | SATA | |

CHAPTER 1: System specifications

| Item | Specification |
|------------------------|---|
| Applicable disc format | CD: CD-DA, CD-ROM, CD-ROM XA, Photo CD (multi-session), Video CD, Cd-Extra (CD+), CD-text DVD: DVD-VIDEO, DVD-ROM, DVD-R (3.9GB, 4.7GB) DVD-R DL, DVD-RW, DVD-RAM, DVD+R, DVD+R DL, DVD+RW CD: CD-DA (Red Book) - Standard Audio CD & CD-TEXT CD-ROM (Yellow Book Mode1 & 2) - Standard Data CD-ROM XA (Mode2 Form1 & 2) - Photo CD, Multi-Session CD-I (Green Book, Mode2 Form1 & 2, Ready, Bridge) CD-Extra/ CD-Plus (Blue Book) - Audio & Text/Video Video-CD (White Book) - MPEG1 Video CD-R (Orange Book Part) CD-RW & HSRW (Orange Book Part Volume1 & Volume 2) Super Audio CD (SACD) Hybrid type US & US+ RW DVD: DVD-ROM (Book 1.02), DVD-Dual DVD-Video (Book 1.1) DVD-R (Book 1.0, 3.9G) DVD-R (Book 2.0, 4.7G) - General & Authoring DVD+R (Version 1.0) DVD+RW DVD-RW (Non CPRM & CPRM) DVD ⁺ R Dual Blu-Ray: BD-R, BD-R DL, BD-RE, BD-RE DL |
| Loading mechanism | Load: Manual Release: (a) Electrical (Release Button), (b) ATAPI command, (c) Emergency |
| Power Requirement | |
| Input Voltage | 5 V +/- 5% (Operating) 5 V +/- 5% (Operating) |

LCD

| Item | Specification |
|--------------------------------------|---|
| Vendor | <ul style="list-style-type: none"> ▪ AUO ▪ CMO ▪ Innolux ▪ LG ▪ Samsung |
| Screen diagonal (mm) | 15.6 inches |
| Resolution support (pixels) | <ul style="list-style-type: none"> ▪ 800×600 ▪ 1024×768 ▪ 1280×720 ▪ 1280*768 ▪ 1360×768 ▪ 1366×768 |
| Pixel pitch | 0.204 x 0.204 |
| Pixel arrangement | R.G.B. Vertical Stripe |
| Display mode | Normally white |
| Typical white luminance (brightness) | 200 or 220 nits |
| Luminance uniformity | 1.25 max. |
| Contrast ratio | 400:1, 500:1 or 650:1 |

| Item | Specification |
|---|------------------------|
| Response time (msec) | 8 |
| Nominal input voltage VDD | +3.3V |
| Viewing angle (degree) Horizontal: Right/Left Vertical: Upper/Lower | 45/45 15/35 |
| Temperature range(° C) Operating Storage (shipping) | 0 to +50 -40 to +60 |

Keyboard

| Item | Specification |
|--|--|
| Keyboard controller | Winbond WPC773 |
| Total number of keypads | 99/100/103-key |
| Windows logo key | Yes |
| Internal & external keyboard work simultaneously | Plug USB keyboard to the USB port directly |

Pointing device

| Item | Specification |
|---------|---|
| Type | <ul style="list-style-type: none"> ▫ Synaptics TM00540-001 Touchpad ▫ ALPS KGDF0031A Touchpad |
| Buttons | Left/Right |

Memory card reader

| Item | Specification |
|-----------------|---|
| Controller | Alcor AU6433 |
| Cards supported | Support 5-in-1 card reader (MMC, MS, MS-pro, SD, and xD) |
| Compliance | <ul style="list-style-type: none"> ▫ Complies to SDIO Host Interface Specification Rev 1.0 ▫ Supports MMC, MMCplus, SD Memory, and SDIO cards ▫ SDIO Version 1.10 compliant with High-Speed Mode ▫ SD Host Interface Specification v1.0 ▫ SD Host Interface Specification v2.0 ▫ SD HC (High Capacity SD memory card) ▫ Supports SD memory card, with CPRM security ▫ Complies to MultiMediaCard™ Version 4.0 ▫ Supports Memory Stick™ and MS PRO media cards ▫ Supports xD-Picture™ card and SmartMedia™ cards |

Audio

| Item | Specification |
|---------------------------|-----------------------------|
| Audio codec | Realtek ALC272 |
| Audio onboard or optional | Built-in |
| Mono or stereo | Stereo |
| Resolution | 24-bit DAC and ADC |
| Compatibility | HD Audio |
| Sampling rate | 192 kHz maximum sample rate |
| Internal microphone | With webcam |
| Internal speaker/quantity | 2 speakers |

Wired LAN

| Item | Specification |
|------------------------|---|
| LAN chipset | Broadcom BCM57780 |
| Supports LAN protocol | 10/100/1000 Mbps |
| LAN connector type | RJ45 |
| LAN connector location | Left side |
| Features | <ul style="list-style-type: none"> ▪ Integrated 10/10/1000 BASE-T transceiver ▪ PCI v2.2 compliant ▪ Wake on LAN support meeting ACPI requirements |

Bluetooth

| Item | Specification |
|-----------------|----------------------------------|
| Chipset | Broadcom BCM2046 |
| Data throughput | 2.1 Mbit/s |
| Protocol | Bluetooth 2.1 |
| Interface | USB (board level) |
| Connector type | Wireless via Bluetooth protocols |

Wireless LAN

| Item | Specification |
|-----------------|--|
| Chipset | <ul style="list-style-type: none"> ▫ Intel WiFi Link 5100 ▫ Intel WiFi Link 5300 ▫ Atheros AR5B91/HB93 b/g/n ▫ Atheros XB63 b/g ▫ WNC WiMAX |
| Data throughput | 11~54 Mbps, up to 270 Mbps for Draft-N |
| Protocol | <ul style="list-style-type: none"> ▫ IEEE 802.11a ▫ IEEE 802.11b ▫ IEEE 802.11g ▫ IEEE 802.11 Draft-N ▫ IEEE 802.16e |
| Interface | PCI bus (mini PCI socket for wireless module) |

USB

| Item | Specification |
|----------------------|---|
| Chipset | Mobile Intel HM55 Express Chipset |
| USB compliancy level | 2.0 |
| OHCI | USB 1.1 and USB 2.0 host controller |
| Number of USB ports | 4 |
| Location | <ul style="list-style-type: none"> ▫ Two on the left side ▫ Two on the right side |

Buttons/Indicators/Ports

| Item | Specification |
|------------|--|
| Buttons | <ul style="list-style-type: none"> ▫ Power button ▫ Capacitive touch keys |
| Indicators | <ul style="list-style-type: none"> ▫ Bluetooth ▫ Hard drive ▫ Num lock ▫ Caps lock ▫ Battery charge ▫ Power |
| Ports | <ul style="list-style-type: none"> ▫ USB (four) ▫ External display (VGA) port ▫ Ethernet (RJ45) ▫ Modem (RJ11) ▫ Headphone/SPDIF Audio Out ▫ Microphone in ▫ DC in jack for AC adapter ▫ 5-in-1 card reader (SD™, MMC, MS, MS PRO, xD) ▫ HDMI™ port with HDCP support |

Camera

| Item | Specification |
|-----------------------|----------------------------------|
| Model | Chicony 0.3M DV Calla / Camellia |
| Interface | USB 2.0 |
| Resolution | 0.3 M pixels (640x480) |
| Signal to noise ratio | 42 dB |
| Sensor | CMOS 1/4 |
| Power | 5 V |
| Built-in microphone | Yes |
| LED | No |

Fans

| CPU temperature (° C) | Fan speed (rpm) | Acoustic level (dBA) |
|-----------------------|-----------------|----------------------|
| 45-50 | 0-3000 | 29 |
| 55-66 | 0-3300 | 33 |
| 68-74 | 3300-3800 | 38 |
| 78-83 | 3800-4100 | 40 |
| 86-91 | 4100-4800 | 40 |

Throttling 50%: % is controlled by operating system. Temperature point is 95 °C. OS shut down at 100 °C; H/W shut down at 105 °C

Battery

| Item | Specification |
|------------------------|---|
| Vendor | <ul style="list-style-type: none"> ▪ Panasonic ▪ Samsung ▪ Sanyo ▪ Sony ▪ Simplo |
| type | Li-ion |
| Pack capacity | 4400mAH–5800mAH |
| Number of battery cell | 6 |
| Package configuration | 3 cells in series, 2 series in parallel |
| Normal voltage | 11.1V |
| Charge voltage | 12.6V (max) |

Power supply

| Item | Specification |
|--------------------------|--|
| Vendor | <ul style="list-style-type: none"> ▫ Delta ▫ Liteon ▫ Hipro |
| Input rating | 90V AC to 264V AC, 47Hz to 63Hz |
| Maximum input AC current | 1.7A (max) |
| Output rating | 19V DC, 3.42A, 65W |

Power savings

| ACPI mode | Power Management |
|---------------------|--|
| Mech. Off (G3) | All devices in the notebook are turned off completely. |
| Soft Off (G2/S5) | OS initiated shutdown. All devices in the notebook are turned off completely. |
| Working (G0/S0) | Individual devices such as the CPU and hard disc may be power managed in this state. |
| Suspend to RAM (S3) | <ul style="list-style-type: none"> ▫ CPU set power down ▫ VGA suspend ▫ PCMCIA suspend ▫ Audio power down ▫ Hard drive power down ▫ Optical drive power down ▫ Super I/O low power mode |
| Save to Disk (S4) | Also called Hibernation mode. System saves all system states and data onto the disc prior to powering off the whole system. |

Notebook product tour

Important

Case color may vary from that shown in the pictures.

Front View

| Component | Icon | Description |
|-----------------|------|--|
| Ventilation fan | | Helps cool internal components. Warning: Do not work with the notebook resting on your lap. If the air vents are blocked, the notebook may become hot enough to harm your skin. Caution: Do not block or insert objects into these slots. If these slots are blocked, your notebook may overheat resulting in unexpected shutdown or permanent damage to the notebook. Caution: Provide adequate space around your notebook so air vents are not obstructed. Do not use the notebook on a bed, sofa, rug, or other similar surface. |

Left View

| Component | Icon | Description |
|-----------------------|------|--|
| Kensington™ lock slot | | Secure your notebook to an object by connecting a Kensington cable lock to this slot. |
| Power connector | | Plug the AC adapter cable into this connector. |
| Ethernet jack | | Plug an Ethernet network cable into this jack. Plug the other end of the cable into a cable modem, DSL modem, or an Ethernet network jack. |
| Monitor port | | Plug an analog VGA monitor or projector into this port. |
| HDMI out jack | | Plug an HDMI device, such as a high definition television, into this optional jack. |

| Component | Icon | Description |
|--------------------|---|---|
| USB port |  | Plug USB devices (such as a diskette drive, flash drive, printer, scanner, camera, keyboard, or mouse) into these ports. |
| Microphone jack |  | Plug a microphone into this jack. |
| Headphone jack |  | Plug amplified speakers or headphones into this jack. The built-in speakers are turned off when speakers or headphones are plugged into this jack. Headphone with SPDIF support |
| Memory card reader |  | Insert a memory card from a digital camera, MP3 player, PDA, or cellular telephone into the memory card reader. The memory card reader supports Memory Stick®, Memory Stick Pro®, MultiMediaCard™, Secure Digital™, and xD-Picture Card™ cards. |

Right View

| Component | Icon | Description |
|--------------|---|---|
| USB port |  | Plug a USB device (such as a diskette drive, flash drive, printer, scanner, camera, keyboard, or mouse) into this port. |
| DVD drive | | Insert CDs or DVDs into this drive. |
| Modem jack |  | Plug a dial-up modem cable into this optional jack. |
| Power button |  | Press to turn the power on or off. You can also configure the power button for Sleep/Resume mode. |

Rear View

| Component | Icon | Description |
|-----------------|------|--|
| Ventilation fan | | Helps cool internal components. Warning: Do not work with the notebook resting on your lap. If the air vents are blocked, the notebook may become hot enough to harm your skin. Caution: Do not block or insert objects into these slots. If these slots are blocked, your notebook may overheat resulting in unexpected shutdown or permanent damage to the notebook. Caution: Provide adequate space around your notebook so air vents are not obstructed. Do not use the notebook on a bed, sofa, rug, or other similar surface. |

| Component | Icon | Description |
|---------------|------|--|
| Battery | | Provides power when the notebook is not plugged into AC power. |
| Battery lock | | Slide to unlock the battery. |
| Battery latch | | Slide to release the battery. |
| Memory bay | | Memory modules are located in this bay. |

| Component | Icon | Description |
|-----------------------------------|---|--|
| Hard drive bay |  | The hard drive is located in this bay. |
| Ventilation slots and cooling fan | | Helps cool internal components. Warning: Do not work with the notebook resting on your lap. If the air vents are blocked, the notebook may become hot enough to harm your skin. Caution: Do not block or insert objects into these slots. If these slots are blocked, your notebook may overheat resulting in unexpected shutdown or permanent damage to the notebook. Caution: Provide adequate space around your notebook so air vents are not obstructed. Do not use the notebook on a bed, sofa, rug, or other similar surface. |

Keyboard area

| Component | Icon | Description |
|--|---|---|
| Speakers | | Left and right speakers deliver stereo audio output. |
| Capacitive hotkeys / status indicators | | Inform you when there is media activity or when a button has been pressed that affects how the keyboard is used. When a function is enabled, the touch key is lit up. For more information, see "Using the status indicators" on page 21 and "Using the capacitive touch keys" on page 24 . |
| Keyboard | | Provides all the features of a full-sized, computer keyboard. For more information, see "Using the keyboard" on page 21 . |
| Power indicator |  | <ul style="list-style-type: none"> ▫ LED on - Notebook is on. ▫ LED blinking - Notebook is in Sleep or Hybrid Sleep mode. ▫ LED off - Notebook is off. |
| Battery charge indicator |  | <ul style="list-style-type: none"> ▫ LED orange - Battery is fully charged. ▫ LED blinking orange - Battery is charging. ▫ LED blinking red - Battery charge is very low. ▫ LED solid red - Battery is malfunctioning. <p>Important: This LED only lights up when your notebook is connected to AC power or the battery charge is very low.</p> |

| Component | Icon | Description |
|-----------------------|------|---|
| Touchpad | | Provides all the functionality of a mouse. For more information, see “Using the touchpad” on page 25 . |
| Capacitive touch keys | | Press to access capacitive touch key function. For more information, see “Using the capacitive touch keys” on page 24 . |

LCD panel

| Component | Icon | Description |
|------------|------|---|
| Webcam | | Use to let others see who they are communicating with when making VoIP calls. For more information, see “Using the webcam” on page 26 . |
| Microphone | | Use to talk through when making Voice over Internet Protocol (VoIP) calls. |

Using the status indicators

Important

If none of the indicators are on, you may need to press FN+F1 to toggle the status indicators on.

Status indicators inform you when a drive is being used or when a button has been pressed that affects how the keyboard is used. The status indicators are located below the screen.

| Indicator | Icon | Description |
|--------------------------|------|---|
| Power indicator | | <ul style="list-style-type: none"> LED on - Notebook is on. LED blinking - Notebook is in Sleep or Hybrid Sleep mode. LED off - Notebook is off. |
| Battery charge indicator | | <ul style="list-style-type: none"> LED blue - Battery is fully charged. LED red - Battery is charging. <p>Important: This LED only lights up when your notebook is connected to AC power.</p> |
| Caps lock | | <ul style="list-style-type: none"> LED on - Caps lock is turned on. LED off - Caps lock is turned off. |
| Num lock | | <ul style="list-style-type: none"> LED on - Num lock is turned on. LED off - Num lock is turned off. |
| Hard drive | | <ul style="list-style-type: none"> LED blinking - The drive is being accessed. LED off - The drive is not being accessed. |
| Bluetooth | | <ul style="list-style-type: none"> LED on - Bluetooth communication is turned on. LED off - Bluetooth communication is turned off. |

Using the keyboard

Your notebook features a full-size keyboard that functions the same as a desktop computer keyboard. Many of the keys have been assigned alternate functions, including shortcut keys for Windows and function keys for specific system operations.

Key types

The keyboard has several different types of keys. Some keys perform specific actions when pressed alone and other actions when pressed in combination with another key.

| Key type | Icon | Description |
|-----------------|---|---|
| Function keys | | Press these keys labeled F1 to F12 to perform actions in programs. For example, pressing F1 may open help. Each program uses different function keys for different purposes. See the program documentation to find out more about the function key actions. |
| System keys | | Press these colored keys in combination with the FN key to perform specific actions. For more information, see “System key combinations” on page 22 . |
| Navigation keys | | Press these keys to move the cursor to the beginning of a line, to the end of a line, up the page, down the page, to the beginning of a document, or to the end of a document. |
| FN key | | Press the FN key in combination with a colored system key to perform a specific action. |
| Windows key |  | Press this key to open the Windows Start menu. This key can also be used in combination with other keys to open utilities like F (Search utility), R (Run utility), and E (Computer window). |
| Application key |  | Press this key for quick access to shortcut menus and help assistants in Windows. |
| Arrow keys | | Press these keys to move the cursor up, down, right, or left. |

System key combinations

When you press the **FN** key and a system key at the same time, your notebook performs the action identified by the text or icon on the key.

| Press and hold FN , then press this system key... | To... |
|---|--|
|  | Turn the capacitive touch key LEDs on or off. For more information, see “Using the status indicators” on page 21 . |
|  | Enter Sleep mode or Hybrid Sleep mode. Press the power button to leave Sleep mode. |
|  | Toggle the notebook display in the following order: <ul style="list-style-type: none"> ▫ The LCD ▫ An external monitor or projector (a monitor or projector must be plugged into the monitor port or HDMI port on your notebook) ▫ Both displays at the same time |

| Press and hold FN, then press this system key... | To... |
|---|---|
|  | Turn the optional Bluetooth radio on or off. Warning: Radio frequency wireless communication can interfere with equipment on commercial aircraft. Current aviation regulations require wireless devices to be turned off while traveling in an airplane. Bluetooth communication devices are examples of devices that provide wireless communication. Important: The wireless network switch must be in the ON position for this button to work. For more information, see "Left View" on page 16 . |
|  | Mute the sound. Press the key combination again to restore the sound. |
|  | Turns the display screen backlight off to save power. Press any key to return. |
|  | Play/ Pause—Plays or pauses the CD or DVD. |
|  | Stop—Stops playing the CD or DVD. |
|  | Previous—Skips back one CD track or DVD chapter. |
|  | Next—Skips ahead one CD track or DVD chapter. |

Using the capacitive touch keys

(only for certain models)

(only for certain models)

| Button | Description |
|---|---|
|  | PowerSave key—Press to put the notebook into power-saving mode. The button lights up red when this happens. Press this key again to return to your previous settings. |
| P | Programmable key—The programmable key will run the Launch Manager, you can assign an application as your needed. (only for certain models) |
|  | MyBackup key—Press to create a data backup in three easy steps: select source, select destination, and backup schedule (manual or automatic). The button lights up red during the backup process. |
|  | Wireless switch—Turn the optional IEEE 802.11 wireless network radio on or off. For more information, see “Wireless Ethernet Networking” in your online <i>User Guide</i> . Warning: Radio frequency wireless communication can interfere with equipment on commercial aircraft. Current aviation regulations require wireless devices to be turned off while traveling in an airplane. IEEE 802.11 communication devices are examples of devices that provide wireless communication. |
|  | Touchpad toggle—turn the internal touchpad on and off. |
|  | Mute—mutes the sound. Press again to restore the sound. |
|  | Decrease volume—press to decrease volume. |
|  | Increase volume—press to increase volume. |

Using the touchpad

When you move your finger on the touchpad, the *pointer* (arrow) on the screen moves in the same direction. You can use the scroll zone to scroll through documents. Use of the scroll zone may vary from program to program.

You can use the *left* and *right* buttons below the touchpad to select objects.

| To... | Do this... |
|---------------------------------|--|
| Move the pointer on the screen. | A diagram showing a hand moving a finger across the touchpad. Green arrows indicate the direction of movement. The touchpad has a scroll zone indicated by two curved arrows. <p>Move your finger around on the touchpad. If you run out of space and need to move the pointer farther, lift your finger, move it to the middle of the touchpad, then continue moving your finger.</p> |
| Select an object on the screen. | A diagram showing a hand pressing the left button of the touchpad. A speech bubble with the word 'click' points to the button. The touchpad has a scroll zone indicated by two curved arrows. <p>Position the pointer over the object. Quickly press and release the left button once. This action is called <i>clicking</i>.</p> |

| To... | Do this... | |
|--|---|---|
| Start a program or open a file or folder. |  | Position the pointer over the object. Press the left button twice in rapid succession. This action is called <i>double-clicking</i> . |
| Access a shortcut menu or find more information about an object on the screen. |  | Position the pointer over the object. Quickly press and release the right button once. This action is called <i>right-clicking</i> . |
| Move an object on the screen. |  | Position the pointer over the object. Press the left button and hold it down, then use the touchpad to move (drag) the object to the appropriate part of the screen. Release the button to drop the object where you want it. |

Using the webcam

You can use the optional webcam with many of the available Internet chat programs to add video and audio to your chat session. In addition, by using the software included with the webcam, you can take pictures or create video clips.

CHAPTER 2

System utilities

- BIOS setup utility
- BIOS recovery
- Clearing a BIOS password
- Unlocking the hard drive

BIOS setup utility

The BIOS setup utility is a hardware configuration program built into the notebook's BIOS (Basic Input/Output System). The notebook was shipped already properly configured and optimized. However, if the user encounters configuration problems, you may need to run Setup.

► To run the BIOS Setup Utility:

- 1 Turn on the notebook.

If the computer is already turned on, save your data and close all open applications, then restart the computer.

- 2 Press F2 when the **Press <F2> to enter Setup** prompt appears on the bottom of the screen.

Use the left and right arrow keys to move between selections on the menu bar.

```

Phoenix SecureCore (tm) Setup Utility
-----
Information  Main  Security  Boot  Exit

CPU Type:          AMD Turion(tm) II Ultra Dual-Core Mobile M640
CPU Speed:         2.60 GHz
IDE0 Model Name:   Hitachi HTS545050B9A300- (S1)
IDE0 Serial Number: 090709PB4400Q7H9ARZG
ATAPI Model Name:  Slimtype BD E DS4E1S- (S2)
System BIOS Version: U1.02
UGA BIOS Version:  BK-ATI VER011.020.000.012.033584

KBC Version:       03.07
Serial Number:     914FM01001G9280003F2200
Asset Tag Number:  None
Product Name:      NUS3 Series
Manufacturer Name: Gateway
UUID:              216cab40-7301-11de-909b-b1b0a0f4560d

F1 Help  ↑↓ Select Item  F5/F6 Change Values  F9 Setup Defaults
Esc Exit  ←→ Select Menu  Enter Select ► Sub-Menu  F10 Save and Exit

```

Navigating the BIOS setup utility

Use the keys listed in the legend bar on the bottom of the Setup screen to work your way through the various menu and submenu screens.

► To use the BIOS setup utility:

- To choose a menu, use the left ← and right → arrow keys.
- To choose an item, use the up ↑ and down ↓ arrow keys.
- To change the value of a parameter, press F5 or F6.
- A plus sign (+) indicates the item has sub-items. Press **ENTER** to expand this item.
- To load default settings, press F9.
- To save changes made and close the utility, press F10.

1 Press **ESC** while you are in any of the menu screen to display the Exit menu.

 **Important**

- You can change the value of a parameter if it is enclosed in square brackets.
 - Navigation keys for a particular menu are shown on the bottom of the screen. Help for parameters are found in the Item Specific Help part of the screen. Read this information carefully when making changes to parameter values.
 - The screenshots used in this section are for illustration only. The values displayed may not be the same as those in your computer.
-

BIOS setup utility menus

The Setup utility has five menus for configuring the various system functions. These include: Information, Main, Security, Boot, and Exit.

 **Important**

- The screenshots used in this section are for illustration only. The values displayed may not be the same as those in your computer. Actual screen information varies by model, installed features, and location.
 - In the descriptive table following each of the screenshot, settings in **boldface** are the default settings.
-

Information

The Information menu displays a summary of your computer hardware information. These information are necessary for troubleshooting and may be required when asking for technical support.

```

| Parameter | Description |
|---------------------|--|
| CPU Type | Displays the processor model and speed. |
| CPU Speed | Displays the processor speed. |
| IDE0 Model Name | Displays the model name of the hard drive installed on the primary IDE master. |
| IDE0 Serial Number | Displays the serial number of the hard drive installed on the primary IDE master. |
| ATAPI Model Name | Displays the model name of the installed optical drive. |
| System BIOS Version | Displays system BIOS version. |
| VGA BIOS Version | Displays the VGA firmware version. |
| KBC Version | Displays the keyboard controller version. |
| Serial Number | Displays the system serial number. |
| Asset Tag Number | Displays the system asset tag number |
| Product Name | Displays the official model name of the computer. |
| Manufacturer Name | Displays the name of the computer manufacturer. |
| UUID Number | Displays the computer's UUID (universally unique identifier). UUID is an identifier standard used in software construction, standardized by the Open Software Foundation (OSF) as part of the Distributed Computing Environment (DCE). |

Main

Use the Main menu to set the system time and date, and other basic options.

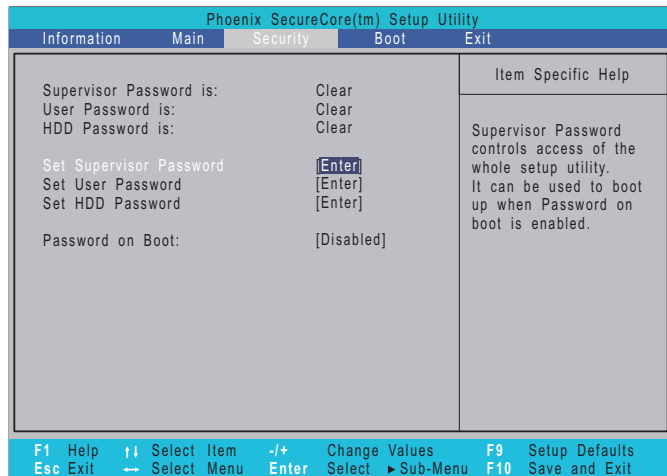

| Parameter | Description | Format/Options |
|---------------|--|----------------------------------|
| System Time | Displays the system time. The time is expressed in a 24-hour format. | HH:MM:SS (hour:minute:second) |
| System Date | Displays the system date. | MM/DD/YYYY (month/day/year) |
| Total Memory | Displays the size of system memory detected during boot-up. | |
| Video Memory | Displays the size of video memory detected during boot-up. | |
| Quiet Boot | Enables or disables the Quiet Boot function. When enabled, BIOS setup is in graphical mode and displays only the computer brand logo during POST and while booting. When disabled, BIOS setup is in conventional text mode and displays the system Summary Screen. | Disabled Enabled |
| Network Boot | When enabled, a remote host with appropriate boot image can boot this computer. (only works with an Ethernet device.) | Disabled Enabled |
| F12 Boot Menu | Enables or disables the Boot menu during POST. | Disabled Enabled |

| Parameter | Description | Format/Options |
|--------------|--|----------------------------|
| D2D Recovery | Enables or disables the D2D Recovery function. This function allows the user to create a hidden partition on the hard drive to store the operation system. User can then use this partition to restore the system to factory defaults by pressing the Alt+F10 keys during system boot-up. | Disabled Enabled |
| SATA Mode | Select the SATA controller operating mode. When set to AHCI (Advanced Host Controller Interface), the SATA controller enables its AHCI and RAID features when the computer boots up. When set to IDE, the SATA controller disables its AHCI and RAID functions when the computer boots up. Note: If you do not intend to use the AHCI or RAID features set this parameter to IDE to speed up the boot-up time. | AHCI IDE |

Security

Use the Security menu option to set system passwords to protect your computer from unauthorized use.

| Parameter | Description | Option |
|------------------------|--|--------------|
| Supervisor Password Is | Displays the supervisor password status. | Clear Set |
| User Password Is | Displays the user password status. | Clear Set |
| HDD Password Is | Displays the hard drive password status. | Clear Set |

| Parameter | Description | Option |
|-------------------------|---|----------------------------|
| Set Supervisor Password | Press Enter to set a supervisor password. When set, this password will allow the user to access and change all settings in the Setup Utility. | |
| Set User Password | Press Enter to set a user password. When set, this password will restrict a user's access to the Setup menus. Only the following menus will be accessible: <ul style="list-style-type: none"> • System Time and System Date • All Exit menu options excluding Load Setup Defaults Note: A supervisor password must first be set before creating a user password. If Password on Boot is enabled, the user must enter the user password each time the notebook is turned on or wakes from Sleep. | |
| Set HDD Password | Press Enter to set password for accessing the hard disk drive (HDD) password. It will be required during boot-up or when waking from hibernation mode. | |
| Password on Boot | Referred to as the power-on password. When enabled, the user or supervisor password will be required to boot up the system. Note: A supervisor password must first be set before creating a user password. | Disabled Enabled |

 **Caution**

When you are prompted to enter a password, you have three tries before the system halts. Don't forget your password.

Setting a password

Note the following reminders before you define a system password:

- The maximum length of password contains 8 alphanumeric characters.
- System passwords are case-insensitive.
- When typing the password, only shaded blocks representing each typed character are visible.

► To set a supervisor password:

- 1 Press ↑ or ↓ to highlight Set Supervisor Password, then press Enter. The *Set Supervisor Password* box opens.

- 2 Type a password, then press Enter.

- 3 Retype the password to verify the first entry, then press Enter.
You will be prompted to save the new password.
- 4 Press Enter.
- 5 Press F10 to save the password and close the Setup Utility or you can proceed to setting a user password.

► To set a user password:

- 1 Press ↑ or ↓ to highlight Set User Password, then press Enter.
The *Set User Password* box opens.
- 2 Type a password, then press Enter.
- 3 Retype the password to verify the first entry, then press Enter.
You will be prompted to save the new password.
- 4 Press Enter.
- 5 Press F10 to save the password and close the Setup Utility.

Changing a password

► To change a password:

- 1 Press ↑ or ↓ to highlight the Set Supervisor Password or Set User Password field, then press Enter.
The *Set Supervisor Password* or *Set User Password* box opens.

- 2 Type the current password, then press Enter.
- 3 Type a new password, then press Enter.
- 4 Retype the new password to verify the first entry, then press Enter.
You will be prompted to save the new password.
- 5 Press Enter.
- 6 Press F10 to save the password and close the Setup Utility or you can proceed to setting a user password.

Removing a password

► To remove a password:

- 1 Press \uparrow or \downarrow to highlight the Set Supervisor Password or Set User Password field, then press Enter.

The *Set Supervisor Password* or *Set User Password* box opens.

- 2 Type the current password, then press Enter.
- 3 Press Enter twice without entering anything in the new and confirm password fields.
You will be prompted to confirm the password removal.
- 4 Press Enter.
- 5 Press F10 to save the password and close the Setup Utility or you can proceed to setting a user password.

Resetting a password

If you have forgotten the user password, the computer will continue to function normally but you will have limited access to the Setup utility.

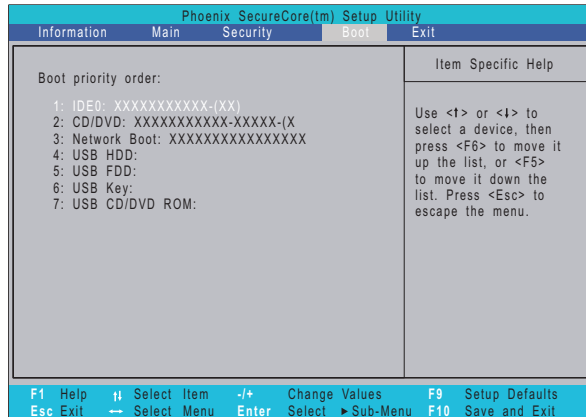

If you have enabled the Password on Boot field and you forget the supervisor password, you will not be able to boot up the computer. The same thing applies if you forget the HDD password.

To clear a lost BIOS password (user or supervisor password) you need to short the clear password hardware gap located on the system board. Go to [page 40](#) for instructions.

To regain access to your computer if you lose the HDD password, you need to generate a master password and unlock your hard drive. Go to [page 41](#) for instructions.

Boot

Use the Boot menu to set the preferred drive sequence in which the Setup utility attempts to boot the operating system.

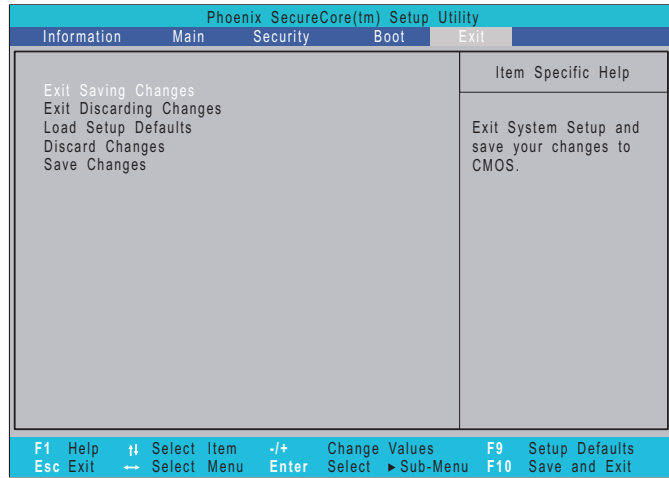

► To set boot drive sequence:

- 1 Press ↑ or ↓ to highlight a bootable device.
- 2 Press F5 or F6 to move the selected device up or down the boot sequence.
- 3 Press F10 to save the changes you made and close the Setup utility.

Exit

The Exit menu screen lists options for quitting from the Setup Utility.

| Option | Description |
|-------------------------|---|
| Exit Saving Changes | Saves changes made and closes the Setup utility. Keyboard shortcut: F10 |
| Exit Discarding Changes | Discards changes made and closes the Setup utility. |
| Load Setup Default | Loads the factory-default settings for all Setup parameters. Keyboard shortcut: F9 |
| Discard Changes | Discards all changes made to the Setup utility and loads previous configuration settings. |
| Save Changes | Saves all changes made to the Setup utility. |

BIOS recovery

An interruption during a BIOS flash procedure (e.g. a power outage) can corrupt the BIOS code, which will cause the system to go into an unbootable state. You need to access and execute the boot block program to reboot the computer and recover the regular BIOS code.

Caution

Observe the following when performing a BIOS recovery:

- Make sure the battery pack is installed to the system and that the computer is connected to a UPS unit during the BIOS recovery and BIOS flash procedures.
- The BIOS crisis recovery disk should be prepared in a computer running the Windows XP or Windows Vista OS.

Creating the Crisis Recovery disk

► To create the Crisis Recovery disk:

- 1 Prepare a removable USB storage device with a capacity size greater than 10 MB.
Note that all data on the USB storage device will be cleared during the creation of the crisis disk.
- 2 Set up a computer running the Windows XP or Windows Vista OS and plug in the USB storage device into an available USB port.
- 3 Decompress the Crisis Package Source.
- 4 Select WINCRIS.exe and then select Run as administrator.
- 5 Keep the default settings and then click Start button.
- 6 When the pop-up warning dialog box appears, click OK to create the crisis disk.
- 7 Click No if you do not want to create another crisis disk.
- 8 Eject and reconnect the USB removable storage device, and make sure it contains the BIOS.wph, MINIDOS.sys, and PHLASH16.exe files.

Performing a BIOS recovery

► To perform a BIOS recovery:

- 1 Shut down the BIOS failed-computer.
- 2 Connect the USB storage device containing the Crisis Recovery disk files to the failed computer.
- 3 Press and hold the Fn+Esc keys (this is the BIOS recovery hotkey), then press the power button.
The BIOS recovery process begins. When the process is complete the computer will automatically reboot.
- 4 Disconnect the USB storage device from the computer.
- 5 Perform a BIOS flash procedure to update the BIOS firmware.

Running the Flash utility:

- ▶ To run the Flash utility:
 - 1 Rename the BIOS file as "XXXXXXX.FD".
 - 2 Copy the "XXXXXXX.FD" file to a bootable USB device containing the Crisis Recovery disk files.
 - 3 Turn off the computer.
 - 4 Insert the USB device containing the renamed BIOS file and the Crisis Recovery disk files to any USB port.
 - 5 Press and hold the Fn+Esc keys (this is the BIOS recovery hotkey), then press the power button.
 - 6 Release the Fn+Esc keys after POST.

Clearing a BIOS password

To clear a lost BIOS password (user or supervisor password) you need to short the clear password hardware gap (G102) located on the system board.

Discrete model

UMA model

| Gap | Default setting | Function |
|------|-----------------|---|
| G102 | Open (normal) | Short to clear the user and supervisor passwords. |

► To clear a BIOS password:

- 1 Turn off the notebook and unplug all the peripherals connected to it.
- 2 Complete the steps in [“Removing the battery” on page 48](#).
- 3 Complete the steps in [“Removing the bay cover” on page 49](#).
- 4 Remove the memory module(s) and locate the G102 gap.
- 5 Use an electrical conductivity tool to short the two contacts on the hardware gap together.
- 6 While resting the tool on the two contacts, plug one end of the AC adapter into the DC power jack and plug one end to an electrical outlet.
- 7 Press the power button to turn on the system.
- 8 After the POST, remove the tool from the hardware gap.
- 9 Reinstall the memory module(s), battery pack, and the bay cover.
- 10 Turn on the notebook and press F2 during bootup to access the Setup utility.
- 11 Press F9 to load the system defaults.
- 12 Press F10 to save the changes you made and close the setup Utility.

Unlocking the hard drive

To regain access to your computer if you lose the HDD password, you need to generate a master password and unlock the hard drive.

▶ To unlock a hard drive:

- 1 Open the computer in a DOS environment.
- 2 Type the following command:
A\> unlock6 XXXXX 00
- 3 Press Enter to display the command options.
- 4 Select option 2 (upper case ASCII code), then press Enter.
- 5 Write down the generated master password.
- 6 Reboot the computer.
- 7 In the HDD password prompt, type the master password generated in [step 5](#), then press Enter.

CHAPTER 3

Replacing notebook components

- Preventing static electricity discharge
- Preparing the work space
- Required tools
- Preparing the notebook
- Adding or replacing memory modules
- Replacing the wireless card
- Replacing the hard drive
- Replacing the optical drive
- Replacing the keyboard cover
- Replacing the multimedia board
- Replacing the keyboard
- Replacing the LCD panel assembly
- Replacing the palm rest
- Replacing the speakers
- Replacing the touchpad board
- Replacing the modem board
- Replacing the USB board
- Replacing the Bluetooth module
- Replacing the system board
- Replacing the cooling assembly
- Replacing the processor
- Replacing the LCD front panel
- Replacing the webcam
- Replacing the LCD
- Replacing the LCD panel hinge brackets
- Replacing the power button board
- Replacing the Kensington lock cap
- Replacing the microphone
- Replacing the antennas
- Replacing the LCD assembly lid

Preventing static electricity discharge

Warning

To avoid exposure to dangerous electrical voltages and moving parts, turn off your notebook, remove the battery, and unplug the power cord and network cable before opening the case.

Warning

To prevent risk of electric shock, do not insert any object into the vent holes of the notebook.

Important

Before performing maintenance on the notebook, you should read and understand the information in this section.

The components inside your notebook are extremely sensitive to static electricity, also known as *electrostatic discharge* (ESD).

Before performing maintenance on the notebook, follow these guidelines:

- Avoid static-causing surfaces such as carpeted floors, plastic, and packing foam.
- Remove components from their antistatic bags only when you are ready to use them. Do not lay components on the outside of antistatic bags because only the inside of the bags provide electrostatic protection.
- Always hold components by their edges. Avoid touching the edge connectors. Never slide components over any surface.
- Wear a grounding wrist strap (available at most electronics stores) and attach it to a bare metal part of your workbench or other grounded connection.
- Touch a bare metal surface on your workbench or other grounded object.

Tape

Some of the procedures in this guide involve removing tape that secures cables or components. Two types of tape are used in this notebook:

- Mylar, non-conductive tape is typically transparent, with a red or brown tint.
- Conductive tape is typically grey or silver in color.

If the existing tape cannot be reused, replace it with the same type. Make sure the replacement tape is of the non-ESD generating kind. Do not use cellophane tape.

Preparing the work space

Before performing maintenance on the notebook, make sure that your work space and the notebook are correctly prepared.

- Wear a grounding (ESD) wrist strap, and use a grounded or dissipative work mat.
- Use a sturdy table. Make sure that the table top is wide enough to hold each component as you remove it.
- Ensure that clear lighting condition is available to make part identification easier.
- Keep your work surface free from clutter and debris that may damage components.
- Use a magnetized screwdriver for removing screws.
- When removing components that are attached to the notebook by a cable, unplug the cable before removing the screws, when possible, to avoid damaging the cable.
- As you remove components and screws, lay them toward the rear of your work surface (behind the notebook) or far enough to the side that your arms will not accidentally brush them onto the floor.
- To help keep track of screws, try the following:
 - Place each component's screws in their own section of a parts sorter.
 - Place each component's screws next to the component on your work surface.
 - Print the first page of each task, then place the page toward the rear of your work surface. As you remove screws, place the screws in their respective section on the page.
 - After loosening screws that are deeply recessed in a hole (for example, on the bottom of the base assembly), you can leave the screws in the holes if you place small pieces of masking tape over the hole openings. When reassembling the component, just remove the tape and tighten the screws.
 - When you place flat-headed screws on the work surface, stand them on their heads to prevent the screws from rolling off the table.

Required tools

To disassemble the notebook, you need the following tools:

- Wrist grounding strap (for ESD prevention)

- Conductive mat (for ESD prevention)
- Flat screwdriver

- Phillips screwdriver

- Non-marring plastic scribe

Preparing the notebook

- ▶ To prepare the notebook for maintenance:
 - 1 Make sure that the optical disc drive is empty.
 - 2 Turn off the notebook.
 - 3 Close the LCD panel.
 - 4 Disconnect the AC adapter.

- 5 Disconnect the network cable and all peripheral devices connected to the notebook.
- 6 Make sure there is no memory card on the card reader slot. To remove a memory card:
 - a Push against the card, as if you were pushing it further into the slot, letting the card spring out
 - b Pull the memory card out of its slot.

Removing the battery

► To remove the battery:

- 1 Turn the notebook over so the base is facing up.
- 2 Slide the battery lock to the unlocked position.

- 3 Slide the battery release latch (a), then remove the battery out of the notebook (b).

Note

The battery is highlighted with a yellow circle in the above image. Follow local regulations for battery disposal.

Removing the bay cover

To remove or replace components located on the lower bay, you need to remove the bay cover first.

Tools you need to complete this task:

► To remove the bay cover:

- 1 Complete the steps in [“Preparing the notebook” on page 47](#).
- 2 Turn the notebook over so the base is facing up.
- 3 Loosen the bay cover screws (these screws cannot be removed).

- 4 Insert a non-marring plastic scribe on the cover's notch to release the cover from the computer, and then remove the cover.

Adding or replacing memory modules

Important

Use only memory modules designed for this Packard Bell notebook.

Tools you need to complete this task:

Phillips #0 screwdriver

Non-marring plastic scribe

► To add or replace memory modules:

- 1 Complete the steps in [“Preparing the notebook”](#) on page 47.
- 2 Complete the steps in [“Removing the bay cover”](#) on page 49.
- 3 If you are replacing a memory module, go to [step 4](#).
If you installing an additional memory module, go to [step 6](#).
- 4 Use a non-marring plastic scribe to push out the latches on both sides of the memory slot until the module tilts upward.

- 5 Remove the memory module from its slot.

- 6 Insert the new memory module at a 30° angle into an empty memory slot, and then press it down until it clicks into place.

The module is keyed so it can only be inserted in one direction. If the module does not fit, make sure that the notch in the module lines up with the tab in the memory slot.

- 7 Reinstall the bay cover.

Replacing the wireless card

Tools you need to complete this task:

Screws removed during this task:

-  1 black M2×5 (wireless card)

► To replace the wireless card:

- 1 Complete the steps in [“Preparing the notebook” on page 47](#).
- 2 Complete the steps in [“Removing the bay cover” on page 49](#).
- 3 Detach the bar code sticker covering the antenna cables.
- 4 Unplug the antenna cables. Note which color cable corresponds to each of the connectors.

Important

The number of antenna cables varies depending on the type of wireless card installed on the notebook. IEEE 802.11n cards typically have three antenna cables. Other types of wireless cards usually have only two antenna cables.

- 5 Move the antenna cables away from the wireless card screw.

- 6 Remove the screw securing the wireless card.

- 7 Pull the card out of the slot.

- 8 Insert the new wireless card at a 30° angle into the empty Mini Card slot. The card is keyed so it can only be inserted in one direction. If the card does not fit, make sure that the notch in the card lines up with the tab in the card slot.
- 9 Secure the new wireless card with the screw removed in [step 6](#).
- 10 Reconnect the antenna cables to the connectors.
- 11 Reinstall the bay cover.

Replacing the hard drive

Tools you need to complete this task:

Screws removed during this task:

-  1 black M2×5 (hard drive)
-  2 chrome M3×3 (hard drive bracket)

► To replace the hard drive:

- 1 Complete the steps in [“Preparing the notebook” on page 47](#).
- 2 Complete the steps in [“Removing the bay cover” on page 49](#).
- 3 Remove the hard drive screw.

- 4 Grasp the black mylar tab and use it to disengage the hard drive from its connector, and then remove the drive from its compartment.

- 5 If your new hard drive already includes the hard drive bracket, go to [step 8](#).
If you need to use the bracket from the old hard drive, go to [step 6](#).
- 6 Remove the screws that secure the hard drive bracket, and then detach the bracket from the drive.

- 7 Place the bracket on the new drive and secure it with the two screws removed in [step 6](#).
- 8 Slide the new hard drive into the hard drive compartment and make sure it's properly engaged to the SATA1 connector.
- 9 Secure the new drive to the system board with the screw removed in [step 6](#).
- 10 Reinstall the bay cover.

Replacing the optical drive

Tools you need to complete this task:

Screws removed during this task:

- 1 black M2.5×6 (optical drive)
- 1 chrome M2×3 (optical drive bracket)

► To replace the optical drive:

- 1 Complete the steps in [“Preparing the notebook”](#) on page 47.
- 2 Complete the steps in [“Removing the bay cover”](#) on page 49.
- 3 Remove the optical drive screw.

- 4 Use the non-marring plastic scribe to carefully push the optical drive out of the drive bay, and then slide the drive out.

- 5 If your new optical drive already has its own bracket and bezel, go to [step 10](#). If you need to use the bracket and bezel from the old optical drive, perform steps [6–9](#) as necessary.
- 6 Detach the bezel from the old optical drive.

- 7 Remove the screws that secure the optical drive bracket, and then detach the bracket from the drive.

- 8 Attach the bezel to the new optical drive.
- 9 Attach the bracket to the new optical drive and secure it with the screw removed in [step 7](#).
- 10 Slide the new optical drive into the drive bay and make sure it's properly engaged to the ODD1 connector.
- 11 Secure the new drive to the system board with the screw removed in [step 3](#).
- 12 Reinstall the bay cover.

Replacing the keyboard cover

Tools you need to complete this task:

or

Screws removed during this task:

-  3 black M2.5×6 (keyboard cover)

► To replace the keyboard cover:

- 1 Complete the steps in [“Preparing the notebook” on page 47](#).
- 2 Complete the steps in [“Removing the battery” on page 48](#).
- 3 Remove the screws securing the keyboard cover.

- 4 Turn the notebook over and open the LCD panel to its fully extended position.
- 5 Insert a small flat-blade screwdriver or non-marring scribe between the LCD hinge side and the keyboard cover, and carefully pry the cover up.

Caution

The keyboard cover is connected to the notebook through the multimedia board cable. Disconnect this cable first before pulling the cover away from the palm rest assembly.

- 6 Detach the keyboard cover from the palm rest assembly and turn it over the keyboard to access its underside **(a)**.
Open the multimedia board cable connector **(b)** and disconnect the cable **(c)**.

- 7 If you will be using the multimedia board from the old keyboard cover, remove it by performing steps 3 and 4 of the “[Replacing the multimedia board](#)” procedure on [page 60](#).
- 8 Secure the multimedia board, with the connector facing up, on the new keyboard cover.
- 9 Insert the multimedia cable to its connector on the multimedia board, then close the clip to lock the cable in place.
- 10 Insert the tabs on the front side of the keyboard cover into the slots located on the top corners of the palm rest assembly, then press down on the back part.
- 11 Press down on the cover until it clicks in place.
The keyboard cover is correctly mounted when you can run your finger along the sides of the cover and find no gaps.
- 12 Close the LCD panel and turn the notebook over so the base is facing up.
- 13 Secure the keyboard cover with the screws removed in [step 3](#).

Caution

If the cover is not correctly installed, your notebook could be damaged when you try to close the LCD panel.

- 14 Reinstall the battery.

Replacing the multimedia board

Tools you need to complete this task:

Screws removed during this task:

-  3 black M2.5×6 (keyboard cover)

► To replace the multimedia board:

- 1 Complete the steps in [“Preparing the notebook”](#) on page 47.
- 2 Remove the keyboard cover by performing steps 2–6 of the [“Replacing the keyboard cover”](#) procedure on page 58.

Caution

The multimedia board is glued to the keyboard cover. Remove this board only if it is defective.

- 3 Insert a small flat-blade screwdriver or non-marring scribe between the multimedia board and the keyboard cover’s underside, and carefully pry the board loose.

- 4 Remove the multimedia board from the keyboard cover.

Note

A circuit board that is $>10 \text{ cm}^2$ has been highlighted with a yellow rectangle as shown in the above image. Follow the local regulations for disposing this type of circuit board.

- 5 Secure the new multimedia board, with the connector facing up, on the keyboard cover.
- 6 Insert the multimedia cable to its connector on the multimedia board, then close the clip to lock the cable in place.
- 7 Insert the tabs on the front side of the keyboard cover into the slots located on the top corners of the palm rest assembly, then press down on the back part.
- 8 Press down on the cover until it clicks in place.
The keyboard cover is correctly mounted when you can run your finger along the sides of the cover and find no gaps.
- 9 Close the LCD panel and turn the notebook over so the base is facing up.
- 10 Secure the keyboard cover with the screws removed in [step 3](#) of the ["Replacing the keyboard cover"](#) procedure on [page 58](#).

Caution

If the cover is not correctly installed, your notebook could be damaged when you try to close the LCD panel.

- 11 Reinstall the battery.

Replacing the keyboard

Tools you need to complete this task:

Screws removed during this task:

-  3 black M2.5×6 (keyboard cover)

► To replace the keyboard:

- 1 Complete the steps in [“Preparing the notebook”](#) on page 47.
- 2 Remove the keyboard cover by performing steps 2–6 of the [“Replacing the keyboard cover”](#) procedure on page 58.

Caution

The keyboard is connected to the notebook through the keyboard cable. Disconnect this cable first before pulling the keyboard away from the palm rest.

- 3 Lift the back edge of the keyboard slightly, then carefully slide it toward the LCD panel to release the keyboard retaining tabs from the palm rest.
- 4 Flip the keyboard over onto the touchpad area to access to the keyboard cable **(a)**.

Open the keyboard cable connector **(b)** and disconnect the cable **(c)**.

- 5 Insert the retaining tabs of the new keyboard into the slots located on the top side of the touchpad area.
- 6 Reach underneath the keyboard and insert the keyboard cable to its system board connector, then close the clip to lock the cable in place.

Important

The keyboard cable is correctly oriented if it is not twisted.

- 7 Gently press the keyboard down until it is flat all the way across.
- 8 Reinstall the keyboard cover by performing steps [9–13](#) of the “[Replacing the keyboard cover](#)” procedure on [page 58](#).
- 9 Reinstall the battery.

Replacing the LCD panel assembly

Tools you need to complete this task:

Screws removed during this task:

-  3 black M2.5×6 (keyboard cover)
-  2 black M2.5×6 (LCD panel hinges - bottom)
-  2 black M2.5×6+Nylok (LCD panel hinges - top)

► To replace the LCD panel assembly:

- 1 Complete the steps in [“Preparing the notebook”](#) on page 47.
- 2 If the notebook has a wireless card installed, complete the steps in [“Removing the bay cover”](#) on page 49, and then unplug the antenna cables. If there’s no wireless card installed, proceed to [step 5](#).
- 3 Remove the keyboard by performing steps 2–4 of the [“Replacing the keyboard”](#) procedure on page 62.

Caution

The keyboard is connected to the notebook through a keyboard cable. Disconnect this cable first before pulling the keyboard away from the palm rest assembly.

- 4 Turn the notebook over so the base is facing up.
- 5 Remove the base screws that secure the LCD panel hinges.

- 6 Turn the notebook over again so the palm rest is facing up.
- 7 Disconnect the LCD, webcam, and microphone cables from their system board connectors.

- 8 Release the LCD, webcam, and microphone cables from their latches.

- 9 If the notebook has a wireless card installed, note the antenna cable routing for later reference and then perform [step 10](#) to release the antenna cables from the palm rest.

If there's no wireless card installed, proceed to [step 11](#) to disconnect the power button board cable.

- 10 Release the antenna cables from their palm rest latches, and then pull them out from underneath the computer.

- 11 Disconnect the power button board cable from its system board connector, and then release it from its palm rest latches.

- 12 Carefully open the LCD panel to its fully extended position.
- 13 Move the LCD, webcam, and microphone cables away from the top hinge screws.
- 14 Remove the top hinge screws securing the LCD assembly.

- 15 Lift the LCD panel assembly up and away from the notebook.

- 16 Position the new LCD panel assembly on the notebook, and then secure it with the hinge screws removed in [step 14](#).
- 17 If the notebook has a wireless card installed, proceed to [step 18](#) to arrange the antenna cables.
If there's no wireless card installed, proceed to [step 19](#) to reconnect the power button board cable.
- 18 Refer to the antenna cable routing note made on [step 9](#) and secure the antenna cables to the palm rest before pulling the ends downward to the wireless card compartment.
- 19 Arrange the power button cable on the palm rest and reconnect it to its system board connector.
- 20 Arrange the LCD, webcam, and microphone cables on the palm rest and reconnect them to their system board connectors.
- 21 Close the LCD panel and turn the notebook over so the base is facing up.
- 22 If the notebook has a wireless card installed, reconnect the antenna cables and then reinstall the bay cover.
- 23 Return the base hinge screws removed in [step 5](#).
- 24 Turn the notebook over so the palm rest is facing up.
- 25 Reinstall the keyboard and the keyboard cover by performing steps [5–8](#) of the "[Replacing the keyboard](#)" procedure on [page 62](#).
- 26 Reinstall the battery.

■ Replacing the palm rest

Tools you need to complete this task:

or

Screws removed during this task:

-  1 black M2×5 (hard drive)
-  1 black M2.5×6 (optical drive)
-    3 black M2.5×6 (keyboard cover)
-   2 black M2.5×6 (LCD panel hinges - bottom)
-   2 black M2.5×6+Nylok (LCD panel hinges - top)
-          10 M2.5×6 black (palm rest - base side)
-    3 M2.5×6 black (palm rest - top side)

► To replace the palm rest:

- 1 Complete the steps in [“Preparing the notebook” on page 47](#).
- 2 Complete the steps in [“Removing the bay cover” on page 49](#).
- 3 If the notebook has a wireless card installed, unplug the antenna cables.
- 4 Remove the hard drive screw, and then remove the hard drive from its compartment.

- 5 Remove the optical drive screw.

- 6 Remove the keyboard cover by performing steps 2–6 of the “Replacing the keyboard cover” procedure on page 58.
- 7 Remove the keyboard by performing steps 3 and 4 of the “Replacing the keyboard” procedure on page 62.
- 8 Remove the LCD panel assembly by performing steps 5–15 of the “Replacing the LCD panel assembly” procedure on page 64.
- 9 Disconnect the speaker cable from the system board.

- 10 Open the multimedia cable connector (a) and disconnect the cable (b).

- 11 Open the touchpad cable connector (a) and disconnect the cable from the system board (b).

- 12 Turn the notebook over so the base is facing up.
- 13 Remove the screws securing the palm rest on the base side.

- 14 Turn the notebook over again so the palm rest is facing up.
- 15 Remove the screws securing the palm rest on the top side.

- 16 Locate the small gaps on the top side of the palm rest and insert a small flat-blade screwdriver or non-marring scribe into each gap to separate the palm rest from the base enclosure.

- 17 Once the top side is separated, pry loose the left and right sides of the palm rest, and finally the bottom side until all the palm rest retaining tabs have been released.
- 18 Lift the palm rest assembly from the base enclosure.

- 19 Place the new palm rest assembly on top of the base enclosure and press it down on all sides until it snaps into place.
- 20 Reconnect the speaker, multimedia, and touchpad cables to their respective system board connectors.
- 21 Secure the palm rest assembly with the screws removed in steps 13 and 15.
- 22 Reinstall the LCD panel assembly by performing steps 16–23 of the [“Replacing the LCD panel assembly”](#) procedure on [page 64](#).
- 23 Reinstall the keyboard and the keyboard cover by performing steps 5–8 of the [“Replacing the keyboard”](#) procedure on [page 62](#).
- 24 Return the optical screw drive in its place.
- 25 Reinstall the hard drive by performing steps 8 and 9 of the [“Replacing the hard drive”](#) procedure on [page 54](#).
- 26 If you have disconnected any wireless antennas, reconnect them now.
- 27 Reinstall the bay cover.

Replacing the speakers

Tools you need to complete this task:

or

Screws removed during this task:

-  1 black M2×5 (hard drive)
-  1 black M2.5×6 (optical drive)
-    3 black M2.5×6 (keyboard cover)
-   2 black M2.5×6 (LCD panel hinges - bottom)
-   2 black M2.5×6+Nylok (LCD panel hinges - top)
-         10 M2.5×6 black (palm rest - base side)
-    3 M2.5×6 black (palm rest - top side)
-   2 chrome M2×3 (speakers)

► To replace the speakers:

- 1 Complete the steps in [“Preparing the notebook” on page 47](#).
- 2 Remove the palm rest by performing steps 2–18 of the [“Replacing the palm rest” procedure on page 68](#).
- 3 Turn the palm rest over so that its underside is facing up.
- 4 Peel off the tape covering the left speaker screw.

- 5 Remove the speaker screws.

- 6 Release the speaker cable from the palm rest, and then remove the speakers.

- 7 Position the new speakers on the palm rest.
- 8 Secure the speakers with the screws removed in [step 5](#) and cover it with the tape that was detached in [step 4](#).
- 9 Secure the speaker cable on the palm rest latches
- 10 Reinstall the palm rest by performing steps [19–21](#) of the “[Replacing the palm rest](#)” procedure on [page 68](#).
- 11 Reinstall the LCD panel assembly by performing steps [16–23](#) of the “[Replacing the LCD panel assembly](#)” procedure on [page 64](#).
- 12 Reinstall the keyboard and the keyboard cover by performing steps [5–8](#) of the “[Replacing the keyboard](#)” procedure on [page 62](#).
- 13 Return the optical screw drive in its place.
- 14 Reinstall the hard drive by performing steps [8](#) and [9](#) of the “[Replacing the hard drive](#)” procedure on [page 54](#).
- 15 If you have disconnected any wireless antennas, reconnect them now.
- 16 Reinstall the bay cover.

Replacing the touchpad board

Tools you need to complete this task:

Screws removed during this task:

- 1 black M2×5 (hard drive)
- 1 black M2.5×6 (optical drive)
- 3 black M2.5×6 (keyboard cover)
- 2 black M2.5×6 (LCD panel hinge - bottom)
- 2 black M2.5×6+Nylok (LCD panel hinge - top)
- 10 M2.5×6 black (palm rest - base side)
- 3 M2.5×6 black (palm rest - top side)

► To replace the touchpad board:

- 1 Complete the steps in [“Preparing the notebook”](#) on page 47.
- 2 Remove the palm rest by performing steps 2–18 of the [“Replacing the palm rest”](#) procedure on page 68.
- 3 Turn the palm rest over so that its underside is facing up.
- 4 Open the touchpad board cable connector **(a)** and disconnect the cable **(b)**.

- 5 Remove the touchpad cable from the palm rest.

- 6 Peel off the tape protecting the touchpad board.

- 7 Note the orientation of the touchpad board for later reference in installing the new touchpad board.

- 8 Insert a small flat-blade screwdriver or non-marring scribe between the touchpad board and the palm rest's underside, and carefully pry the board loose.

- 9 Remove the touchpad board from the palm rest.

Note

A circuit board that is $>10 \text{ cm}^2$ has been highlighted with a yellow rectangle as shown in the above image. Follow the local regulations for disposing this type of circuit board.

- 10 Observing the same orientation as the old touchpad board, secure the new board on the palm rest.
- 11 Cover the new touchpad board with the tape removed in [step 6](#).
- 12 Insert the touchpad cable to the touchpad board cable connector, and then close the clip to lock the cable in place.
- 13 Reinstall the palm rest by performing steps [19–21](#) of the “[Replacing the palm rest](#)” procedure on [page 68](#).
- 14 Reinstall the LCD panel assembly by performing steps [16–23](#) of the “[Replacing the LCD panel assembly](#)” procedure on [page 64](#).
- 15 Reinstall the keyboard and the keyboard cover by performing steps [5–8](#) of the “[Replacing the keyboard](#)” procedure on [page 62](#).
- 16 Return the optical screw drive in its place.
- 17 Reinstall the hard drive by performing steps [8](#) and [9](#) of the “[Replacing the hard drive](#)” procedure on [page 54](#).
- 18 If you have disconnected any wireless antennas, reconnect them now.
- 19 Reinstall the bay cover.

Replacing the modem board

Tools you need to complete this task:

Phillips #0 screwdriver

Flat screwdriver

or

Non-marring plastic scribe

Screws removed during this task:

-  1 black M2×5 (hard drive)
-  1 black M2.5×6 (optical drive)
-    3 black M2.5×6 (keyboard cover)
-   2 black M2.5×6 (LCD panel hinge - bottom)
-   2 black M2.5×6+Nylok (LCD panel hinge - top)
-          10 M2.5×6 black (palm rest - base side)
-    3 M2.5×6 black (palm rest - top side)
-  1 black M2×4 (modem board)

► To replace the system board:

- 1 Complete the steps in [“Preparing the notebook” on page 47](#).
- 2 Complete the steps in [“Removing the battery” on page 48](#).
- 3 Remove the memory from the old system board and install it on the new system board by following the instructions in the [“Adding or replacing memory modules”](#) section on [page 50](#).
- 4 If the notebook has a wireless card installed, remove the card from the old system board and install it on the new system board by following the instructions in the [“Replacing the wireless card”](#) section on [page 52](#).
- 5 Remove the hard drive by performing steps 3 and 4 of the [“Replacing the hard drive”](#) procedure on [page 54](#).
- 6 Remove the optical drive by performing steps 3 and 4 of the [“Replacing the optical drive”](#) procedure on [page 56](#).
- 7 Remove the palm rest by following steps 6–18 of the [“Replacing the palm rest”](#) procedure on [page 68](#).

- 8 Disconnect the modem cable from the modem board.

- 9 Remove the modem board screw.

- 10 Remove the old modem board from the system board.

- 11 Connect the modem cable to the new modem board, and then attach to board to its system board connector.
- 12 Secure the new modem board with the screw removed in [step 9](#).
- 13 Reinstall the palm rest by performing steps [19–21](#) of the “[Replacing the palm rest](#)” procedure on [page 68](#).
- 14 Reinstall the LCD panel assembly by following the steps [16–23](#) of the “[Replacing the LCD panel assembly](#)” procedure on [page 64](#).
- 15 Reinstall the keyboard and the keyboard cover by performing steps [5–8](#) of the “[Replacing the keyboard](#)” procedure on [page 62](#).
- 16 Close the LCD panel and turn the notebook over so the base is facing up.
- 17 Reinstall the optical drive by performing steps [10](#) and [11](#) of the “[Replacing the optical drive](#)” procedure on [page 56](#).
- 18 Reinstall the hard drive by performing steps [8](#) and [9](#) of the “[Replacing the hard drive](#)” procedure on [page 54](#).
- 19 If you have disconnected any wireless antennas, reconnect them now.
- 20 Reinstall the bay cover.
- 21 Reinstall the battery.

Replacing the USB board

Tools you need to complete this task:

or

Screws removed during this task:

-  1 black M2×5 (hard drive)
-  1 black M2.5×6 (optical drive)
-    3 black M2.5×6 (keyboard cover)
-   2 black M2.5×6 (LCD panel hinge - bottom)
-   2 black M2.5×6+Nylok (LCD panel hinge - top)
-          10 M2.5×6 black (palm rest - base side)
-    3 M2.5×6 black (palm rest - top side)

► To replace the USB board:

- 1 Complete the steps in [“Preparing the notebook” on page 47](#).
- 2 Complete the steps in [“Removing the battery” on page 48](#).
- 3 Complete the steps in [“Removing the bay cover” on page 49](#).
- 4 If the notebook has a wireless card installed, unplug the antenna cables.
- 5 Remove the hard drive screw, and then remove the hard drive from its compartment.

- 6 Remove the optical drive screw.

- 7 Remove the palm rest by performing steps 6–18 of the “Replacing the palm rest” procedure on [page 68](#).
- 8 Disconnect the USB board and modem board cables from the USB board.

- 9 Remove the USB board screw.

- 10 Remove the USB board from the base enclosure.

- 11 Place the new USB board in the base enclosure and secure it with the screw removed in [step 9](#).
- 12 Connect the USB board and modem board cables to the new USB board.
- 13 Reinstall the palm rest by performing steps [19–21](#) of the “[Replacing the palm rest](#)” procedure on [page 68](#).
- 14 Reinstall the LCD panel assembly by performing steps [16–23](#) of the “[Replacing the LCD panel assembly](#)” procedure on [page 64](#).
- 15 Reinstall the keyboard and the keyboard cover by performing steps [5–8](#) of the “[Replacing the keyboard](#)” procedure on [page 62](#).
- 16 Close the LCD panel and turn the notebook over so the base is facing up.
- 17 Return the optical screw drive in its place.
- 18 Reinstall the hard drive by performing steps [8](#) and [9](#) of the “[Replacing the hard drive](#)” procedure on [page 54](#).
- 19 If you have disconnected any wireless antennas, reconnect them now.
- 20 Reinstall the bay cover.
- 21 Reinstall the battery.

Replacing the Bluetooth module

Tools you need to complete this task:

Phillips #0 screwdriver

Flat screwdriver

or

Non-marring plastic scribe

Screws removed during this task:

-  1 black M2×5 (hard drive)
-  1 black M2.5×6 (optical drive)
-    3 black M2.5×6 (keyboard cover)
-   2 black M2.5×6 (LCD panel hinge - bottom)
-   2 black M2.5×6+Nylok (LCD panel hinge - top)
-          10 M2.5×6 black (palm rest - base side)
-    3 M2.5×6 black (palm rest - top side)

► To replace the Bluetooth module:

- 1 Complete the steps in [“Preparing the notebook” on page 47.](#)
- 2 Complete the steps in [“Removing the battery” on page 48.](#)
- 3 Complete the steps in [“Removing the bay cover” on page 49.](#)
- 4 If the notebook has a wireless card installed, unplug the antenna cables.
- 5 Remove the hard drive screw, and then remove the hard drive from its compartment.

- 6 Remove the optical drive screw.

- 7 Remove the palm rest by performing steps 6–18 of the “Replacing the palm rest” procedure on [page 68](#).
- 8 Disconnect the Bluetooth cable from the Bluetooth module.

- 9 Release the Bluetooth module from the tabs securing it.

- 10 Secure the new Bluetooth module on the base enclosure and connect the Bluetooth cable to it.
- 11 Reinstall the palm rest by performing steps 19–21 of the “[Replacing the palm rest](#)” procedure on [page 68](#).
- 12 Reinstall the LCD panel assembly by performing steps 16–23 of the “[Replacing the LCD panel assembly](#)” procedure on [page 64](#).
- 13 Reinstall the keyboard and the keyboard cover by performing steps 5–8 of the “[Replacing the keyboard](#)” procedure on [page 62](#).
- 14 Close the LCD panel and turn the notebook over so the base is facing up.
- 15 Return the optical screw drive in its place.
- 16 Reinstall the hard drive by performing steps 8 and 9 of the “[Replacing the hard drive](#)” procedure on [page 54](#).
- 17 If you have disconnected any wireless antennas, reconnect them now.
- 18 Reinstall the bay cover.
- 19 Reinstall the battery.

Replacing the system board

Tools you need to complete this task:

Screws removed during this task:

-  1 black M2×5 (hard drive)
-  1 black M2.5×6 (optical drive)
-    3 black M2.5×6 (keyboard cover)
-   2 black M2.5×6 (LCD panel hinge - bottom)
-   2 black M2.5×6+Nyllok (LCD panel hinge - top)
-           10 M2.5×6 black (palm rest - base side)
-    3 M2.5×6 black (palm rest - top side)
-  1 black M2×4 (system board)

► To replace the system board:

- 1 Complete the steps in [“Preparing the notebook” on page 47](#).
- 2 Complete the steps in [“Removing the battery” on page 48](#).
- 3 Remove the memory from the old system board and install it on the new system board by following the instructions in the [“Adding or replacing memory modules”](#) section on [page 50](#).
- 4 If the notebook has a wireless card installed, remove the card from the old system board and install it on the new system board by following the instructions in the [“Replacing the wireless card”](#) section on [page 52](#).
- 5 Remove the hard drive by performing steps 3 and 4 of the [“Replacing the hard drive”](#) procedure on [page 54](#).
- 6 Remove the optical drive by performing steps 3 and 4 of the [“Replacing the optical drive”](#) procedure on [page 56](#).
- 7 Remove the palm rest by following steps 6–18 of the [“Replacing the palm rest”](#) procedure on [page 68](#).
- 8 Remove the modem board by following steps 8–10 of the [“Replacing the modem board”](#) procedure on [page 77](#), then disconnect the Bluetooth module cable from its system board connector.

- 9 Disconnect the USB board cable from its system board connector.

- 10 Remove the system board screw.

Discrete model

UMA model

- 11 Carefully remove the system board from the base enclosure.

Discrete model

UMA model

Note

A circuit board that is $>10\text{ cm}^2$ has been highlighted with a yellow rectangle as shown in the previous image. Follow the local regulations for disposing this type of circuit board.

The RTC battery has been highlighted with a yellow circle in the previous image. Detach the RTC battery and follow the local regulations for disposing it.

- 12 Turn the system board over and remove the cooling assembly by performing steps 4–7 of the “[Replacing the cooling assembly](#)” procedure on [page 89](#).
- 13 If your new system board does not include a processor, remove the processor from the old system board and install it on the new system board by performing steps 4–7 in the “[Replacing the processor](#)” section on [page 92](#).
- 14 Reinstall the cooling assembly by performing steps 9–12 of the “[Replacing the cooling assembly](#)” procedure on [page 89](#).
- 15 Place the new system board in the base enclosure and secure it with the screw removed in [step 9](#).
- 16 Reconnect the USB board and Bluetooth module cables to their system board connectors.
- 17 Reinstall the modem module by performing steps 11–12 of the “[Replacing the modem board](#)” procedure on [page 77](#).
- 18 Reinstall the palm rest by performing steps 19–21 of the “[Replacing the palm rest](#)” procedure on [page 68](#).
- 19 Reinstall the LCD panel assembly by following the steps 16–23 of the “[Replacing the LCD panel assembly](#)” procedure on [page 64](#).
- 20 Reinstall the keyboard and the keyboard cover by performing steps 5–8 of the “[Replacing the keyboard](#)” procedure on [page 62](#).
- 21 Close the LCD panel and turn the notebook over so the base is facing up.
- 22 Reinstall the optical drive by performing steps 10 and 11 of the “[Replacing the optical drive](#)” procedure on [page 56](#).
- 23 Reinstall the hard drive by performing steps 8 and 9 of the “[Replacing the hard drive](#)” procedure on [page 54](#).
- 24 If you have disconnected any wireless antennas, reconnect them now.
- 25 Reinstall the bay cover.
- 26 Reinstall the battery.

Replacing the cooling assembly

Tools you need to complete this task:

Additional materials you need to complete this task:

- Soft cloth and isopropyl alcohol; or alcohol pad
- Thermal grease

Screws removed during this task:

- 1 black M2×5 (hard drive)
- 1 black M2.5×6 (optical drive)
- 3 black M2.5×6 (keyboard cover)
- 2 black M2.5×6 (LCD panel hinge - bottom)
- 2 black M2.5×6+Nylok (LCD panel hinge - top)
- 10 M2.5×6 black (palm rest - base side)
- 3 M2.5×6 black (palm rest - top side)
- 1 black M2×4 (system board)

► To replace the cooling assembly:

- 1 Complete the steps in [“Preparing the notebook”](#) on page 47.
- 2 Remove the system board by performing steps 2–11 of the [“Replacing the system board”](#) procedure on page 86.
- 3 Turn the system board over to access the cooling fan cable.
- 4 Disconnect the cooling fan cable from its system board connector.

Discrete model

UMA model

- 5 Loosen the spring-loaded captive screws securing the cooling assembly. Follow the screw sequence indicated on the below images.

Discrete model

UMA model

- 6 Remove the cooling assembly from the system board.

Discrete model

UMA model

- 7 Lay the cooling assembly down in an upright position to avoid tainting your work space with thermal grease.

- 8 Remove the barcode sticker on top of the processor.

Discrete model

UMA model

- 9 Moisten a soft cloth with isopropyl alcohol and clean the processor die to remove any thermal grease residue. Wipe the die surface several times to make sure that no particles or dust contaminants are evident. Allow the alcohol to evaporate before continuing.

Caution

Do not touch the contact surface of the new cooling assembly nor the processor die as this may leave dead skin cells or oils from your finger that can result in poor thermal grease performance.

- 10 Apply just enough thermal grease to evenly coat the surface of the processor die.
- 11 Place the new cooling assembly on the system board and tighten its captive screws to secure it in place. Follow the sequence of the number beside each screw when securing the cooling assembly.
- 12 Reconnect the cooling fan cable to its system board connector.
- 13 Reinstall the system board by performing steps 15 and 16 of the “[Replacing the system board](#)” procedure on [page 86](#).
- 14 Reinstall the palm rest by performing steps 19–21 of the “[Replacing the palm rest](#)” procedure on [page 68](#).
- 15 Reinstall the LCD panel assembly by performing steps 16–23 of the “[Replacing the LCD panel assembly](#)” procedure on [page 64](#).
- 16 Reinstall the keyboard and the keyboard cover by performing steps 5–8 of the “[Replacing the keyboard](#)” procedure on [page 62](#).
- 17 Close the LCD panel and turn the notebook over so the base is facing up.
- 18 Reinstall the optical drive by performing steps 10 and 11 of the “[Replacing the optical drive](#)” procedure on [page 56](#).
- 19 Reinstall the hard drive by performing steps 8 and 9 of the “[Replacing the hard drive](#)” procedure on [page 54](#).
- 20 If you have disconnected any wireless antennas, reconnect them now.
- 21 Reinstall the bay cover.
- 22 Reinstall the battery.

Replacing the processor

Tools you need to complete this task:

Additional materials you need to complete this task:

- Soft cloth and isopropyl alcohol; or alcohol pad
- Thermal grease

Screws removed during this task:

- 1 black M2×5 (hard drive)
- 1 black M2.5×6 (optical drive)
- 3 black M2.5×6 (keyboard cover)
- 2 black M2.5×6 (LCD panel hinge - bottom)
- 2 black M2.5×6+Nylok (LCD panel hinge - top)
- 10 M2.5×6 black (palm rest - base side)
- 3 M2.5×6 black (palm rest - top side)
- 1 black M2×4 (system board)

► To replace the processor:

- 1 Complete the steps in [“Preparing the notebook”](#) on page 47.
- 2 Remove the cooling assembly by performing steps 2–7 of the [“Replacing the cooling assembly”](#) procedure on page 89.
- 3 Remove the barcode sticker on top of the processor.

Discrete model

UMA model

- 4 Use a flat-blade screwdriver to turn the processor lock screw counter-clockwise.

Discrete model

UMA model

- 5 Remove the old processor from the system board.

Discrete model

UMA model

- 6 Align pin 1 of the new processor (indicated by the gold arrow on the corner of the processor) with the beveled corner of the processor socket. The processor will easily fit into the socket if you oriented it properly.
- 7 Use a flat-blade screwdriver to turn the lock screw 180° clockwise to secure the processor in place.
- 8 Apply just enough thermal grease to evenly coat the surface of the processor die.
- 9 Reinstall the cooling assembly by performing steps 9–12 of the “[Replacing the cooling assembly](#)” procedure on [page 89](#).
- 10 Reinstall the system board by performing steps 15 and 16 of the “[Replacing the system board](#)” procedure on [page 86](#).
- 11 Reinstall the palm rest by performing steps 19–21 of the “[Replacing the palm rest](#)” procedure on [page 68](#).
- 12 Reinstall the LCD panel assembly by performing steps 16–23 of the “[Replacing the LCD panel assembly](#)” procedure on [page 64](#).
- 13 Reinstall the keyboard and the keyboard cover by performing steps 5–8 of the “[Replacing the keyboard](#)” procedure on [page 62](#).
- 14 Close the LCD panel and turn the notebook over so the base is facing up.

- 15 Reinstall the optical drive by performing steps 10 and 11 of the “[Replacing the optical drive](#)” procedure on [page 56](#).
- 16 Reinstall the hard drive by performing steps 8 and 9 of the “[Replacing the hard drive](#)” procedure on [page 54](#).
- 17 If you have disconnected any wireless antennas, reconnect them now.
- 18 Reinstall the bay cover.
- 19 Reinstall the battery.

Replacing the LCD front panel

Tools you need to complete this task:

Screws removed during this task:

- 1 black M2×5 (hard drive)
- 1 black M2.5×6 (optical drive)
- 3 black M2.5×6 (keyboard cover)
- 2 black M2.5×6 (LCD panel hinges - bottom)
- 2 black M2.5×6+Nylok (LCD panel hinges - top)
- 4 black M2.5×6+Nylok (LCD front panel)
- 2 chrome M2×4 (LCD hinge covers)

► To replace the LCD front panel:

- 1 Complete the steps in [“Preparing the notebook”](#) on page 47.
- 2 Remove the LCD panel assembly by performing steps 2–15 of the [“Replacing the LCD panel assembly”](#) procedure on page 64.
- 3 Remove the rubber inserts from the corners of the LCD front panel.

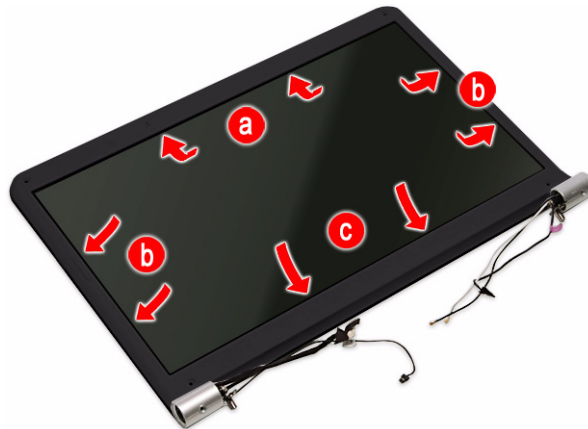

- 4 Remove the LCD front panel screws.

- 5 Remove the LCD hinge cover screws.

- 6 Carefully pry loose the front panel from the LCD assembly lid. Start on the top side (a), continue to the left and right sides (b), and finally the bottom side (c).

- 7 Remove the front panel.

- 8 Place the new front panel on top of the LCD assembly lid.
Make sure that the LCD, webcam, microphone, antenna, and power button cables are properly routed on the hinge sides.
- 9 Press the front panel on all sides until it snaps into place.
Make sure that there is no gap between the front panel and the LCD assembly lid.
- 10 Secure the front panel with screws removed in steps 4 and 5.
- 11 Return the LCD front panel rubber inserts to their places.
- 12 Reinstall the LCD panel assembly by performing steps 16–23 of the “Replacing the LCD panel assembly” procedure on page 64.
- 13 Turn the notebook over so the palm rest is facing up.
- 14 Reinstall the keyboard and the keyboard cover by performing steps 5–8 of the “Replacing the keyboard” procedure on page 62.
- 15 Reinstall the battery.

Replacing the webcam

Tools you need to complete this task:

Screws removed during this task:

-  1 black M2×5 (hard drive)
-  1 black M2.5×6 (optical drive)
-    3 black M2.5×6 (keyboard cover)
-   2 black M2.5×6 (LCD panel hinges - bottom)
-   2 black M2.5×6+Nylok (LCD panel hinges - top)
-     4 black M2.5×6+Nylok (LCD front panel)
-   2 chrome M2×4 (LCD hinge covers)
-     4 black M2.5×6+Nylok (LCD front panel)

► To replace the webcam:

- 1 Complete the steps in [“Preparing the notebook”](#) on page 47.
- 2 Remove the LCD panel assembly by performing steps 2–15 of the [“Replacing the LCD panel assembly”](#) procedure on page 64.
- 3 Remove the LCD front panel by performing steps 3–7 of the [“Replacing the LCD front panel”](#) procedure on page 95.
- 4 Disconnect the webcam board cable.

- 5 Place the new webcam on the top side of the LCD assembly lid.
- 6 Reinstall the LCD front panel by performing steps 8–11 of the “[Replacing the LCD front panel](#)” procedure on [page 95](#).
Make sure the webcam lens is aligned with camera peephole on the LCD front panel before you secure the panel in place.
- 7 Reinstall the LCD panel assembly by performing steps 16–23 of the “[Replacing the LCD panel assembly](#)” procedure on [page 64](#).
- 8 Turn the notebook over so the palm rest is facing up.
- 9 Reinstall the keyboard and the keyboard cover by performing steps 5–8 of the “[Replacing the keyboard](#)” procedure on [page 62](#).
- 10 Reinstall the battery.

Replacing the LCD

Tools you need to complete this task:

Screws removed during this task:

-  1 black M2×5 (hard drive)
-  1 black M2.5×6 (optical drive)
-    3 black M2.5×6 (keyboard cover)
-   2 black M2.5×6 (LCD panel hinges - bottom)
-   2 black M2.5×6+Nylok (LCD panel hinges - top)
-     4 black M2.5×6+Nylok (LCD front panel)
-   2 chrome M2×4 (LCD hinge covers)
-     4 black M2.5×6+Nylok (LCD front panel)
-     4 black M2.5×5 (LCD panel hinges)
-     4 chrome M2×3 (LCD panel brackets)

► To replace the LCD:

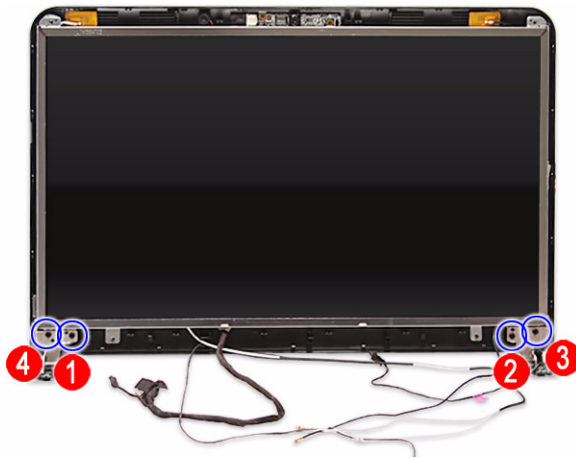

- 1 Complete the steps in [“Preparing the notebook” on page 47](#).
- 2 Remove the LCD panel assembly by performing steps 2–15 of the [“Replacing the LCD panel assembly” procedure on page 64](#).
- 3 Remove the LCD front panel by performing steps 3–7 of the [“Replacing the LCD front panel” procedure on page 95](#).
- 4 Release the LCD, webcam, microphone, antenna, and power button from their LCD assembly lid latches.

- 5 Disconnect the webcam cable from the webcam board.

- 6 Remove the LCD hinge screws.

- 7 Remove the LCD from the LCD assembly lid.

- 8 Lay the LCD on its front to access the LCD-webcam cable.

- 9 Detach the LCD-webcam from the LCD's underside (a) and disconnect it from the LCD PCB (b).

- 10 Remove the screws securing the LCD panel brackets.

- 11 Attach the LCD panel brackets and the LCD cable to the new LCD.
- 12 Place the new LCD on the LCD assembly lid and secure it with the screws removed in [step](#) .
- 13 Reinstall the LCD front panel by performing steps 8–11 of the “[Replacing the LCD front panel](#)” procedure on [page 95](#).
- 14 Reinstall the LCD panel assembly by performing steps 16–23 of the “[Replacing the LCD panel assembly](#)” procedure on [page 64](#).
- 15 Turn the notebook over so the palm rest is facing up.
- 16 Reinstall the keyboard and the keyboard cover by performing steps 5–8 of the “[Replacing the keyboard](#)” procedure on [page 62](#).
- 17 Reinstall the battery.

Replacing the LCD panel hinge brackets

Tools you need to complete this task:

Screws removed during this task:

- 1 black M2×5 (hard drive)
- 1 black M2.5×6 (optical drive)
- 3 black M2.5×6 (keyboard cover)
- 2 black M2.5×6 (LCD panel hinges - bottom)
- 2 black M2.5×6+Nylok (LCD panel hinges - top)
- 4 black M2.5×6+Nylok (LCD front panel)
- 2 chrome M2×4 (LCD hinge covers)
- 4 black M2.5×6+Nylok (LCD front panel)
- 4 black M2.5×5 (LCD panel hinges)
- 4 chrome M2×3 (LCD panel brackets)

► To replace the LCD:

- 1 Complete the steps in [“Preparing the notebook”](#) on page 47.
- 2 Remove the LCD panel assembly by performing steps 2–15 of the [“Replacing the LCD panel assembly”](#) procedure on page 64.
- 3 Remove the LCD front panel by performing steps 3–7 of the [“Replacing the LCD front panel”](#) procedure on page 95.
- 4 Remove the LCD by performing steps 4–7 of the [“Replacing the LCD”](#) procedure on page 100.
- 5 Remove the screws securing the LCD panel brackets.

- 6 Attach the new LCD panel brackets to the LCD.
- 7 Place the LCD on the LCD assembly lid and secure it with the screws removed in [step](#) .
- 8 Reinstall the LCD front panel by performing steps [8–11](#) of the “[Replacing the LCD front panel](#)” procedure on [page 95](#).
- 9 Reinstall the LCD panel assembly by performing steps [16–23](#) of the “[Replacing the LCD panel assembly](#)” procedure on [page 64](#).
- 10 Turn the notebook over so the palm rest is facing up.
- 11 Reinstall the keyboard and the keyboard cover by performing steps [5–8](#) of the “[Replacing the keyboard](#)” procedure on [page 62](#).
- 12 Reinstall the battery.

Replacing the power button board

Tools you need to complete this task:

Screws removed during this task:

-  1 black M2×5 (hard drive)
 -  1 black M2.5×6 (optical drive)
 -    3 black M2.5×6 (keyboard cover)
 -   2 black M2.5×6 (LCD panel hinges - bottom)
 -   2 black M2.5×6+Nylok (LCD panel hinges - top)
 -     4 black M2.5×6+Nylok (LCD front panel)
 -   2 chrome M2×4 (LCD hinge covers)
 -     4 black M2.5×6+Nylok (LCD front panel)
 -     4 black M2.5×5 (LCD panel hinges)
- To replace the power button board:
- 1 Complete the steps in [“Preparing the notebook”](#) on page 47.
 - 2 Remove the LCD panel assembly by performing steps 2–15 of the [“Replacing the LCD panel assembly”](#) procedure on page 64.
 - 3 Remove the LCD front panel by performing steps 3–7 of the [“Replacing the LCD front panel”](#) procedure on page 95.
 - 4 Remove the LCD by performing steps 4–7 of the [“Replacing the LCD”](#) procedure on page 100.

- 5 Note the orientation of the power button board for later reference and then remove the board from the LCD assembly lid.

- 6 Disconnect the power button cable from the board.

- 7 Connect the power button cable to the new power button board.
- 8 Position the new power button board on the LCD assembly lid making sure it is in the same orientation noted on [step 5](#).
The board should fit snugly against the spring to ensure proper contact when pressing the power button.
- 9 Place the LCD back on the LCD assembly lid.
- 10 Return the hinge screws to their places.
- 11 Reinstall the LCD front panel by performing steps [8–11](#) of the “[Replacing the LCD front panel](#)” procedure on [page 95](#).
- 12 Reinstall the LCD panel assembly by performing steps [16–23](#) of the “[Replacing the LCD panel assembly](#)” procedure on [page 64](#).
- 13 Turn the notebook over so the palm rest is facing up.
- 14 Reinstall the keyboard and the keyboard cover by performing steps [5–8](#) of the “[Replacing the keyboard](#)” procedure on [page 62](#).
- 15 Reinstall the battery.

Replacing the Kensington lock cap

Tools you need to complete this task:

Screws removed during this task:

-  1 black M2×5 (hard drive)
 -  1 black M2.5×6 (optical drive)
 -    3 black M2.5×6 (keyboard cover)
 -   2 black M2.5×6 (LCD panel hinges - bottom)
 -   2 black M2.5×6+Nylok (LCD panel hinges - top)
 -     4 black M2.5×6+Nylok (LCD front panel)
 -   2 chrome M2×4 (LCD hinge covers)
 -     4 black M2.5×6+Nylok (LCD front panel)
 -    3 black (Kensington lock cap)
- To replace the Kensington lock cap:
- 1 Complete the steps in [“Preparing the notebook”](#) on page 47.
 - 2 Remove the LCD panel assembly by performing steps 2–15 of the [“Replacing the LCD panel assembly”](#) procedure on page 64.
 - 3 Remove the LCD front panel by performing steps 3–7 of the [“Replacing the LCD front panel”](#) procedure on page 95.
 - 4 Move the LCD, webcam, microphone, and antenna cables away from the Kensington lock cap screws.

- 5 Note the orientation of the Kensington lock cap for later reference and then remove the screws securing it.

- 6 Detach the Kensington lock cap from the left hinge.

- 7 Position the new Kensington lock cap on the left hinge making sure it is in the same orientation noted on [step 5](#).
- 8 Secure the cap with the screws removed in [step 5](#).
- 9 Reinstall the LCD front panel by performing steps [8–11](#) of the “[Replacing the LCD front panel](#)” procedure on [page 95](#).
- 10 Reinstall the LCD panel assembly by performing steps [16–23](#) of the “[Replacing the LCD panel assembly](#)” procedure on [page 64](#).
- 11 Turn the notebook over so the palm rest is facing up.
- 12 Reinstall the keyboard and the keyboard cover by performing steps [5–8](#) of the “[Replacing the keyboard](#)” procedure on [page 62](#).
- 13 Reinstall the battery.

Replacing the microphone

Tools you need to complete this task:

Screws removed during this task:

- 1 black M2×5 (hard drive)
- 1 black M2.5×6 (optical drive)
- 3 black M2.5×6 (keyboard cover)
- 2 black M2.5×6 (LCD panel hinges - bottom)
- 2 black M2.5×6+Nylok (LCD panel hinges - top)
- 4 black M2.5×6+Nylok (LCD front panel)
- 2 chrome M2×4 (LCD hinge covers)
- 4 black M2.5×6+Nylok (LCD front panel)
- 4 black M2.5×5 (LCD panel hinges)

► To replace the microphone:

- 1 Complete the steps in [“Preparing the notebook”](#) on page 47.
- 2 Remove the LCD panel assembly by performing steps 2–15 of the [“Replacing the LCD panel assembly”](#) procedure on page 64.
- 3 Remove the LCD front panel by performing steps 3–7 of the [“Replacing the LCD front panel”](#) procedure on page 95.
- 4 Remove the LCD by performing steps 4–7 of the [“Replacing the LCD”](#) procedure on page 100.
- 5 Release the microphone cable from the adhesive tabs securing it.

- 6 Remove the microphone from the LCD assembly lid.

- 7 Place the new microphone on the LCD assembly lid and secure its cable on the adhesive tabs.
- 8 Place the LCD back on the LCD assembly lid.
- 9 Return the hinge screws to their places.
- 10 Reinstall the LCD front panel by performing steps 8–11 of the [“Replacing the LCD front panel”](#) procedure on [page 95](#).
- 11 Reinstall the LCD panel assembly by performing steps 16–23 of the [“Replacing the LCD panel assembly”](#) procedure on [page 64](#).
- 12 Turn the notebook over so the palm rest is facing up.
- 13 Reinstall the keyboard and the keyboard cover by performing steps 5–8 of the [“Replacing the keyboard”](#) procedure on [page 62](#).
- 14 Reinstall the battery.

Replacing the antennas

Tools you need to complete this task:

Screws removed during this task:

- 1 black M2×5 (hard drive)
- 1 black M2.5×6 (optical drive)
- 3 black M2.5×6 (keyboard cover)
- 2 black M2.5×6 (LCD panel hinges - bottom)
- 2 black M2.5×6+Nylok (LCD panel hinges - top)
- 4 black M2.5×6+Nylok (LCD front panel)
- 2 chrome M2×4 (LCD hinge covers)
- 4 black M2.5×6+Nylok (LCD front panel)
- 4 black M2.5×5 (LCD panel hinges)

► To replace the antennas:

- 1 Complete the steps in [“Preparing the notebook”](#) on page 47.
- 2 Remove the LCD panel assembly by performing steps 2–15 of the [“Replacing the LCD panel assembly”](#) procedure on page 64.
- 3 Remove the LCD front panel by performing steps 3–7 of the [“Replacing the LCD front panel”](#) procedure on page 95.
- 4 Remove the LCD by performing steps 4–7 of the [“Replacing the LCD”](#) procedure on page 100.
- 5 Release the antenna cables from the adhesive tabs securing them.

- 6 Carefully pry the antenna boards loose from the LCD assembly lid to remove the antennas.

- 7 Secure the new antenna on the LCD assembly lid and route their cables underneath the adhesive tabs.
- 8 Place the LCD back on the LCD assembly lid.
- 9 Return the hinge screws to their places.
- 10 Reinstall the LCD front panel by performing steps 8–11 of the [“Replacing the LCD front panel”](#) procedure on [page 95](#).
- 11 Reinstall the LCD panel assembly by performing steps 16–23 of the [“Replacing the LCD panel assembly”](#) procedure on [page 64](#).
- 12 Turn the notebook over so the palm rest is facing up.
- 13 Reinstall the keyboard and the keyboard cover by performing steps 5–8 of the [“Replacing the keyboard”](#) procedure on [page 62](#).
- 14 Reinstall the battery.

Replacing the LCD assembly lid

Tools you need to complete this task:

Screws removed during this task:

-  1 black M2×5 (hard drive)
-  1 black M2.5×6 (optical drive)
-    3 black M2.5×6 (keyboard cover)
-   2 black M2.5×6 (LCD panel hinges - bottom)
-   2 black M2.5×6+Nylok (LCD panel hinges - top)
-     4 black M2.5×6+Nylok (LCD front panel)
-   2 chrome M2×4 (LCD hinge covers)
-     4 black M2.5×6+Nylok (LCD front panel)
-     4 black M2.5×5 (LCD panel hinges)

► To replace the antennas:

- 1 Complete the steps in [“Preparing the notebook”](#) on page 47.
- 2 Remove the LCD panel assembly by performing steps 2–15 of the [“Replacing the LCD panel assembly”](#) procedure on page 64.
- 3 Remove the LCD front panel by performing steps 3–7 of the [“Replacing the LCD front panel”](#) procedure on page 95.
- 4 Remove the LCD by performing steps 4–7 of the [“Replacing the LCD”](#) procedure on page 100.
- 5 If you are going to use the same Kensington lock cap, power button assembly, webcam, microphone and wireless antennas, remove these items from the old LCD assembly lid and attach them to the new one. Refer to the related replacement procedure on previous pages for instructions.
- 6 Place the LCD on the new LCD assembly lid.
- 7 Return the hinge screws to their places.

- 8 Reinstall the LCD front panel by performing steps 8–11 of the “[Replacing the LCD front panel](#)” procedure on [page 95](#).
- 9 Reinstall the LCD panel assembly by performing steps 16–23 of the “[Replacing the LCD panel assembly](#)” procedure on [page 64](#).
- 10 Turn the notebook over so the palm rest is facing up.
- 11 Reinstall the keyboard and the keyboard cover by performing steps 5–8 of the “[Replacing the keyboard](#)” procedure on [page 62](#).
- 12 Reinstall the battery.

CHAPTER 4

Troubleshooting

- Diagnosing problems
- System test procedures
- Power-On Self-Test (POST) error message
- Index of error messages
- Phoenix BIOS beep codes
- Symptom-to-FRU error messages
- Intermittent problems
- Undetermined problems

Diagnosing problems

Use the following procedure as a guide for diagnosing notebook problems.

Important

The diagnostic tests are intended to test only Acer products. Non-Acer products, prototype cards, or modified options can give false errors and invalid system responses.

- 1 Obtain the failing symptoms in as much detail as possible.
- 2 Verify the symptoms by attempting to re-create the failure by running the diagnostic test or by repeating the same operation.
- 3 Use the following table with the verified symptom to determine which page to go to.

| Symptoms (Verified) | Go To |
|---|--|
| Power failure. (The power indicator does not go on or stay on.) | "Testing the power system" on page 118 |
| POST does not complete. No beep or error codes are indicated. | <ul style="list-style-type: none"> ▪ "Power-On Self-Test (POST) error message" on page 120 ▪ "Undetermined problems" on page 133 |
| POST detects an error and displayed messages on screen. | "Index of error messages" on page 121 |
| Other symptoms (LCD display problems or others). | "Power-On Self-Test (POST) error message" on page 120 |
| Symptoms cannot be re-created (intermittent problems). | <ul style="list-style-type: none"> ▪ Use the customer-reported symptoms and go to "Power-On Self-Test (POST) error message" on page 120 ▪ "Intermittent problems" on page 132 ▪ "Undetermined problems" on page 133 |

System test procedures

Testing the optical drive

Use the following procedure to isolate a problem in an optical drive controller, driver, or drive.

 **Important**
Make sure that the CD-ROM does not have any label attached to it. The label can cause damage to the drive or can cause the drive to fail.

▶ To test the optical drive:

- 1 Boot from the diagnostics diskette and start the diagnostics program.
- 2 Run the CD-ROM Test and see if the test completes successfully.
- 3 Follow the instructions in the message window.
If an error occurs, reconnect the connector on the system board.
If the error still remains:
- 4 Reconnect the external optical drive to a USB jack.
- 5 Replace the external optical drive.
- 6 Replace the system board.

Testing the keyboard or auxiliary input device

If the internal keyboard does not work or an unexpected character appears, make sure that the flexible cable extending from the keyboard is correctly seated in the connector on the system board. If the keyboard cable is connected correctly, run the Keyboard Test.

 **Important**
Disconnect any external keyboards before testing the built-in keyboard.

If the tests detect a keyboard problem, do the following one at a time.

▶ To correct the problem:

- 1 Reconnect the keyboard cable to the system board.
- 2 Replace the keyboard.
- 3 Replace the system board.

 **Important**
Do not replace a non-defective FRU.

The following auxiliary input devices are supported by this notebook:

- Numeric keypad
- External keyboard

If any of these devices do not work, reconnect the cable connector and repeat the failing operation.

Testing the memory

Memory errors can stop your programs, show error messages on the screen, or hang the system.

► To test the memory:

- 1 Boot from the diagnostics diskette and start the diagnostics program.
- 2 Run the Memory Test and see if the test completes successfully.
- 3 Press F2 in the test items.
- 4 Follow the instructions in the message window.

Important

Make sure that each memory card is fully installed into the connector. A loose connection can cause an error.

Testing the power system

► To test for a power problem:

- Turn on the notebook using each of the following power sources:
 - Remove the battery pack, connect the power adapter, then make sure that the notebook turns on using AC power.
 - Disconnect the power adapter, install a charged battery pack, then make sure that power is supplied by the battery pack.

If you suspect a power problem, complete the appropriate power supply check:

- [“Check the power adapter” on page 118](#)
- [“Check the battery pack” on page 119](#)

Check the power adapter

Unplug the power adapter cable from the notebook and measure the output voltage at the power adapter cable plug. See the following figure.

Pin 1: +19 to +20.5V
Pin 2: 0V, Ground

- If the voltage is not correct, replace the power adapter.
- If the voltage is within the range, do the following:
 - Replace the system board.
 - If the problem is not corrected, see [“Undetermined problems” on page 133](#).
 - If the power-on indicator does not light up, check the power adapter’s power cord for correct continuity and installation.
 - If the operational charge does not work, see [“Check the battery pack” on page 119](#).

Important

An audible noise from the power adapter does not always indicate a defect.

Check the battery pack

- ▶ To check the battery pack using software:
 - 1 Open Power Management in the Windows Control Panel.
 - 2 In Power Meter, make sure that the parameters shown for Current Power Source and Total Battery Power Remaining are correct.
 - 3 Repeat the steps 1 and 2, for both battery and adapter. This helps you identify first the problem is on recharging or discharging.
-
- ▶ To check the battery pack using hardware:
 - 1 Turn off the notebook.
 - 2 Remove the battery pack and measure the voltage between battery terminals 1 (+) and 6 (ground).
 - 3 If the voltage is still less than 7.5 Vdc after recharging, replace the battery.

 **Important**

To check the battery charge operation, use a discharged battery pack or a battery pack that has less than 50% of the total power remaining when installed in the notebook.

If the battery status indicator does not light up, remove the battery pack and let it return to room temperature. Re-install the battery pack.

If the charge indicator still does not light up, replace the battery pack. If the charge indicator still does not light up, replace the DC/DC charger board.

Testing the touchpad

If the touchpad doesn't work, do the following actions one at a time to correct the problem.

- ▶ To test the touchpad:
 - 1 Reconnect the touchpad cables.
 - 2 Replace the touchpad.
 - 3 Replace the system board.

 **Important**

Do not replace a non-defective FRU.

After you use the touchpad, the pointer may drift on the screen for a short time. This self-acting pointer movement can occur when a slight, steady pressure is applied to the touchpad pointer. This symptom is not a hardware problem. No service actions are necessary if the pointer movement stops in a short period of time.

Power-On Self-Test (POST) error message

The POST error message index lists the error message and their possible causes. The most likely cause is listed first.

**Important**

Perform the FRU replacement or actions in the sequence shown in the FRU/Action column. If the FRU replacement does not solve the problem, put the original part back in the notebook. Do not replace a non-defective FRU.

This index can also help you determine the next possible FRU to be replaced when servicing a notebook.

If the symptom is not listed, see [“Undetermined problems” on page 133](#).

The following lists the error messages that the BIOS displays on the screen and the error symptoms classified by function.

**Important**

Most of the error messages occur during POST. Some of them display information about a hardware device, such as the amount of memory installed. Others may indicate a problem with a device, such as the way it has been configured.

**Important**

If the system fails after you make changes in the BIOS Setup Utility menus, reset the notebook, enter Setup, and install Setup defaults or correct the error.

Index of error messages

Error codes

| Error Codes | Error Messages |
|-----------------|--|
| 006 | Equipment Configuration Error Causes: 1. CPU BIOS Update Code Mismatch 2. IDE Primary Channel Master Drive Error (The causes are shown before "Equipment Configuration Error") |
| 010 | Memory Error at xxx:xxx:xxxh (R:xxxh, W:xxxh) |
| 070 | Real Time Clock Error |
| 071 | CMOS Battery Bad |
| 072 | CMOS Checksum Error |
| 110 | System is disabled. An incorrect password was entered. |
| <No error code> | Battery is critically low. In this situation BIOS issues four short beeps, then shuts the system down. No message is displayed. |
| <No error code> | Temperature is critically high. In this situation BIOS shuts the system down. No message is displayed. |

Error messages

| Error Messages | FRU/Action Sequence |
|---|--|
| Failure Fixed Disk | <ul style="list-style-type: none"> ▫ Reconnect the hard disk drive connector. ▫ Run "Load Setup Defaults" using the BIOS Setup Utility, then reboot the notebook. ▫ Test or replace the hard disk drive. ▫ Test or replace the system board. |
| Stuck Key | See "Testing the keyboard or auxiliary input device" on page 117. |
| Keyboard error | See "Testing the keyboard or auxiliary input device" on page 117. |
| Keyboard Controller Failed | See "Testing the keyboard or auxiliary input device" on page 117. |
| Keyboard locked - Unlock key switch | Unlock the external keyboard. |
| Monitor type does not match CMOS - Run Setup | Run "Load Setup Defaults" using the BIOS Setup Utility, then reboot the notebook. |
| Shadow RAM Failed at offset: nnnn | <ul style="list-style-type: none"> ▫ Test or replace the BIOS ROM. ▫ Test or replace the system board. |
| System RAM Failed at offset: nnnn | <ul style="list-style-type: none"> ▫ Test or replace the SO-DIMM. ▫ Test or replace the system board. |
| Extended RAM Failed at offset: nnnn | <ul style="list-style-type: none"> ▫ Test or replace the SO-DIMM. ▫ Test or replace the system board. |
| System battery is dead - Replace and run Setup | Test or replace the CMOS battery, run the BIOS Setup Utility to reconfigure system time, then reboot the system. |
| System CMOS checksum bad - Default configuration used | Test or replace the CMOS battery, run the BIOS Setup Utility to reconfigure system time, then reboot the system. |

CHAPTER 4: Troubleshooting

| Error Messages | FRU/Action Sequence |
|---|--|
| System timer error | <ul style="list-style-type: none"> ▫ Test or replace the CMOS battery, run the BIOS Setup Utility to reconfigure system time, then reboot the system. ▫ Test or replace the system board. |
| Real time clock error | <ul style="list-style-type: none"> ▫ Test or replace the CMOS battery, run the BIOS Setup Utility to reconfigure system time, then reboot the system. ▫ Test or replace the system board. |
| Previous boot incomplete - Default configuration used | <ul style="list-style-type: none"> ▫ Run "Load Setup Defaults" using the BIOS Setup Utility, then reboot the notebook. ▫ Test or replace the CMOS battery, run the BIOS Setup Utility to reconfigure system time, then reboot the system. ▫ Test or replace the system board. |
| Memory size found by POST differed from CMOS | <ul style="list-style-type: none"> ▫ Run "Load Setup Defaults" using the BIOS Setup Utility, then reboot the notebook. ▫ Test or replace the SO-DIMM. ▫ Test or replace the system board. |
| Diskette drive A error | <ul style="list-style-type: none"> ▫ Make sure that the drive is defined with the proper diskette type in the BIOS Setup Utility. |
| Incorrect Drive A type - run SETUP | Make sure that the drive is defined with the proper diskette type in the BIOS Setup Utility |
| System cache error - Cache disabled | Test or replace the system board. |
| CPU ID: | Test or replace the system board. |
| DMA Test Failed | <ul style="list-style-type: none"> ▫ Test or replace the SO-DIMM. ▫ Test or replace the system board. |
| Software NMI Failed | <ul style="list-style-type: none"> ▫ Test or replace the SO-DIMM. ▫ Test or replace the system board. |
| Fail-Safe Timer NMI Failed | <ul style="list-style-type: none"> ▫ Test or replace the SO-DIMM. ▫ Test or replace the system board. |
| Device Address Conflict | <ul style="list-style-type: none"> ▫ Run "Load Setup Defaults" using the BIOS Setup Utility, then reboot the notebook. ▫ Test or replace the CMOS battery, run the BIOS Setup Utility to reconfigure system time, then reboot the system. ▫ Test or replace the system board. |

|----------------------------|--|
| I/O device IRQ conflict | <ul style="list-style-type: none"> ▫ Run "Load Setup Defaults" using the BIOS Setup Utility, then reboot the notebook. ▫ Test or replace the CMOS battery, run the BIOS Setup Utility to reconfigure system time, then reboot the system. ▫ Test or replace the system board. |
| Operating system not found | <ul style="list-style-type: none"> ▫ Run the BIOS Setup Utility and see if fixed disk and drive A: are properly identified. ▫ Test or replace the diskette drive ▫ Test or replace the hard disk drive ▫ Test or replace the system board |

No-beep error messages

| No-beep Error Messages | FRU/Action in Sequence |
|---|--|
| No beep, power-on indicator turns off and LCD is blank. | <ul style="list-style-type: none"> ▫ Test the power source (battery pack and power adapter). See "Testing the power system" on page 118. ▫ Make sure that every connector is connected tightly and correctly. ▫ Reconnect the SO-DIMM. ▫ Test or replace the LED board. ▫ Test or replace the system board. |
| No beep, power-on indicator turns on and LCD is blank. | <ul style="list-style-type: none"> ▫ Test the power source (battery pack and power adapter). See "Testing the power system" on page 118. ▫ Reconnect the LCD connector ▫ Check the hard disk drive. ▫ Check the LCD inverter ID. ▫ Check the LCD cable. ▫ Test or replace the LCD inverter. ▫ Test or replace the LCD. ▫ Test or replace the system board. |
| No beep, power-on indicator turns on and LCD is blank. But you can see POST on an external CRT. | <ul style="list-style-type: none"> ▫ Reconnect the LCD connectors. ▫ Check the LCD inverter ID. ▫ Check the LCD cable. ▫ Test or replace the LCD inverter. ▫ Test or replace the LCD. ▫ Test or replace the system board. |
| No beep, power-on indicator turns on and a blinking cursor shown on LCD during POST. | <ul style="list-style-type: none"> ▫ Make sure that every connector is connected tightly and correctly. ▫ Test or replace the system board. |
| No beep during POST but system runs correctly. | <ul style="list-style-type: none"> ▫ Test or replace the speaker. ▫ Test or replace the system board. |

Phoenix BIOS beep codes

| Code | Beeps | POST Routine Description |
|------|---------|---|
| 02h | | Verify Real Mode |
| 03h | | Disable Non-Maskable Interrupt (NMI) |
| 04h | | Get CPU type |
| 06h | | Initialize system hardware |
| 08h | | Initialize chipset with initial POST values |
| 09h | | Set IN POST flag |
| 0Ah | | Initialize CPU registers |
| 0Bh | | Enable CPU cache |
| 0Ch | | Initialize caches to initial POST values |
| 0Eh | | Initialize I/O component |
| 0Fh | | Initialize the local bus IDE |
| 10h | | Initialize Power Management |
| 11h | | Load alternate registers with initial POST values |
| 12h | | Restore CPU control word during warm boot |
| 13h | | Initialize PCI Bus Mastering devices |
| 14h | | Initialize keyboard controller |
| 16h | 1-2-2-3 | BIOS ROM checksum |
| 17h | | Initialize cache before memory autosize |
| 18h | | 8254 timer initialization |
| 1Ah | | 8237 DMA controller initialization |
| 1Ch | | Reset Programmable Interrupt Controller |
| 20h | 1-3-1-1 | Test DRAM refresh |
| 22h | 1-3-1-3 | Test 8742 Keyboard Controller |
| 24h | | Set ES segment register to 4 GB |
| 26h | | Enable A20 line |
| 28h | | Autosize DRAM |
| 29h | | Initialize POST Memory Manager |
| 2Ah | | Clear 215 KB base RAM |
| 2Ch | 1-3-4-1 | RAM failure on address line xxxx |
| 2Eh | 1-3-4-3 | RAM failure on data bits xxxx of low byte of memory bus |
| 2Fh | | Enable cache before system BIOS shadow |

| Code | Beeps | POST Routine Description |
|------|---------|--|
| 30h | 1-4-1-1 | RAM failure on data bits xxxx of high byte of memory bus |
| 32h | | Test CPU bus-clock frequency |
| 33h | | Initialize Phoenix Dispatch Manager |
| 36h | | Warm start shut down |
| 38h | | Shadow system BIOS ROM |
| 3Ah | | Autosize cache |
| 3Ch | | Advanced configuration of chipset registers |
| 3Dh | | Load alternate registers with CMOS values |
| 42h | | Initialize interrupt vectors |
| 45h | | POST device initialization |
| 46h | 2-1-2-3 | Check ROM copyright notice |
| 48h | | Check video configuration against CMOS |
| 49h | | Initialize PCI bus and devices |
| 4Ah | | Initialize all video adapters in system |
| 4Bh | | QuietBoot start (optional) |
| 4Ch | | Shadow video BIOS ROM |
| 4Eh | | Display BIOS copyright notice |
| 50h | | Display CPU type and speed |
| 51h | | Initialize EISA board |
| 52h | | Test keyboard |
| 54h | | Set key click if enabled |
| 58h | 2-2-3-1 | Test for unexpected interrupts |
| 59h | | Initialize POST display service |
| 5Ah | | Display prompt "Press F2 to enter SETUP" |
| 5Bh | | Disable CPU cache |
| 5Ch | | Test RAM between 512 and 640 KB |
| 60h | | Test extended memory |
| 62h | | Test extended memory address lines |
| 64h | | Jump to User Patch1 |
| 66h | | Configure advanced cache registers |
| 67h | | Initialize Multi Processor APIC |
| 68h | | Enable external and CPU caches |
| 69h | | Setup System Management Mode (SMM) area |

CHAPTER 4: Troubleshooting

| Code | Beeps | POST Routine Description |
|------|-------|--|
| 6Ah | | Display external L2 cache size |
| 6Bh | | Load custom defaults (optional) |
| 6Ch | | Display shadow-area message |
| 6Eh | | Display possible high address for UMB recovery |
| 70h | | Display error messages |
| 72h | | Check for configuration errors |
| 76h | | Check for keyboard errors |
| 7Ch | | Set up hardware interrupt vectors |
| 7Eh | | Initialize coprocessor if present |
| 80h | | Disable onboard Super I/O ports and IRQs |
| 81h | | Late POST device initialization |
| 82h | | Detect and install external RS232 ports |
| 83h | | Configure non-MCD IDE controllers |
| 84h | | Detect and install external parallel ports |
| 85h | | Initialize PC-compatible PnP ISA devices |
| 86h | | Re-initialize onboard I/O ports |
| 87h | | Configure Motherboard Configurable Devices (optional) |
| 88h | | Initialize BIOS Area |
| 89h | | Enable Non-Maskable Interrupts (NMIs) |
| 8Ah | | Initialize Extended BIOS Data Area |
| 8Bh | | Test and initialize PS/2 mouse |
| 8Ch | | Initialize floppy controller |
| 8Fh | | Determine number of ATA drives (optional) |
| 90h | | Initialize hard-disk controllers |
| 91h | | Initialize local-bus hard-disk controllers |
| 92h | | Jump to UserPatch2 |
| 93h | | Build MPTABLE for multi-processor boards |
| 95h | | Install CD ROM for boot |
| 96h | | Clear huge ES segment register |
| 97h | | Fixup Multi Processor table |
| 98h | 1-2 | Search for option ROMs. One long, two short beeps on checksum failure. |
| 99h | | Check for SMART drive (optional) |
| 9Ah | | Shadow option ROMs |

| Code | Beeps | POST Routine Description |
|------|-------|---|
| 9Ch | | Set up Power Management |
| 9Dh | | Initialize security engine (optional) |
| 9Eh | | Enable hardware interrupts |
| 9Fh | | Determine number of ATA and SCSI drives |
| A0h | | Set time of day |
| A2h | | Check key lock |
| A4h | | Initialize Typematic rate |
| A8h | | Erase F2 prompt |
| AAh | | Scan for F2 key stroke |
| ACh | | Enter SETUP |
| AEh | | Clear Boot flag |
| B0h | | Check for errors |
| B2h | | POST done- prepare to boot operating system |
| B4h | 1 | One short beep before boot |
| B5h | | Terminate QuietBoot (optional) |
| B6h | | Check password (optional) |
| B9h | | Prepare Boot |
| BAh | | Initialize DMI parameters |
| BBh | | Initialize PnP Option ROMs |
| BCh | | Clear parity checkers |
| BDh | | Display MultiBoot menu |
| BEh | | Clear screen (optional) |
| BFh | | Check virus and backup reminders |
| C0h | | Try to boot with INT 19 |
| C1h | | Initialize POST Error Manager (PEM) |
| C2h | | Initialize error logging |
| C3h | | Initialize error display function |
| C4h | | Initialize system error handler |
| C5h | | PnPnd dual CMOS (optional) |
| C6h | | Initialize notebook docking (optional) |
| C7h | | Initialize notebook docking late |
| C8h | | Force check (optional) |
| C9h | | Extended checksum (optional) |

CHAPTER 4: Troubleshooting

| Code | Beeps | POST Routine Description |
|------|-------|-----------------------------------|
| D2h | | Unknown interrupt |
| E0h | | Initialize the chipset |
| E1h | | Initialize the bridge |
| E2h | | Initialize the CPU |
| E3h | | Initialize the system timer |
| E4h | | Initialize system I/O |
| E5h | | Check force recovery boot |
| E6h | | Checksum BIOS ROM |
| E7h | | Go to BIOS |
| E8h | | Set Huge Segment |
| E9h | | Initialize Multi Processor |
| EAh | | Initialize OEM special code |
| EBh | | Initialize PIC and DMA |
| ECh | | Initialize Memory type |
| EDh | | Initialize Memory size |
| EEh | | Shadow Boot Block |
| EFh | | System memory test |
| F0h | | Initialize interrupt vectors |
| F1h | | Initialize Run Time Clock |
| F2h | | Initialize video |
| F3h | | Initialize System Management Mode |
| F4h | 1 | Output one beep before boot |
| F5h | | Boot to Mini DOS |
| F6h | | Clear Huge Segment |
| F7h | | Boot to Full DOS |

Symptom-to-FRU error messages

LCD

| Symptom / Error | Action in Sequence |
|---|--|
| <ul style="list-style-type: none"> ▫ The LCD backlight doesn't work. ▫ The LCD is too dark. ▫ The LCD brightness cannot be adjusted. ▫ The LCD contrast cannot be adjusted. | <ul style="list-style-type: none"> ▫ Run "Load Setup Defaults" using the BIOS Setup Utility, then reboot the notebook. ▫ Reconnect the LCD connectors. ▫ Test or replace the keyboard (if contrast and brightness function key doesn't work). ▫ Check the LCD inverter ID. ▫ Test or replace the LCD cable. ▫ Test or replace the LCD inverter. ▫ Test or replace the LCD. ▫ Test or replace the system board. |
| <ul style="list-style-type: none"> ▫ The LCD screen is unreadable. ▫ Missing pels in characters. ▫ The screen appears abnormal. ▫ The wrong color is displayed. | <ul style="list-style-type: none"> ▫ Reconnect the LCD connector. ▫ Check the LCD inverter ID. ▫ Test or replace the LCD cable. ▫ Test or replace the LCD inverter. ▫ Test or replace the LCD. ▫ Test or replace the system board. |
| The LCD is displaying extra horizontal or vertical lines. | <ul style="list-style-type: none"> ▫ Check the LCD inverter ID. ▫ Test or replace the LCD cable. ▫ Test or replace the LCD inverter. ▫ Test or replace the LCD. ▫ Test or replace the system board. |

Power

| Symptom / Error | Action in Sequence |
|---|---|
| The notebook shuts down during operation. | <ul style="list-style-type: none"> ▫ Test the power source (battery pack and power adapter). See "Testing the power system" on page 118. ▫ Test or replace the battery pack. ▫ Test or replace the power adapter. ▫ Test or replace the system board. |
| The notebook doesn't turn on. | <ul style="list-style-type: none"> ▫ Test the power source (battery pack and power adapter). See "Testing the power system" on page 118. ▫ Test or replace the battery pack. ▫ Test or replace the power adapter. ▫ Test or replace the system board. |
| The notebook doesn't turn off. | <ul style="list-style-type: none"> ▫ Test the power source (battery pack and power adapter). See "Testing the power system" on page 118. ▫ Press and hold the power button for more than four seconds. ▫ Test or replace the system board. |
| The battery can't be charged. | <ul style="list-style-type: none"> ▫ Test the battery pack. See "Check the battery pack" on page 119. ▫ Test or replace the battery pack. ▫ Test or replace the system board. |

Memory

| Symptom / Error | Action in Sequence |
|---|--|
| Memory count (size) appears different from actual size. | <ul style="list-style-type: none"> ▫ Run “Load Setup Defaults” using the BIOS Setup Utility, then reboot the notebook. ▫ Test or replace the SO-DIMM. ▫ Test or replace the system board. |

Sound

| Symptom / Error | Action in Sequence |
|--|---|
| No sound comes from the notebook when running Windows multimedia programs. | <ul style="list-style-type: none"> ▫ Reinstall the audio driver. ▫ Test or replace the speakers. ▫ Test or replace the system board. |
| The internal speakers make noise or emit no sound. | <ul style="list-style-type: none"> ▫ Test or replace the speakers. ▫ Test or replace the system board. |

Power management

| Symptom / Error | Action in Sequence |
|---|--|
| The notebook will not hibernate. | <ul style="list-style-type: none"> ▫ Test or replace the keyboard (if control is from the keyboard). ▫ Test or replace the hard disk drive. ▫ Test or replace the system board. |
| The system doesn't hibernate and emits four short beeps every minute. | <ul style="list-style-type: none"> ▫ Press Fn+O and see if the notebook enters hibernation mode. ▫ Test or replace the touchpad. ▫ Test or replace the keyboard. ▫ Check the hard disk connection to the system board. ▫ Test or replace the hard disk drive. ▫ Test or replace the system board. |
| The notebook doesn't enter standby mode after closing the LCD. | <ul style="list-style-type: none"> ▫ Make sure that the magnet is in the magnet holder. For more information, see “Replacing the LCD” on page 100. ▫ Test or replace the system board. |
| The system doesn't resume from hibernation mode. | <ul style="list-style-type: none"> ▫ Check the hard disk connection to the system board. ▫ Test or replace the hard disk drive. ▫ Test or replace the system board. |
| The system doesn't resume from standby mode after opening the LCD. | <ul style="list-style-type: none"> ▫ Make sure that the magnet is in the magnet holder. For more information, see “Replacing the LCD” on page 100. ▫ Test or replace the system board. |
| The battery fuel gauge in Windows doesn't go higher than 90%. | <ul style="list-style-type: none"> ▫ Remove the battery pack and let it cool for two hours. ▫ Refresh the battery (use only battery power until the notebook turns off, then charge the battery). ▫ Test or replace the battery pack. ▫ Test or replace the system board. |
| The system hangs intermittently. | <ul style="list-style-type: none"> ▫ Reconnect the hard disk drive and optical drive. ▫ Check the hard disk connection to the system board. ▫ Test or replace the system board. |

Devices

| Symptom / Error | Action in Sequence |
|--|--|
| System configuration does not match the installed devices. | <ul style="list-style-type: none"> ▫ Run "Load Setup Defaults" using the BIOS Setup Utility, then reboot the notebook. ▫ Reconnect the hard disk drive and optical drive. |
| The external display does not work correctly. | <ul style="list-style-type: none"> ▫ Press Fn+F4 repeatedly to switch between LCD, external display, and both displays. ▫ Test or replace the system board. |
| USB does not work correctly. | <ul style="list-style-type: none"> ▫ Test or replace the USB board. ▫ Test or replace the system board. |
| Printer problems. | <ul style="list-style-type: none"> ▫ Run the printer self-test. ▫ Reinstall the printer driver. ▫ Test or replace the printer cable. ▫ Test or replace the printer. ▫ Test or replace the system board. |

Keyboard and touchpad

| Symptom / Error | Action in Sequence |
|--|---|
| The keyboard (one or more keys) does not work. | <ul style="list-style-type: none"> ▫ Reconnect the keyboard cable. ▫ Test or replace the keyboard. ▫ Test or replace the system board. |
| The touchpad does not work. | <ul style="list-style-type: none"> ▫ Reconnect the touchpad cable. ▫ Test or replace the touchpad board. ▫ Test or replace the system board. |

Important

If you cannot find a symptom or an error in this list and the problem remains, see ["Undetermined problems" on page 133](#).

Intermittent problems

Intermittent system hang problems can be caused by a variety of reasons that have nothing to do with a hardware defect. These reasons include: cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a recurring problem exists.

- ▶ To analyze an intermittent problem:
 - 1 Run the advanced diagnostic test for the system board in loop mode at least ten times.
 - If any error is detected, replace the FRU.
 - If no error is detected, do not replace any FRU.
 - 2 Rerun the test to verify that there are no more errors.

Undetermined problems

If the diagnostic test may not identify which adapter or device failed, which installed devices are incorrect, whether a short circuit is suspected, or whether the system is inoperative. Use these procedures to isolate the failing FRU (do not isolate a non-defective FRU).

Important

Verify that all attached devices are supported by the notebook.

Important

Verify that the power supply being used at the time of the failure is operating correctly. (See ["Testing the power system" on page 118.](#))

► To isolate a failing FRU:

- 1 Turn off the notebook.
- 2 Visually check FRU parts for damage. If you identify any damage, replace the FRU.
- 3 Remove or disconnect all of the following devices:
 - Non-Acer devices
 - Printer, mouse, and other external devices
 - Battery pack
 - Hard disk drive(s)
 - SO-DIMM
 - Optical drive
- 4 Turn on the notebook.
- 5 Determine if the problem has changed.
 - If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
 - If the problem does recur, replace the following FRUs one at a time:
 - System board
 - LCD assembly

Important

Do not replace a non-defective FRU.

CHAPTER 6

FRU (Field-Replaceable Unit) list

- [Introduction](#)
- [Exploded diagram](#)
- [FRU list](#)

Introduction

This chapter gives you the FRU (field-replaceable-unit) listing in global configurations of this model. Refer to this chapter whenever ordering for parts to repair or for RMA (Return Merchandise Authorization).

Please note that WHEN ORDERING FRU PARTS, you should check the most up-to-date information available on your regional web or channel. For whatever reasons a part number change is made, it will not be noted on the printed Service Guide. For ACER AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code from those given in the FRU list of this printed Service Guide. You MUST use the local FRU list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

Important

To scrap or to return the defective parts, you should follow the local government ordinance or regulations on how to dispose it properly, or follow the rules set by your regional Acer office on how to return it.

APPENDIX B

Online support information

This section describes online technical support services available to help you repair your Packard Bell notebook.

If you are a distributor, dealer, ASP, or TPM, please refer your technical queries to your local Acer branch office. Acer branch offices and Regional Business Units may access our website. However some information sources will require a user id and password. These can be obtained directly from Acer CSD Taiwan.

Acer's website offers you convenient and valuable support resources whenever you need them. In the Technical Information section you can download information on all of Acer's Notebook, Desktop and Server models including:

- Service guides for all models
- User's manuals
- Training materials
- BIOS updates
- Software utilities
- Spare parts lists
- TABs (Technical Announcement Bulletin)

For these purposes, we have included an Acrobat File to facilitate the problem-free downloading of our technical material. Also contained on this website are:

- Detailed information on Acer's International Traveller's Warranty (ITW)
- Returned material authorization procedures
- An overview of all the support services we offer, accompanied by a list of telephone, fax and email contacts for all your technical queries.

We are always looking for ways to optimize and improve our services, so if you have any suggestions or comments, please do not hesitate to communicate these to us.
