Order No. CPD0611208C1

Service Manual

Notebook Computer

CF-Y5

TOUGHBOOK

This is the Service Manual for the following areas.
M …for U.S.A. and Canada

Model No. CF-Y5LWVYZ *1* *2*

1: Operation System
B: Microsoft® Windows® XP Professional
2: Area
M: Refer to above area table

⚠ WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public.
It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product.
Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

Unauthorized copying and distribution is a violation of law.

WARNING

For U.K.

This apparatus must be earthed for your safety.

To ensure safe operation the three-pin plug must be inserted only into a standard three-pin power point which is effectively earthed through the normal household wiring.
Extension cords used with the equipment must be three-core and be correctly wired to provide connection to earth. Wrongly wired extension cords are a major cause of fatalities.
The fact that the equipment operates satisfactorily does not imply that the power point is earthed and that the installation is completely safe.
For your safety, if you have any doubt about the effective earthing of the power point, consult a qualified electrician.

FOR YOUR SAFETY PLEASE READ THE FOLLOWING TEXT CAREFULLY

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.
A 3 amp fuse is fitted in this plug.
Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 3 amps and that it is approved by ASTA or BSI to BS 1362.

Check for the ASTA mark ⓐ or the BSI mark ⓑ on the body of the fuse.
If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.
If you lose the fuse cover the plug must not be used until a replacement cover is obtained.
A replacement fuse cover can be purchased from your local Panasonic Dealer.
IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.
THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13 AMP SOCKET.
If a new plug is to be fitted please observe the wiring code as shown below.
If in any doubt please consult a qualified electrician.

Warning: THIS APPLIANCE MUST BE EARTHED.

Important

The wires in this mains lead are coloured in accordance with the following code:

Green-and-yellow:	Earth
Blue:	Neutral
Brown:	Live

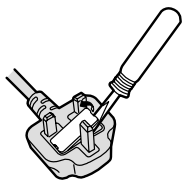
As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:
The wire which is coloured GREEN-and-YELLOW must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol ⏚ coloured GREEN or GREEN-and-YELLOW.

The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured BLACK.
The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured RED.

The mains plug on this equipment must be used to disconnect the mains power.
Please ensure that a socket outlet is available near the equipment and shall be easily accessible.

■ How to replace the fuse

Open the fuse compartment with a screwdriver and replace the fuse.



Warnings

- This equipment is not designed for connection to an IT power system.
  (An IT system is a system having no direct connections between live parts and Earth; the exposed-conducive-parts of the electrical installation are earthed.
  An IT system is not permitted where the computer is directly connected to public supply systems in the U.K.)
- Disconnect the mains plug from the supply socket when the computer is not in use.

This equipment is produced to BS800/1983.

LASER SAFETY INFORMATION

For U.S.A.

Class 1 LASER-Product

This product is certified to comply with DHHS Rules 21 CFR Subchapter J.
This product complies with European Standard EN60825 (or IEC Publication 825)

For all areas
This equipment is classified as a class 1 level LASER product and there is no hazardous LASER radiation.

Caution:
(1) Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
(2) The drive is designed to be incorporated into a computer-based system or unit which has an enclosing cover. It should never be used as a stand alone drive.

Danger:
The serviceman should not remove the cover of drive unit and should not service because the drive unit is a non-serviceable part.
Please check DANGER label on PD-drive unit.

Unplug the AC power cord to the equipment before opening the top cover of the drive.
When the power switch it on, do not place your eyes close to the front panel door to look into the interior of the unit.

LASER Specification

Class 1 level LASER Product
Wave Length: DVD 658–8 nm
CD 775~815 nm

Laser safety information is appropriate only when drive with laser is installed.

Safety precautions

1. Before servicing, unplug the power cord to prevent an electric shock.
2. When replacing parts, use only manufacture's recommended components for safety.
3. Check the condition of the power cord. Replace if wear or damage is evident.
4. After servicing, be sure to restore the lead dress, insulation barriers, insulation papers, shields, etc.

Important Safety Instructions

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

1. Do not use this product near water, for example, near a bath tub, wash bowl, kitchen sink or laundry tub, in a wet basement or near a swimming pool.
2. Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
3. Do not use the telephone to report a gas leak in the vicinity of the leak.
4. Use only the power cord and batteries indicated in this manual. Do not dispose of batteries in a fire. They may explode. Check with local codes for possible special disposal instructions.

SAVE THESE INSTRUCTIONS

Lithium Battery

Lithium Battery!

This computer contains a lithium battery to enable the date, time, and other data to be stored. The battery should only be exchanged by authorized service personnel.

Warning! A risk of explosion from incorrect installation or misapplication may possibly occur.

LITHIUM BATTERY ⚠

• **CAUTION**

Danger of explosion if battery is incorrectly replaced.
Replace only with the same or equivalent type recommended by the equipment manufacture.
Discard used batteries according to the manufacturer's instructions.

LITHIUMBATTERIES ⚠

Vorsicht!

Explosionsgefahr bei unsachgemäßem Austausch der Batterie. Ersatz nur durch denselben order einen vom Hersteller empfohlenen ähnlichen Typ. Entsorgung gebrauchter Batterien nach Angaben des Herstellers.

PILE AU LITHIUM ⚠

ATTENTION: IL Y A DANGER D'EXPLOSION S' IL Y A REMPLACEMENT INCORRECT DE LA PILE. REMPLACER UNIQUEMENT AVEC UNE PILE DU MÈME TYPE OU D'UN TYPE RECOMMANDÉ PAR LE CONSTRUCTEUR. METTRE AU RÉBUT LES PILES USAGÉES CONFORMÉMENT AUX INSTRUCTIONS DU FABRICANT.

For U.S.A. / CANADA

A lithium ion battery that is recyclable powers the product you have purchased. Please call 1-800-8-BATTERY for information on how to recycle this battery.

L'appareil que vous vous êtes procuré est alimenté par une batterie au lithium-ion. Pour des renseignements sur le recyclage de la batterie, veuillez composer le 1-800-8-BATTERY.

Precautions (Battery Pack)

- Care should be exercised with regard to the following in order to avoid the possibility of overheating, fire or damage.

Avoid Heat
Do not throw the battery pack into a fire or expose it to excessive heat.

Keep Articles Away
Do not place the battery pack together with articles such as necklaces or hairpins when carrying or storing.

Do Not Disassemble
Do not insert sharp objects into the battery pack, expose it to bumps or shocks, deform, disassemble, or modify it.

Do Not Short
Do not short the positive (+) and negative (-) contacts.

Avoid Extreme Heat, Cold and Direct Sunlight
Do not charge, use or leave the battery pack for extended periods where it will be exposed to direct sunlight, in a hot place (in an automobile on a sunny day, for example), or in a cold place.

Do Not Use With Any Other Computer
The battery pack is rechargeable and was intended for the specified computer or charger. Do not use it with a computer other than the one for which it was designed.

Do Not Put into a Microwave
Do not put the battery pack into a microwave oven or a pressurized chamber.

Discontinue Use
Should the battery emit an abnormal odor, become hot to the touch, become discolored, change shape, or become in any way different from normal, remove it from the computer or charger and discontinue use.

- Do not touch the terminals on the battery pack. The battery pack may no longer function properly if the contacts are dirty or damaged.
- Do not expose the battery pack to water, or allow it to become wet.
- If the battery pack will not be used for a long period of time (a month or more), charge or discharge (use) the battery pack until the remaining battery level becomes 30% to 40% and store it in a cool, dry place.
- This computer prevents overcharging of the battery by recharging only when the remaining power is less than approx. 95% of capacity.
- The battery pack is not charged when the computer is first purchased. Be sure to charge it before using it for the first time. When the AC adaptor is connected to the computer, charging begins automatically.
- Should the battery leak and the fluid get into your eyes, do not rub your eyes. Immediately flush your eyes with clear water and see a doctor for medical treatment as soon as possible.

NOTE

- The battery pack may become warm during recharging or normal use. This is completely normal.
- Recharging will not commence outside of the allowable temperature range (0 °C to 50 °C {32°F to 122 °F}).(☞ Reference Manual "Battery Power") Once the allowable range requirement is satisfied, charging begins automatically. Note that the recharging time varies based on the usage conditions. (Recharging takes longer than usual when the temperature is 10 °C {50 °F} or less.)
- If the temperature is low, the operating time is shortened. Only use the computer within the allowable temperature range.
- The battery pack is a consumable item. If the amount of time the computer can be run off a particular battery pack becomes dramatically shorter and repeated rechargings do not restore its performance, the battery pack should be replaced with a new one.
- When transporting spare batteries inside a package, briefcase, etc., it is recommended that it be placed in a plastic bag so that its contacts are protected.
- Always power off the computer when it is not in use. Leaving the computer on when the AC adaptor is not connected will exhaust the remaining battery capacity.

1 Specifications

■ Main Specifications

Model No.		CF-Y5LWVYZBM
CPU/ Secondary cache memory		Intel® Core™ Duo Processor Low Voltage L 2400 (1.66 GHz, 2 MB[*1] L2 cache, 667 MHz FSB)
Chip Set		Mobile Intel® 945 GMS Express chip set
Main Memory		512 MB[*1], DDR2 SDRAM (1536 MB[*1] Max.)
Video Memory		UMA (128 MB[*1] Max.)[*2]
Hard Disk Drive		60 GB[*3]
CD/DVD Drive		USB 2.0 connection interface
		DVD MULTI Drive built-in, Buffer underrun error prevention function: Supported
Continuous Data Transfer Speed[*4*5]	Reading[*6]	●DVD-RAM[*7]: 2X (4.7 GB[*3])/1X (2.6 GB[*3]) ●DVD-R[*8]: 4X (Max.) ●DVD-RW: 4X (Max.) ●DVD-ROM: 8X (Max.) ●CD-ROM: 24X (Max.) ●CD-R: 24X (Max.) ●CD-RW: 20X (Max.) ●+R: 4X (Max.) ●+R DL: 4X (Max.) ●+RW: 4X (Max.)
	Writing[*9]	●DVD-RAM[*7]: 2X (4.7GB[*3]) ●DVD-R: 1X/2X/4X ●DVD-RW: 1X/2X ●+R: 2.4X/4X ●+RW: 2.4X ●CD-R: 4X/8X/8-16X/8-24X ●CD-RW: 4X ●High-Speed CD-RW: 4X/8X/10X ●Ultra-Speed CD-RW: 8X/10X
Supported Disks/Format[*5]	Reading	●DVD-ROM (Single Layer, Dual Layer) ●DVD-Video ●DVD-R[*8](1.4 GB, 3.95 GB, 4.7 GB)[*3] ●DVD-RW (Ver.1.1/1.2 1.4 GB, 4.7 GB, 9.4 GB)[*3] ●DVD-RAM[*7] (1.4 GB, 2.8 GB, 2.6 GB, 5.2 GB, 4.7 GB, 9.4 GB)[*3] ●+R (4.7 GB)[*3] ●+R DL (8.5 GB)[*3] ●+RW (4.7 GB)[*3] ●CD-Audio ●CD-ROM (XA compatible) ●CD-R ●Photo CD (multiple session compatible) ●Video CD ●CD-EXTRA ●CD-RW ●CD-TEXT
	Writing	●DVD-RAM[*7] (1.4GB, 2.8GB, 4.7GB, 9.4GB)[*3] ●DVD-R (1.4GB, 4.7GB for General)[*3] ●DVD-RW (Ver.1.1/1.2 4.7GB, 9.4GB)[*3] ●+R (4.7GB[*3]) ●+RW (4.7GB[*3]) ●CD-R ●CD-RW
Display Method		14.1 SXGA+ type (TFT) (1400 × 1050 dots)
Internal LCD		65,536/16,777,216 colors (1400 × 1050 dots)[*10]
External Display[*11]		65,536/16,777,216 colors (800 × 600 dots/1024 × 768 dots/1280 × 768 dots/1280 × 1024 dots/1400 × 1050 dots/1600 × 1200 dots/2048 × 1536 dots (60 Hz)[*12])
Simultaneous Display on LCD + External Display[*11]		65,536/16,777,216 colors (800 × 600 dots/1024 × 768 dots/1280 × 768 dots/1280 × 1024 dots/1400 × 1050 dots)[*10]
Wireless LAN		Intel® PRO/Wireless 3945 ABG Network Connection (next page)
Bluetooth™		(next page)
LAN[*13]		IEEE 802.3 10Base-T, IEEE 802.3u 100Base-TX
Modem		Data: 56 kbps (V.92) FAX: 14.4 kbps
Sound		WAVE and MIDI playback, Intel® High Definition Audio subsystem support, Stereo Speakers (built in)
Security Chip		TPM (TCG V1.2 compliant)[*14]
Card Slots	PC Card Slot	× 1, Type I or Type II, Allowable current 3.3 V: 400 mA, 5 V: 400 mA
	SD Memory Card Slot[*15]	× 1, Data transfer rate = 8 MB per second
RAM Module Slot		× 1, DDR2 SDRAM, 172-pin, 1.8 V, Micro DIMM, PC2-4200 Compliant[*16]
Interface		USB Ports × 2 (USB2.0 × 2)[*17] / Modem Port (RJ-11) / LAN Port (RJ-45) [*13] / External Display Port: Mini Dsub 15-pin female / Microphone Jack: Miniature jack, 3.5 DIA / Headphone Jack: Miniature jack, 3.5 DIA / Mini Port Replicator connector: Dedicated 50-pin male
Keyboard/Pointing Device		87 keys/Touch Pad
Power Supply		AC adaptor or Battery pack
AC Adaptor[*18]		Input: 100 V - 240 V AC, 50 Hz/60 Hz Output: 16 V DC, 3.75 A
Battery Pack		Li-ion 10.65 V, 5.7 Ah
Operating Time[*19]		Approx. 5 hours - 8 hours[*20] (Approx. 6 hours[*21]) (Disable Economy Mode (ECO))
Charging Time[*22]		Approx. 5 hours (Power off)/Approx. 6.5 hours (Power on)

Model No.			CF-Y5LWVYZBM
Power Consumption[*23]			Approx. 35 W[*24] / Approx. 60 W (maximum when recharging in the ON state)
Physical Dimensions (W × H × D)			309.6 mm × 28 mm (at the front)/44.5 mm (at the rear) × 245.5 mm (excluding protrusion) {12.2 " × 1.1 " / 1.8 " × 10.0 "}
Weight[*25]			Approx. 1530 g {3.4 lb.}
Environment	Operation	Temperature	5°C to 35°C {41°F to 95°F}
		Humidity	30% to 80% RH (No condensation)
	Storage	Temperature	-20°C to 60°C {-4°F to 140°F}
		Humidity	30% to 90% RH (No condensation)
OS[*26]			Microsoft® Windows® XP Professional Service Pack 2 with Advanced Security Technologies (NTFS File system)
Pre-installed Software[*26]			Microsoft® Internet Explorer 6 Service Pack 2 / DirectX 9.0c /Microsoft® Windows® Media Player 10 / Microsoft® Windows® Movie Maker 2.1 / Microsoft® .NET Framework 1.1 SP1/2.0 / Adobe Reader / Intel® PROSet/Wireless Software <Only for model with wireless LAN> / SD Utility / Icon Enlarger / Loupe Utility / Touch Pad Utility / DMI Viewer / PC Information Viewer / WinDVD 5 (OEM Version) / B's Recorder GOLD8 BASIC / B's CLiP 6[*27] / Hotkey Settings / Optical Disc Drive Letter-Setting Utility / Optical Disc Drive Power-Saving Utility / Wireless Switch Utility <Only for model with wireless LAN/Bluetooth> / Economy Mode (ECO) Setting Utility / Battery Recalibration Utility / Infineon TPM Professional Package V2.5[*28] / Recover Pro 6[*28]

■ Wireless LAN

Data Transfer Rates	IEEE802.11a: 54/48/36/24/18/12/9/6 Mbps (automatically switched)[*31] IEEE802.11b: 11/5.5/2/1 Mbps (automatically switched)[*31] IEEE802.11g: 54/48/36/24/18/12/9/6 Mbps (automatically switched)[*31]
Standard Supported	IEEE802.11a/IEEE802.11b/IEEE802.11g
Transmission Method	OFDM system, DS-SS system
Wireless Channels Used	IEEE802.11a: Channels 36/40/44/48/52/56/60/64/149/153/157/161/165 IEEE802.11b/ IEEE802.11g: Channels 1 to 11
RF Frequency Band	IEEE802.11a: 5.18 - 5.32 GHz, 5.745 - 5.825 GHz IEEE802.11b/ IEEE802.11g: 2412 - 2462 MHz

■ Bluetooth™

Bluetooth Version	2.0 + EDR
Transmission Method	FHSS system
Wireless Channels Used	Channels 1 to 79
RF Frequency Band	2.402-2.48 GHz
Power Class	Class 1

[*1] 1 MB = 1,048,576 bytes

[*2] A segment of the main memory is allotted automatically depending on the computer's operating status. The size of the Video Memory cannot be set by the user.

[*3] 1 GB = 1,000,000,000 bytes. Your operating system or some application software will report as fewer GB.

[*4] Data transfer speeds indicate values measured by Matsushita Electric Industrial Co., Ltd. The data transfer rate of DVD per 1X speed is 1,350 KB/s. The data transfer rate of CD per 1X speed is 150 KB/s.

[*5] Performance of CD-R, CD-RW, DVD-RAM, DVD-R, DVD-RW, +R, +R DL, and +RW cannot be guaranteed depending on writing status and recording format. Also, some data cannot be played back depending on the disk, settings, and environment being used.
Does not support writing to DVD-R DL/+R DL (dual layer disks) or reading from DVD-R DL.

[*6] If an unbalanced disk (e.g., a disk with which the balance has been displaced from the center) is inserted, the speed may become slower if there are large vibrations while the disk is rotating.

[*7] Only non-cartridge type or removable cartridge type can be used.
When writing to DVD-RAM, use only disks up to 3x. This application cannot be used with 5x DVD-RAM media (2-5x disks, etc.).

[*8] DVD-R is compatible with 4.7 GB (for General) playback. DVD-R (for Authoring) playback is compatible with disks recorded using Disk-at-Once recording.

[*9] Depending on the disk, the writing speed may become slower.

[*10] A 16,777,216 color display is achieved by using the dithering function.

[*11] Display may be impossible using some connected external displays.

*12 When using an external display with a resolution of 2048 x 1536 dots, use a display that supports a 60Hz refresh rate. If an external display that does not support a 60Hz refresh rate is used, images may not be displayed properly.

*13 Some devices cannot be used depending on the port type.

*14 For information on TPM, click [start] - [Run] and input "c:\util\drivers\tpm\README.pdf", and refer to the *Installation Manual* of "Trusted Platform Module (TPM)".

*15 Operation has been tested and confirmed using Panasonic SD Memory Cards with a capacity of up to 2 GB.
The transfer rate using the SD Memory Card slot on this computer is 8 MB per second. (This is a theoretical value, and differs from actual speeds.)
The transfer rate is 8 MB per second even if you use an SD Memory Card that supports high-speed transfer rates.
Operation on other SD equipment is not guaranteed.
This computer is not compatible with MultiMediaCards or SDHC Memory Cards.
Do not insert these kinds of cards.

*16 Only a RAM module designed for DDR2 (PC2-4200) can be added (Panasonic : CF-BAW0512U, CF-BAW1024U).
JEDEC standard 214 pin Micro DIMM cannot be used.
PC2100 / PC2700 172 pin Micro DIMM cannot be used.
If a PC2-3200 RAM module is installed, the main memory processing speed may become slower.

*17 Does not guarantee operation of all USB-compatible peripherals.

*18 <Only for North America>
The AC adaptor is compatible with power sources up to 240 V AC adaptor. This computer is supplied with a 125 V AC compatible AC cord.

20-M-2-1

*19 Varies depending on the usage conditions, or when an optional device is attached. Measured when the power saving function on the USB2.0 USB Root Hub is set to on. (At the time of purchase, the power saving function is activated.)
When Economy Mode (ECO) is enabled, the operating time becomes approximately 20% shorter than when it is disabled.

*20 Measured using BatteryMark™ Version 4.0.1 (LCD brightness : Maximum - Minimum).

*21 Measured using MobileMark™ 2005 (LCD brightness : 60 cd/m^2).

*22 Varies depending on the usage conditions, CPU speed, etc.
It may take a long time to charge a fully discharged battery.

*23 Approx. 1.5 W when the battery pack is fully charged (or not being charged) and the computer is off.

*24 Rated power consumption.

23-E-1

*25 Average value. May differ depending on models.

*26 Operations of this computer are not guaranteed except for the pre-installed OS.

*27 Preinstalled B's CLiP does not support CD-R, DVD-R, +R and DVD-RAM.

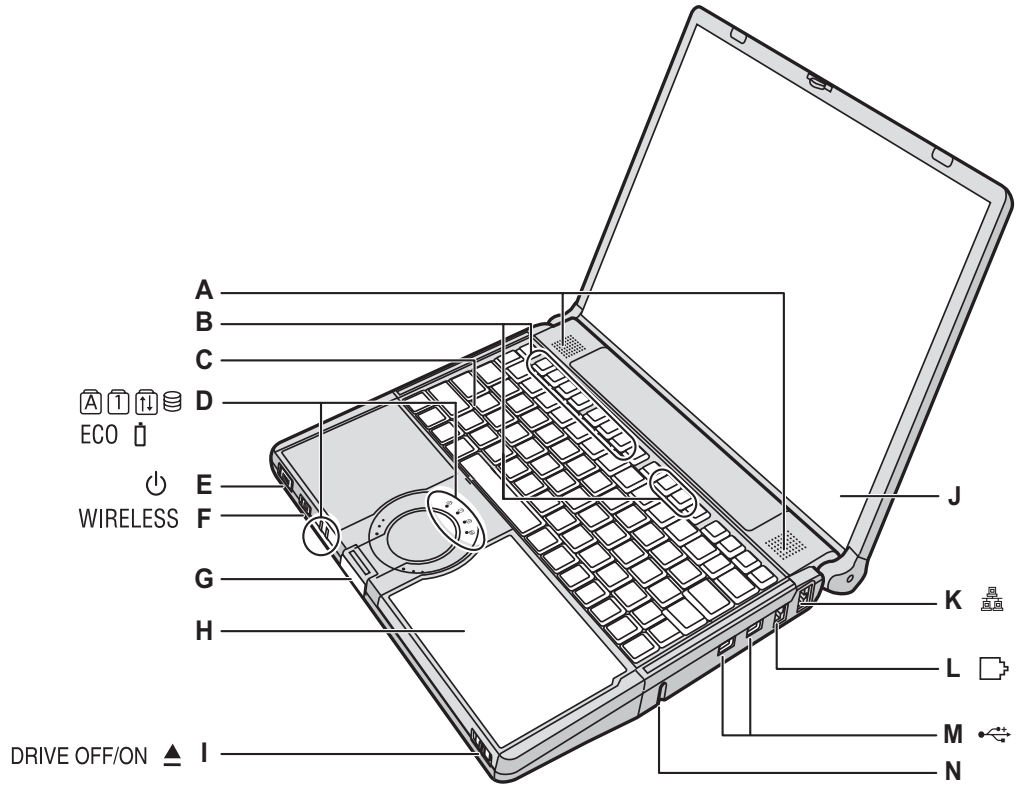
*28 Must be installed before use.

*29 The Product Recovery DVD-ROM is required.

*30 For startup methods, refer to "Hardware Diagnostics".

*31 These are speeds specified in IEEE802.11a+b+g standards. Actual speeds may differ.

2 Names and Functions of Parts



A : Speakers

B : Function Key

C : Keyboard

D : LED Indicator

: Caps lock

: Numeric key (NumLk)

: Scroll lock (ScrLk)

: Hard disk drive status

ECO : Economy Mode (ECO) status

: Battery status

E : Power Switch

Power Indicator

- Off: Power off/Hibernation
- Green: Power on
- Blinking green: Standby

F : Wireless Switch

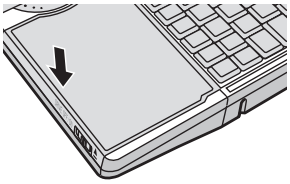
<Only for model with wireless LAN/Bluetooth>

"Wireless LAN"

G : Latch

When closing the display, press down firmly from above until the latch is firmly closed (locked).

CAUTION



When closing the disk cover, press down near the drive power/open switch (position of the arrow) to ensure that the cover is locked.

H : CD/DVD Drive

I : CD/DVD Drive Power/Open Switch

- Slide the switch to the right to open the disk cover.
- Slide the switch to the left to turn on/off the drive power.

CD/DVD Drive Indicator

- Off: Drive power is off.
- Green: Drive power is on, but the drive is not accessed.
- Blinking green: Drive power is on, and the drive is being accessed.

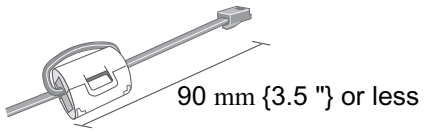
J : LCD

K : LAN Port

If the Mini Port Replicator is connected to the computer, connect the LAN cable to the LAN port on the Mini Port Replicator. You cannot use the LAN port on the computer.

L : Modem Port

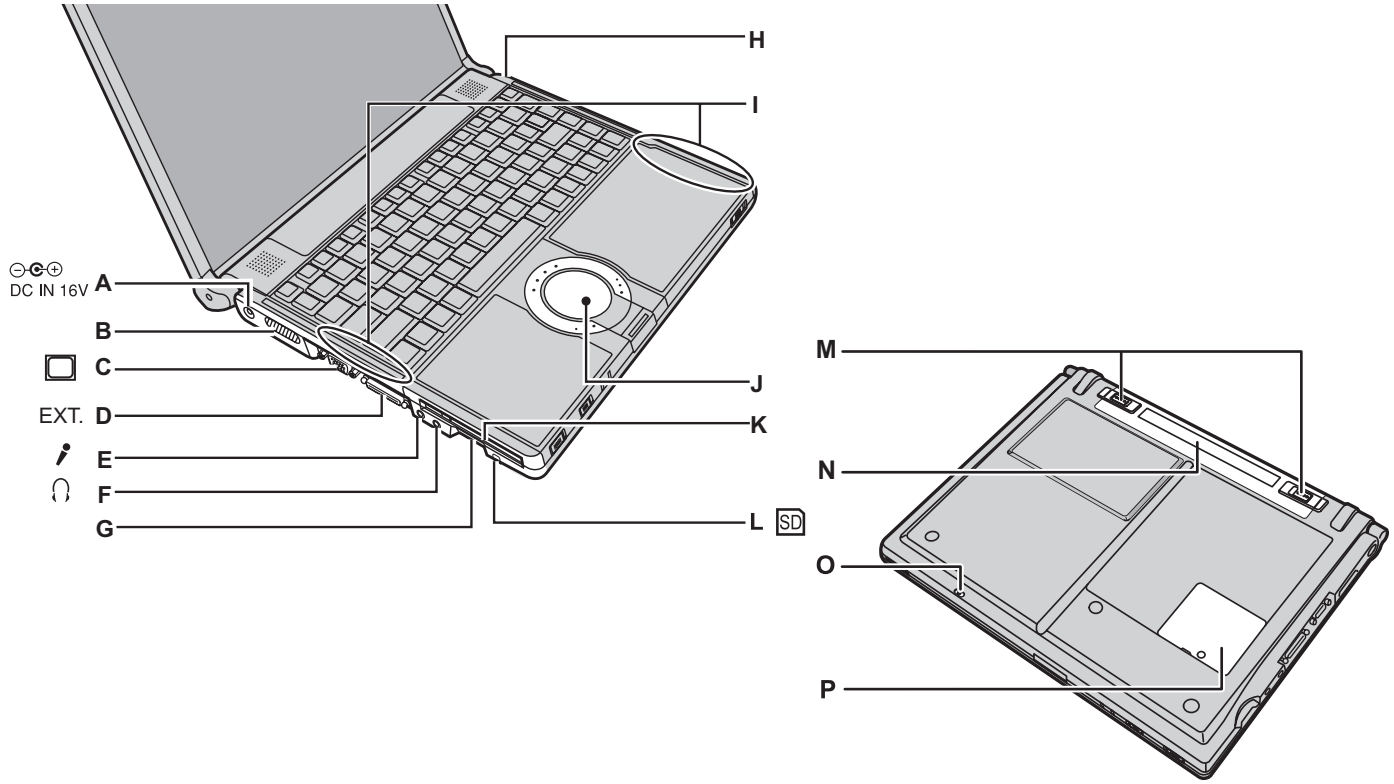
- Be sure to use the included modem telephone cable, and insert the ferrite core side of modem telephone cable into the modem port on the computer.
- Do not move/remove the ferrite core of modem telephone cable.



M : USB Ports

N : Security Lock

You can connect a Kensington cable. Refer to the instruction manual of the cable. The security lock and cable is a theft prevention device. Matsushita Electric Industrial Co., Ltd. will bear no responsibility in the event of theft.



A : DC-IN Jack

B : Ventilation Hole

C : External Display Port
If the Mini Port Replicator is connected to the computer, connect the external display to the external display port on the Mini Port Replicator. You cannot use the external display port on the computer.

D : Mini Port Replicator Connector
Connect the Mini Port Replicator (optional).

E : Microphone Jack
A condenser microphone can be used. If other types of microphones are used, audio input may not be possible, or malfunctions may occur as a result.

- When recording in stereo using a stereo microphone

  Double-click in the notification area, click [Options] - [Properties], and add a check mark for [Recording], click [OK] - [Options] - [Advanced Controls] - [Advanced], remove a check mark for [Mono Microphone], and then click [Close].
- When using a monaural microphone with a 2-terminal plug
  With the settings outlined above, only audio on the left track will be recorded.
  When monitoring the microphone audio using headphones, sounds on the left track cannot be heard, regardless of the above settings. This is a result of the computer's specifications, and is not a malfunction.

F : Headphone Jack
You can connect headphones or amplified speakers. When they are connected, audio from the internal speakers is not heard.

G : SD Memory Card Slot

H : Bluetooth Antenna
<Only for model with Bluetooth>

I : Wireless LAN Antenna

J : Touch Pad

K : PC Card Slot

L : SD Memory Card Indicat
Blinking: During access

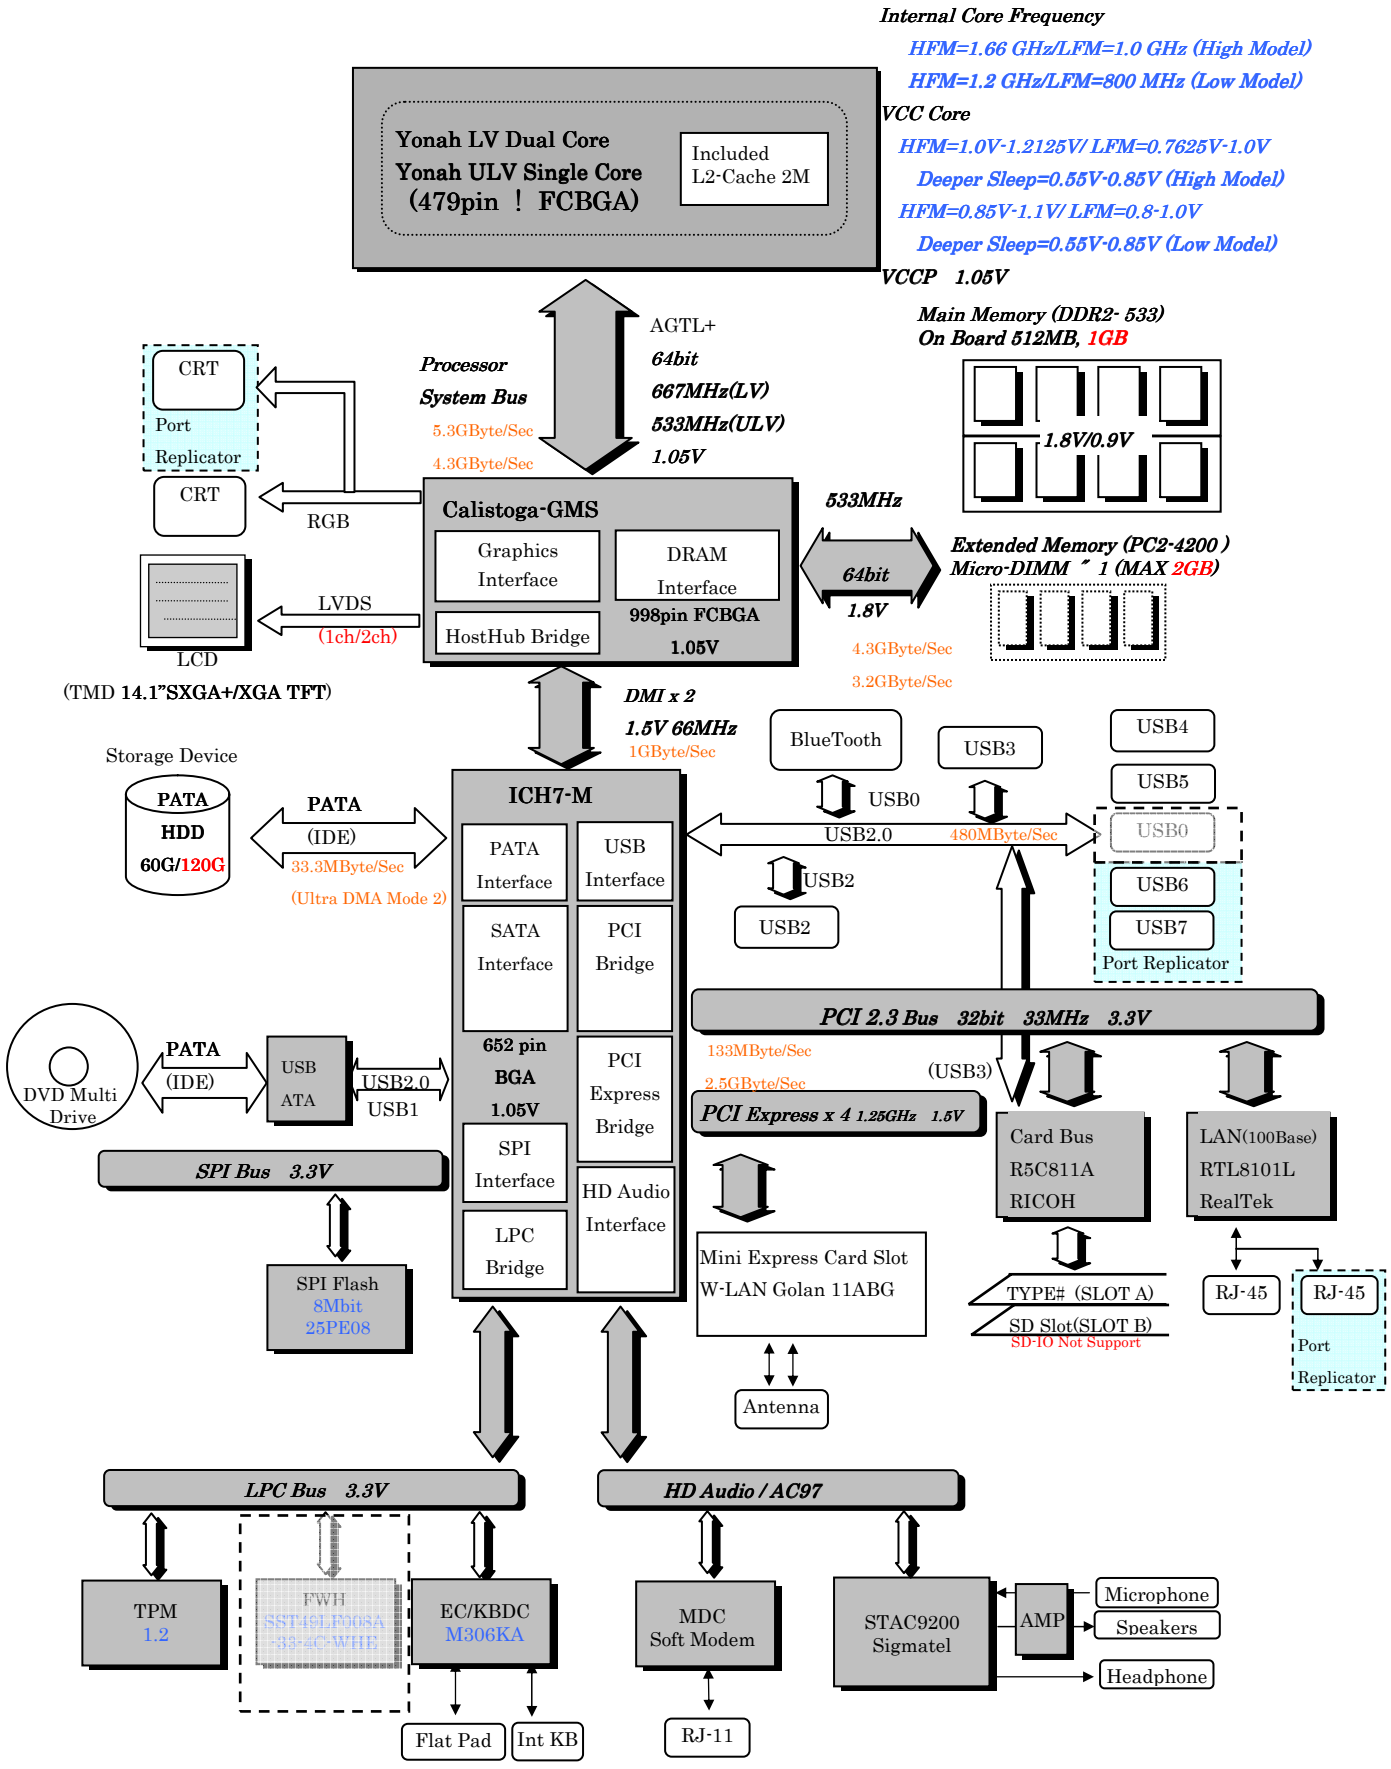
M : Battery Latches

N : Battery Pack

O : Emergency Hole

P : RAM Module Slot

3 Block Diagram

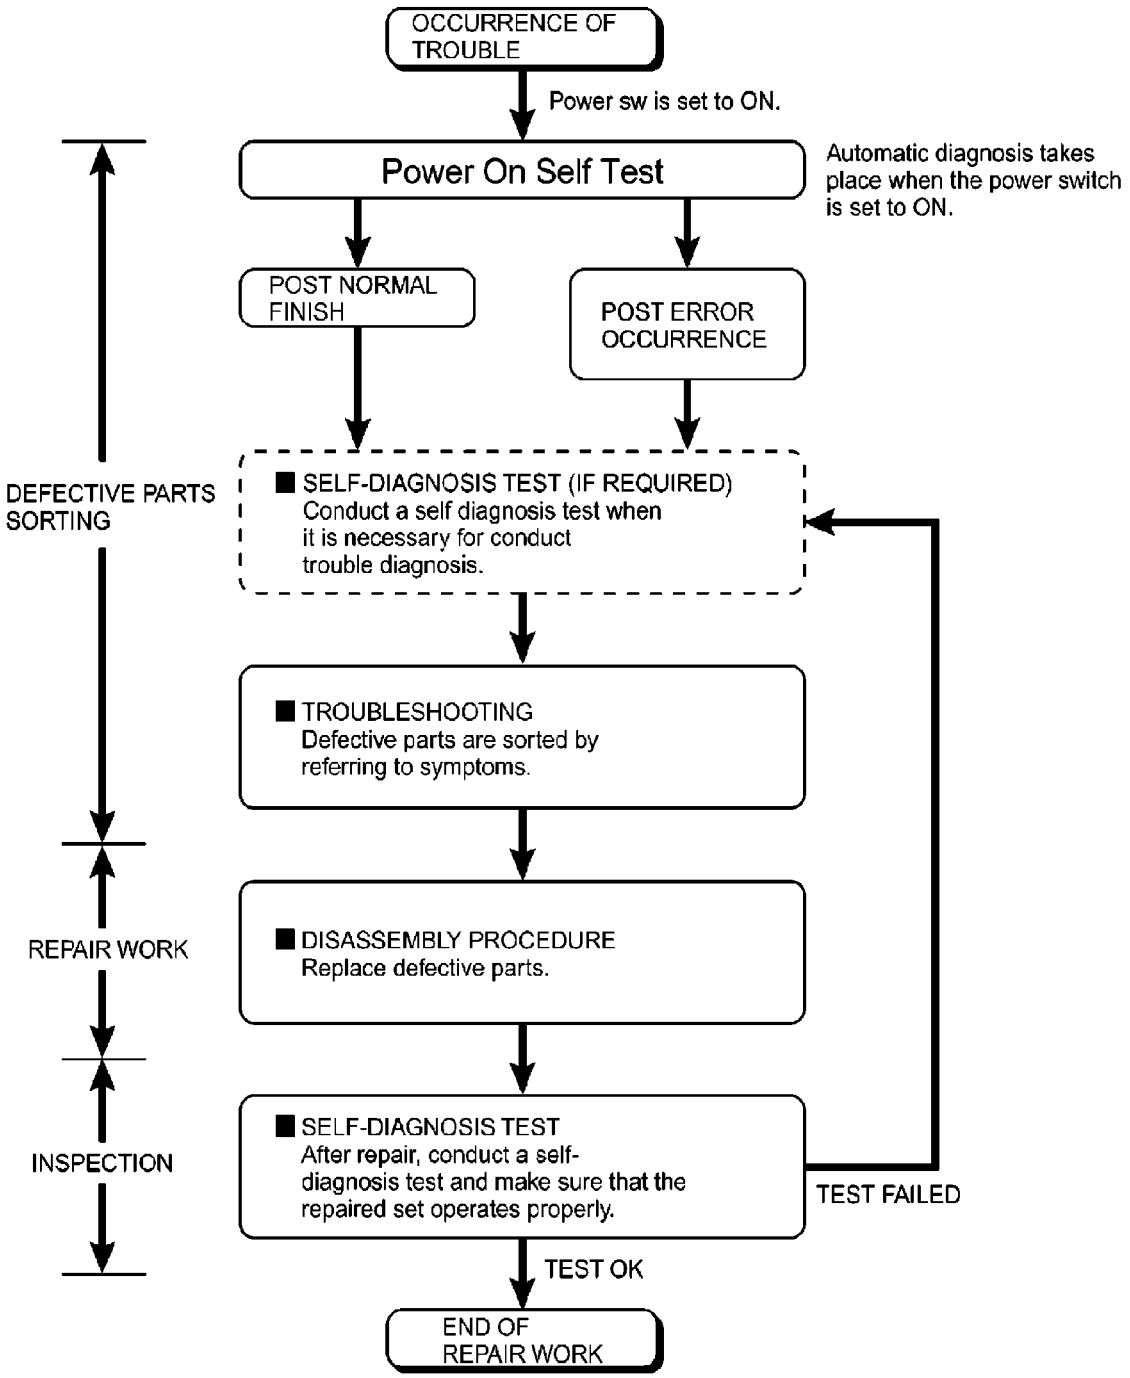


4 Diagnosis Procedure

4.1. Basic Procedures

The basic procedures for diagnosis, disassembly, and test of defective parts of a set to be repaired are summarized below. For details, refer to relevant pages in the Service Manual.

● **Flow Chart**

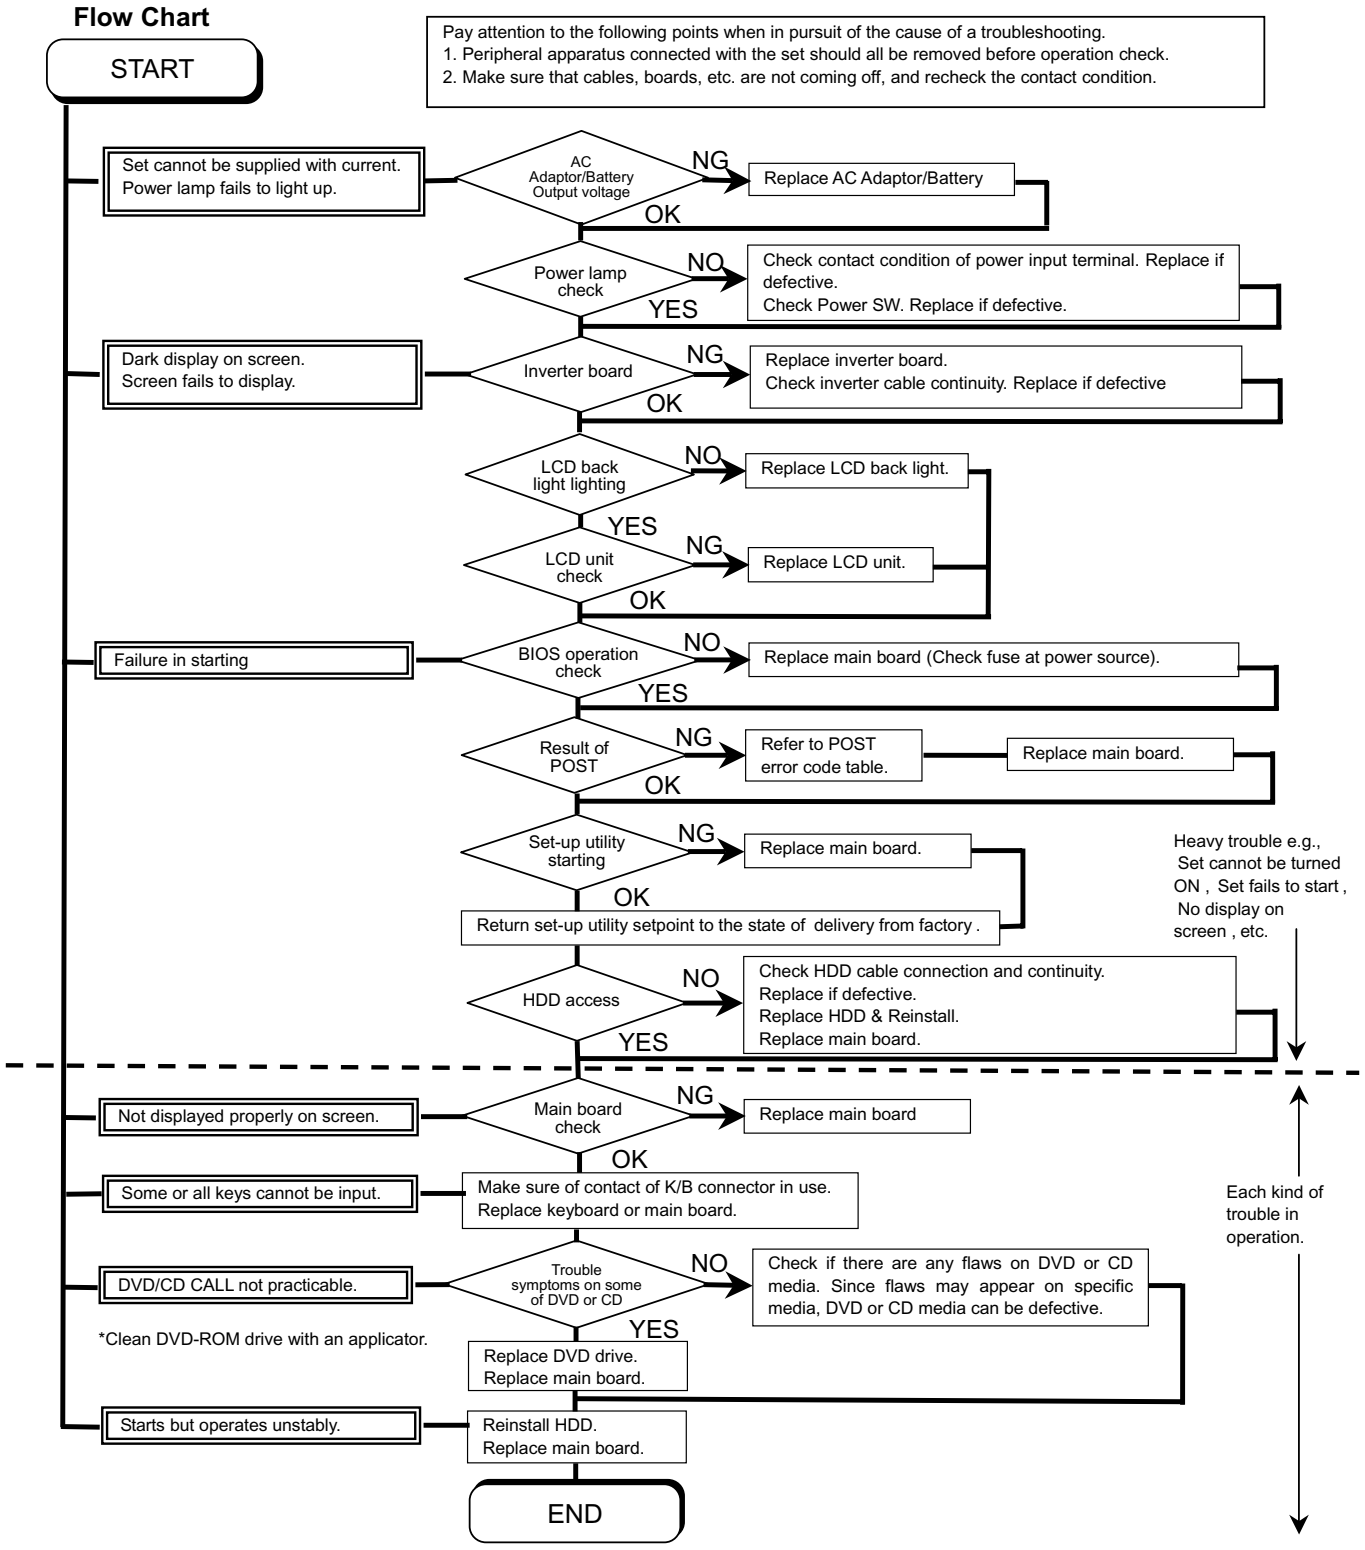


4.2. Troubleshooting

Please take note of the following two points with regard to troubleshooting:

1. Know-how of diagnosis upon occurrence of heavy troubles, e.g. Set cannot be turned ON , Set fails to start , No display on screen , etc.
2. Explanation of each trouble, mainly symptom of trouble in operation.

Flow Chart



5 Power-On Self Test (Boot Check)

Outline of POST

The set has a boot check function called POST (Power-On Self Test) in it.
The condition of the main body is diagnosed by checking beep sound or error code.

Start .....Test begins automatically when power switch is set to ON.

Normal finish .....After memory checking, a beep sound is issued once and the set is placed into automatic stop.

Note: If no error occurs, nothing is displayed. (No display of OK, etc.)

Error Diagnosis by Checking Beep Signal Sound

The beep sound is as follows:

(1 (long sound) -2-3-4)

(Length of bar shows length of sound.)

■ = long sound (about 0.4 sec.), ■ = short sound (about 0.2 sec.), Length between sounds is about 0.1 sec.

Table of errors classified by beep sounds

Diagnosis	Beep signal sound	Error message
Main board	1(long sound)-2	BIOS ROM error
	1-2-2-3	BIOS ROM error
	1-3-1-1	RAM error
	1-3-1-3	Keyboard controller error
	1-3-4-1	RAM error
	1-3-4-3	RAM error
	1-4-1-1	RAM error
	2-1-2-3	BIOS ROM error
	2-2-3-1	Occurrence of unexpected offering

(Note) A beep sound is also issued in case of other I/O trouble.

6 List of Error Codes <Only when the port replicator is connected>

The following is a list of the messages that BIOS can display. Most of them occur during POST. Some of them display information about a hardware device, e.g., the amount of memory installed. Others may indicate a problem with a device, such as the way it has been configured. Following the list are explanations of the messages and remedies for reported problems.
If your system displays one of except the messages marked below with an asterisk (*), write down the message and contact Panasonic Technical Support. If your system fails after you make changes in the Setup menus, reset the computer, enter Setup and install Setup defaults or correct the error.

0200 Failure Fixed Disk
Fixed disk in not working or not configured properly. Check to see if fixed disk is attached properly. Run Setup. Find out if the fixed-disk type is correctly identified.

0210 Stuck key
Stuck key on keyboard.

0211 Keyboard error
Keyboard not working.

0212 Keyboard Controller Failed
Keyboard controller failed test. May require replacing keyboard controller.

0213 Keyboard locked - Unlock key switch
Unlock the system to proceed.

0230 System RAM Failed at offset : *nnnn*
System RAM failed at offset *nnnn* of in the 64k block at which the error was detected.

0231 Shadow RAM Failed at offset : *nnnn*
Shadow RAM failed at offset *nnnn* of the 64k block at which the error was detected.

0232 Extended RAM Failed at offset : *nnnn*
Extended memory not working or not configured properly at offset *nnnn*.

0250 System battery is dead - Replace and run SETUP
The CMOS clock battery indicator shows the battery is dead. Replace the battery and run Setup to reconfigure the system.

***0251 System CMOS checksum bad - Default configuration used**
System CMOS has been corrupted or modified incorrectly, perhaps by an application program that changes data stored in CMOS. The BIOS installed Default SETUP Values. If you do not want these values, enter Setup and enter your own values. If the error persists, check the system battery or contact Panasonic Technical Support.

0260 System timer error
The timer test failed. Requires repair of system board.

0270 Real time clock error
Real-time clock fails BIOS test. May require board repair.

***0280 Previous boot incomplete - Default configuration used**
Previous POST did not complete successfully. POST loads default values and offers to run Setup. If the failure was caused by incorrect values and they are not corrected, the next boot will likely fail. On systems with control of **wait states**, improper Setup settings can also terminate POST and cause this error on the next boot. Run Setup and verify that the wait-state configuration is correct. This error is cleared the next time the system is booted.

0281 Memory Size found by POST differed from EISA CMOS
Memory size found by POST differed from EISA CMOS.

02D0 System cache error - Cache disabled

Contact Panasonic Technical Support.

02F0: CPU ID:

CPU socket number for Multi-Processor error.

02F4: EISA CMOS not writable

ServerBIOS2 test error: Cannot write to EISA CMOS.

02F5: DMA Test Failed

ServerBIOS2 test error: Cannot write to extended DMA (Direct Memory Access) registers.

02F6: Software NMI Failed

ServerBIOS2 test error: Cannot generate software NMI (Non-Maskable Interrupt).

02F7: Fail - Safe Timer NMI Failed

ServerBIOS2 test error: Fail-Safe Timer takes too long.

***device* address Conflict**

Address conflict for specified *device*.

Allocation Error for: *device*

Run ISA or EISA Configuration Utility to resolve resource conflict for the specified *device*.

Failing Bits : *nnnn*

The hex number *nnnn* is a map of the bits at the RAM address which failed the memory test. Each 1 (one) in the map indicates a failed bit. See error 230,231 or 232 for offset address of the failure in System, Extended or Shadow memory.

Invalid System Configuration Data

Problem with NVRAM (CMOS) data.

I/O device IRQ conflict

I/O device IRQ conflict error.

Operating System not found

Operating system cannot be located on either drive A: or drive C:. Enter Setup and see if fixed disk and drive A: are properly identified.

Parity Check 1 *nnnn*

Parity error found in the system bus. BIOS attempts to locate the address and display it on the screen. If it cannot locate the address, it displays ????. Parity is a method for checking errors in binary data. A parity error indicates that some data has been corrupted.

Parity Check 2 *nnnn*

Parity error found in the I/O bus. BIOS attempts to locate the address and display it on the screen. If it cannot locate the address, it displays ????.

Press <F1> to resume, <F2> to Setup

Displayed after any recoverable error message. Press <F1> to start the boot process or <F2> to enter a Setup and change the settings. Write down and follow the information shown on the screen.

7 Self Diagnosis Test

As for the self-diagnosis test(PC-Diagnostic utility) to use this model, a standard test and the enhancing test by the module of the main body building in are possible.

● Notes To skip BIOS password

Use <Ctrl>+<F10> key to skip BIOS password or authentication of fingerprint.
This key is only for entering DIAG mode. Not available to boot the computer.
If customer set "HDD Lock", the DIAG program cannot perform HDD test.
*This key is for service purpose only. Do not disclose this information to unrelated others.

1. Beginning of self-diagnosis test

1-1. Setting of content of setup

1. The power supply of the computer is turned on.
2. " F2 " is pushed on the screen of "Panasonic" while " press <F2 to enter Setup> " is displayed.
3. The setup utility starts and then takes notes of the content of the BIOS setup of present set.
4. " F9 " is pushed, " Yes" is selected on the screen of " Is the default value loaded? ", and " Enter" is pushed.
5. " F10 " is pushed.
6. " Yes" is selected on the screen of the setup confirmation, and " Enter" is pushed.
7. The computer starts automatically.

Attention

- If the device which can be set is set to "Invalidity" by "Advanced" or "Security" menu, becomes an error by "PC-Diagnostic utility".
  (It is judged that the device which can be set to "Invalidity" by "Main" menu such as "Flat pad" is normal if the controller operates normally though sets to "Invalidity" by the setup.)
- In the model with built-in DVD of the USB connection, even if DVD is normal, becomes an error if legacy USB is set to "Invalidity"

1-2. When you execute an automatic test

1. "Ctrl" + "F7" is pushed while the "Panasonic" start screen is displayed after the computer is started.
2. The test of all devices begins automatically by "PC-Diagnostic utility"'s starting.

Attention

- It is a test which the customer who bought PC can execute. (As for HDD, the enhancing test is also possible.)
- A flat pad does not work for a while after starting "PC-Diagnostic utility".
- The movement of a flat pad might become abnormal If after RAM begins from the CPU/System test, a flat pad will be operated in about 30 seconds. In that case,restarts pushing"Alt" + "Ctrl" + "Del" key. Or, please start "PC-Diagnostic utility" again after doing the power supply switch in the slide, and turning off the power supply.

1-3. When you execute the enhancing test

1. Please let me discontinue diagnosing clicking to end an automatic test.

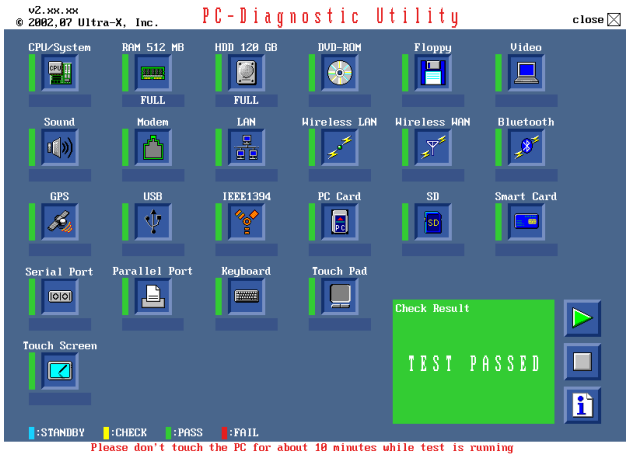
2. Please click on the character of "D" "PC-Diagnostic utility" on the screen while pushing both of right "Shift" and left "Shift" keys.

3. All devices which can select the enhancing test make the setting of the enhancing test possible.
4. The district device is made"FULL" display (enhancing test).
5. The test begins clicking .

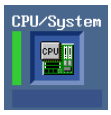
*Please refer to item 4 for the error result of each test and the division of the breakdown part.

2. Operation of PC-Diagnostic Utility

-Only the device which can be inspected on the entire screen is displayed.
-The item does not appear when the device of wireless LAN etc. is not physically connected.
-The movement of the item must use an arrow key or a flat pad.



-As for the device under the diagnosis, blue and yellow are alternately displayed at the left of the icon.
- The diagnosis result of the device greens at the left of the icon when it is normal, and becomes red when abnormal.



-When the test of all devices ends, the test result is displayed under the right of the screen.

-Please click while diagnosing when being stop on the way by the time the test of all devices ends.

-Please click when you restart "PC-Diagnostic utility".

*Each device is tested from the beginning, and it is not possible to restart on the way.

2-1. Selection of tested device

-To test only a specific device, "Test" and "Do not test" of each device can be selected.
-The device which can select the enhancing test changes in order of "The standard is tested" and "Do not test" whenever the device icon is clicked.

Start the standard test

Do not test

Please begin testing clicking if the selection of the tested device ends.

2-2. "PC-Diagnostic utility" End method

When ☒ of "Close" on the right of the screen is clicked, the computer reactivates automatically. Or, the power supply switch is done in the slide and the power supply is turned off.

2-3. The content of the setup is returned to the setting of the user

1. Turned on the computer.
2. "F2" is pushed on the screen while "Press<F2>to enter Setup" is displayed of "Panasonic".
3. Push "F10", and on the screen of "Is the change in the setting preserved and do end?"and then "Yes" is selected, and "Enter" is pushed.
4. The computer reactivates automatically.
5. The end option is chosen by the start menu, and the power supply of the computer is turned off.

Standard at test time
All devices other than RAM and HDD -------- about 1 minute
RAM standard test ---------- 1 - 2 minutes
HDD standard test ---------- 2 - 3 minutes
HDD enhancing test (60GB) ---------- about 40 minutes

Ex.The standard when the standard <all device> is tested becomes 1+2+3=6 minutes.

- There is greatly a difference from RAM test when the memory is increased according to the performance of the memory occasionally.
- Moreover, when the main body of PC under the test is a high temperature, it occasionally takes time.
- There is greatly a difference from HDD according to the performance of the drive occasionally.

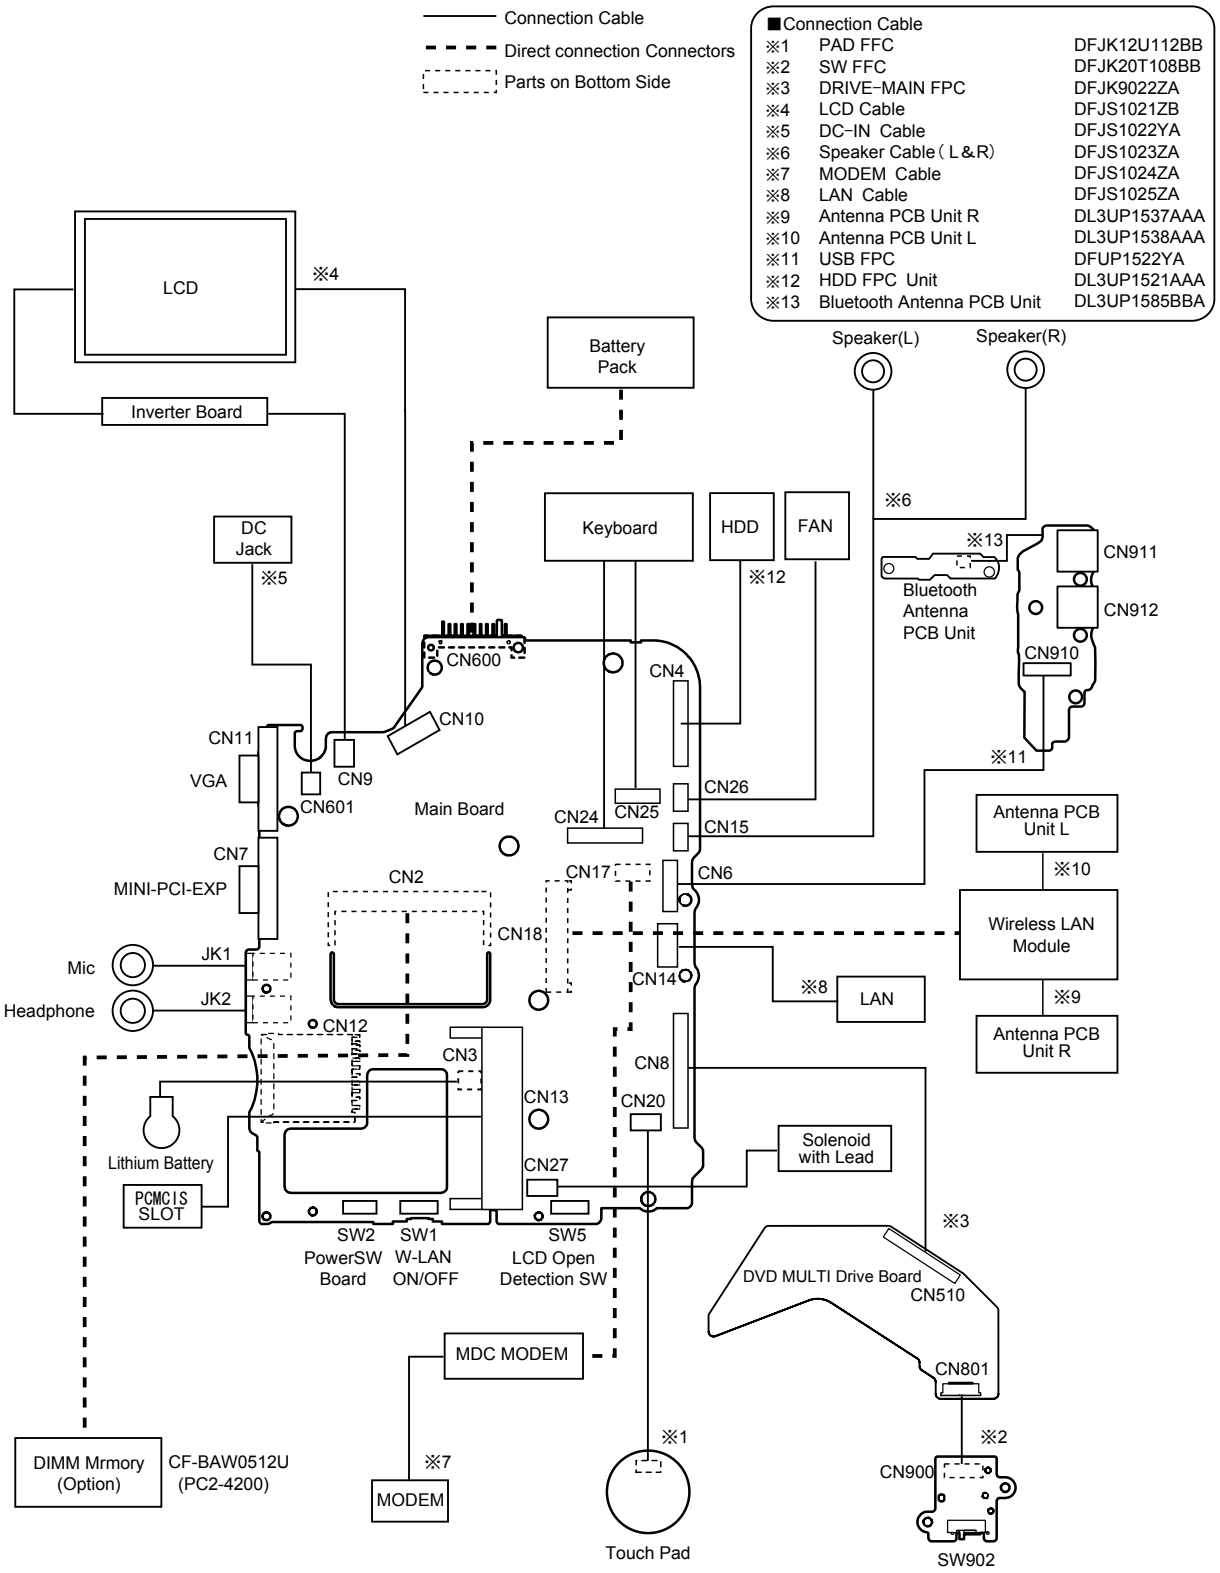
7.1. Test Item and Division of trouble

Test item	Stanard	Enhancing	Content of standard test	Content of enhancing test	Place with possibility of breakdown
CPU / SYSTEM	○	—	CPU is shifted to protected mode, and "Violation of the paging", "Operation of the violation of a privileged instruction", and DMA, INT, TIMER, and the RTC operation are confirmed.	—	CPU / Main board
RAM	○	—	All memory space is tested in a special memory access pattern based on "R.S.T . technology".	—	Memory / Mainboard
HDD	○	○	The record area frequently accessed with Microsoft Windows XP to test in about two minutes regardless of points of HDD is emphatically tested.	All record area is tested.	HDD / Mainboard / Cable / Connector
MODEM	○	—	It is confirmed not to find abnormality in the AC97 modem controller.	—	MODEM/ Mainboard
Wireless LAN	○	—	It is confirmed not to find abnormality in the Wireless LAN modem controller.	—	Wireless LAN board / Connector / Mainboard
Sound *5	○	—			
USB	○	○*1	It is confirmed not to find abnormality in the USB controller.	It is confirmed not to find abnormality in the wiring between the USB controller and the connector by confirming the connection of the USB equipment connected with the USB connector.	Mainboard / Connector
LAN	○	○*2	It is confirmed not to find abnormality in the LAN controller.	It is confirmed not to find abnormality in the wiring between the controller and the connector by connecting to HUB with LAN cable.	Mainboard / Connector
PC Card	○	—	It is confirmed not to find abnormality in the CardBus controller.	—	Mainboard
SD	○	—	It is confirmed not to find abnormality in the SD controller.	—	Mainboard
Keyboard	○	○*3	It is confirmed not to find abnormality in keyboard controller's keyboard interface.	The key is actually input, and the operation is displayed on the screen.	Mainboard / Keyboard
Touch Pad	○	○*4	Whether keyboard controller's mouse interface operates normally is confirmed.	The operation is actually displayed on the screen by operating the touch pad.	Mainboard / Touch Pad
DVD-ROM	○	○*6	The drive is normally reset, and it is accessible is confirmed.	It is confirmed to be able to read media normally.	Mainboard / Touch Pad

Test Item	Standard	Enhanced	Content of Standard Test	Content of Extend Test	The place with possibility of breakdown
Touch Screen	○	○	It is confirmed not to find abnormality in the USB connection of Touch Screen. This test cannot find abnormality of Touch Screen.	Perform Touch Screen functionality practically. Operator has to judge PASS/FAIL with test result.	Main board/ Touch Screen
Bluetooth	○		It is confirmed not to find abnormality in the connection of Main board and Bluetooth module.	—	Bluetooth cable
Floppy	○	—	It is confirmed not to find abnormality in the legacy FD drive. This test cannot find abnormality of mechanical breakdown. (e.g.. Head, Motor)	—	FD Drive/ Main board (Super I/O)/ FDD cable FDD connector
Video	○	—	It is confirmed not to find abnormality in access to VRAM with VESA. The PC which uses main of Main board and GPS main memory failure.	—	Main board (Chipset, Graphic Controller)/ Memory
GPS	○	—	It is confirmed not to find abnormality in the connection memory as VRAM may fail with	—	GPS cable
IEEE1394	○	—	It is confirmed not to find abnormality in the IEEE1394 controller.	—	Main board (IEEE 1394 Controller)
Express Card	—	○	—	It is confirmed not to find abnormality in the wiring between Chipset and Express Card.	Main board (Chipset)/ Express Card Connector
Smart Card	○	—	It is confirmed not to find abnormality in the Smart Card controller.	—	Main board (Smart Card Controller)
Serial Port	○	○ *7	It is confirmed not to find abnormality of Super I/O UART function. This test cannot find lack of wiring between Super I/O and Serial Connector.	It is confirmed not to find abnormality in the wiring between Super I/O and Serial Connector. This test cannot find failure of cable characteristic and device problems.	Main board (Super I/O)/ Serial Connector
Parallel Port	○	○ *8	It is confirmed not to find abnormality of Super I/O parallel function. This test cannot find lack of wiring between Super I/O and Parallel Connector.	It is confirmed not to find abnormality in the wiring between Super I/O and Parallel Connector. This test cannot find failure of cable characteristic and device problems.	Main board (Super I/O)/ Parallel Connector

*1 Please connect the USB device with the port (USB connector) which wants to test before the tests.
*2 Please connect LAN port with LAN HUB with LAN cable before the tests.
*3 The operator actually inputs the key, and the operator judges PASS/FAIL of the test.
*4 The operator actually operates the mouse, and the operator judges PASS/FAIL of the test.
*5 It is not abnormal though the sound is emitted from the speaker while testing.
※ When the test result is PASS, trouble is thought by not hearing of the sound under the test from the speaker and the headphone by the wiring of the audio output system.
*6 Please set DVD/CD media in the drive before the tests.
*7 Please set a Special Loop Back Connector Tool at serial connector for Enhanced Test. (This Connector Tool is same as the one used before.)
*8 Please set a Special Loop Back Connector Tool at parallel connector for Enhanced Test. (This Connector Tools is same as the one used before.)

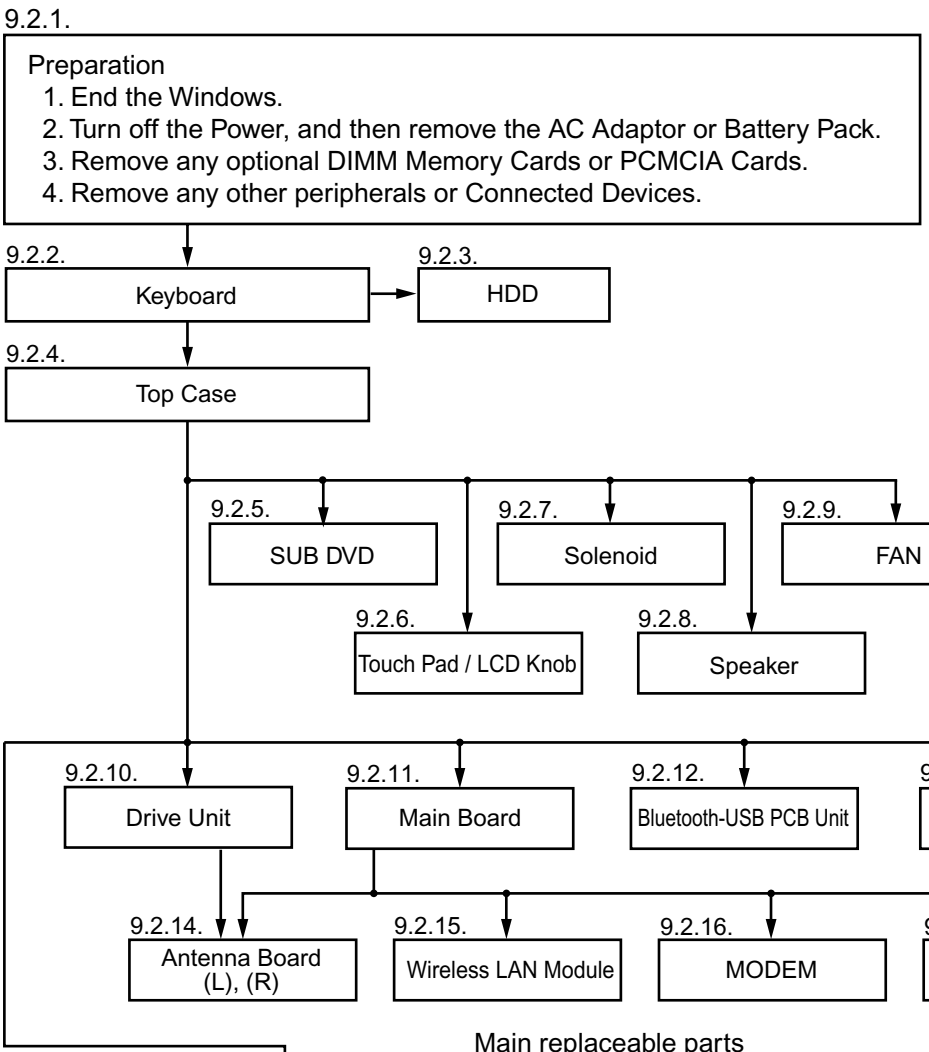
8 Wiring Connection Diagram



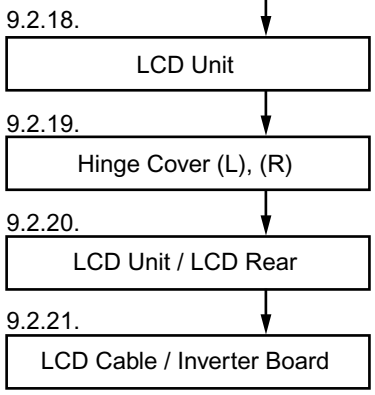
9 Disassembly instructions

9.1. Disassembly Flow Chart

● Main Unit



● Display Unit



Main replaceable parts

9.2.1. -Battery Pack
-DIMM Cover
-Side Cover
9.2.2. -HDD
-HDD Cover
9.2.3. -Keyboard
-Keyboard Side Cover (L), (R)
9.2.4. -Top Case
-Disk Side Cover
9.2.5. -SUB DVD
-Disk Eject Knob
9.2.6. -Touch Pad
-LCD Knob
-Pad Buttom
-PAD FFC
9.2.7. -Solenoid
-Disk Cover Angle
9.2.8. -Speaker
9.2.9. -FAN
9.2.10. -Drive Unit
9.2.11. -Main Board
-Lithium Battery
9.2.12. -Bluetooth-USB PCB Unit
9.2.13. -DC-IN Cable
9.2.14. -Antenna Board (L), (R)
9.2.15. -Wireless LAN Module
9.2.16. -MODEM
9.2.17. -Card Bus Ejector
9.2.18. -LCD Unit
9.2.19. -Hinge Cover (L), (R)
9.2.20. -LCD Rear
-LCD Hook
9.2.21. -Hinge (L), (R)
-LCD Cable
-Inverter Board

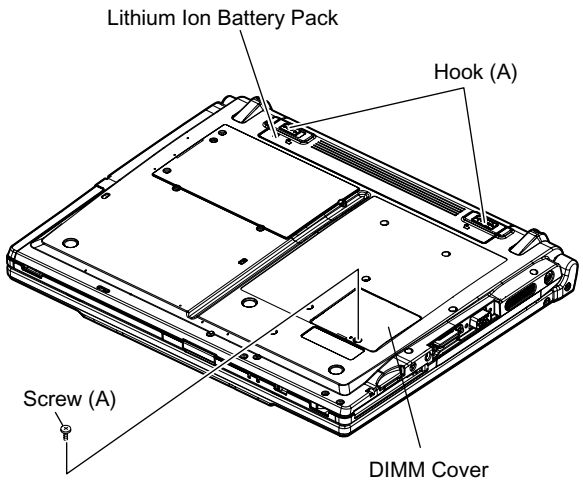
9.2. Disassembly Instructions

9.2.1. Preparation

Attention:

Before disassembly, be sure to perform the following steps.

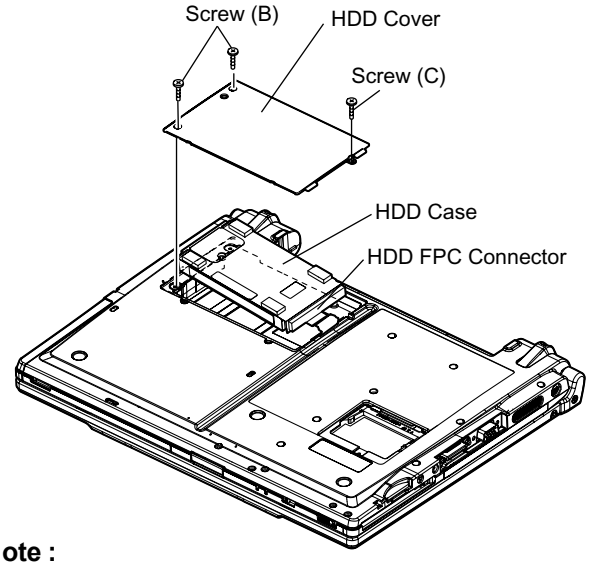
1. End the Windows.
2. Turn off the power and then remove the AC adaptor.
3. Slide the hooks (A) and then remove the battery Pack.
4. Remove the screw (A) and then remove the DIMM cover.
   (Remove if the DIMM memory is equipped with)
   Screw (A) : XSB2+4FNL (N14)



9.2.2. Removing the HDD

Preparation : perform the section 9.2.1. first.

1. Remove the 2 screws (B) and 1 screw (C).
   Screw (B) : DXQT2+D4FNL (N7)
   Screw (C) : DXQT2+E12FNL (N9)
2. Lift up the HDD unit and remove FFC connector and then remove the HDD unit.
3. HDD is taken out of the HDD case.



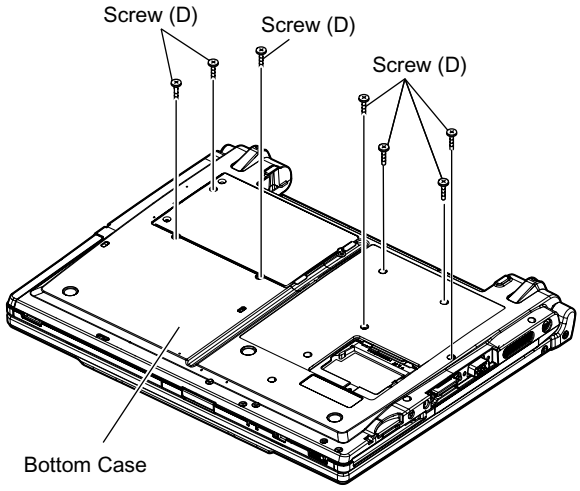
Note :

Please do not bend pins of the HDD connector, at the time of removing HDD and FFC connector.

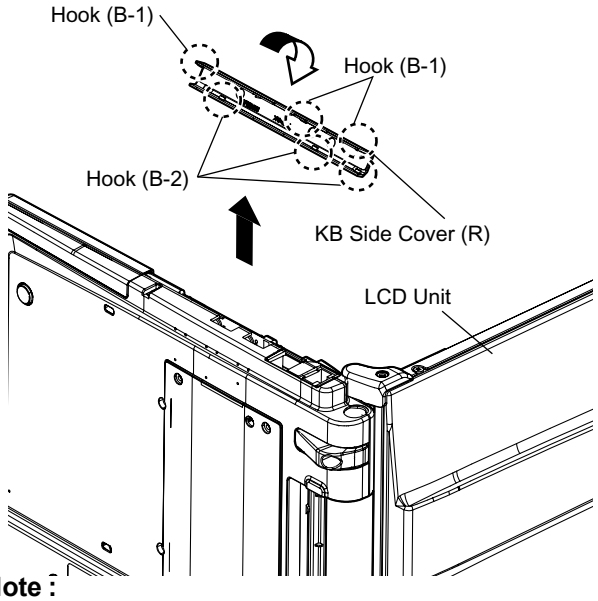
9.2.3. Removing the Keyboard

Preparation : perform the section 9.2.1. first.

1. Remove the 7 screws (D).
   Screw (D) : DXQT2+E12FNL (N9)
2. Operate the LCD knob and open the LCD Unit to an angle of 90 degrees or more.
   The minus clock driver removes hook (B-1) in the intuition combination part so as not to damage from the W-LAN connector side space to the exterior, and then rotates to the keyboard side, and KB side cover is detached.
3. Remove the keyboard hook plates,and then remove the hook of back side of keyboard with screwdriver.



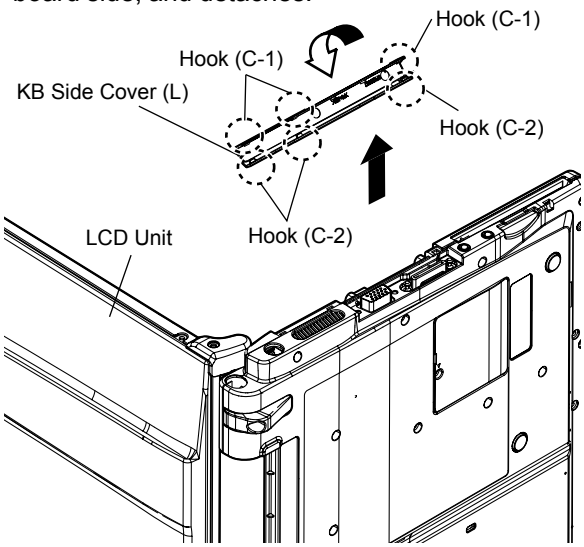
4. Operate the LCD knob and open the LCD unit to an angle of 90 degrees or more.
   The minus clock driver removes hook (B-1) in the hook position so as not to damage from the wireless LAN connector side space to the exterior, and then rotates to the keyboard side, and KB side cover is removed.



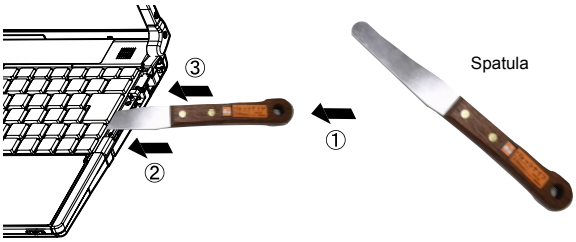
Note :

Be careful not to wrap the protection cloth etc. around minus clock driver's point, and be careful not to damage the exterior.

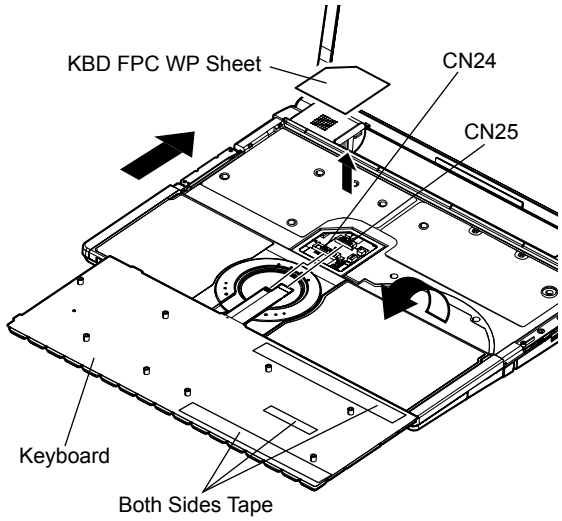
5. KB side cover (L) is adjusted to the upper part as well as KB side cover (R), the minus clock driver removes hook (C-1) in the hook position from the space with the bottom case, rotates to the keyboard side, and detaches.



6. The both sides tape pasted to the keyboard bottom with the spatula is inserted in order of the arrow and then peel off. It is start-up from the LCD side and turns inside out on the top case.
   The KBD FPC WP sheet is peeld off, FFC (keyboard) is removed from connector (CN25) and (CN24), and then remove the keyboard.



※ Do not damage the spatula ahead and move a top case in the direction of the arrow in ①-③ order.

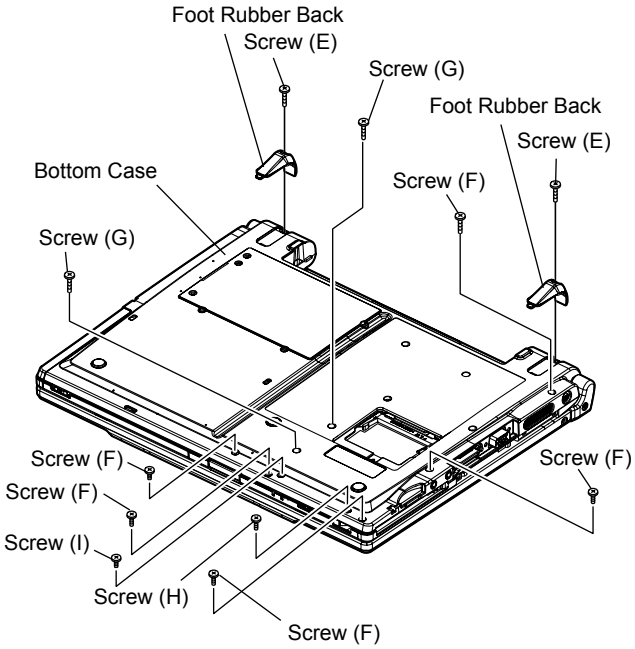


Note:
KBD-FPC sheet cannot be recycled. Please use new parts.

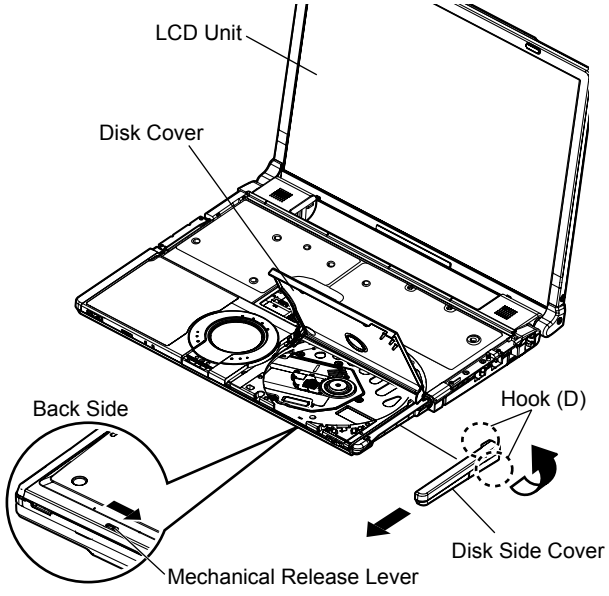
9.2.4. Removing the Top Case

Preparation : perform the section 9.2.1., 9.2.3. first.

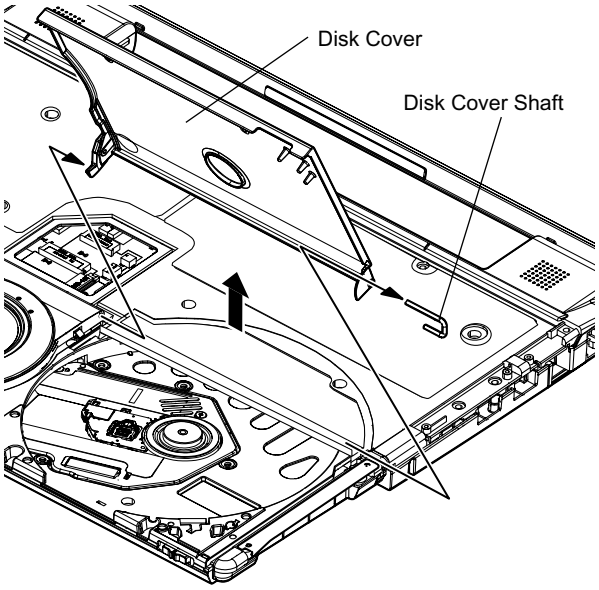
1. Remove the 2 screws (E) and 2 foot rubber backs.
   Screw (E) : XTB26+10GFN (N12)
2. Remove the 5 screws (F).
   Screw (F) : DXHM0057ZA (N5)
3. Remove the 2 screws (G).
   Screw (G) : DXHM0049ZA (N3)
4. Remove the 1 screw (H) and 1 screw (I).
   Screw (H) : DXQT2+D4FNL (N7)
   Screw (I) : DXQT2+E10FNL (N8)



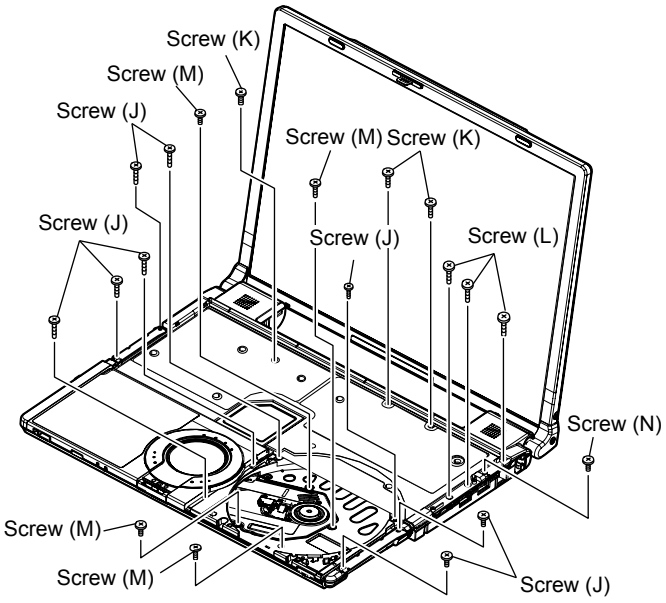
5. Operate the LCD knob and open the LCD Unit to an angle of 90 degrees or more.
6. The hook 2 places of the disk side cover are removed, and detaches forward while rotating in the direction of the upper surface.
7. The disk cover lock is mechanically released, and the disk cover is opened.



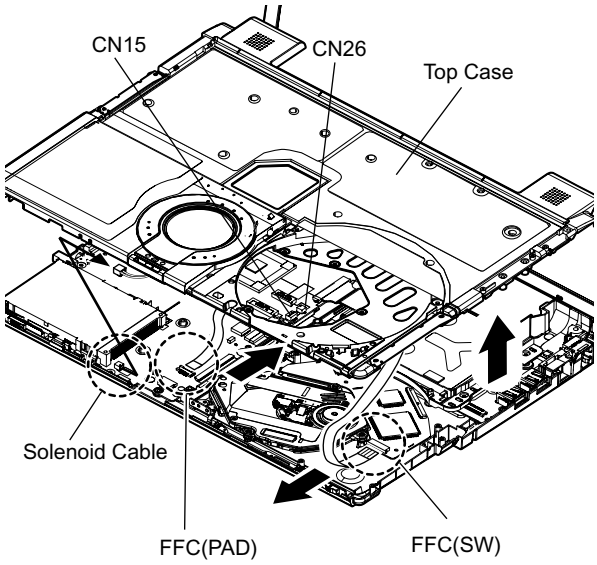
8. The disk cover shaft is removed and pulling out disk cover is removed from the disk cover.



9. Remove the 8 screws (J), 3 screws (K), 3 screws (L), 4 screws (M) and 1 screw (N).
   Screw (J) : DXQT2+E6FNL (N10)
   Screw (K) : DRQT2+E8FKL (N2)
   Screw (L) : DXQT2+E10FNL (N8)
   Screw (M) : DXQT2+F3FNL (N16)
   Screw (N) : DXHM0056ZA (N4)



10. CN26 (FAN) and CN15 (SP) are removed. A top case is lifted and FFC (PAD), FFC (DRIVE) and CN27 (solenoid) are removed and then the top case is removed.



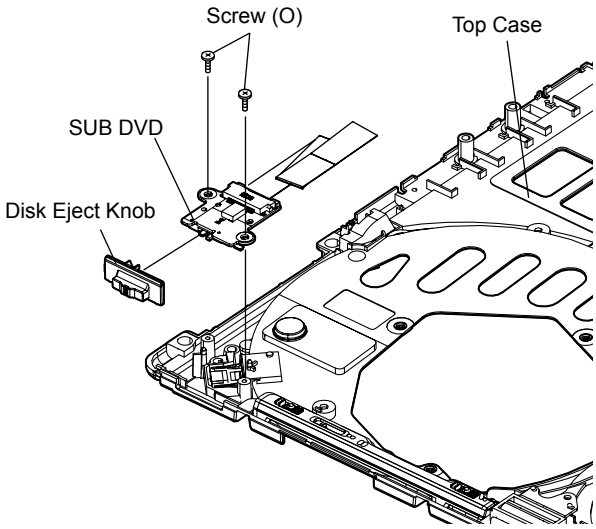
9.2.5. Removing the SUB DVD

Preparation : perform the section 9.2.1., 9.2.3. and 9.2.4. first.

1. Peel off the tape.
2. Remove the 2 screw (O) and then remove the SUB DVD.
   Screw (O) : DXHM0056ZA (N4)

Note:

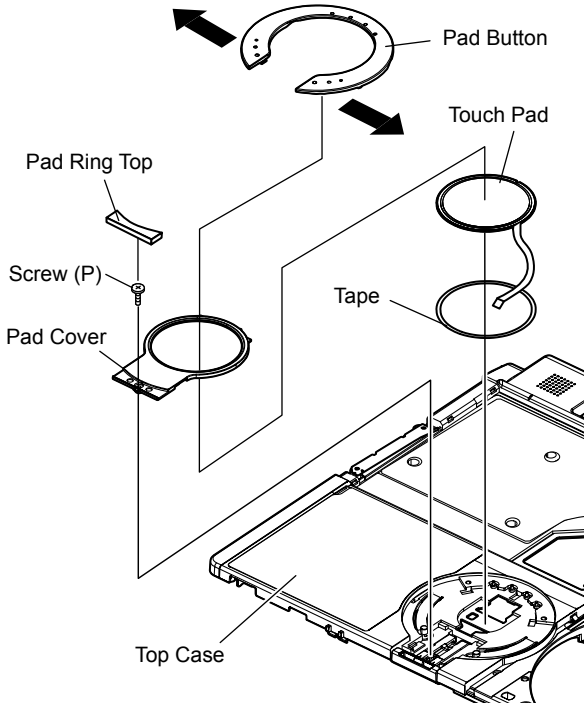
Note it that the disc eject knob comes off at the same time.



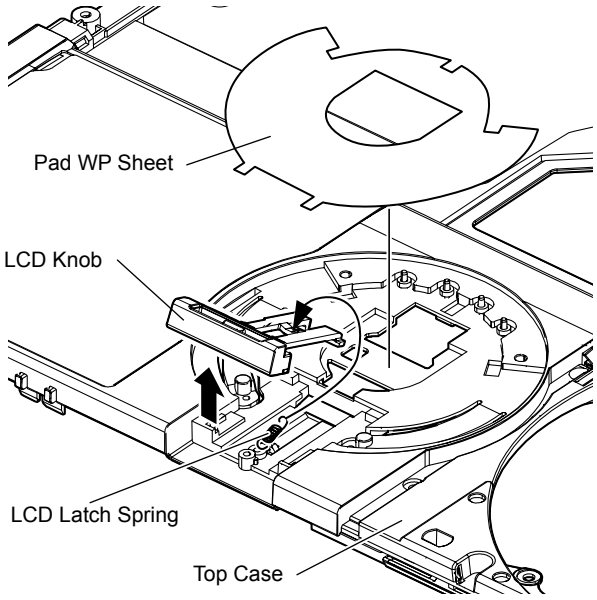
9.2.6. Removing the Touch Pad / LCD Knob

Preparation : perform the section 9.2.1., 9.2.3. and 9.2.4. first.

1. The pad top ring fixed to the pad cover by the both sides tape is removed, and remove the screw (P).
   Screw (P) : DXHM0057ZA (N5)



2. Peel off the pad sheet.
   The LCD knob is lifted from a top case, and removing LCD knob is removed from the knob side in the LCD latch spring.

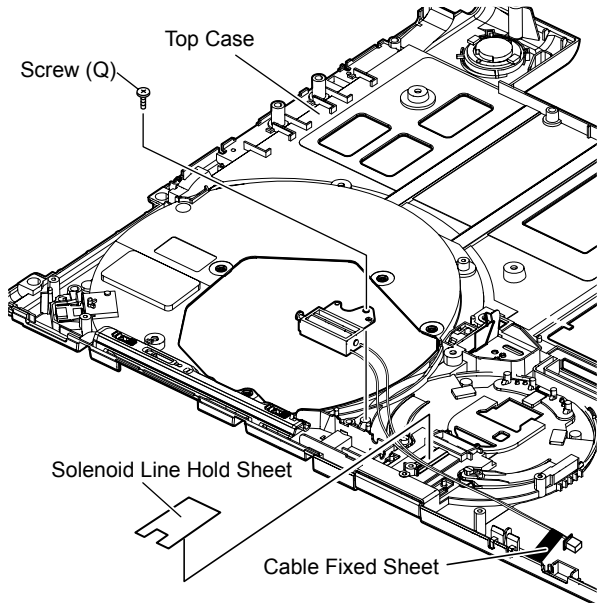


Note:
The pad sheet cannot be recycled. Please use new parts.

9.2.7. Removing the Solenoid / Disc Cover Lock

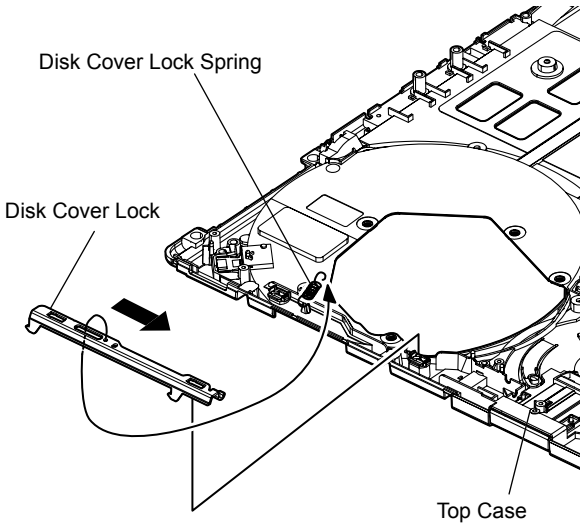
Preparation : perform the section 9.2.1., 9.2.3. and 9.2.4. first.

1. Remove the solenoid line hold sheet and cable fixed sheet.
   Solenoid line hold sheet : DFHR3D20ZA (K122)
2. Remove the 1 screw (Q) and the solenoid from the top case.
   Screw (Q) : DXHM0056ZA (N4)



Note:
The each cable fixed tapes cannot be recycled. Please use new parts.

3. Remove the disc cover lock spring, and slide the disc cover lock and then remove.

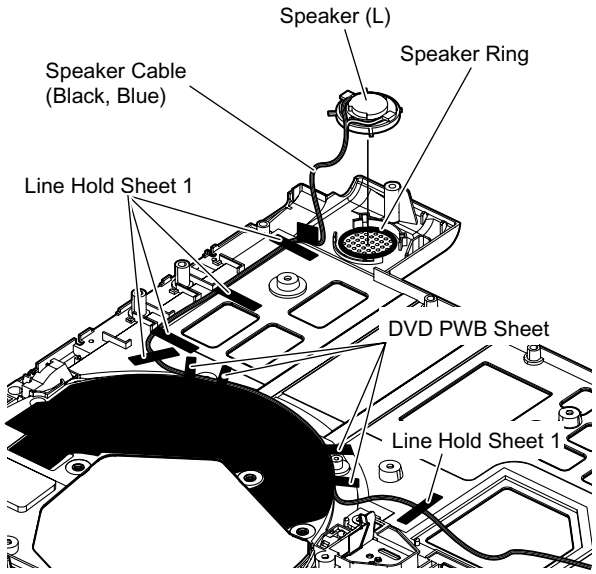


Note:
When expanding or transforming, the disk cover knob spring cannot be recycled.

9.2.8. Removing the Speaker (L), (R)

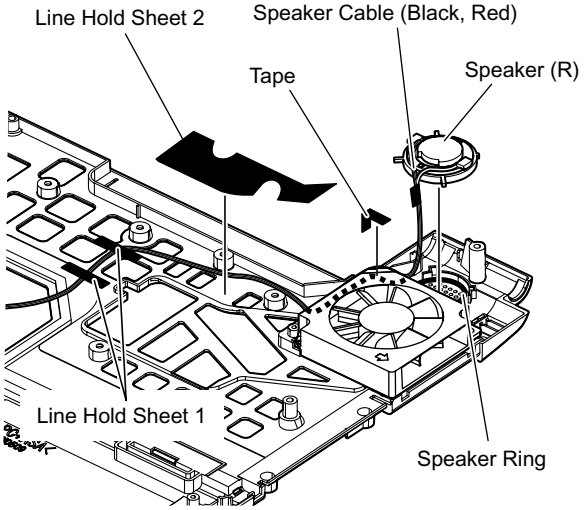
Preparation : perform the section 9.2.1., 9.2.3. and 9.2.4. first.

1. Peel off the 5 line hold sheet 1, the 4 brims of the DVD PWB sheet, and remove the speaker (L).
   Line hold sheet 1 : DFHR3D21YA (K123)
   DVD PWB sheet : DFMX1229ZA (K161)



Note:
These sheet and speaker ring cannot be recycled. Please use new parts.

2. Peel off the 2 line hold sheet 1, line hold sheet 2 the 1 tape, and remove the Speaker (L).
   Line hold sheet 1 : DFHR3D21YA (K123)
   Line hold sheet 2 : DFHR3D22ZA (K124)

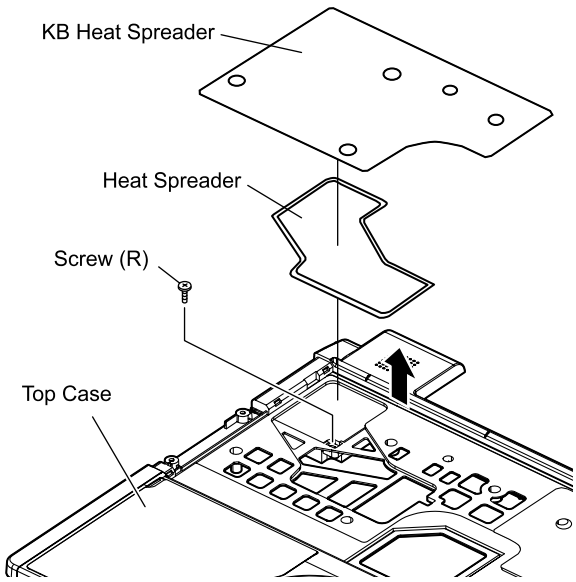


Note:
These sheets and speaker ring cannot be recycled. Please use new parts.

9.2.9. Removing the FAN

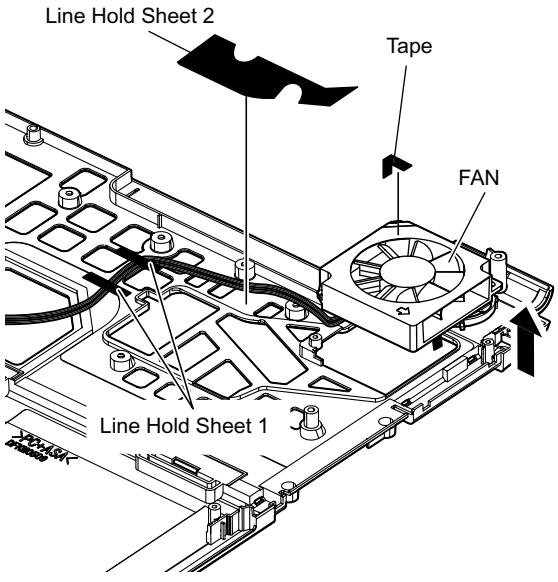
Preparation : perform the section 9.2.1., 9.2.3. and 9.2.4. first.

1. Remove the KB heat spreader and the heat spreader.
2. Remove the 1 screw (R)
   Screw (R) : DXHM0057ZA (N5)



Note:
KB heat spreader and the heat spreader cannot be recycled. Please use new parts.

3. Remove the tape and line hold sheet 2 and then remove the FAN.
   Line hold sheet 1 : DFHR3D21YA (K123)
   Line hold sheet 2 : DFHR3D22ZA (K124)

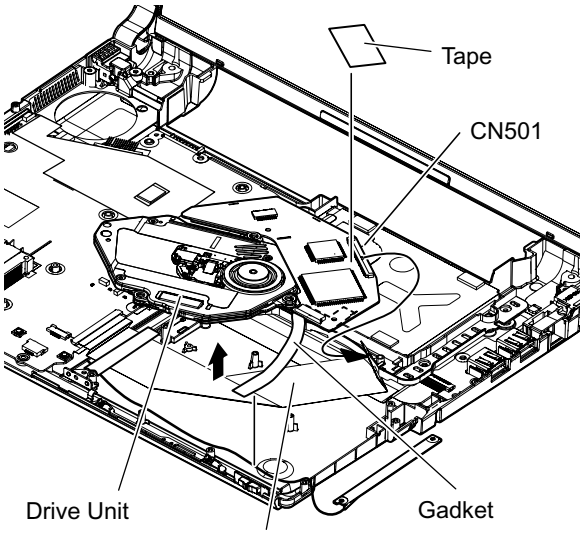


Note:
These sheets and tape cannot be recycled. Please use new parts.

9.2.10. Removing the Drive Unit

Preparation : perform the section 9.2.1., 9.2.3. and 9.2.4. first.

1. Peel off the tape from the connector.
2. DVD FFC is removed from connector (CN501), and the drive unit is lifted from the bottom case, and the gasket is peeled off and then remove the drive unit.



Note:

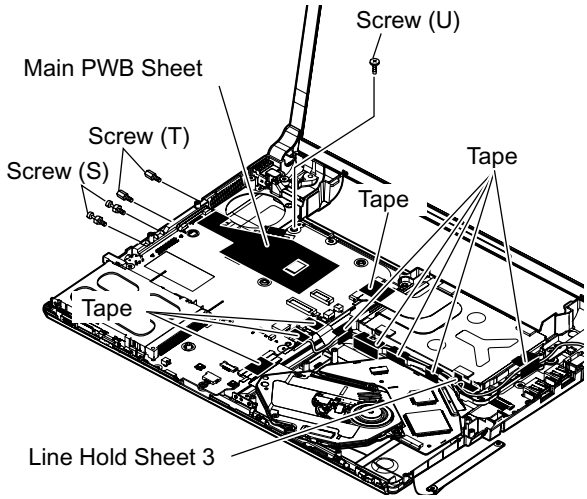
-When you exchange DRIVE-MAIN FFC, mark the bottom case, and match new FFC to marking of the bottom case, bend, and build the bend externals of FFC before peeling off FFC from the bottom case.

-Tape and gusket cannot be recycled. Please use new parts.

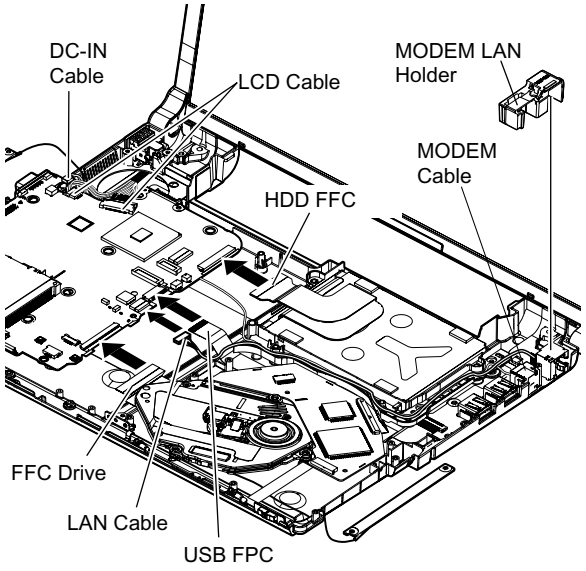
9.2.11. Removing the Main Board

Preparation : perform the section 9.2.1., 9.2.3. and 9.2.4. first.

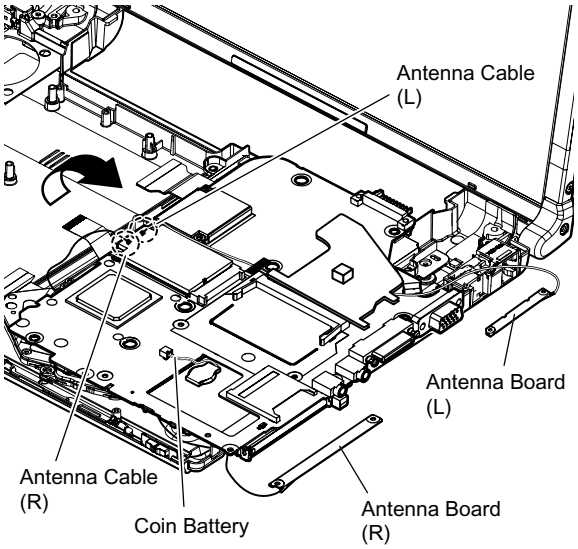
1. Remove the 2 screws (S), 2 screws (T) and 1 screw (U).
   Screw (S) : K1YE5000022 (N15)
   Screw (T) : DFHE5035ZB (N1)
   Screw (U) : DXQT2+E6FNL (N10)
2. Peel off the 6 tapes, main PWB sheet and line hold sheet 3.
   Main PWB sheet : DFMX1228ZA (K64)
   Line hold sheet 3 : DFHR3D59YA (K47)



3. Disconnect the LCD connector (CN9) (CN10), DC-IN connector (CN601) and FFC (CN4) (CN6) (CN18) (CN8).



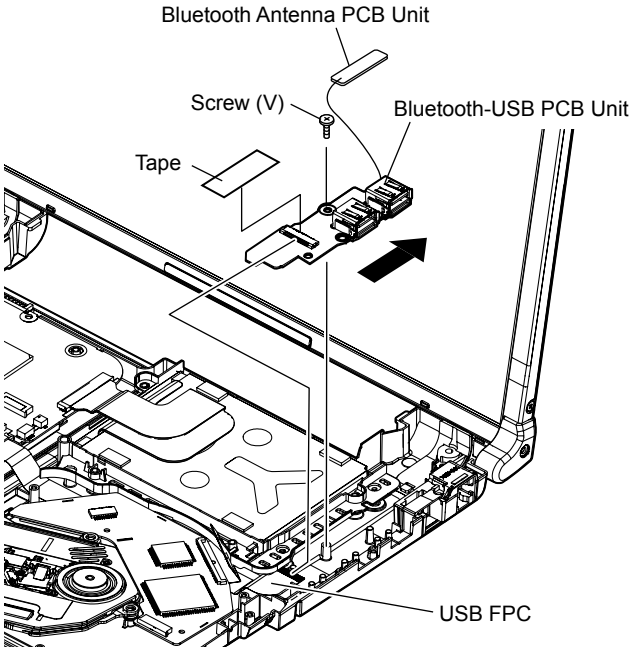
4. Turn inside out the main board. Remove the antenna cable (L), (R) from the wireless LAN module, and then remove the main board.
5. Remove the connector from CN3 and then remove the coin battery.



9.2.12. Removing the Bluetooth-USB PCB Unit (with BT) / Bluetooth Antenna PCB Unit

Preparation : perform the section 9.2.1., 9.2.3. and 9.2.4. first.

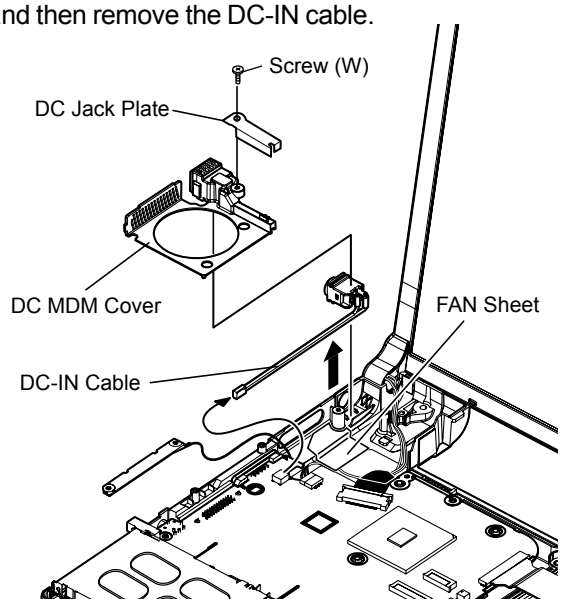
1. Remove the screw (V).
   Screw (V) : DXQT2+D25FNL (N6)
2. Remove the USB FPC from the tape and CN910, and then remove the bluetooth-USB PCB unit.



9.2.13 . Removing the DC-IN Cable

Preparation : perform the section 9.2.1., 9.2.3. and 9.2.4. first.

1. Remove the 1 screw (W) .
   Screw (W) : DXQT2+E6FNL (N10)
2. DC-IN jack plate, DC MDM cover, DC-IN cable connector (CN601), and FAN sheet are peeled off, and then remove the DC-IN cable.

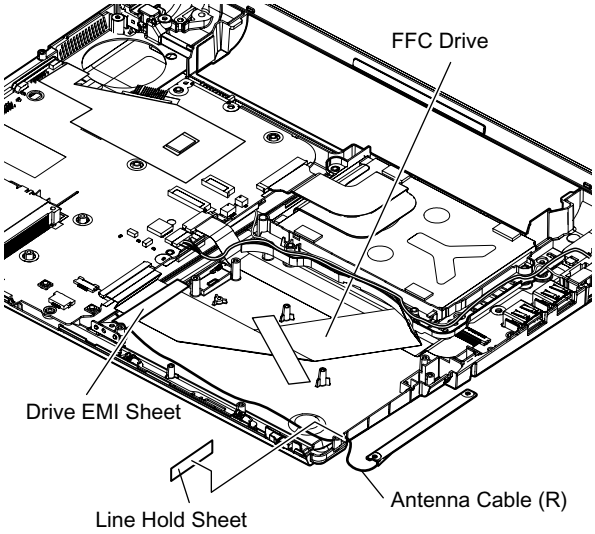


Note:
FAN sheet cannot be recycled. Please use new parts.

9.2.14. Removing the Antenna Board Unit (L), (R)

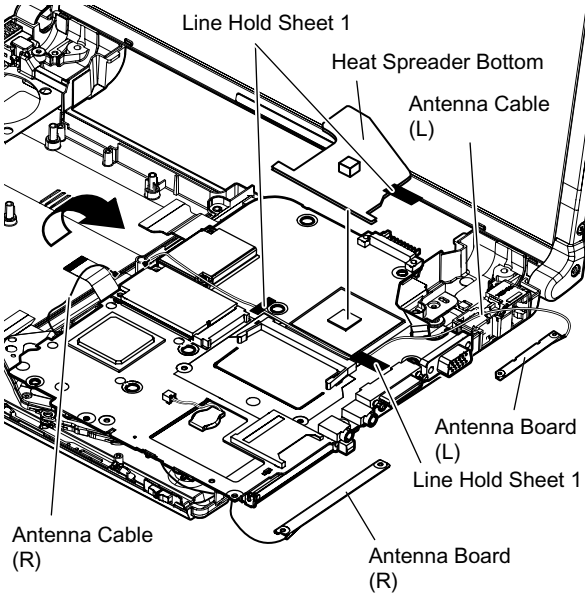
Preparation : perform the section 9.2.1., 9.2.3., 9.2.4., 9.2.10. and 9.2.11. first.

1. Peei off the line hold sheet and drive EMI sheet and then remove the antenna board (R).
   Line hold sheet : DFHR3D80ZA (K52)
   Drive EMI sheet : DFHE1003ZA (K38)



Note:
These sheet cannot be recycled. Please use new parts.

2. Line hold sheet 1 and heat spreader bottom are peeled off from main Board's wireless LAN side, and takes the antenna cable (L) out from the ditch and then remove the antenna board (L).
   Line hold sheet 1 : DFHR3D21ZB (K43)
   Heat spreader bottom : DFMY3222ZA (K69)

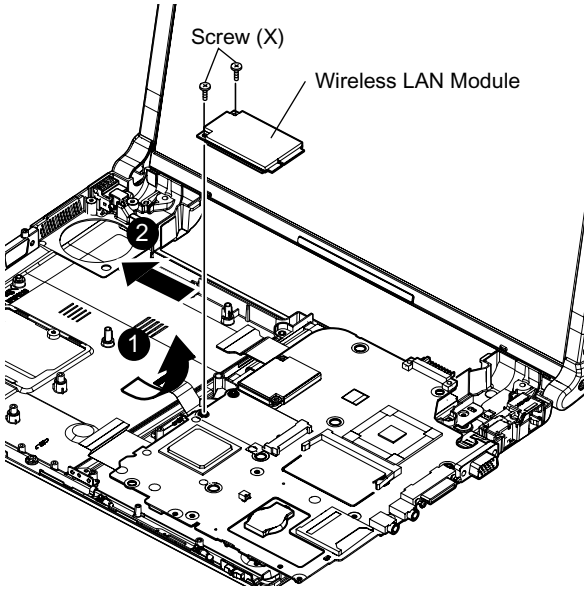


Note:
Line hold sheet 1 and heat spreader bottom cannot be recycled. Please use new parts.

9.2.15. Removing the Wireless LAN Module

Preparation : perform the section 9.2.1., 9.2.3., 9.2.4. and 9.2.11. first.

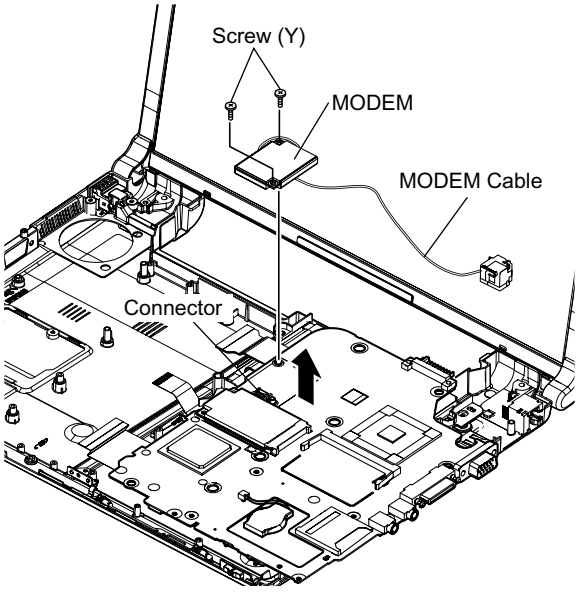
1. Remove the 2 screws (X).
   Screw (X) : DXQT2+D25FNL (N6)
2. Wireless LAN module is floated in the connector fulcrum and removed.



9.2.16. Removing the MODEM

Preparation : perform the section 9.2.1., 9.2.3., 9.2.4. and 9.2.11. first.

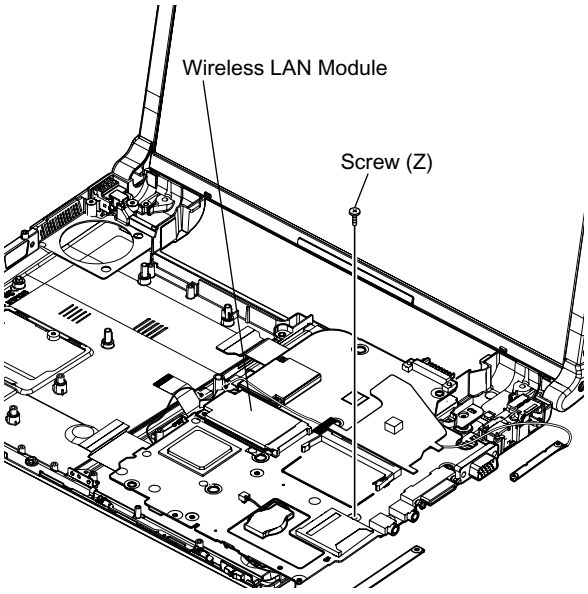
1. Remove the 2 screws (Y).
   Screw (Y) : DXQT2+D25FNL (N6)
2. MODEM will be removed from connector (CN17) to the vertical direction.



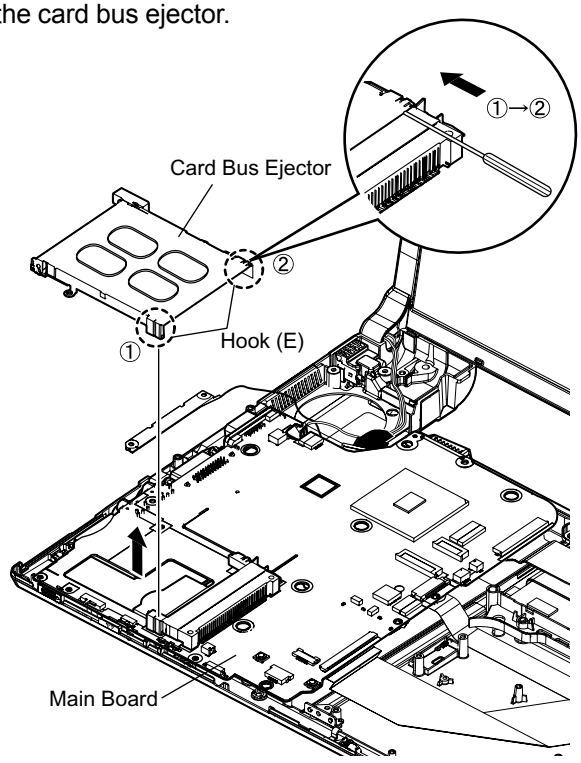
9.2.17. Removing the Card Bus Ejector

Preparation : perform the section 9.2.1., 9.2.3., 9.2.4. and 9.2.11. first.

1. Remove the 1 screw (Z) from connection side of wireless LAN.
   Screw (Z) : DXQT2+D25FNL (N6)



2. Return it on the revers to the card bus ejector side.
3. The minus small driver is inserted in connector (CN13) and the card bus ejector intuition combination parts, 2 places of hooks (E). And then remove the card bus ejector.



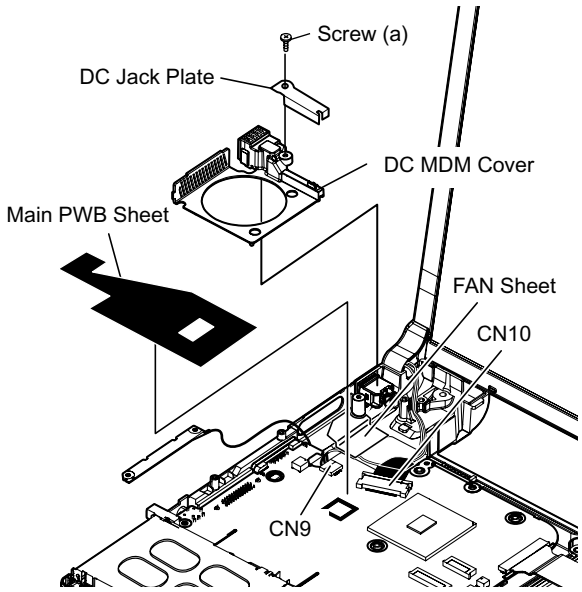
Note :

Be careful not to transform the card bus ejector when you remove the hook.

9.2.18. Removing the LCD Unit

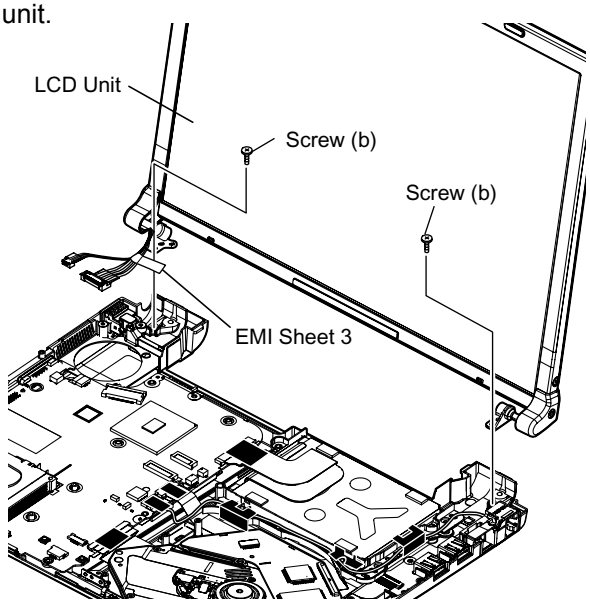
Preparation : perform the section 9.2.1., 9.2.3. and 9.2.4. first.

1. Remove the 1 screw (a).
   Screw (a) : DXQT2+E6FNL (N10)
2. Remove the DC-IN jack plate, DC MDM cover and FAN sheet.
   FAN sheet : DFMY0428ZA (K65)
3. Peel off the main PWB sheet and remove the connector (CN9), (CN10) of the main board.
   Main PWB sheet : DFMX1228ZA (K64)



Note:
These sheet cannot be recycled. Please use new parts.

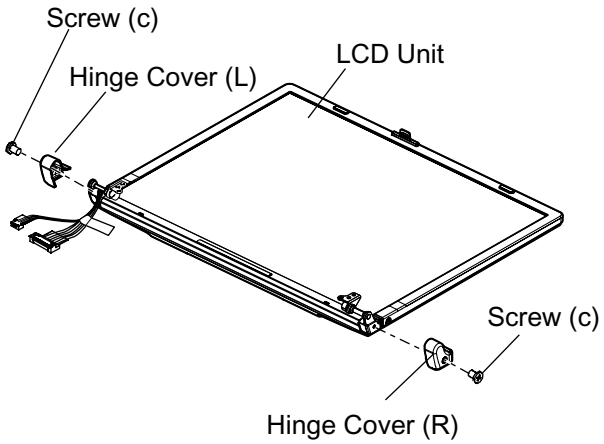
4. Remove the 2 screws (b).
   Screw (b) : DXYN26+J6FNM (N11)
5. Peel off the EMI sheet 3 and then remove the LCD unit.



9.2.19. Removing the Hinge Cover (L), (R)

Preparation : perform the section 9.2.1., 9.2.3., 9.2.4. and 9.2.18. first.

1. Remove the 2 screws (c) and then remove the hinge Cover (L), (R).
   Screw (c) : DRHM0076ZA (N17)

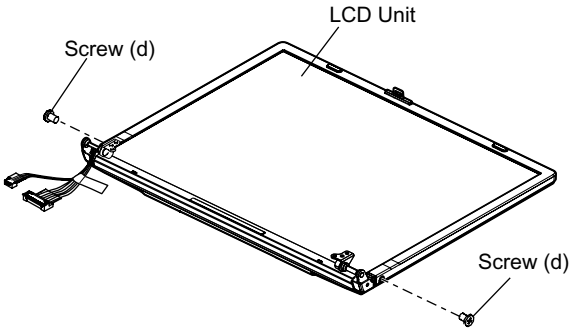


Note:
Screw (c) cannot be recycled. Please use new parts.

9.2.20. Removing the LCD Unit and the LCD Rear

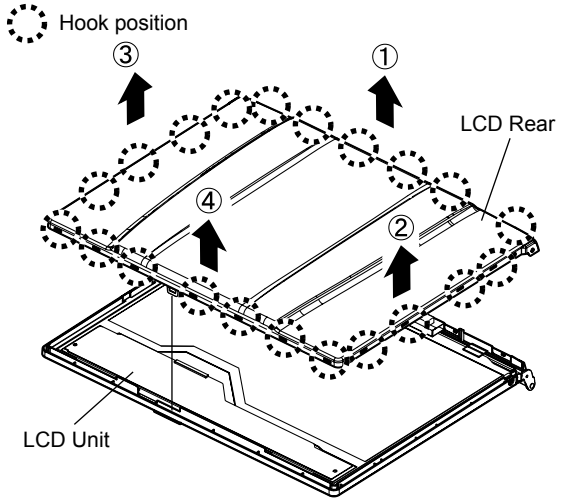
Preparation : perform the section 9.2.1., 9.2.3., 9.2.4., 9.2.18. and 9.2.19. first.

1. Remove the 2 screws (d).
   Screw (d) : DRHM0076ZA (N17)



Note:
Screw (d) cannot be recycled. Please use new parts.

2. The intuition combination part of LCD rear case (21 places) is separated with LCD front case.



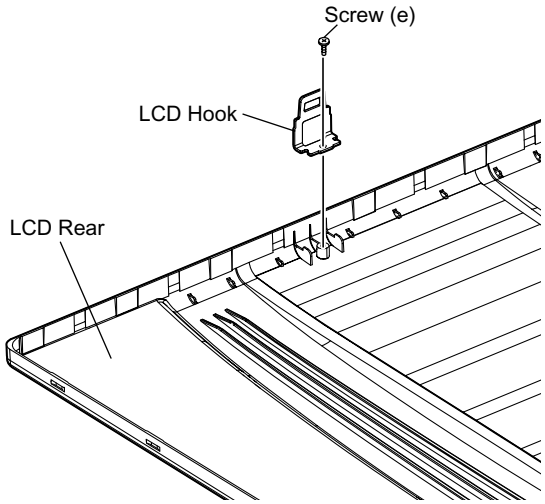
Note:

-When each hook is removed, it becomes easy to detach if the driver who wraps protection cloth etc. is inserted with LCD Front Case between LCD rear covers, and the slide is repeated.

-Do noting that externals are not damaged.

3. Remove the 1 screw (e) from LCD rear and then remove the LCD hook.

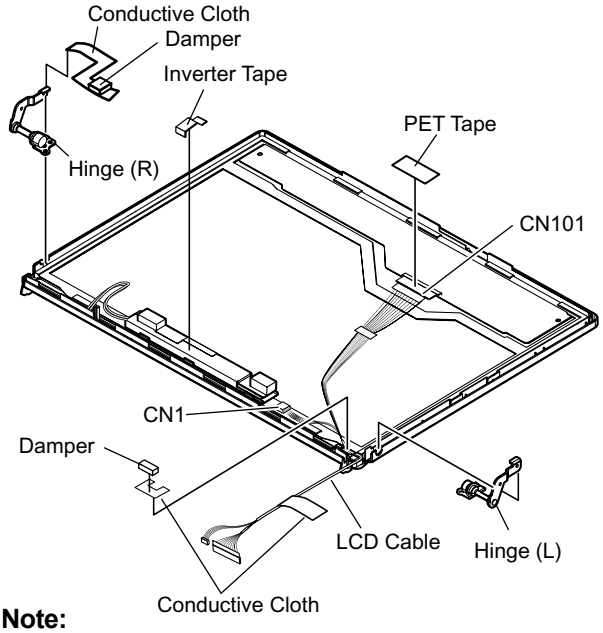
Screw (e) : DXQT2+D25FNL (N6)



9.2.21. Removing the LCD Cable / Inverter Board

Preparation : perform the section 9.2.1., 9.2.3., 9.2.4., 9.2.18. and 9.2.20. first.

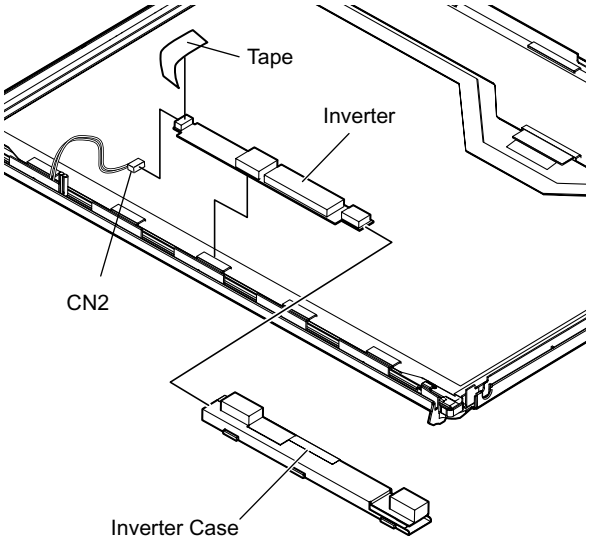
1. Peel of the damper, conductive cloth, inverter tape and the tape.
   Inverter tape : DFHR3E07ZA (K18)
2. Remove the hinge (L), (R).
3. LCD Ccable is removed from LCD unit board (CN101), and connector (CN1) is removed from inverter board.



Note:

Conductive cloth and tapes cannot be recycled. Please use new parts.

4. Inverter case is peeled off and Inverter fixed with a both sided tape is taken out.
5. Peel off the tape from inverter.
6. Remove the connector (CN2) and then remove the inverter.



Note:

Tape and inverter case cannot be recycled. Please use new parts.

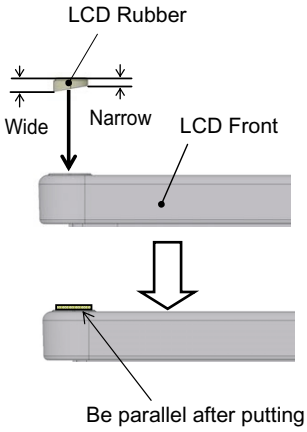
9.3. Reassenbly instructions

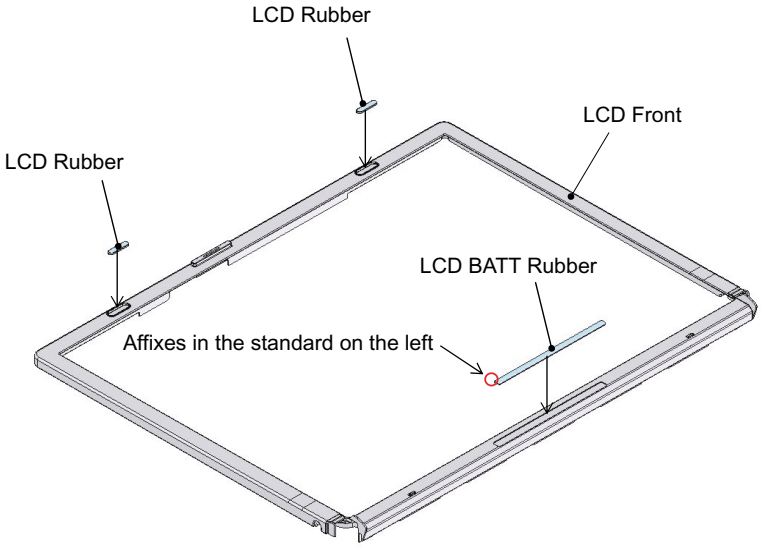
9.3.1. Attention when CF-Y5L series is repaired

- Please execute writing BIOS ID when you exchange the main board.
- Parts (sheet and rubber) etc.related various the conductive cloth and heat spreader cannot be recycled.Use new parts.

9.3.2. Assembly knowhow of the LCD

9.3.2.1. Assembly of the LCD Front

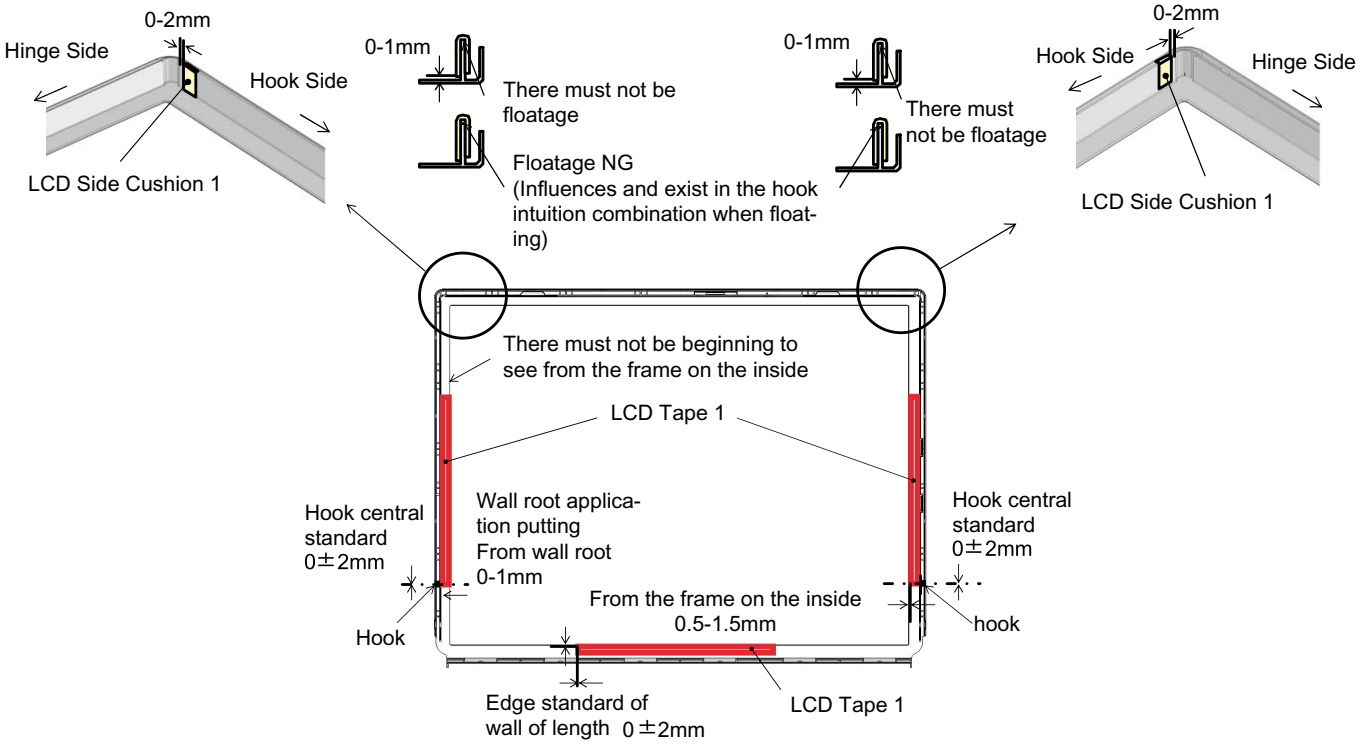




Safety Work

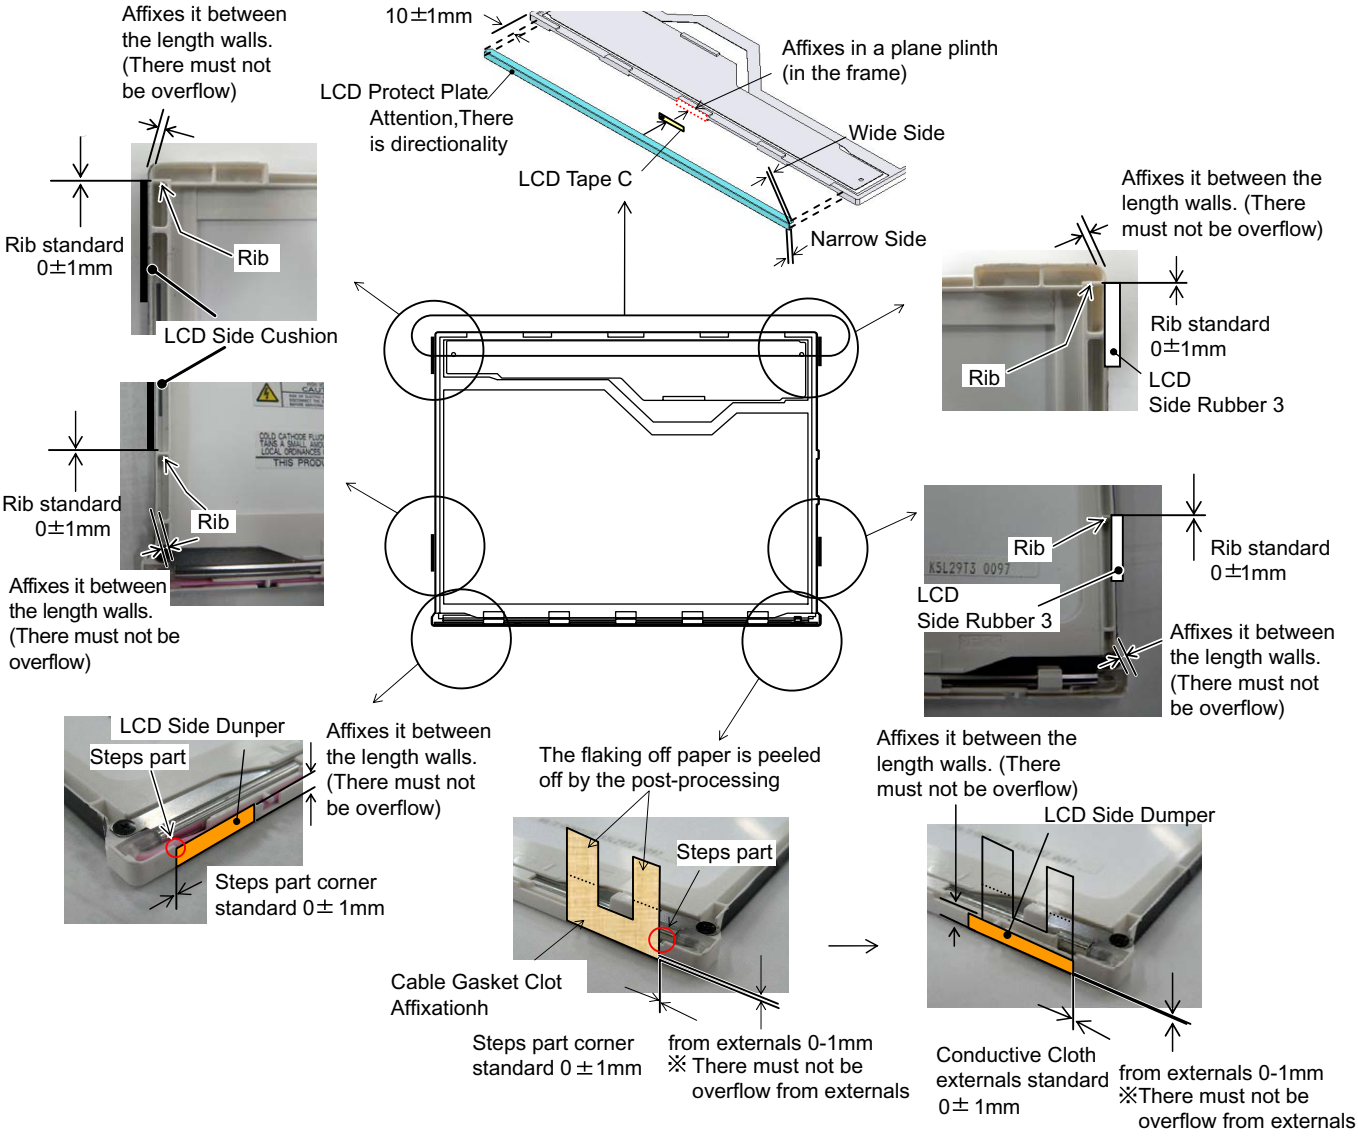
(Attention)
-The LCD Front is installed in the receiving stand, and works.
-The LCD rubber and LCD BATT Rubber does not out of the concave part, moreover, not run aground.
-It is noted that the finger does not touch the paste side when the LCD Rubber and LCD BATT Rubber are affixed.

9.3.2.2. Putting LCD Side Cushion / LCD Tape 1



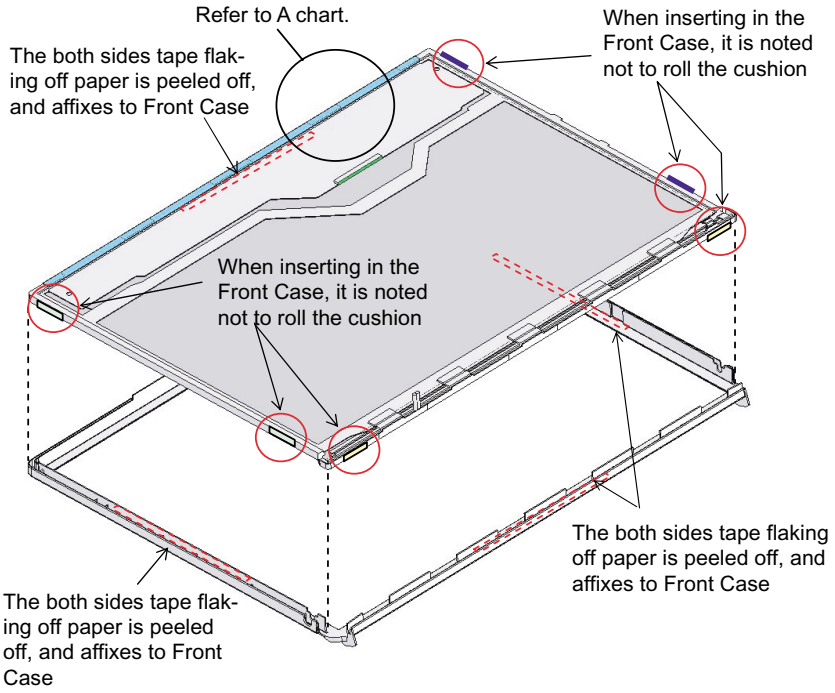
9.3.2.3. Putting LCD Side Rubber / LCD Side Damper

(LCD handling attention)
-Do not take out the vicinity of the center of the lamp side having when you take out LCD of the packing box.
(Because there is a possibility that the transformation of the lamp reflector etc. occur)
-Take out right and left both ends of the lamp side having when you take out LCD.

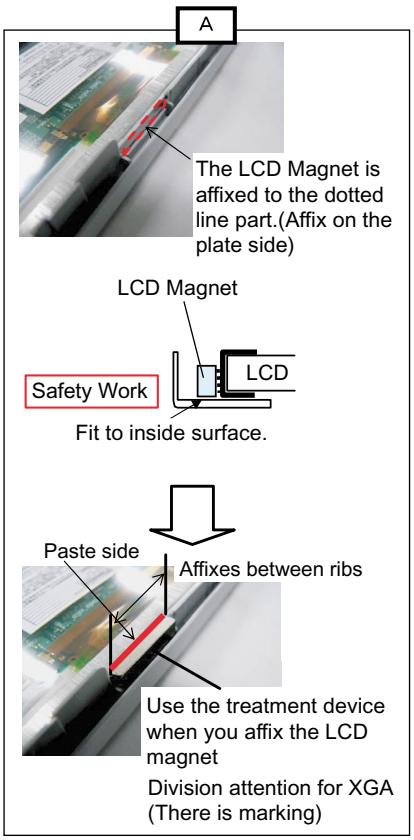


9.3.2.4. Putting LCD Magnet

(Attention)
-The LCD Front is installed in the receiving stand, and works.

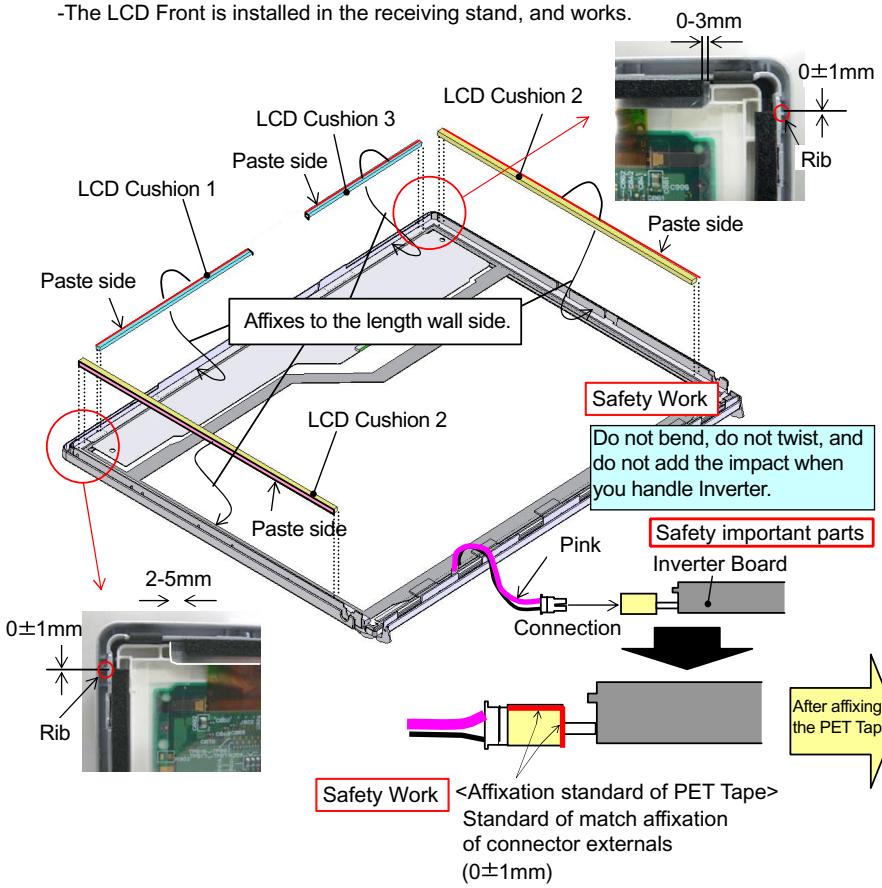


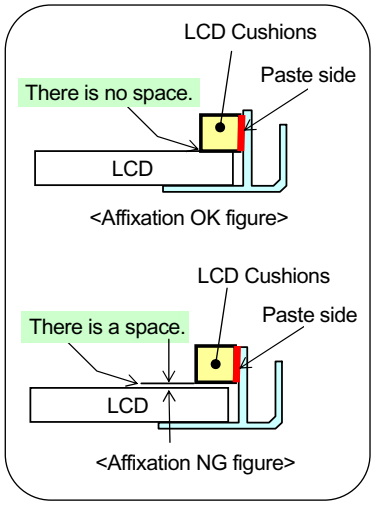
Pressurize it from the Front Case side (painting side) when you pressurize a two sided tape

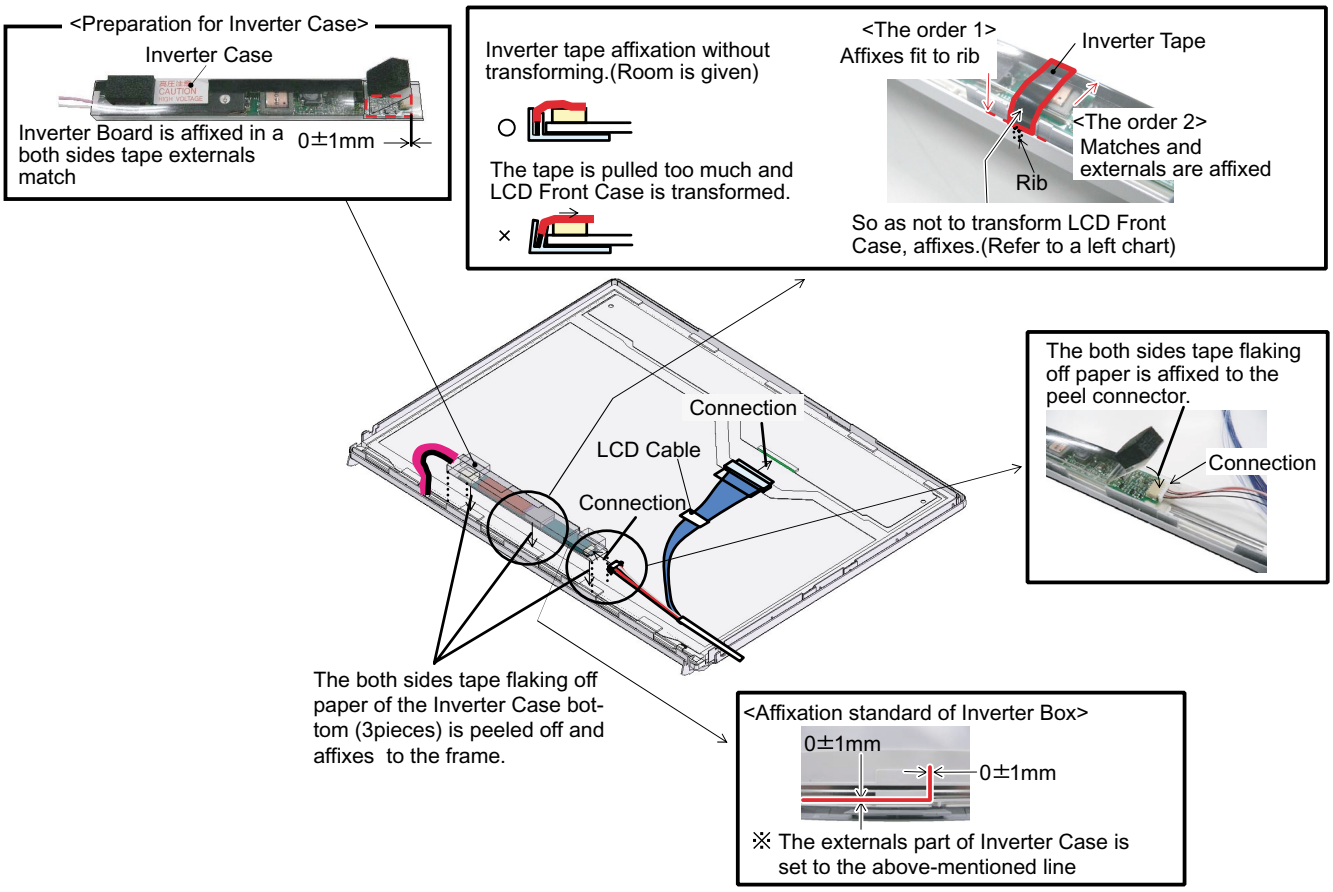


9.3.2.5. Putting LCD Cushion / Assembly of the Inverter

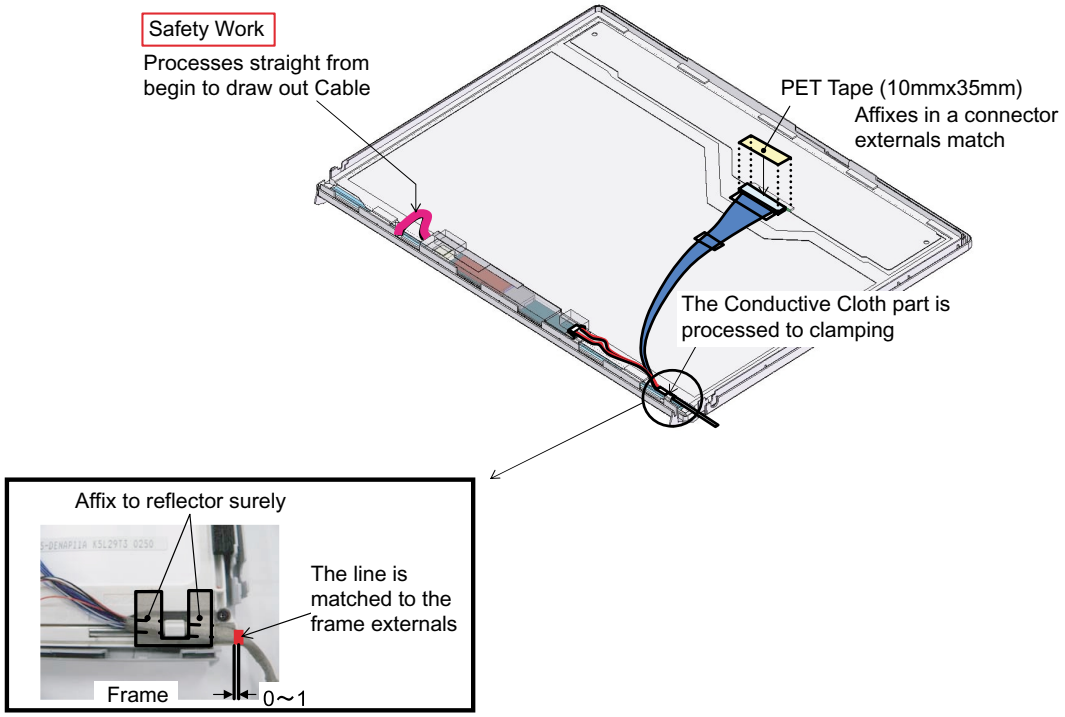
(Attention)
-The LCD Front is installed in the receiving stand, and works.





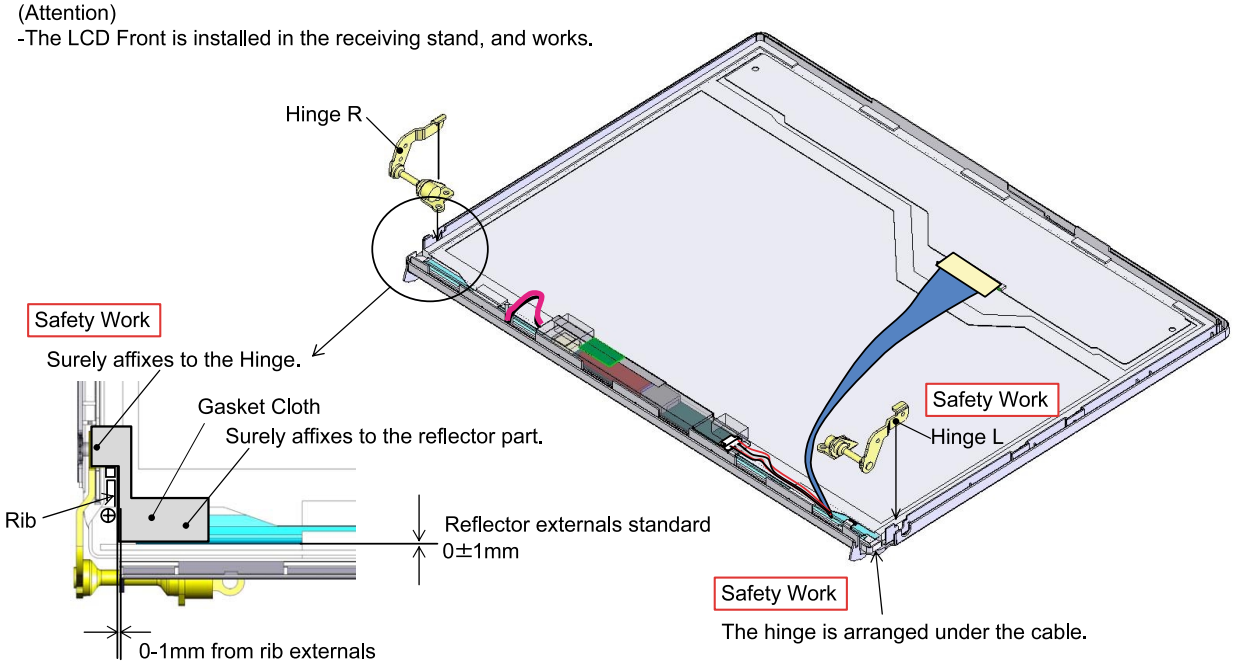


9.3.2.6. Putting Tape for LCD Cable

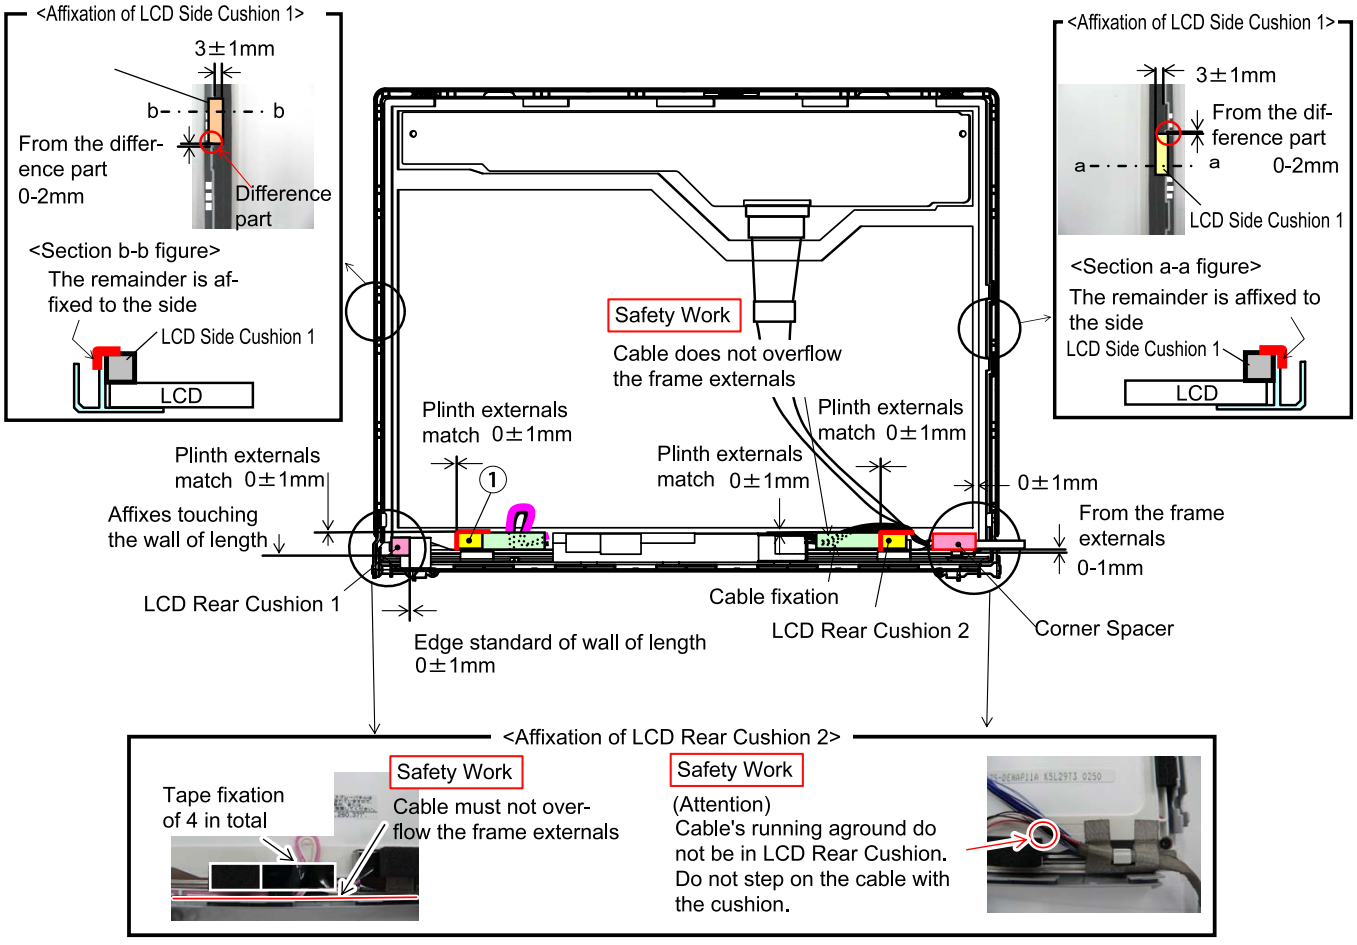


9.3.2.7. Assembly of the Hinge (L), (R)

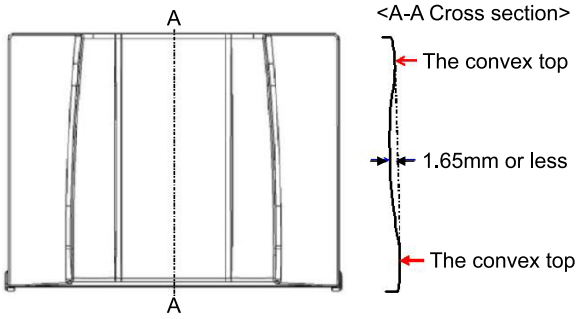
(Attention)
-The LCD Front is installed in the receiving stand, and works.



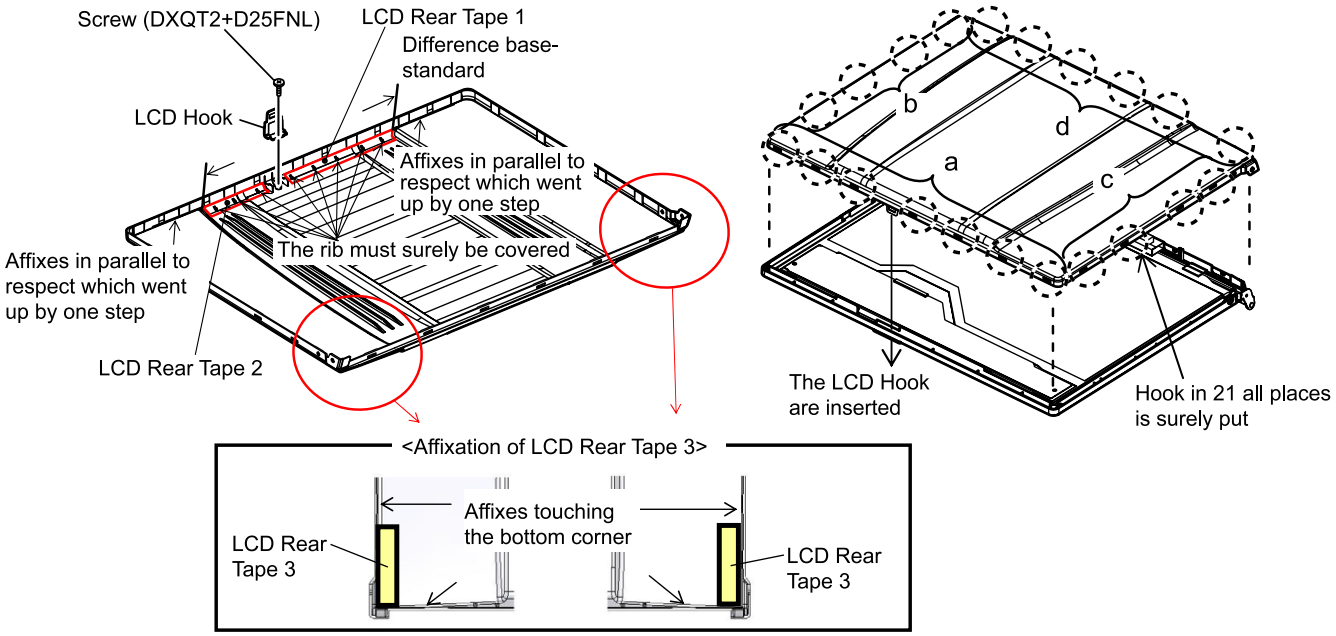
9.3.2.8. Putting LCD Rear Cushion / LCD Side Cushion



9.3.2.9. Assembly of the LCD Rear / LCD Front



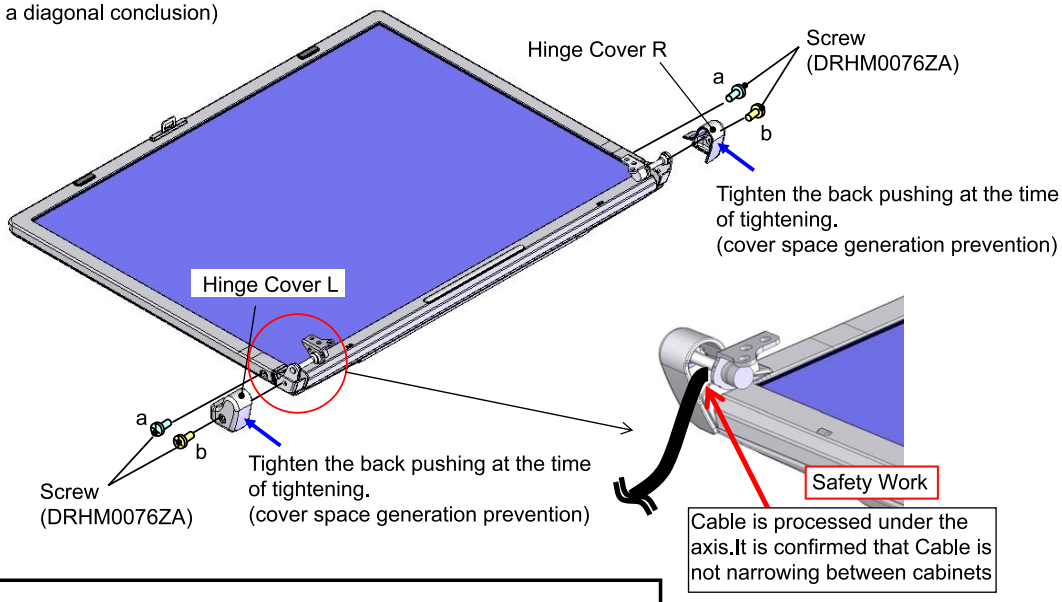
The order of engagement of hook :
a ⇒ b, c ⇒ d



9.3.2.10. Assembly of the Hinge Cover (L), (R)

<Attention>
The tightening order : a ⇒ b

-Conclude after confirming there is a machine screw hole.
-The thing that the machine screw is not concluded imperfect is confirmed. (Generated by DVT a diagonal conclusion)

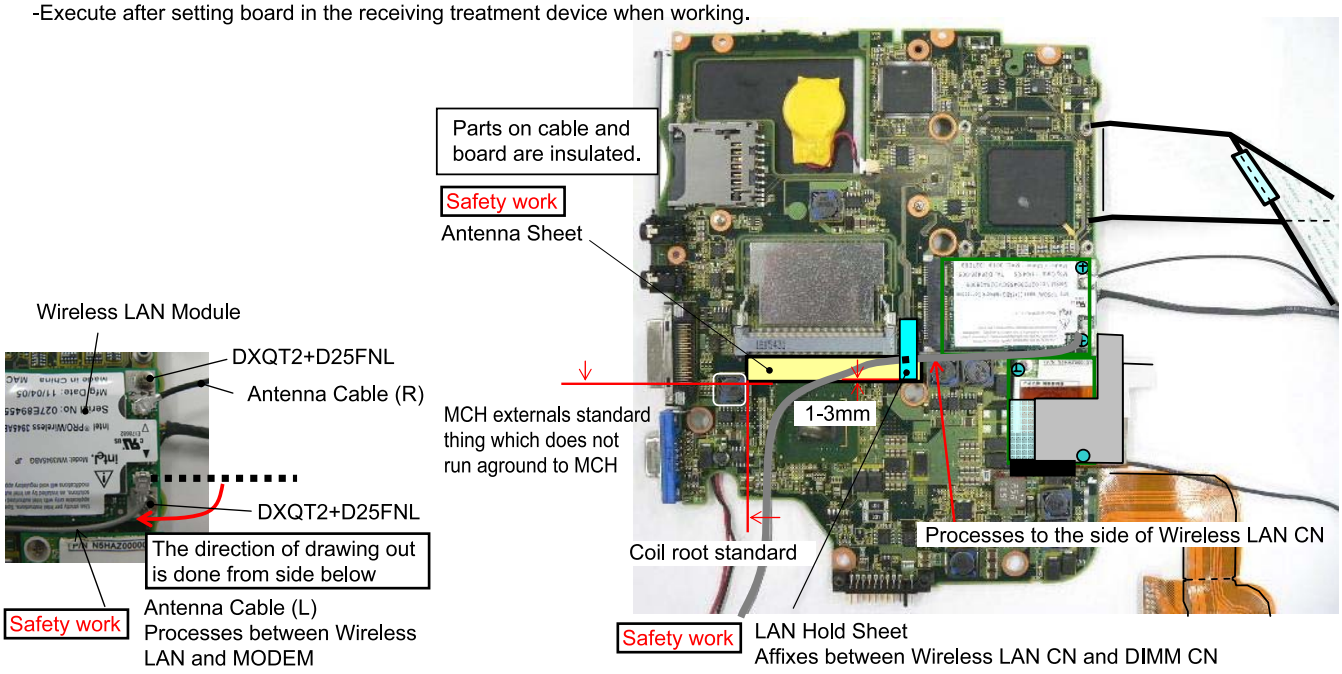


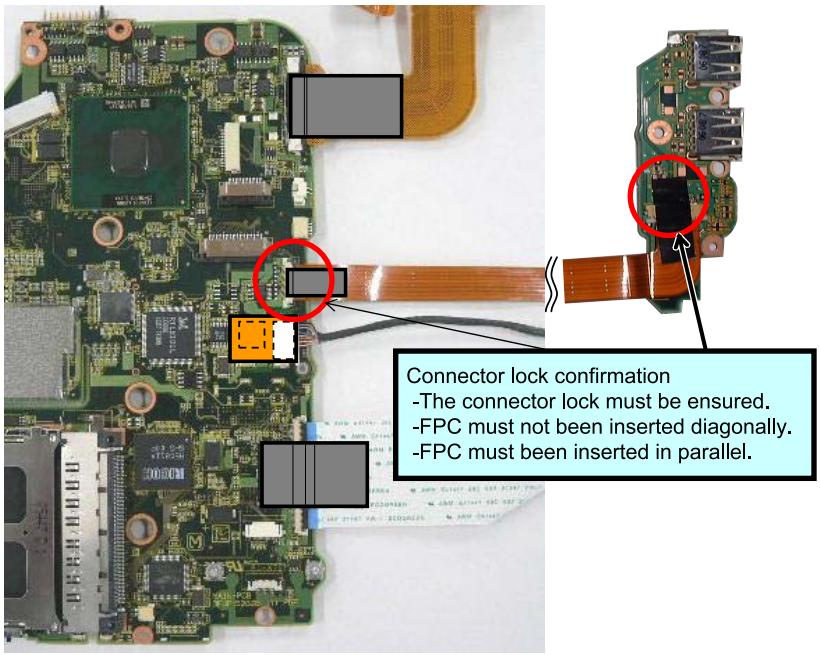
<Attention>
-The Screw (DRHM0076ZA) cannot use the fixed lock medicine repeatedly for use.
-Exchange for the new article when tightening again.

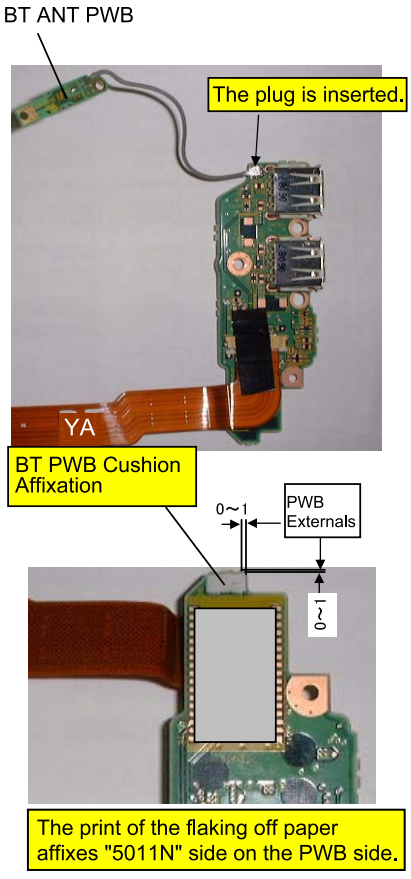
9.3.3. Assembly knowhow of the Main Board

9.3.3.1. Putting Line Hold Sheet / Antenna Sheet / BT PWB Cushion

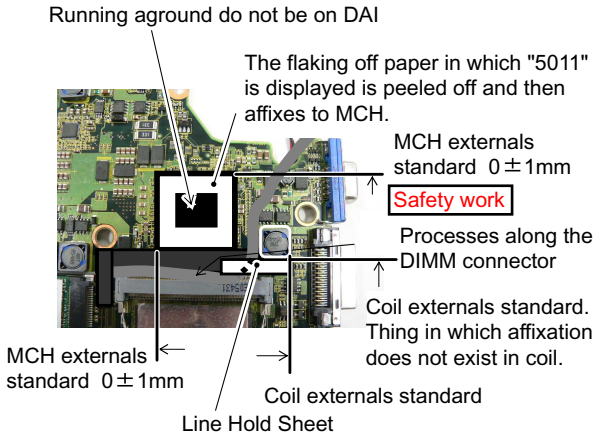
(Attention)
-Execute after setting board in the receiving treatment device when working.

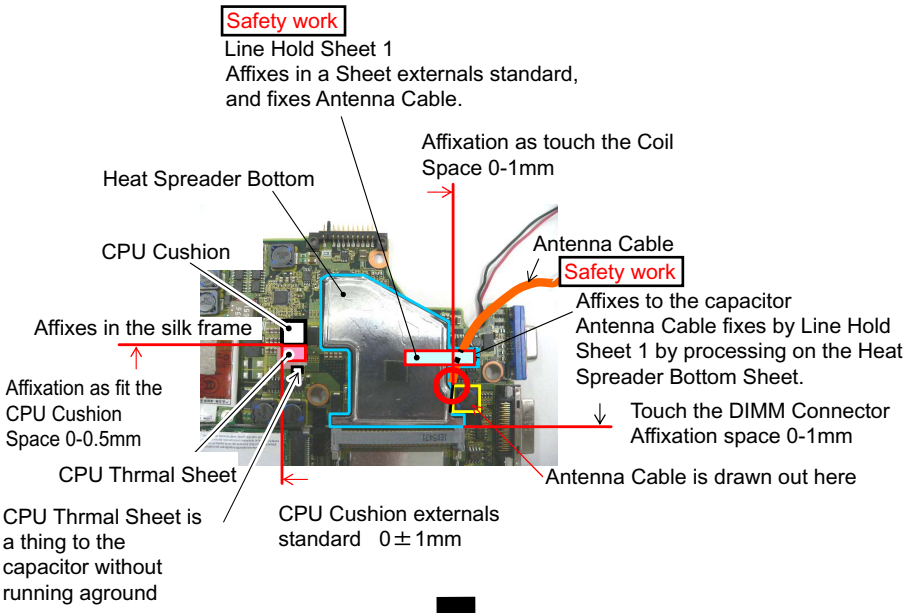


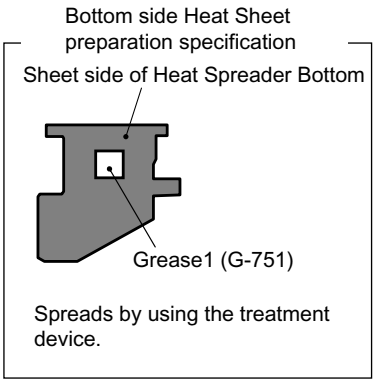


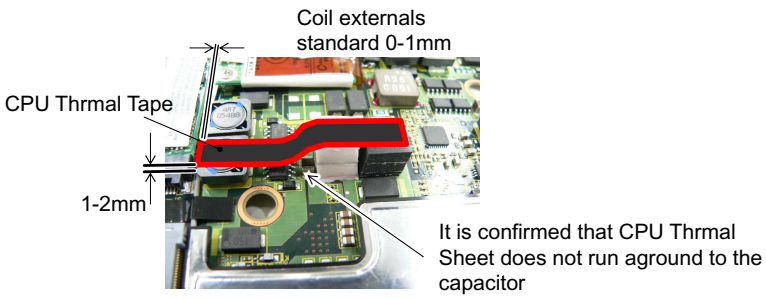


9.3.3.2. Putting MCH Sheet / Heat Spreader Bottom

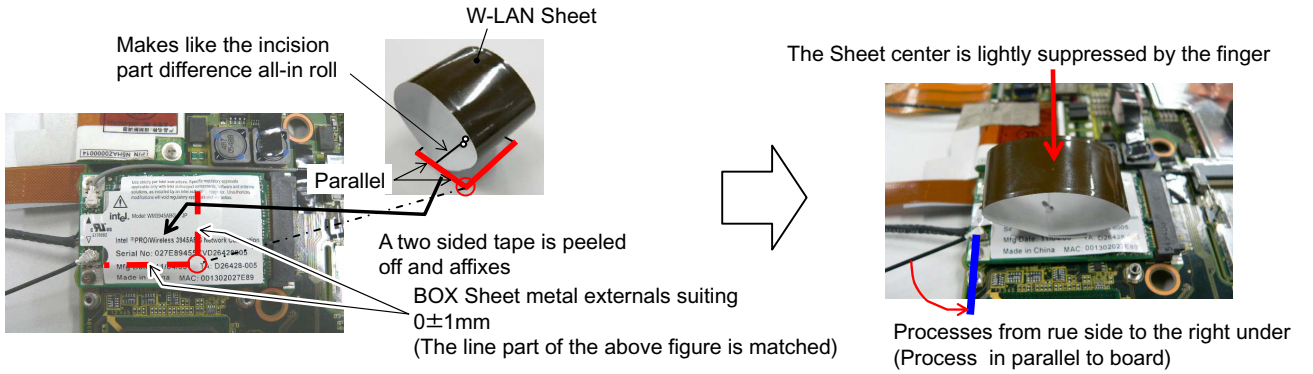


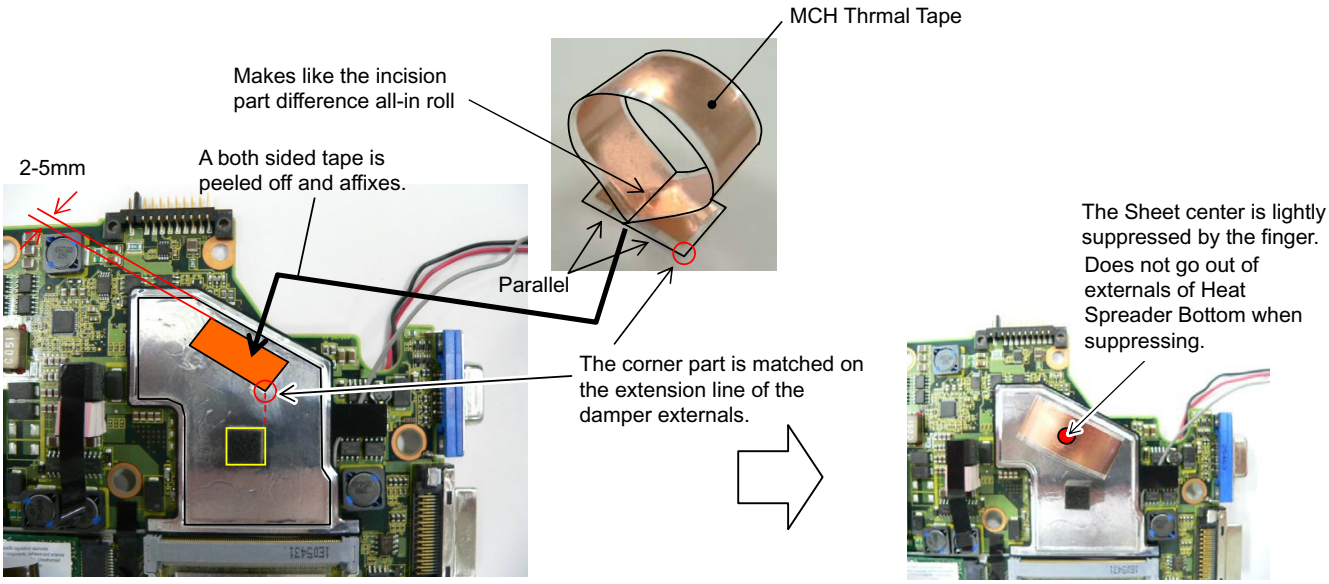




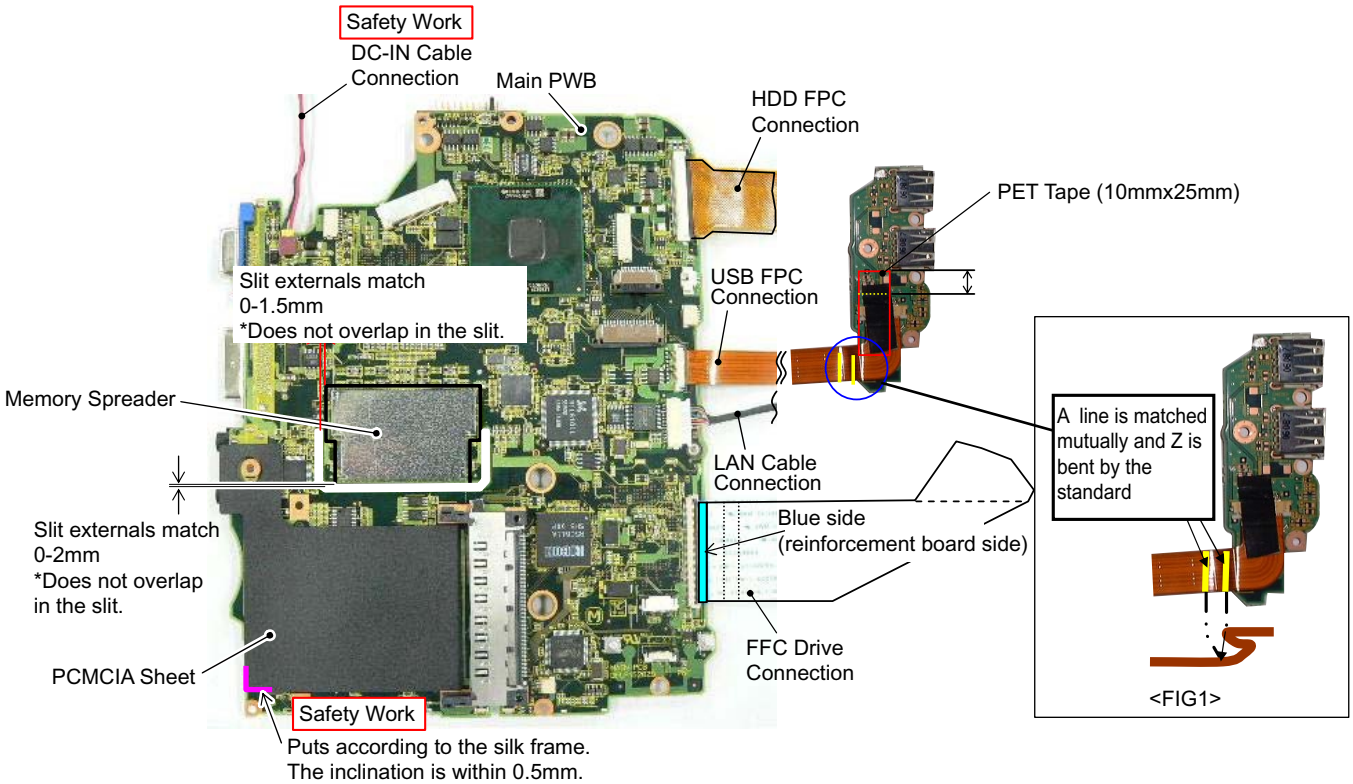


9.3.3.3. Assembly of the WLAN Sheet / MCH Thermal Tape

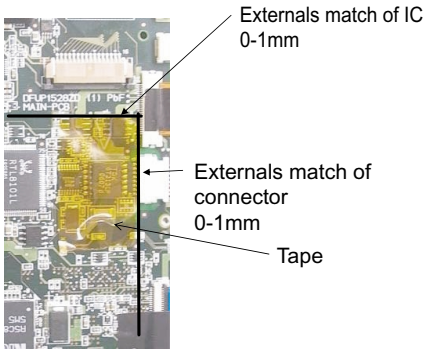




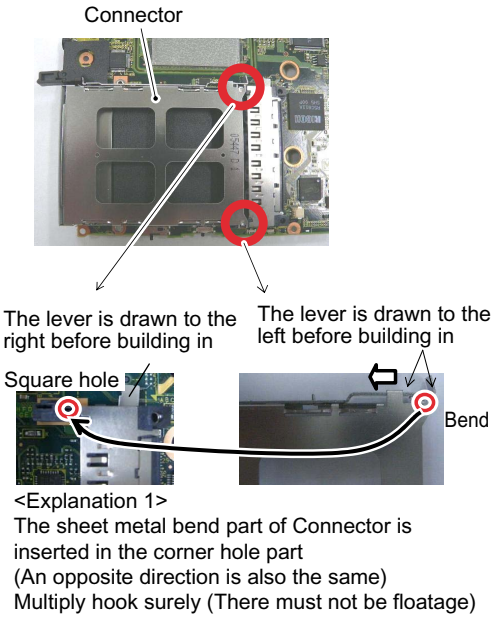
9.3.3.4. Assembly of the Main Board



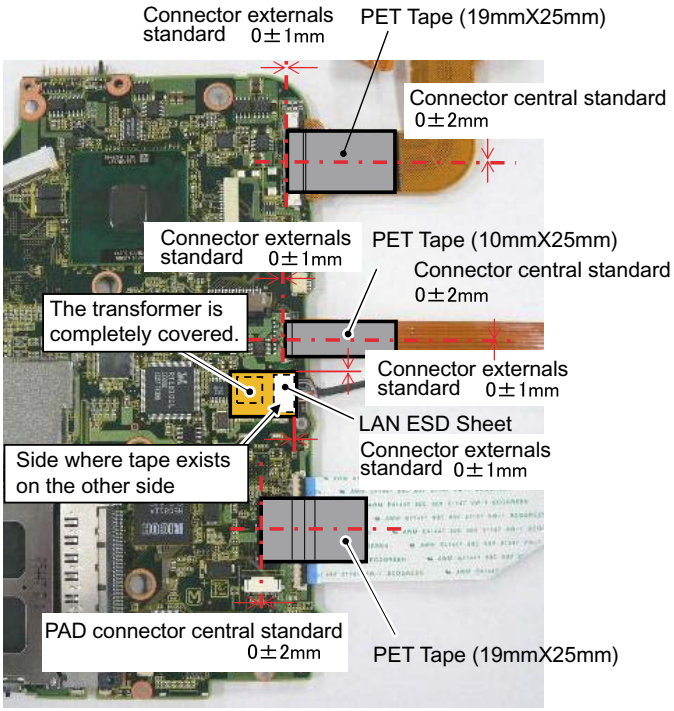
(Attention)
-The board is set in the receiving treatment device and works.
-The connector lock work after FPC is inserted uses the treatment device.



9.3.3.5. Assembly of the Card Bus Ejector



<Explanation 1>
The sheet metal bend part of Connector is
inserted in the corner hole part
(An opposite direction is also the same)
Multiply hook surely (There must not be floatage)

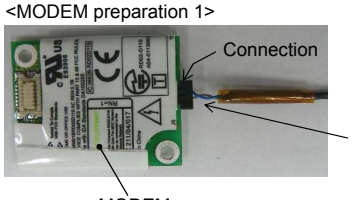


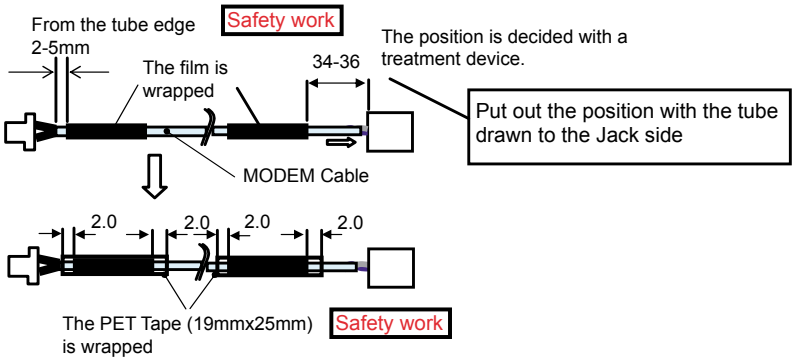
9.3.3.6. Assembly of the Wireless LAN Module / MODEM

<W-LAN Module preparation>

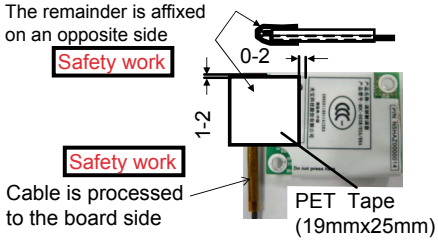
-Work in midair prohibition when module is connected with antenna board.
-Connects applying the board to the receiving stand.
(For the distortion prevention of the board)

<MODEM preparation 1>

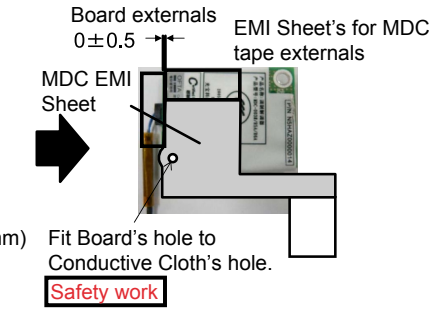




<MODEM preparation 2>

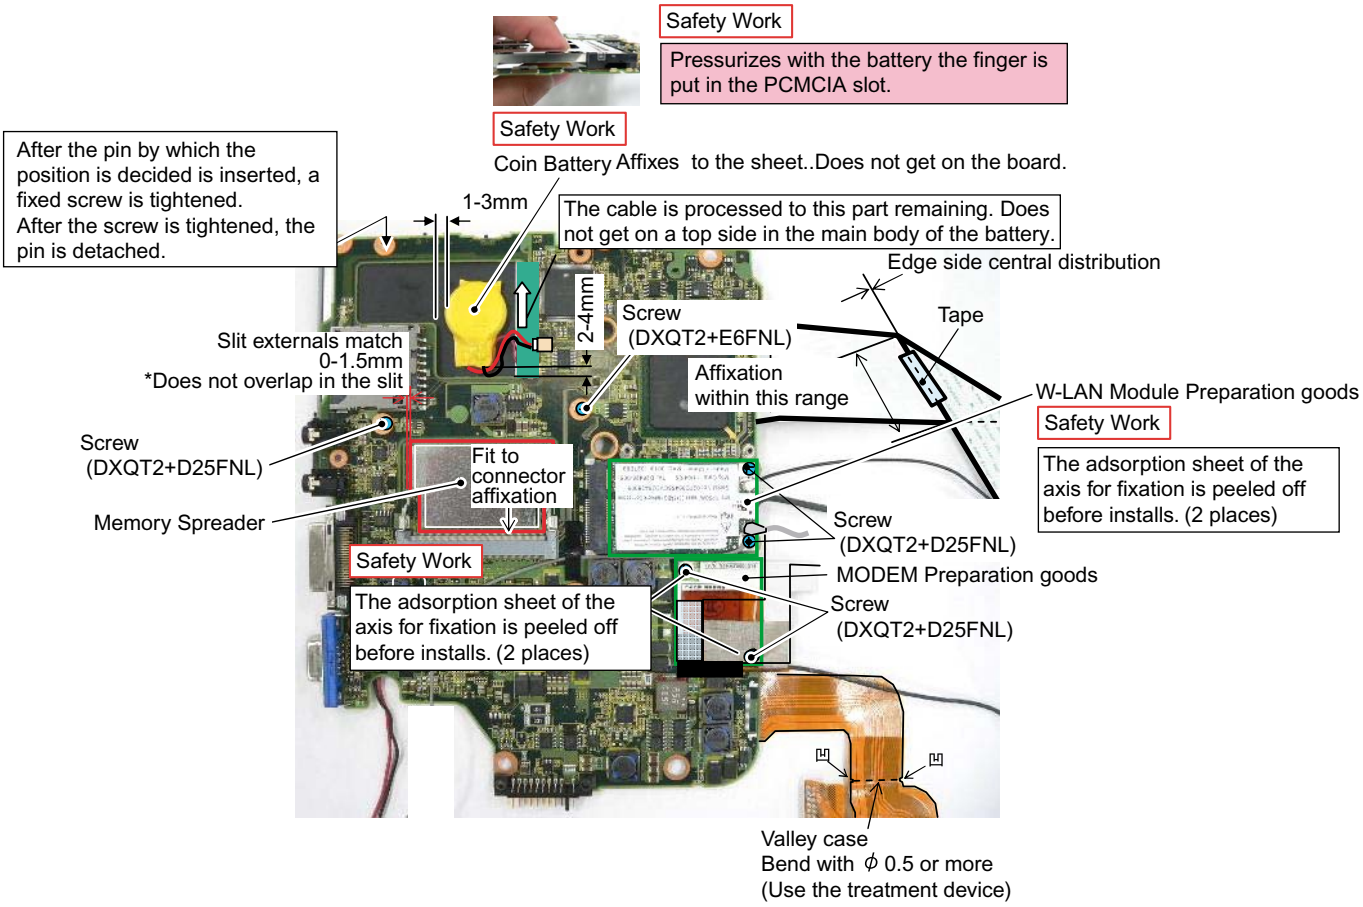


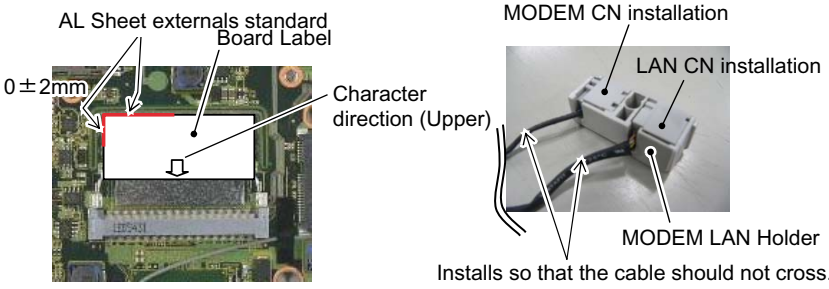
<MODEM preparation 3>



9.3.3.7. Insert the Main Board

(Attention)
-The board is set in the receiving treatment device and works.
-When carrying to the following process, a special palette is used.
(The FPC bend in YB respect is prohibited)



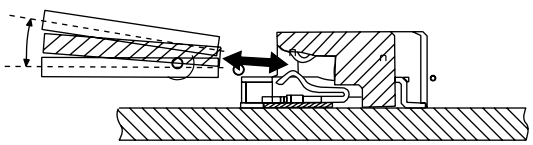


9.3.3.8. Note of Wireless LAN module is inserted

<Notes when Wireless LAN Module is inserted>

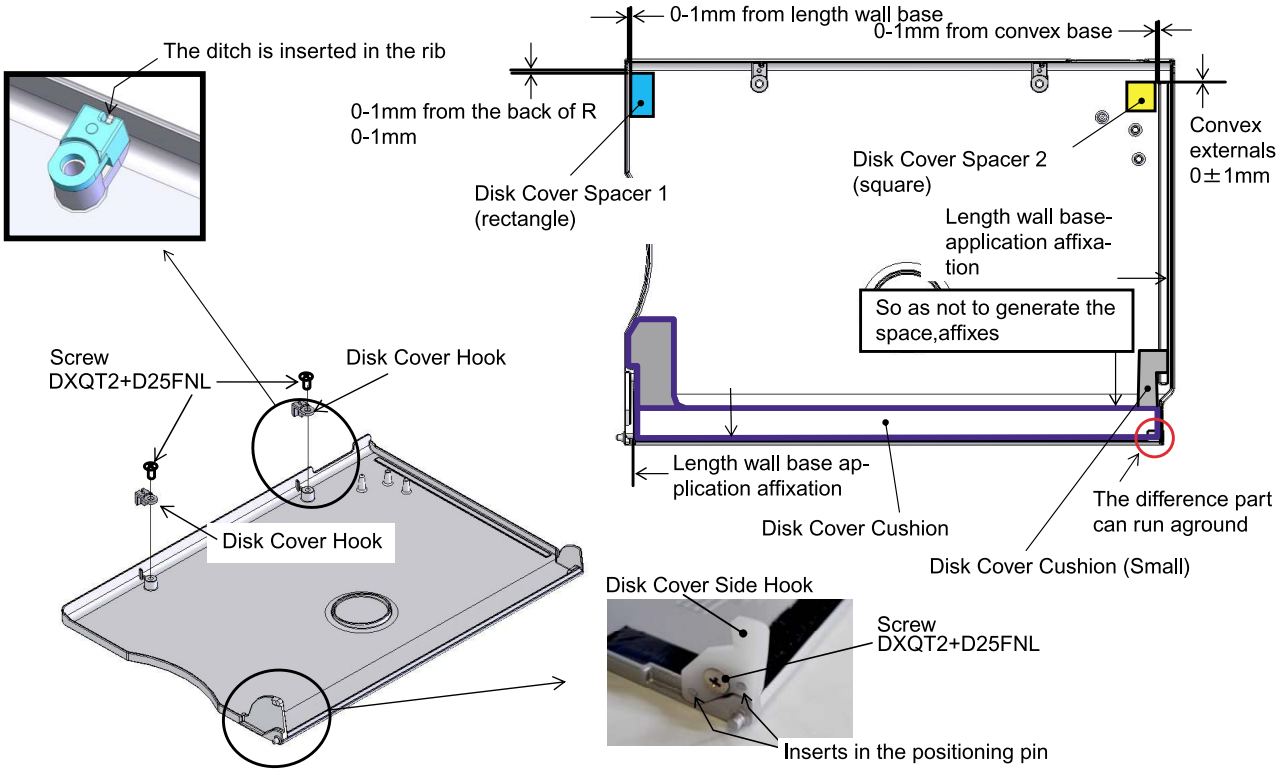
Please do Board's insertion and extraction correctly according to the direction and the procedure shown in the figure below

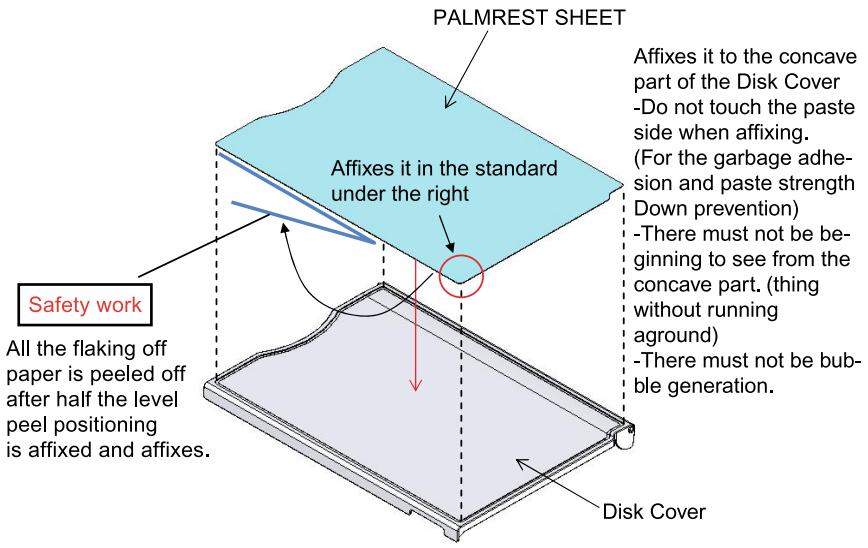
①Please go from parallel respect to mounting Board in Board's insertion and extraction within the range of 5°-10°
②Please insert in the interior completely when you insert Board.



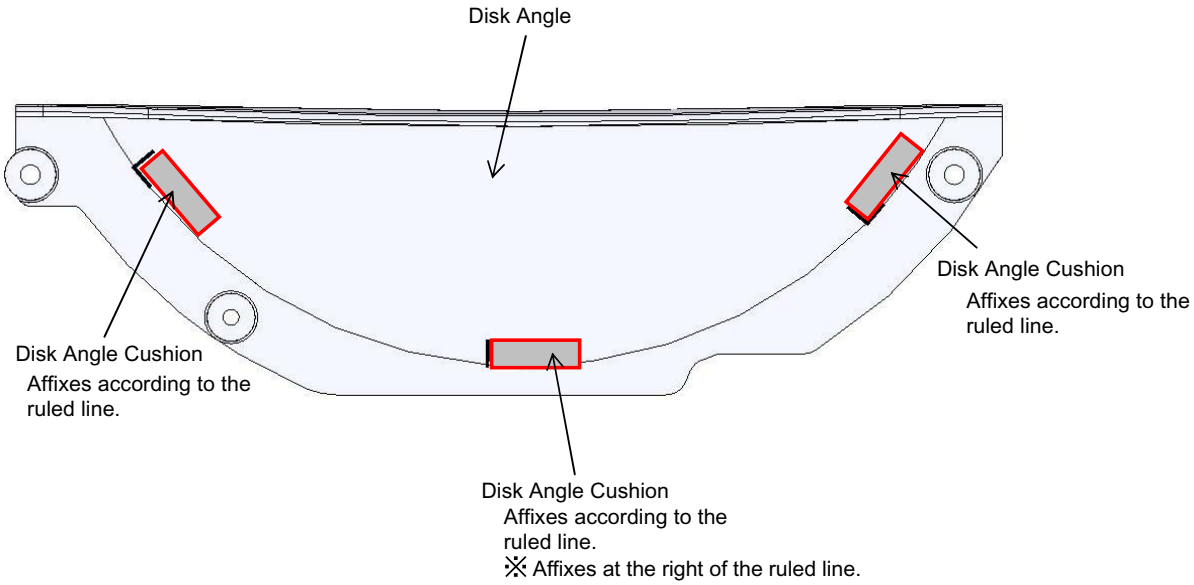
9.3.4. Assembly knowhow of the Top Case

9.3.4.1. Assembly of the Disk Cover

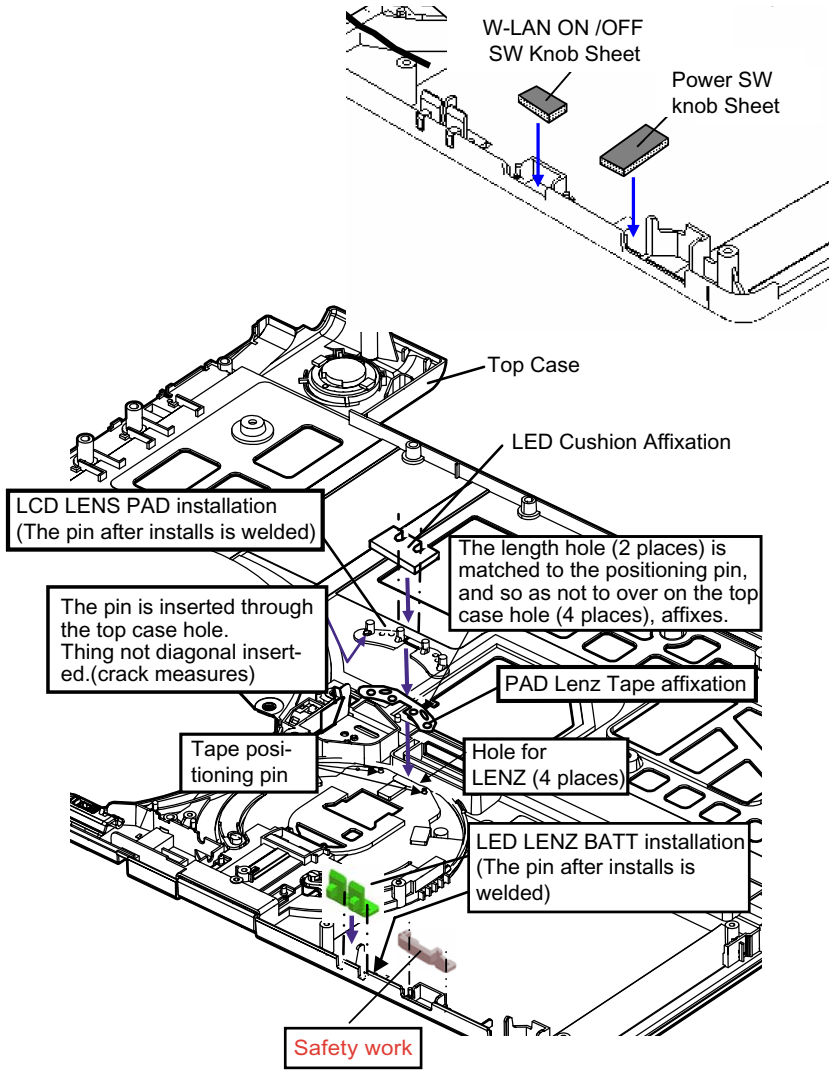




9.3.4.2. Putting Disk Angle Cushion

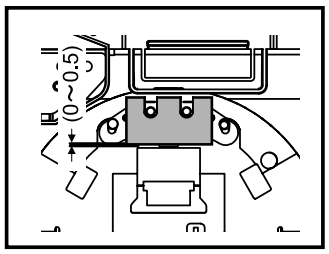


9.4.3.3. Assembly of the Top Case

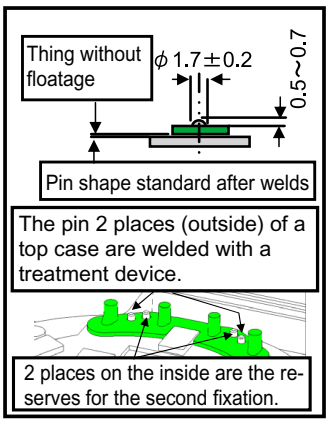


Lan Sw Blank Installation

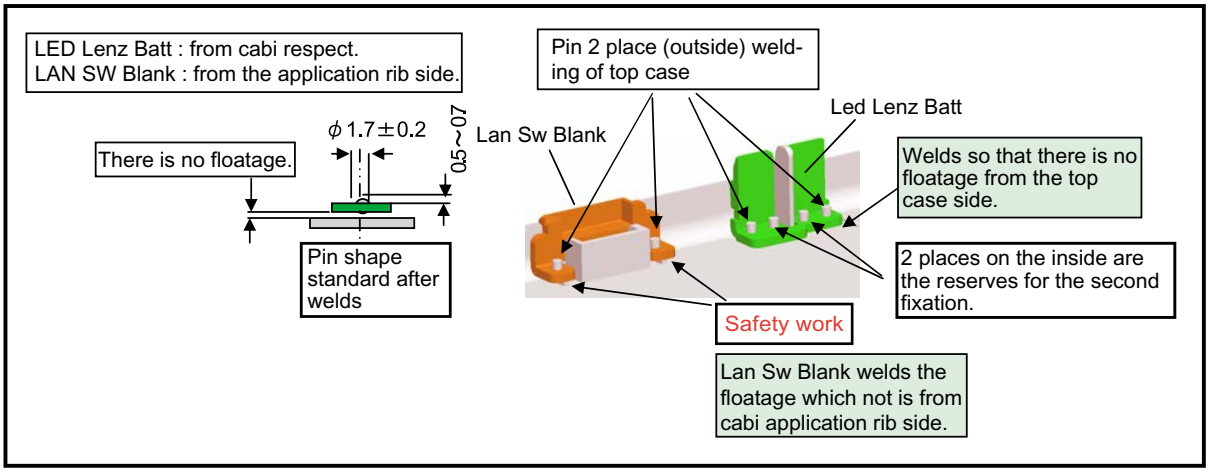
<Position where LED Cushion is Affixed>



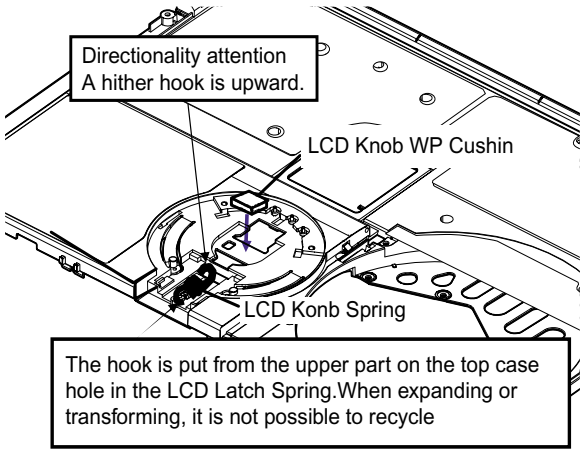
<Position where LED LENS PAD is installed>

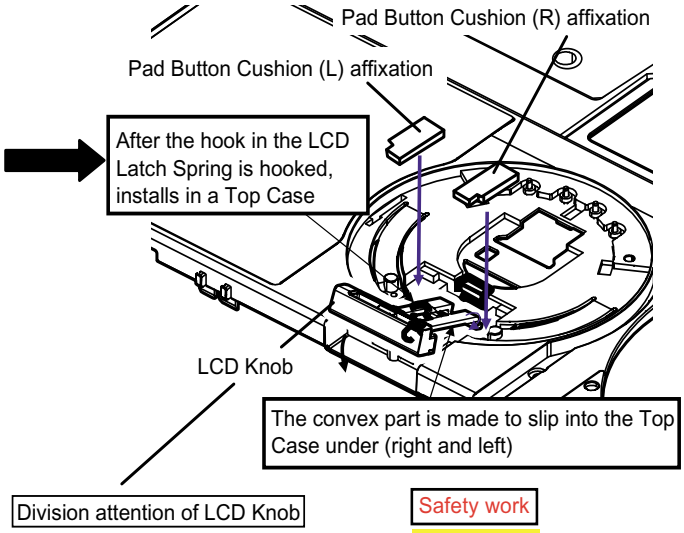


<Position where LED LENZ BATT is installed>

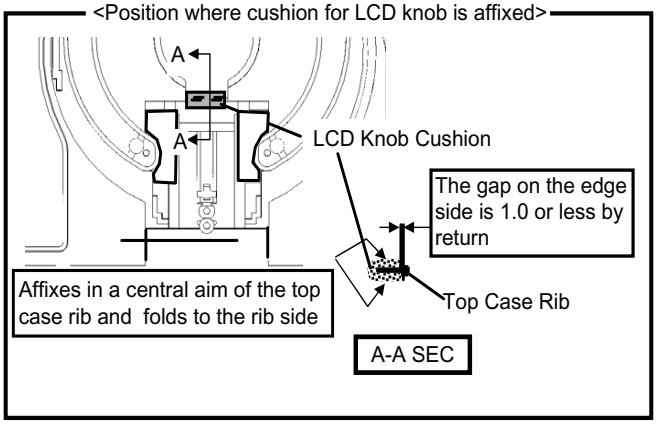


9.4.3.4. Assembly of the LCD Knob / Putting Cushion

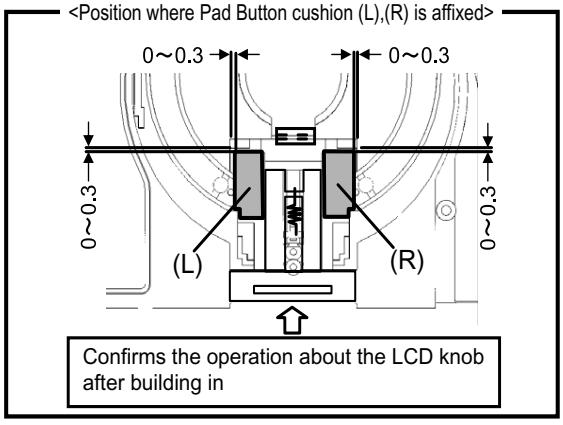




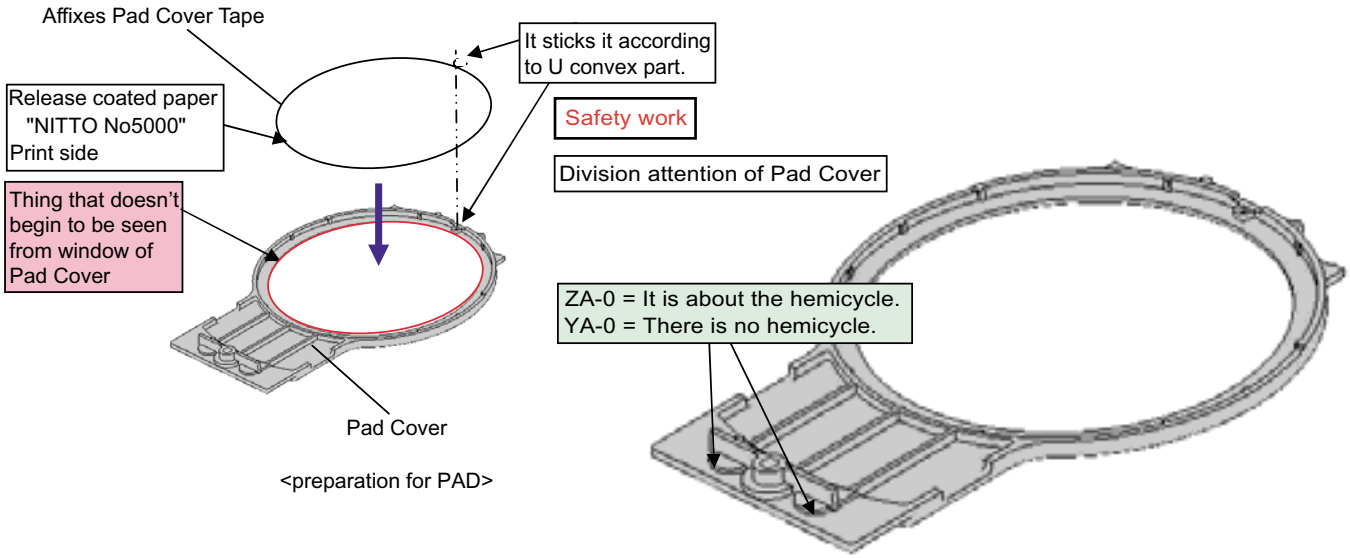
<Position where cushion for LCD knob is affixed>



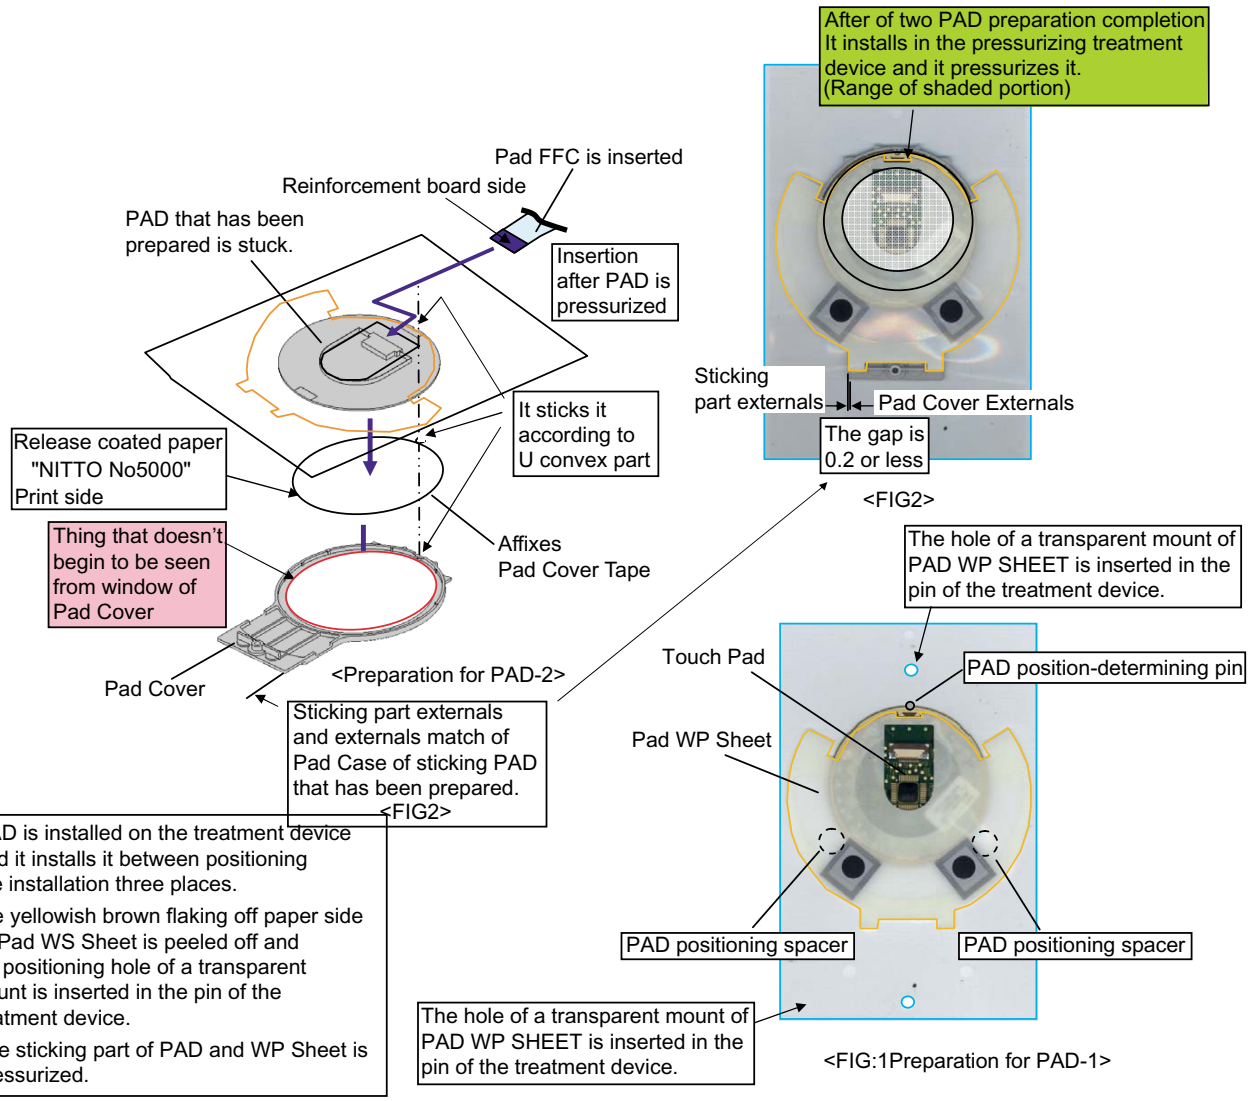
<Position where Pad Button cushion (L),(R) is affixed>



9.3.4.5. Assembly of the Touch Pad



<preparation for PAD>



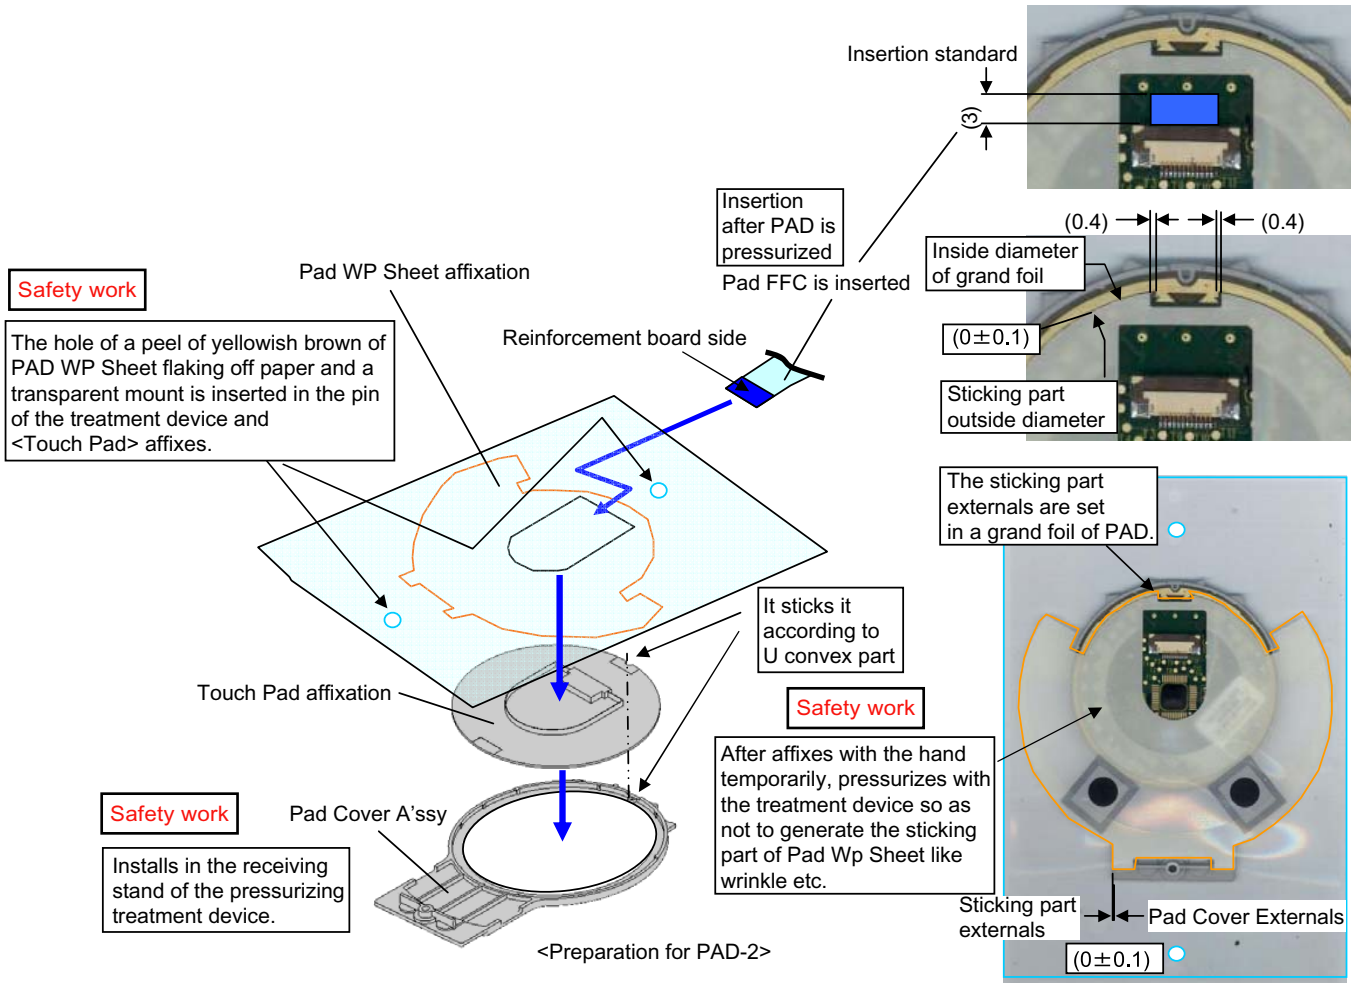
<Preparation for PAD-2>

<FIG2>

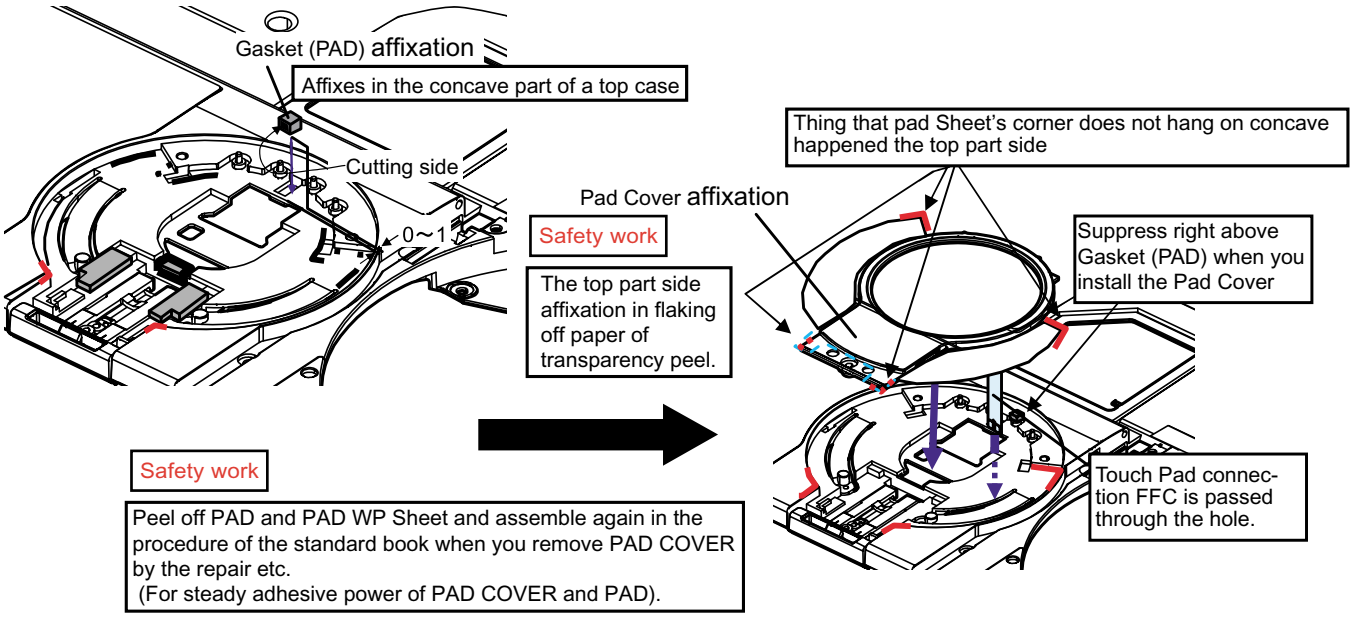
<FIG2>

<FIG:1Preparation for PAD-1>

1. PAD is installed on the treatment device and it installs it between positioning the installation three places.
2. The yellowish brown flaking off paper side of Pad WS Sheet is peeled off and the positioning hole of a transparent mount is inserted in the pin of the treatment device.
3. The sticking part of PAD and WP Sheet is pressurized.



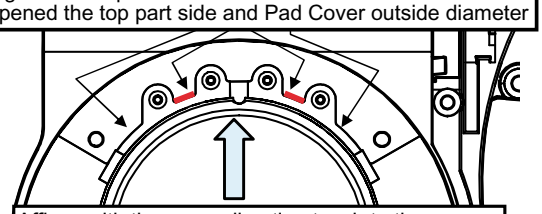
Insertion standard
(3)
Insertion after PAD is pressurized
Pad FFC is inserted
(0.4)
(0.4)
Inside diameter of grand foil
(0±0.1)
Sticking part outside diameter
Safety work
The hole of a peel of yellowish brown of PAD WP Sheet flaking off paper and a transparent mount is inserted in the pin of the treatment device and <Touch Pad> affixes.
Pad WP Sheet affixation
Reinforcement board side
The sticking part externals are set in a grand foil of PAD.
It sticks it according to U convex part
Touch Pad affixation
Safety work
After affixes with the hand temporarily, pressurizes with the treatment device so as not to generate the sticking part of Pad Wp Sheet like wrinkle etc.
Safety work
Pad Cover A'ssy
Installs in the receiving stand of the pressurizing treatment device.
Sticking part externals
Pad Cover Externals
(0±0.1)
<Preparation for PAD-2>



Gasket (PAD) affixation
Affixes in the concave part of a top case
Cutting side
0~1
Thing that pad Sheet's corner does not hang on concave happened the top part side
Pad Cover affixation
Safety work
The top part side affixation in flaking off paper of transparency peel.
Suppress right above Gasket (PAD) when you install the Pad Cover
Safety work
Peel off PAD and PAD WP Sheet and assemble again in the procedure of the standard book when you remove PAD COVER by the repair etc.
(For steady adhesive power of PAD COVER and PAD).
Touch Pad connection FFC is passed through the hole.

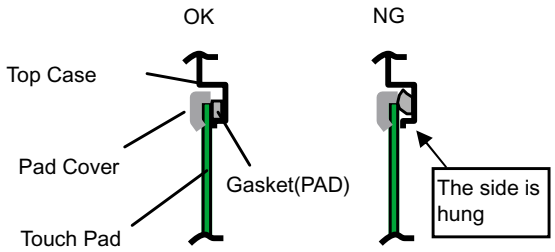
<Pad Cover installation position>

Thing in which space does not exist between convex happened the top part side and Pad Cover outside diameter

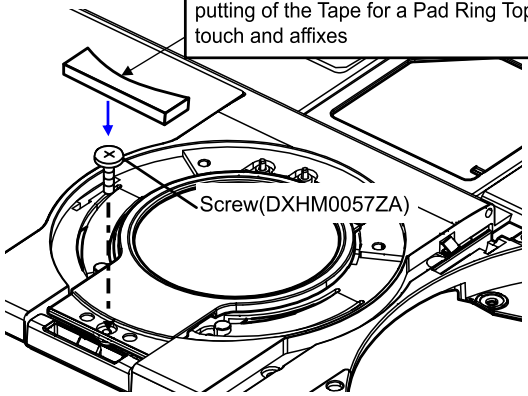


Affixes with the arrow direction touch to the convex happened top part side
(Space measures with PAD BUTTON)

<Gasket (PAD) installation position>



Pad Cover R part is made for part R after putting of the Tape for a Pad Ring Top to touch and affixes



After the installation, Pad Button is confirmed
-Space confirmation with cover
-Hanging
-Thing without rubbing sound generation

Pad Button affixation

Affixes it in the arrow direction drawing while matching the lens and the hole after the convex part is inserted

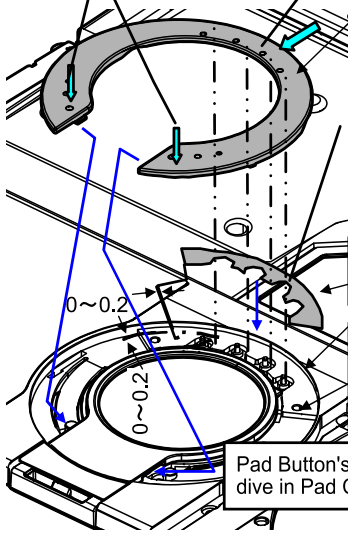
Pad Button Tape affixation

The flaking off paper is confirmed and it is confirmed that there is not a waving lying on top of one another of a two sided tape after the peel.

Affixes it while setting part R externals to Top Case R part.

Thing that there is beginning not to see in round concave part for positioning of Pad Button.Right and left 2 places

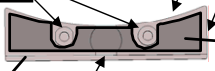
Pad Button's convex part is made to dive in Pad Cover's concave part



<Tape installation position for Pad Ring Top>

Thing that running aground is not in round convex part

Thing that beginning to see is not in externals of Pad Ring Top



Pad Ring Tape affixation

Pad Ring Top

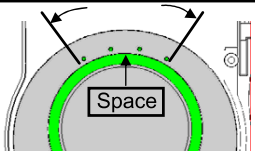
Thing that there is beginning not to see on respect under steps

The flaking off paper is confirmed and it is confirmed that there is not a waving lying on top of one another of a two sided tape after the peel

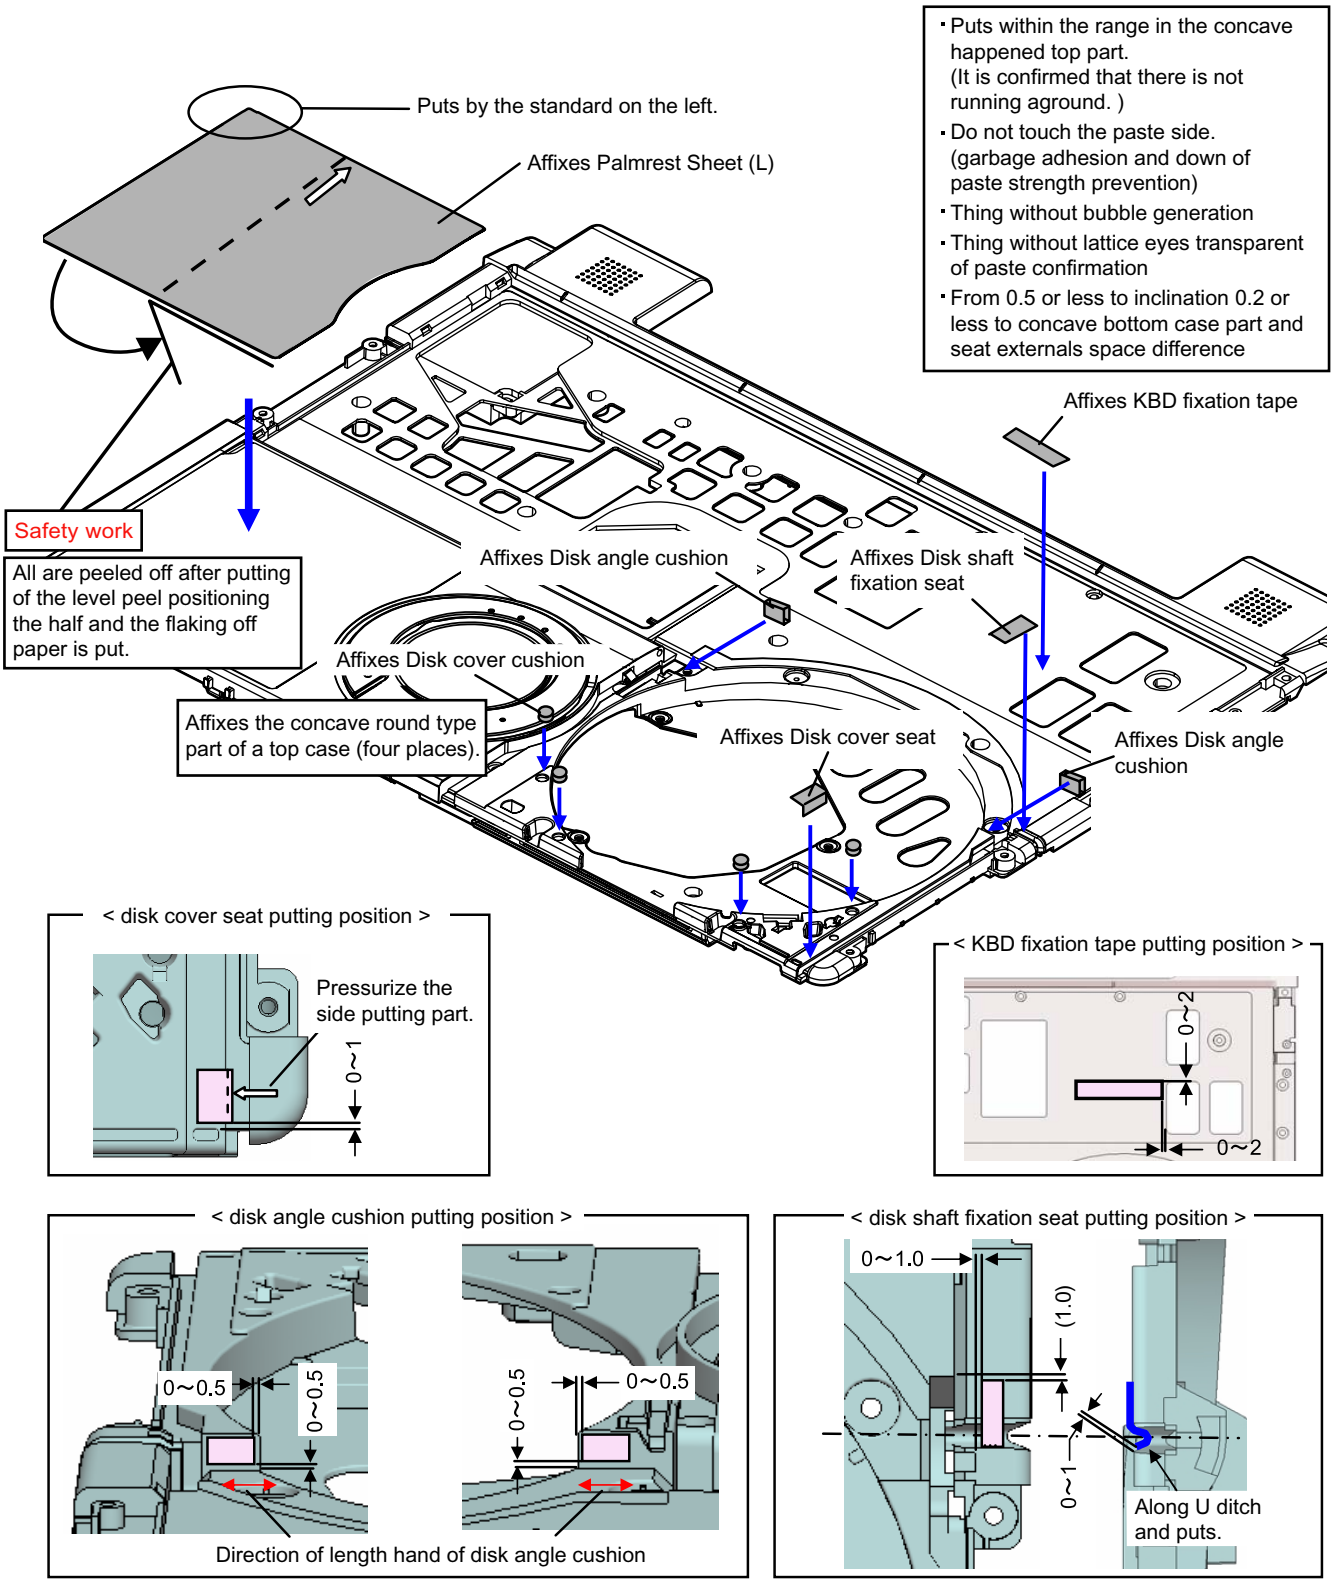
<Pad Button's installation position>

Thing that hook on externals fineness measures cover side is unremarkable

Confirmation of the space between button and cover between these of Pad Button after installation.0.2 or less

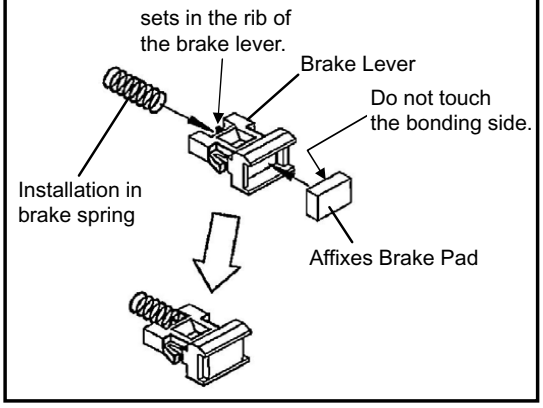


9.3.4.6. Putting Sheet



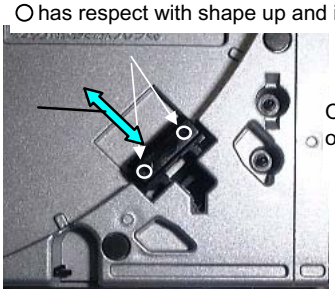
9.3.4.7. Assembly of the Break Lever

< The Brake Lever is assembled >

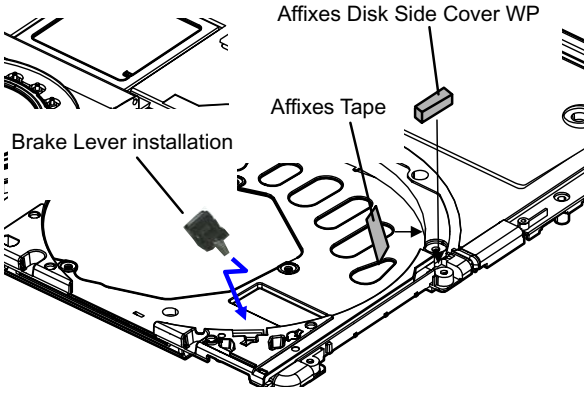


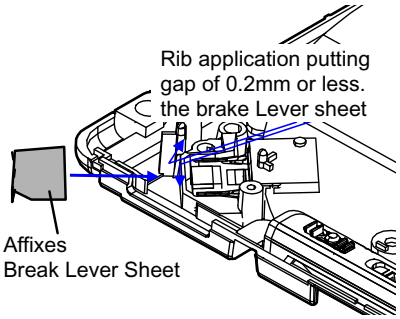
< installation position of brake lever >

○ has respect with shape up and installs.

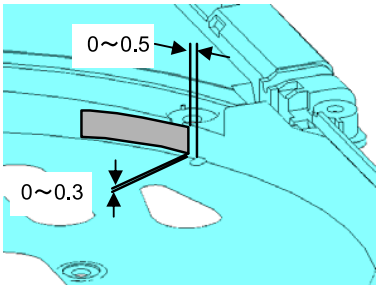


Operativeness confirmation
of DISK brake after installation
・Thing without Hi debt

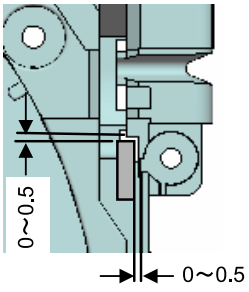




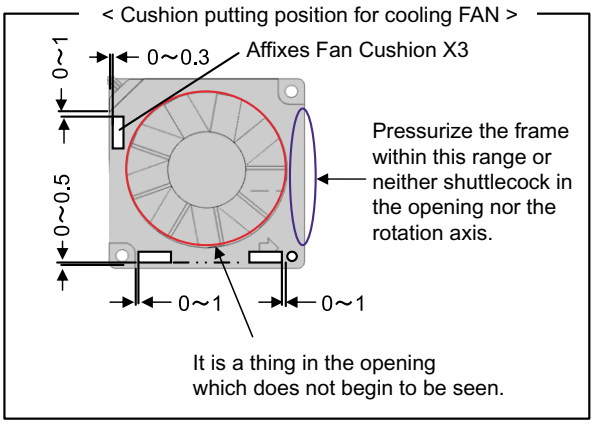
< putting position of wire rod fixation tape >

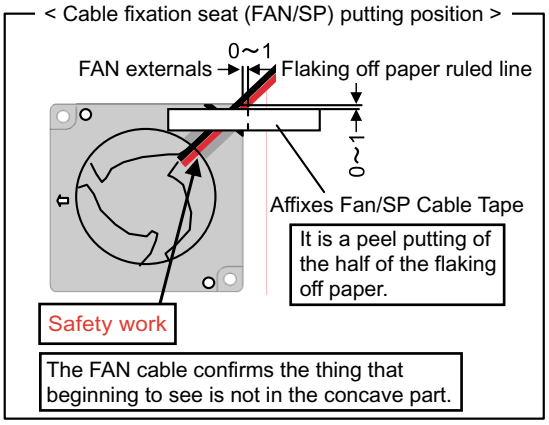


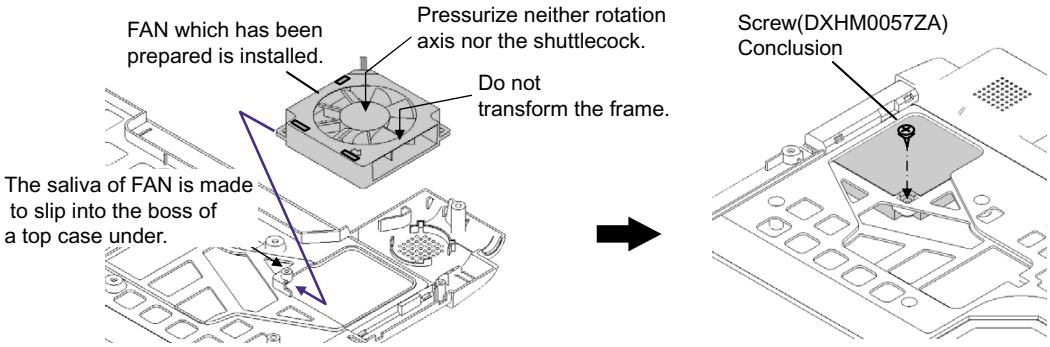
< Putting position of Disk Side Cover WP >



9.3.4.8. Assembly of the FAN







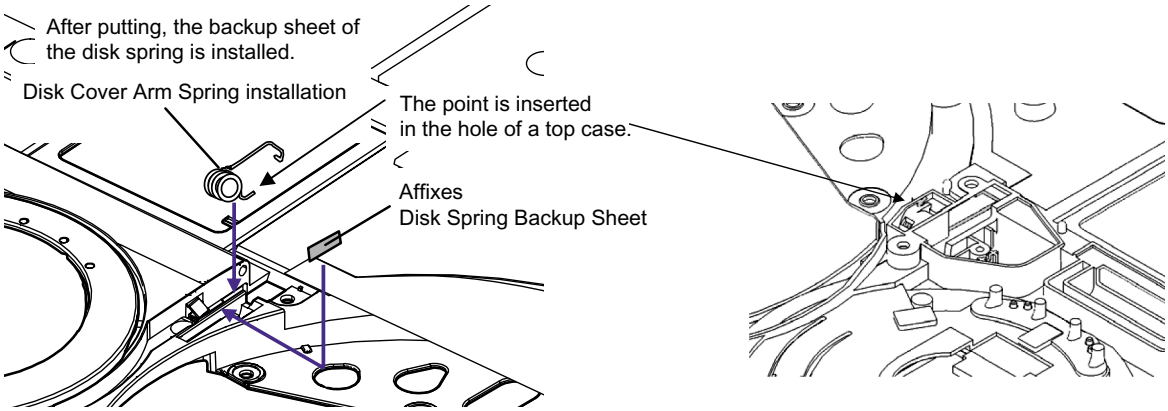
∗Work notes

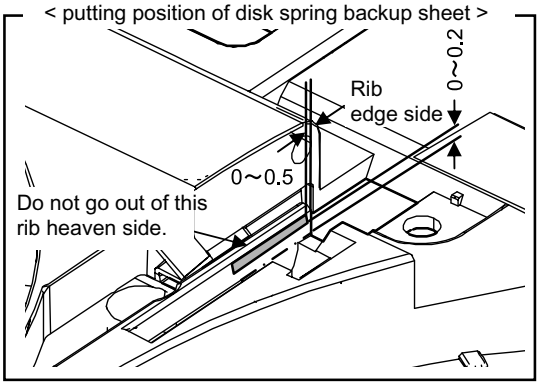
1. FAN must not be dropped, and do not add the impact.

< SCWER tightening torque >

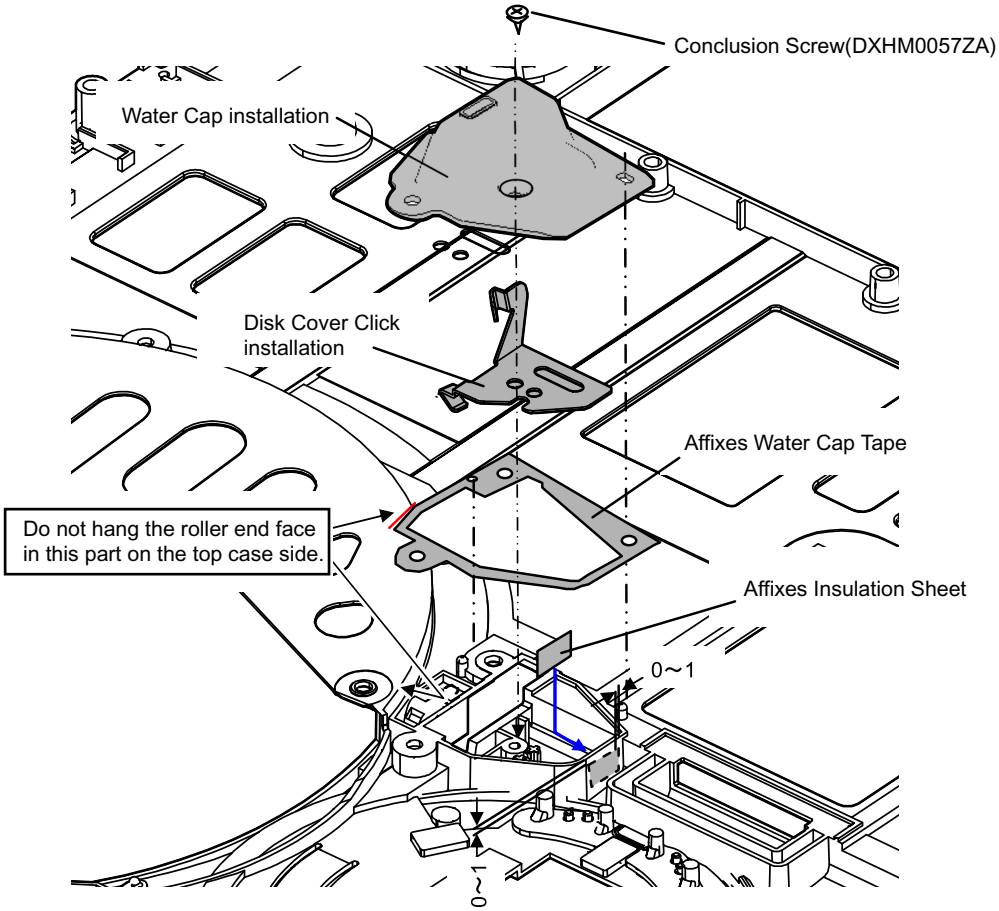
Conclusion first time power : 0.16-0.18N.m {1.6-1.8kgf.cm}

At the repair : 0.10-0.12N.m {1.0-1.2kgf.cm}

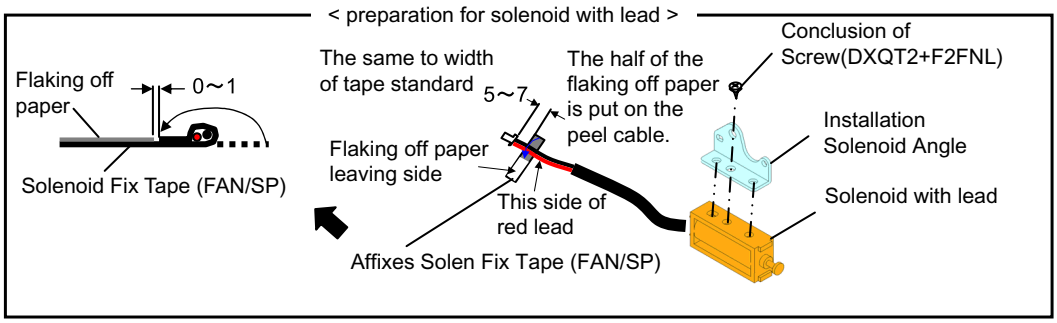


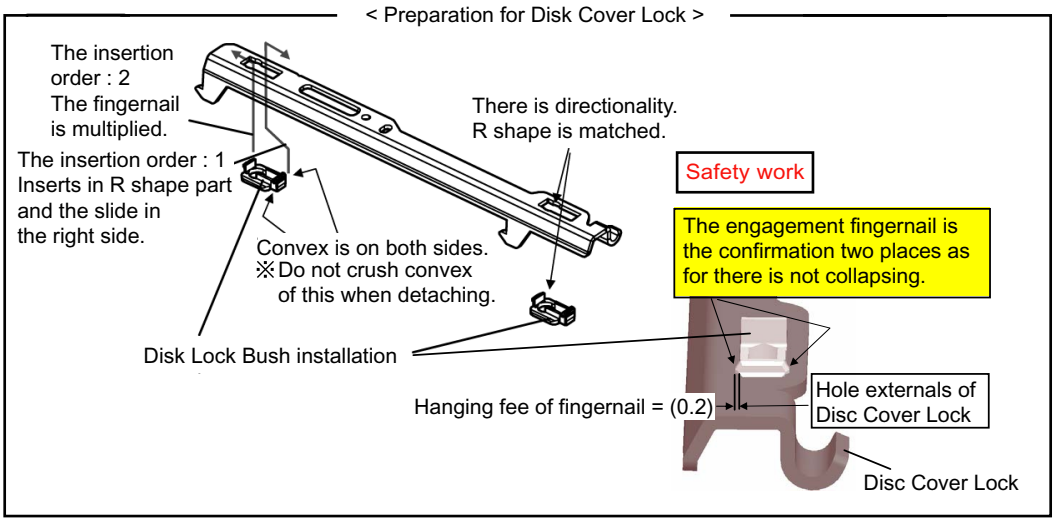


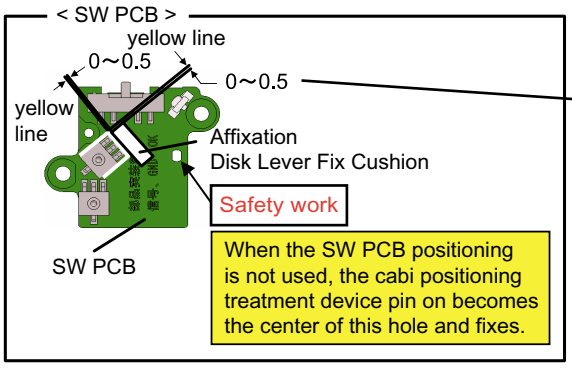
9.3.4.9. Assembly of the Disk Cover Click



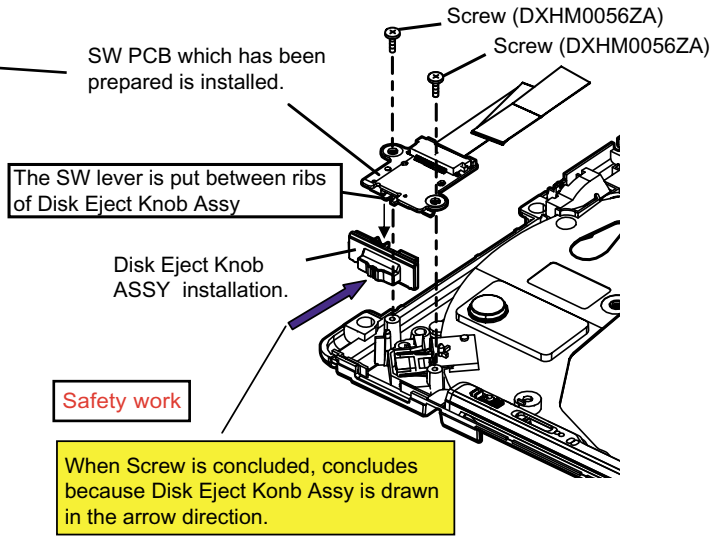
9.3.4.10. Assembly of the Disk Cover Lock / SW PCB



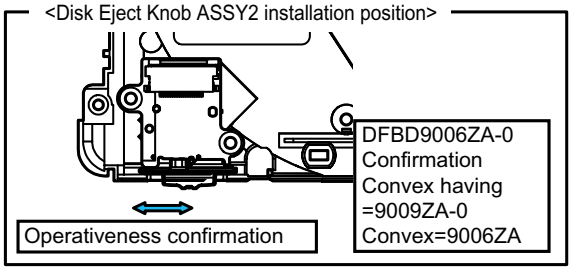




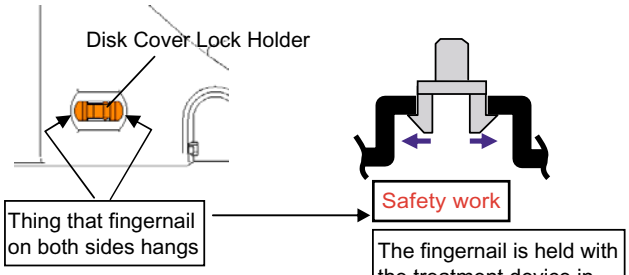
< SW PCB >
yellow line
0～0.5
0～0.5
yellow line
Affixation
Disk Lever Fix Cushion
Safety work
When the SW PCB positioning is not used, the cabi positioning treatment device pin on becomes the center of this hole and fixes.
SW PCB



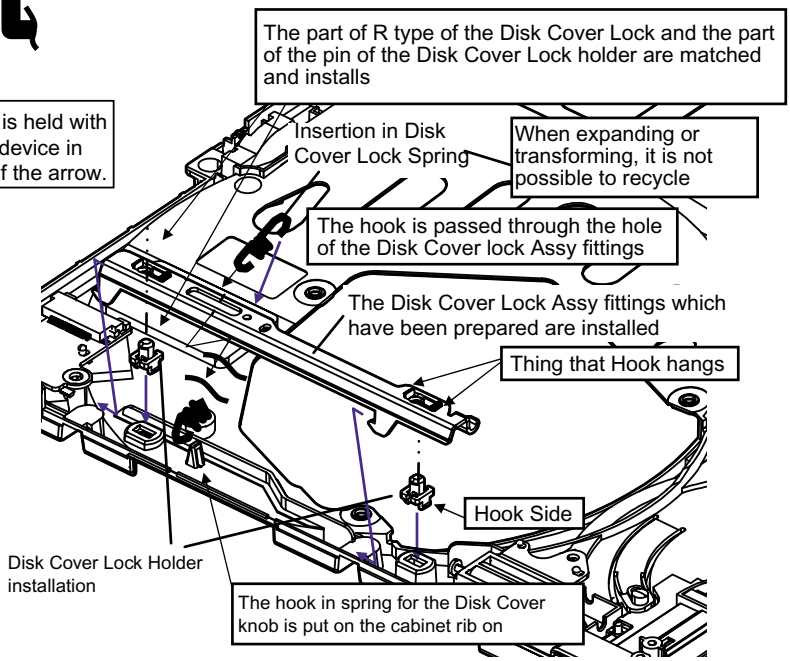
Screw (DXHM0056ZA)
Screw (DXHM0056ZA)
SW PCB which has been prepared is installed.
The SW lever is put between ribs of Disk Eject Knob Assy
Disk Eject Knob ASSY installation.
Safety work
When Screw is concluded, concludes because Disk Eject Konb Assy is drawn in the arrow direction.



<Disk Eject Knob ASSY2 installation position>
DFBD9006ZA-0
Confirmation
Convex having
=9009ZA-0
Convex=9006ZA
Operativeness confirmation

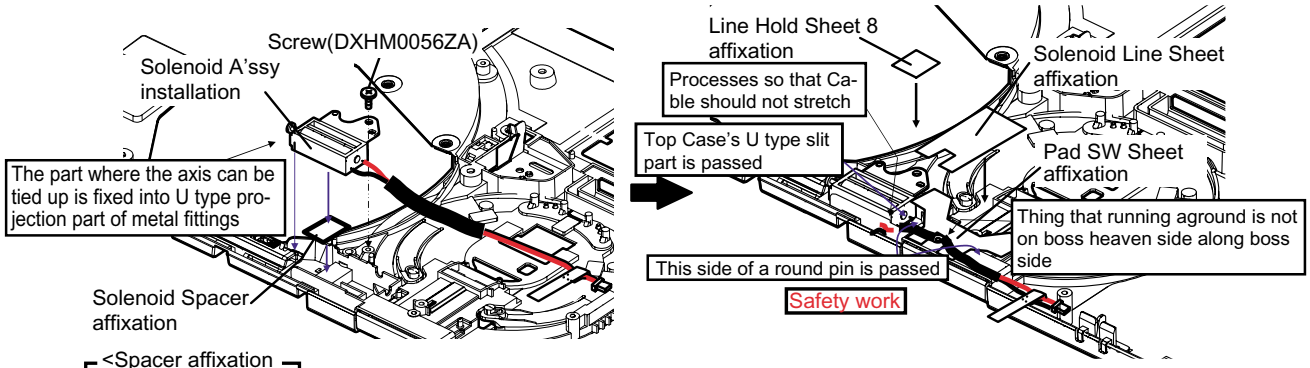


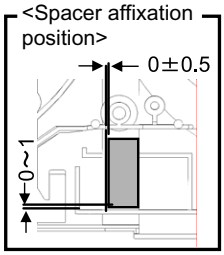
Disk Cover Lock Holder
Thing that fingernail on both sides hangs
Safety work
The fingernail is held with the treatment device in the direction of the arrow.

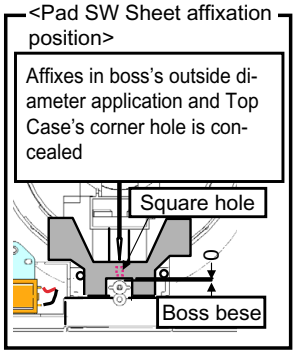


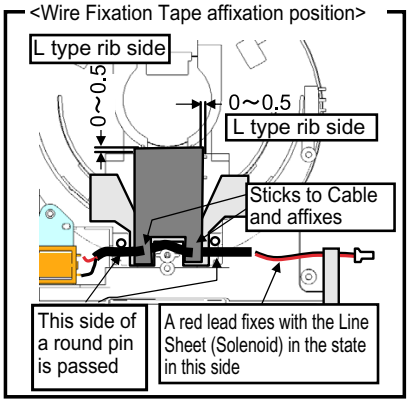
The part of R type of the Disk Cover Lock and the part of the pin of the Disk Cover Lock holder are matched and installs
Insertion in Disk Cover Lock Spring
When expanding or transforming, it is not possible to recycle
The hook is passed through the hole of the Disk Cover lock Assy fittings
The Disk Cover Lock Assy fittings which have been prepared are installed
Thing that Hook hangs
Hook Side
Disk Cover Lock Holder installation
The hook in spring for the Disk Cover knob is put on the cabinet rib on

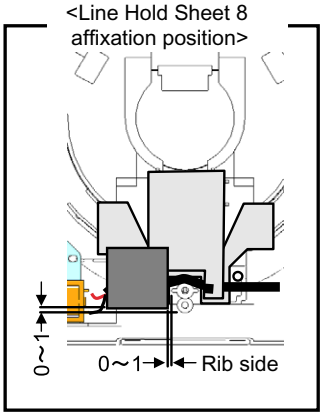
9.3.4.11. Assembly of the Solenoid











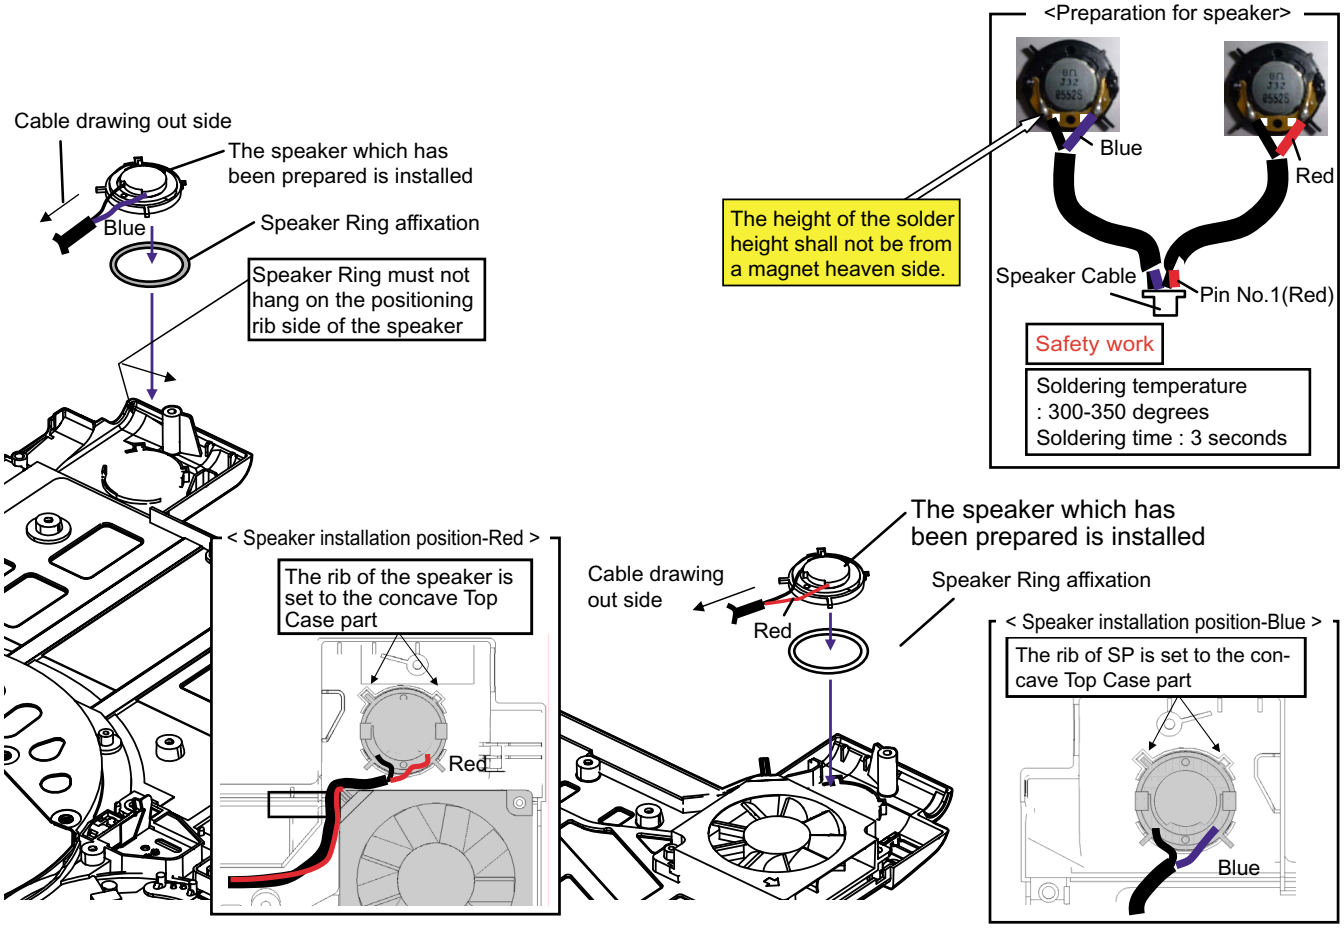
* Work notes

< SCWER tightening torque >

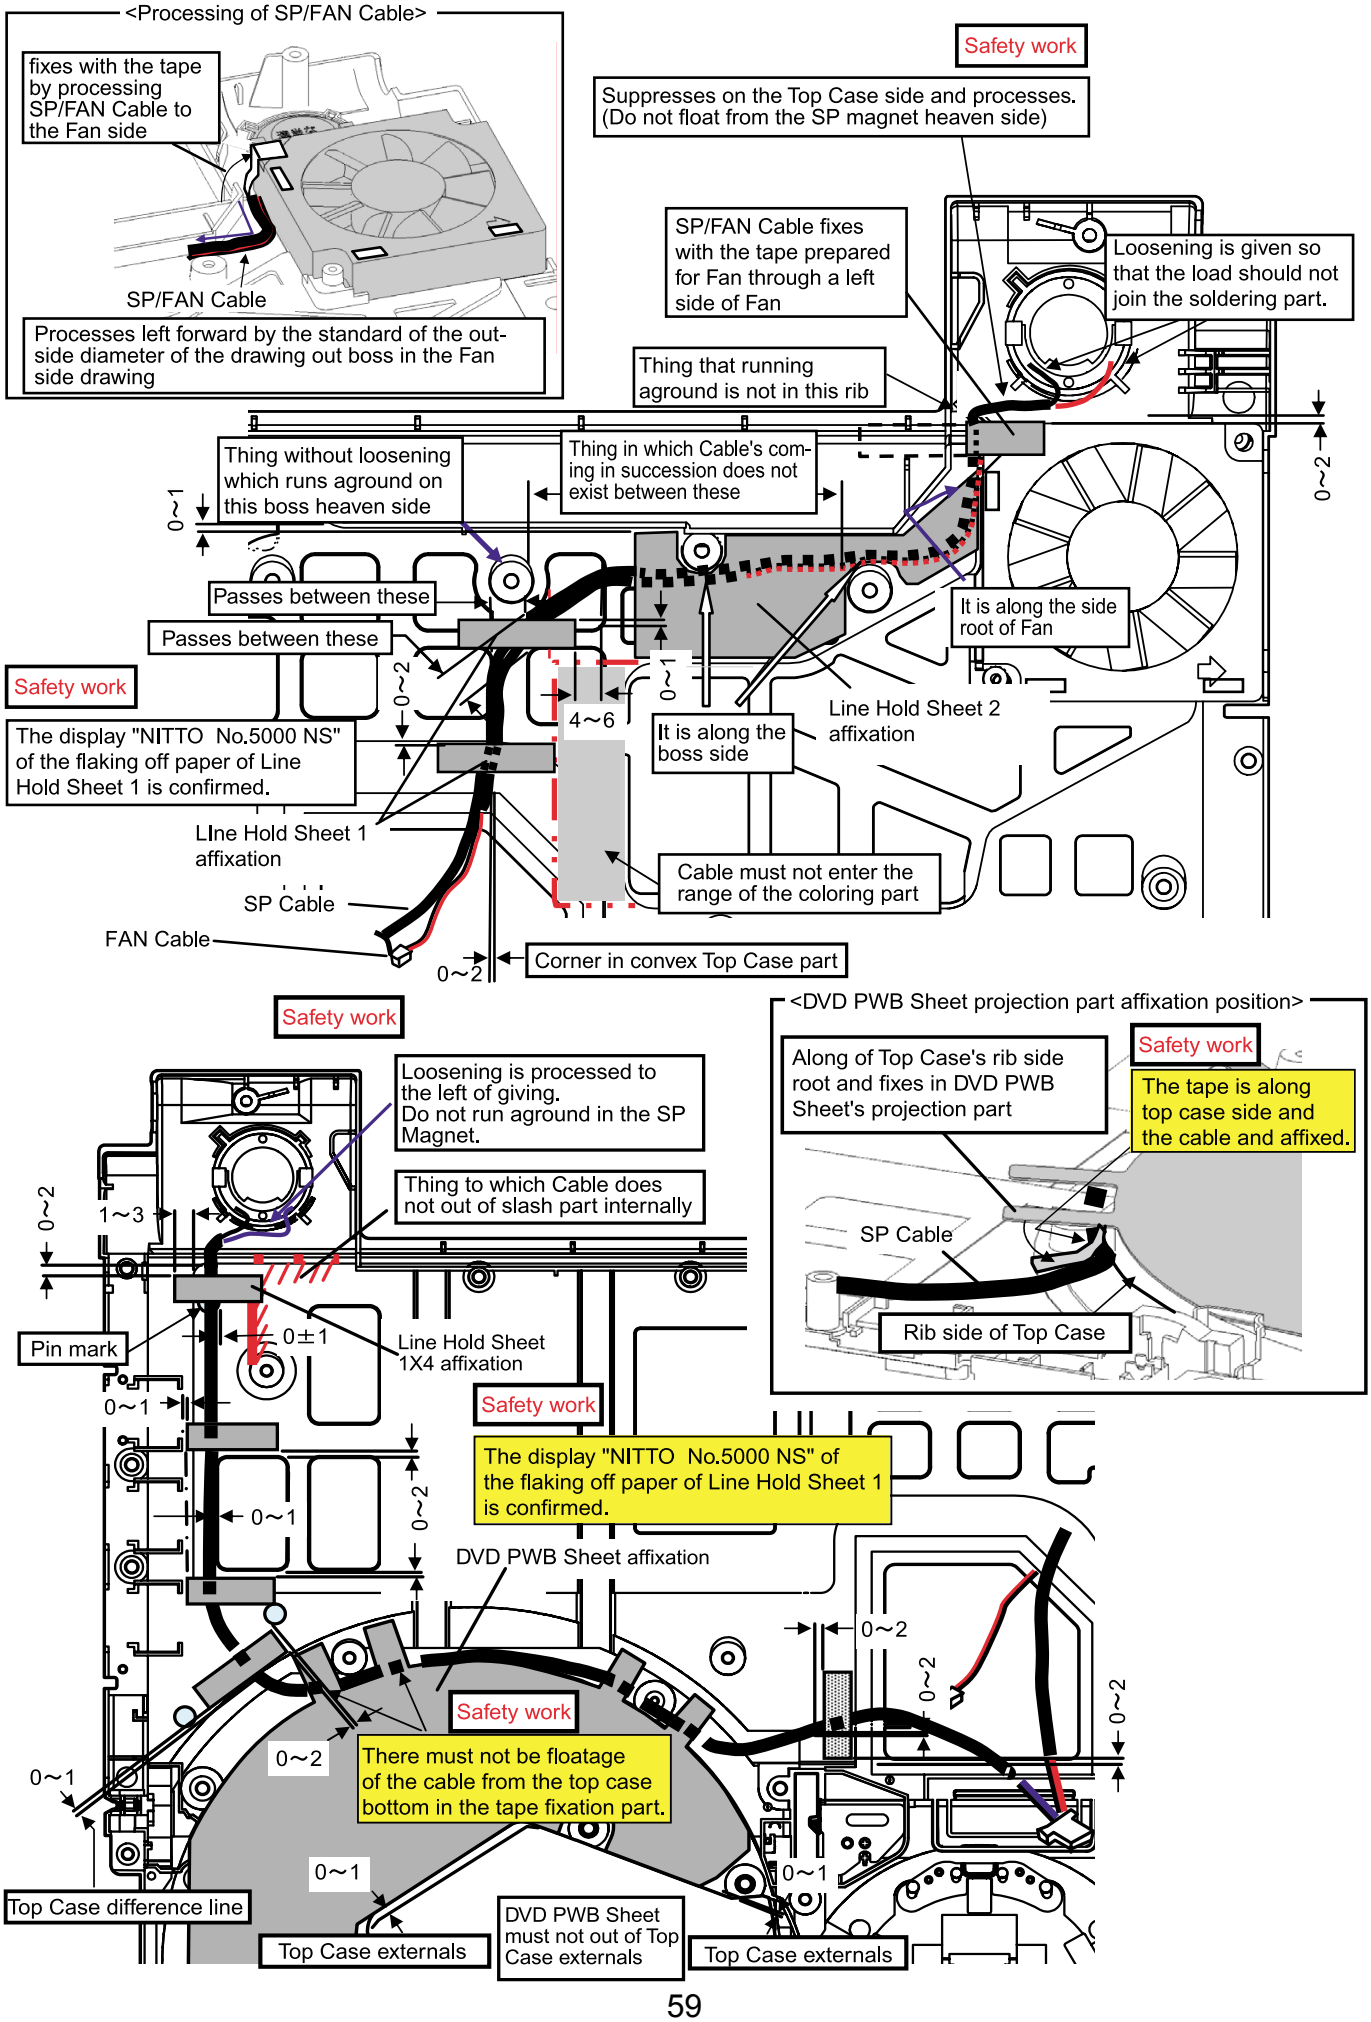
Conclusion first time power : 0.16-0.18N・m{ 1.6-1.8kgf・cm }

At the repair : 0.10-0.12N・m{ 1.0-1.2kgf・cm }

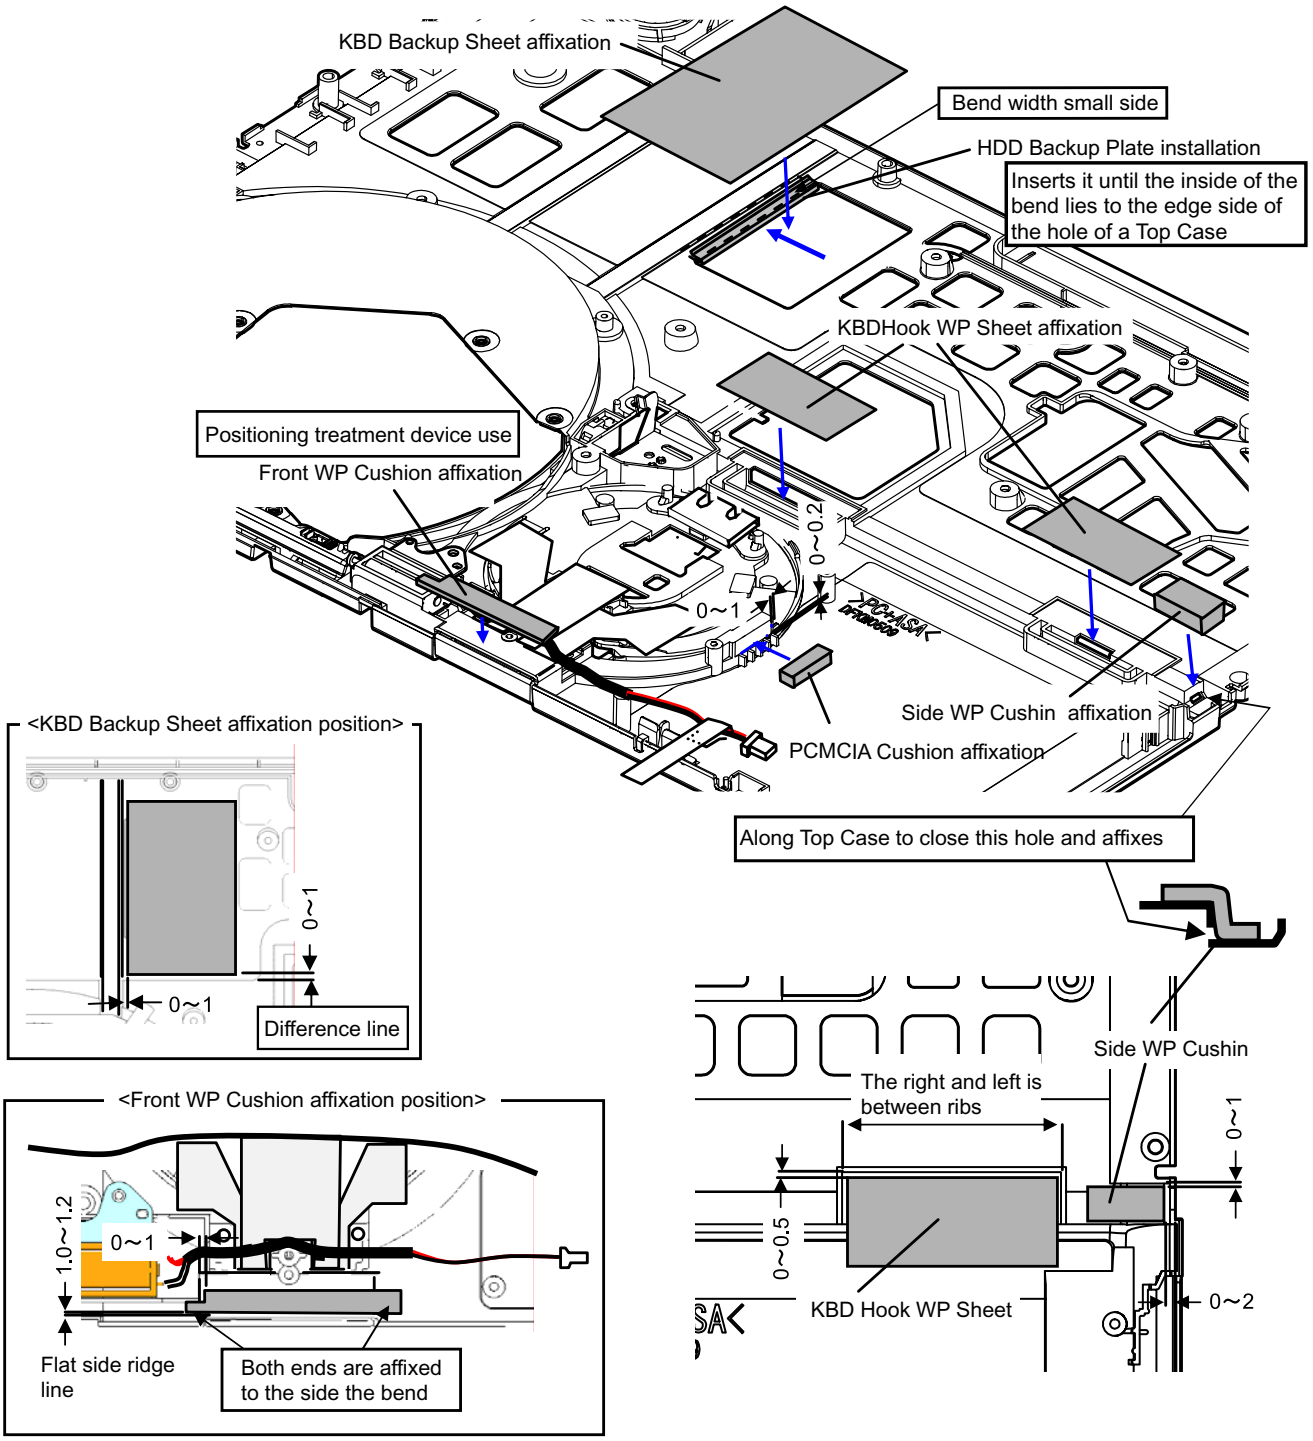
9.3.4.12. Assembly of the Speaker



9.3.4.13. Wiring Speaker Cable



9.3.4.14. Putting Cushion / Tape / Sheet



9.3.4.15. Assembly of the SW PCB FFC

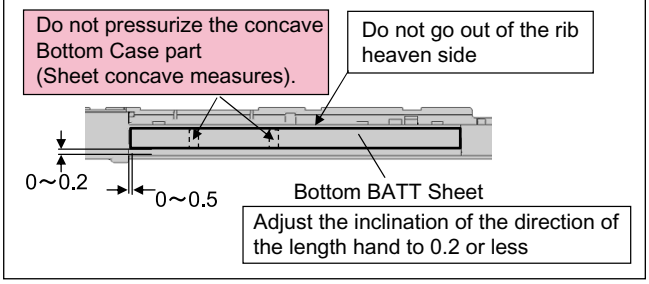
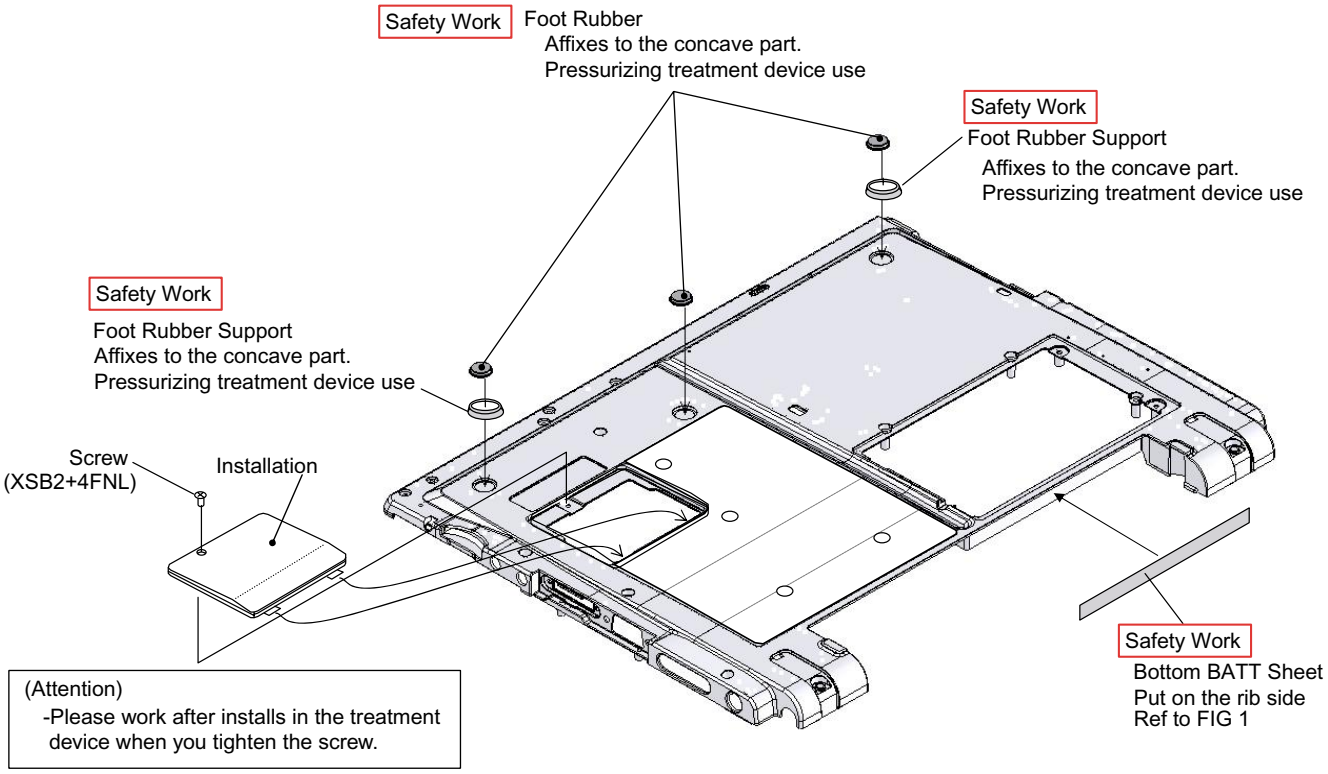
Outer wall bottom corner

9.3.5.4. Putting Foot Rubber

<FIG1> Safety Work



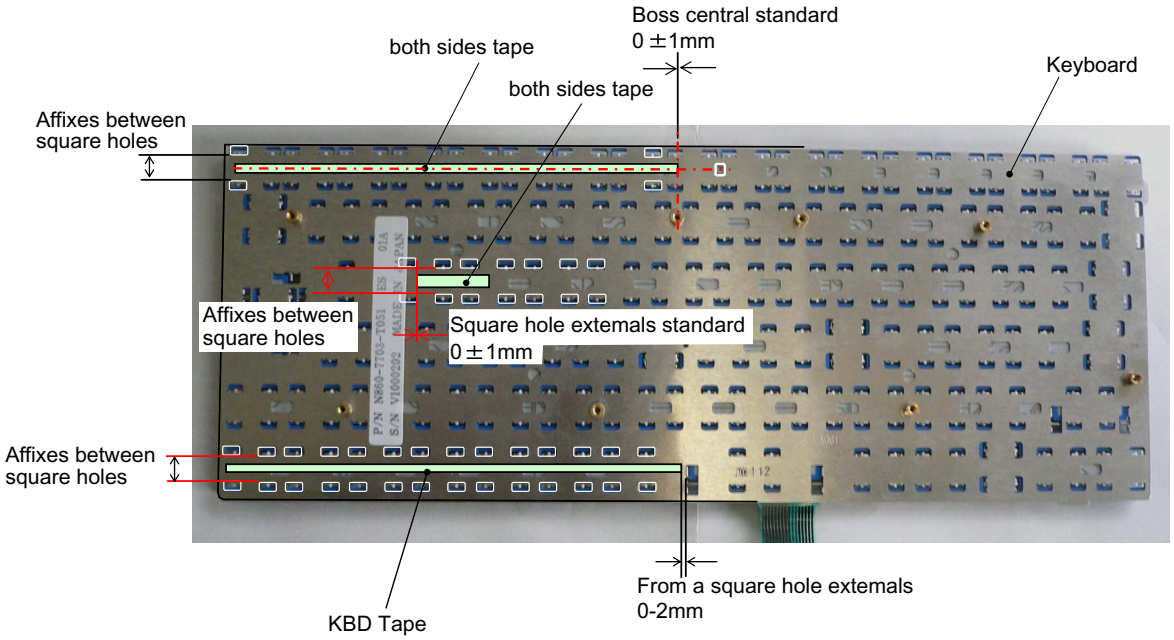
<Notes and procedures when rubber foot / rubber foot (center) putting>
1) Wipe rubber foot/ rubber foot (center) pasting side with the dry cloth (3 places)
(Cautions) - Exchange the cloth (rag) wiped off regularly (twice / day)
2) A rubber foot/rubber foot(center) pasting
(Cautions) - Put on the Bottom Case with tweezers etc.
- Paste so as not to touch the sticking side.
3) Pressurizing (treatment device use) condition:
Pressurizing power : 2.5kgf or more,
Time : 3 seconds or more



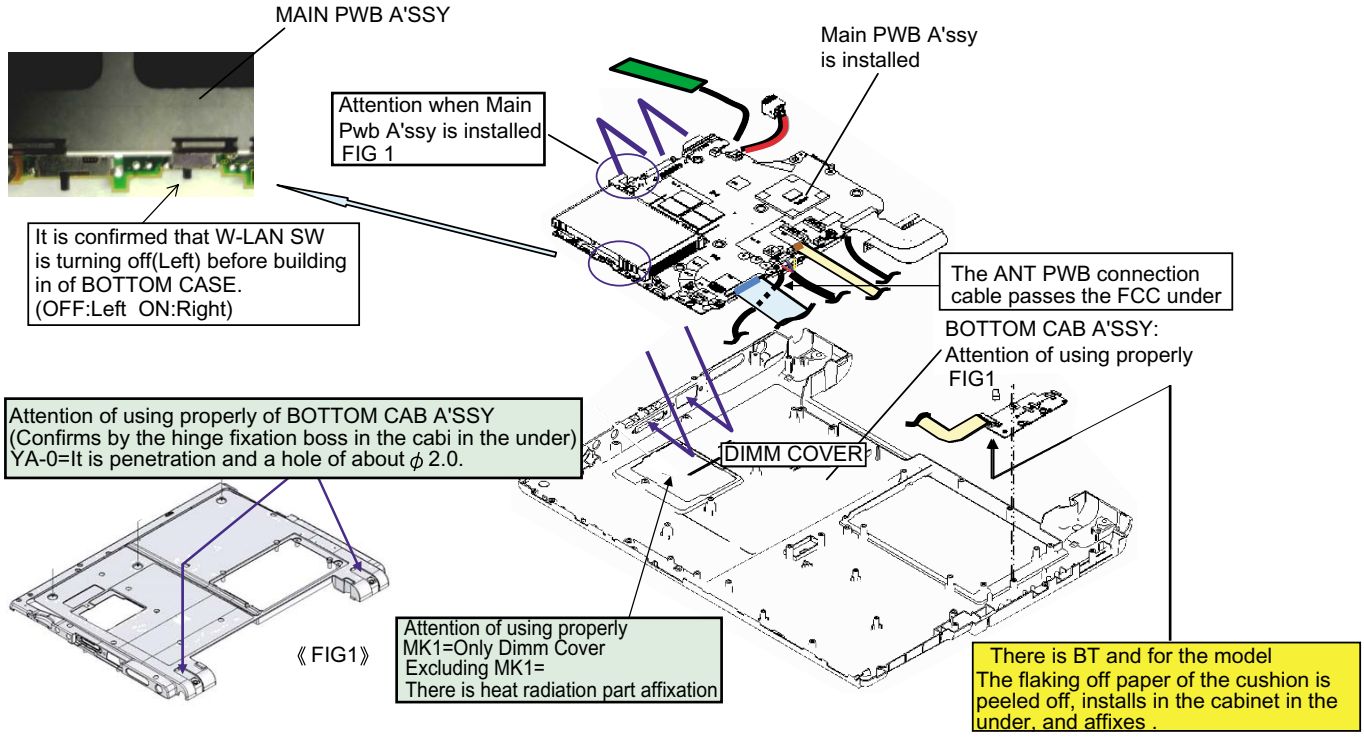
Work with a specified treatment device when you pressurize Foot Rubber and Bottom BATT Sheet .

9.3.6. Assembly knowhow of the Body

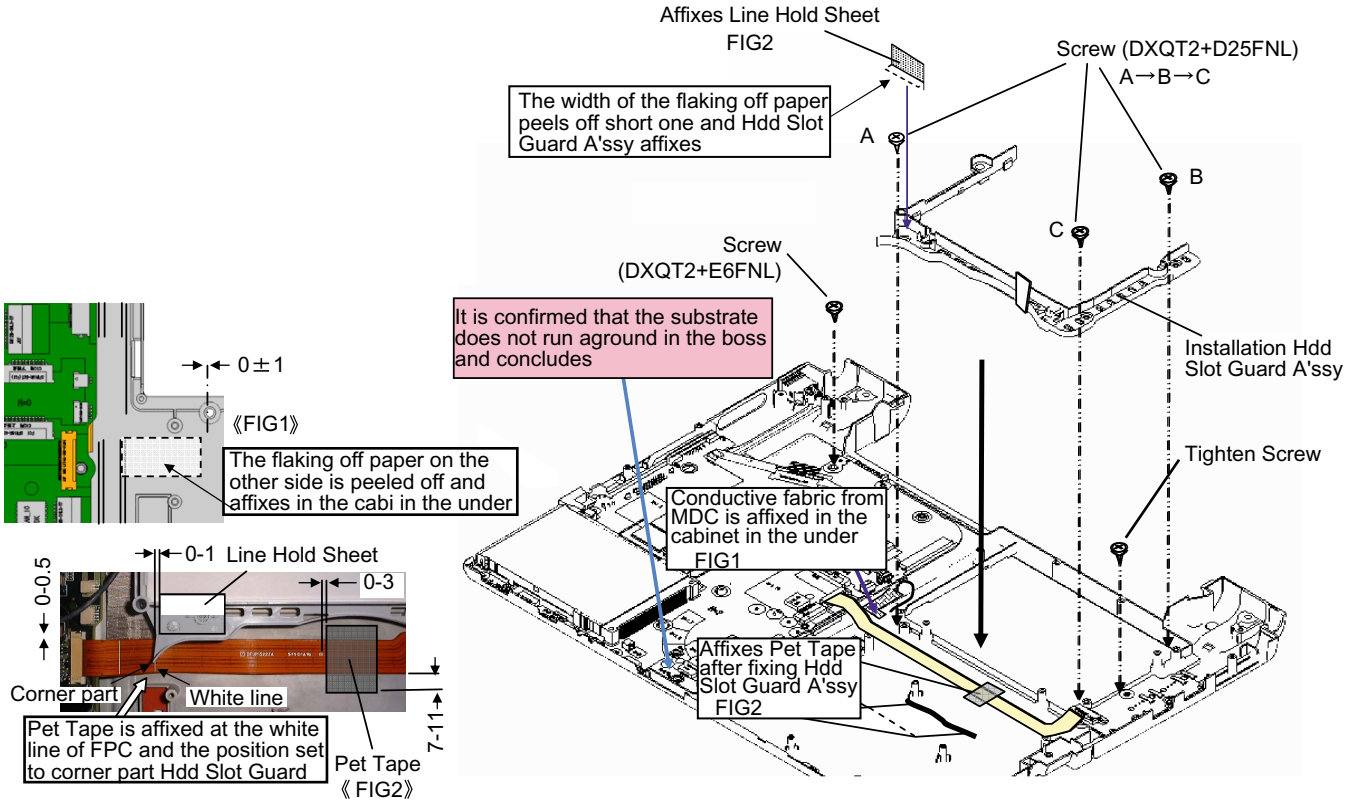
9.3.6.1. Keyboard preparation



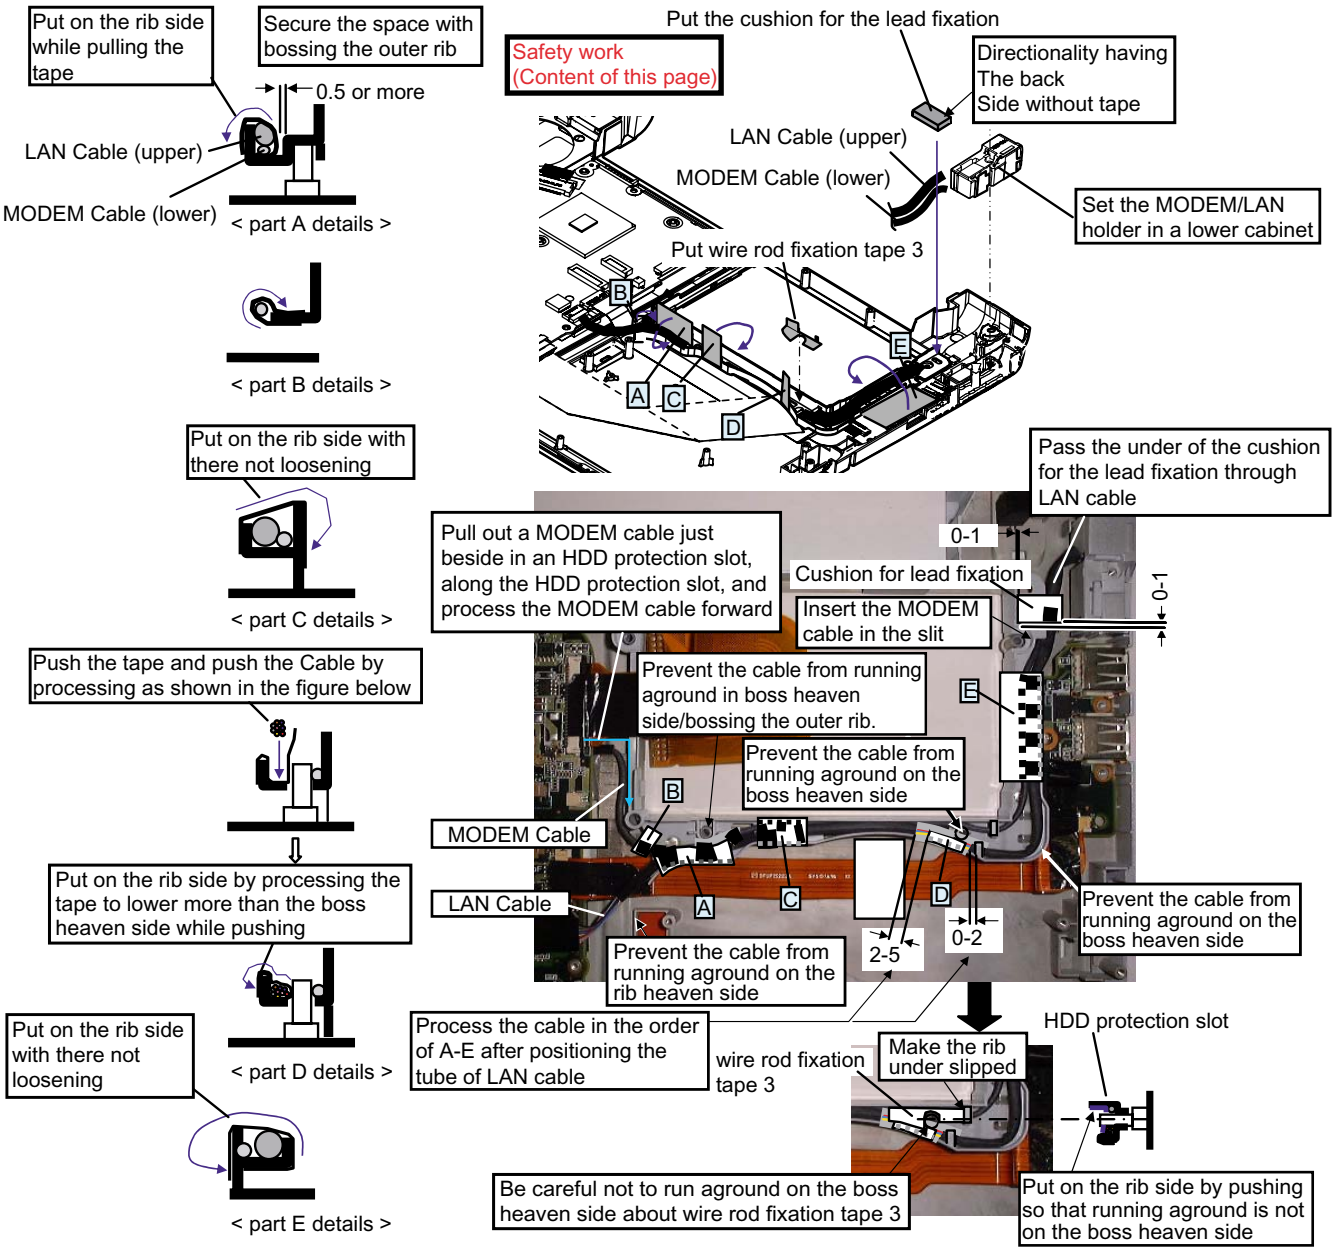
9.3.6.2. Installation of Main Board



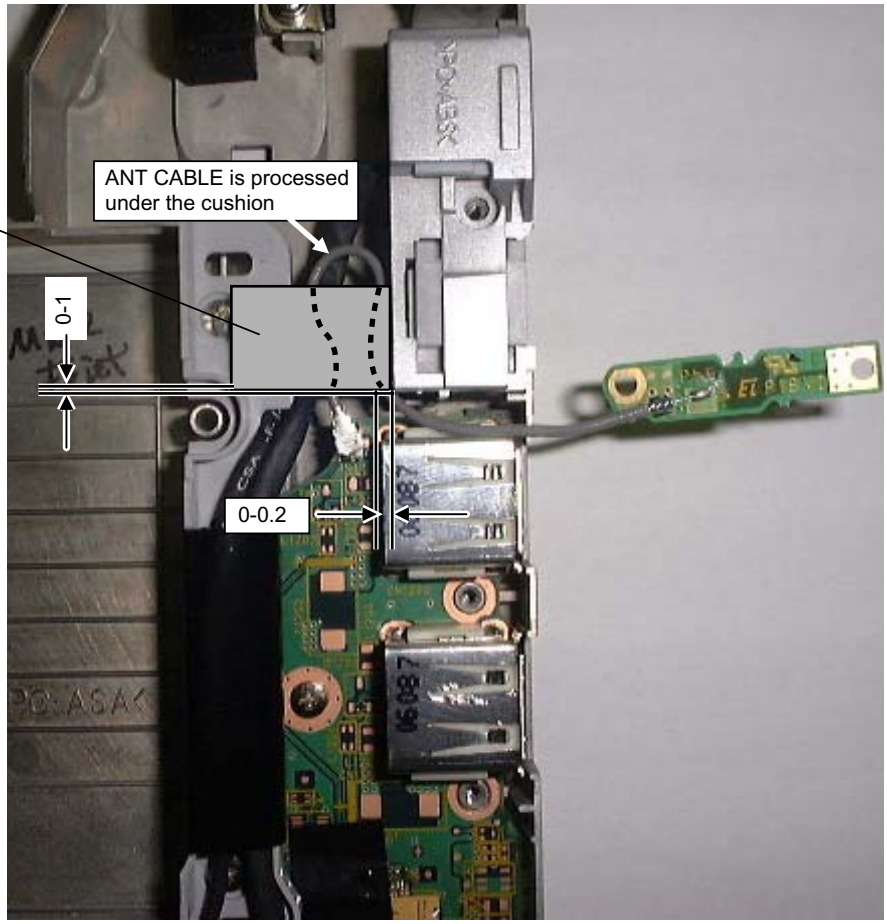
9.3.6.3. Assembly of the HDD Slot Guard

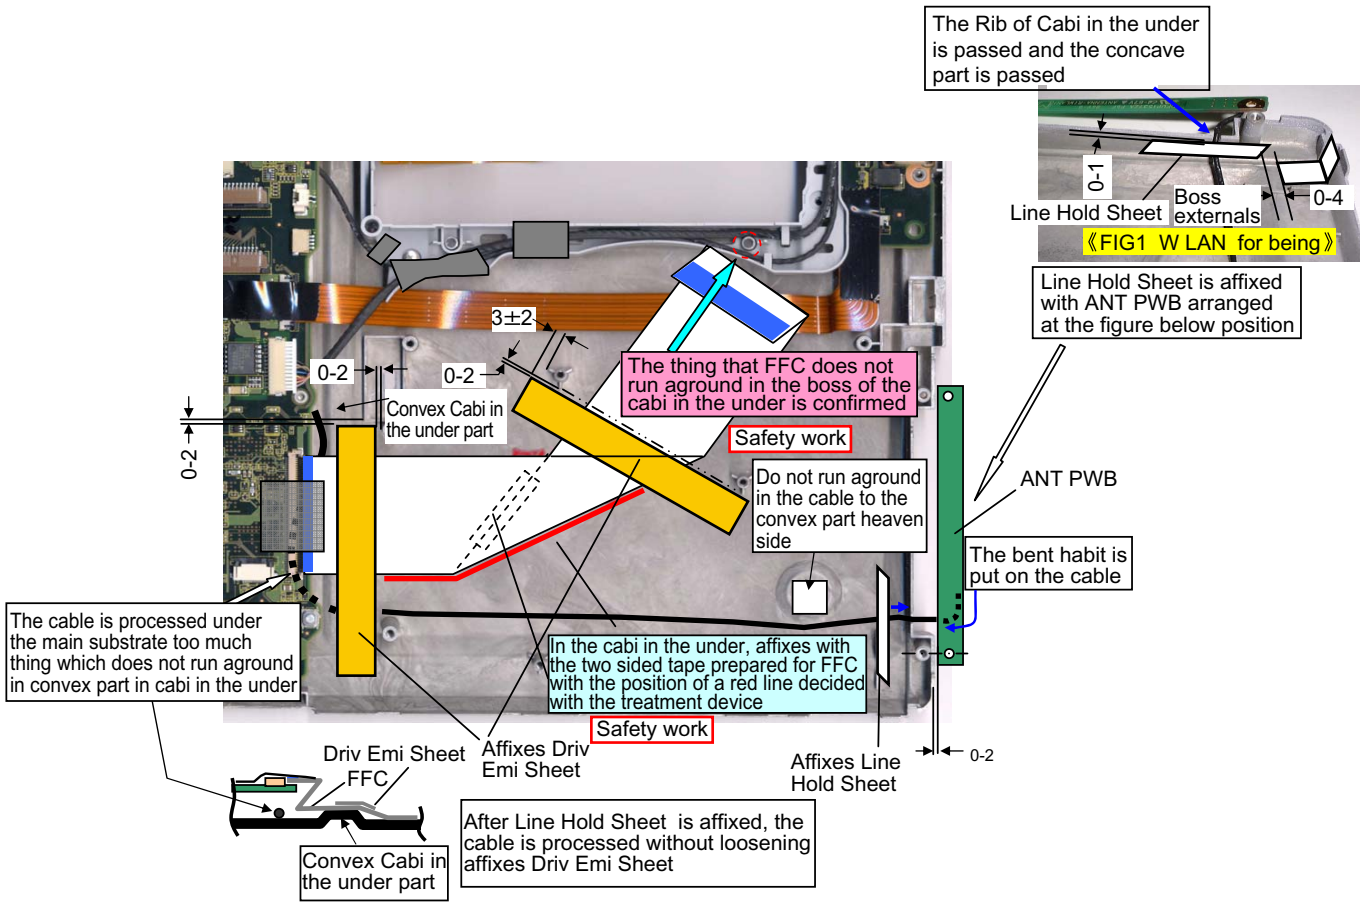


9.3.6.4. Putting Line Hold Sheet 3 / Line Hold Cushion

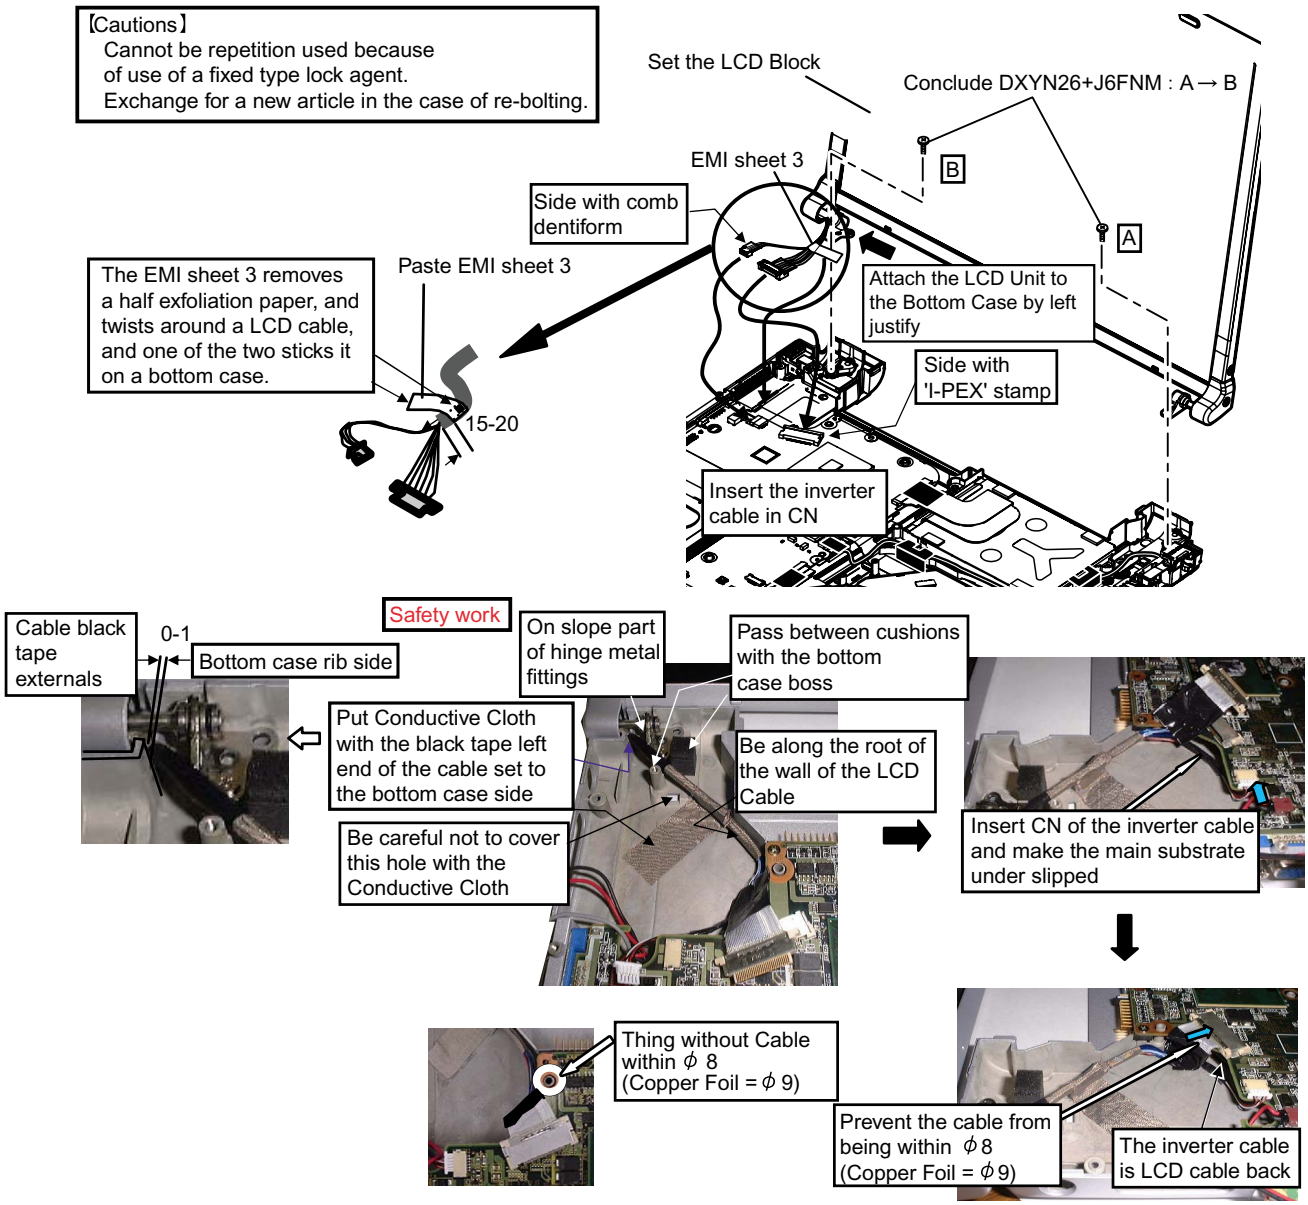


It is the same as last page excluding the undermentioned specification

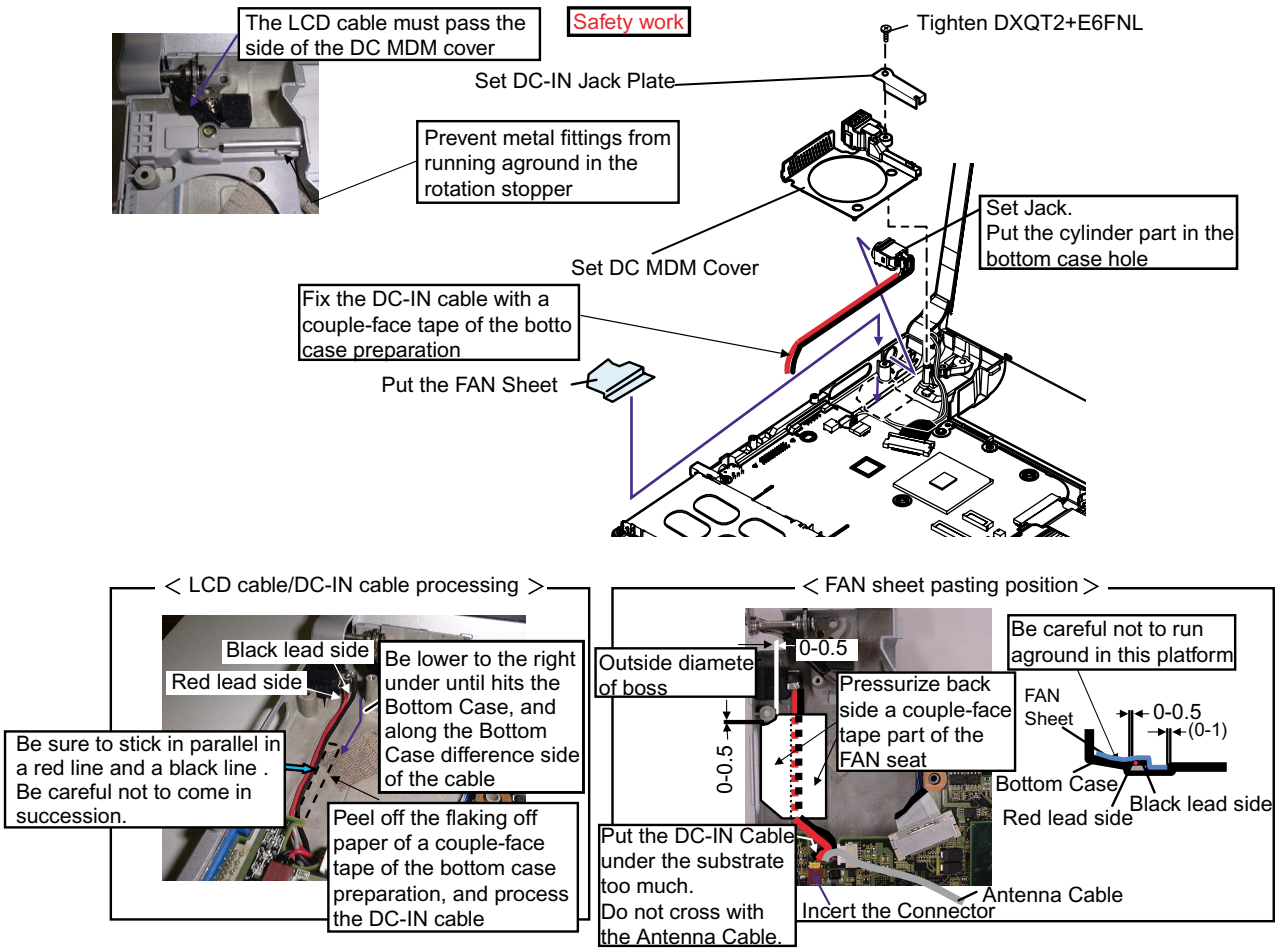




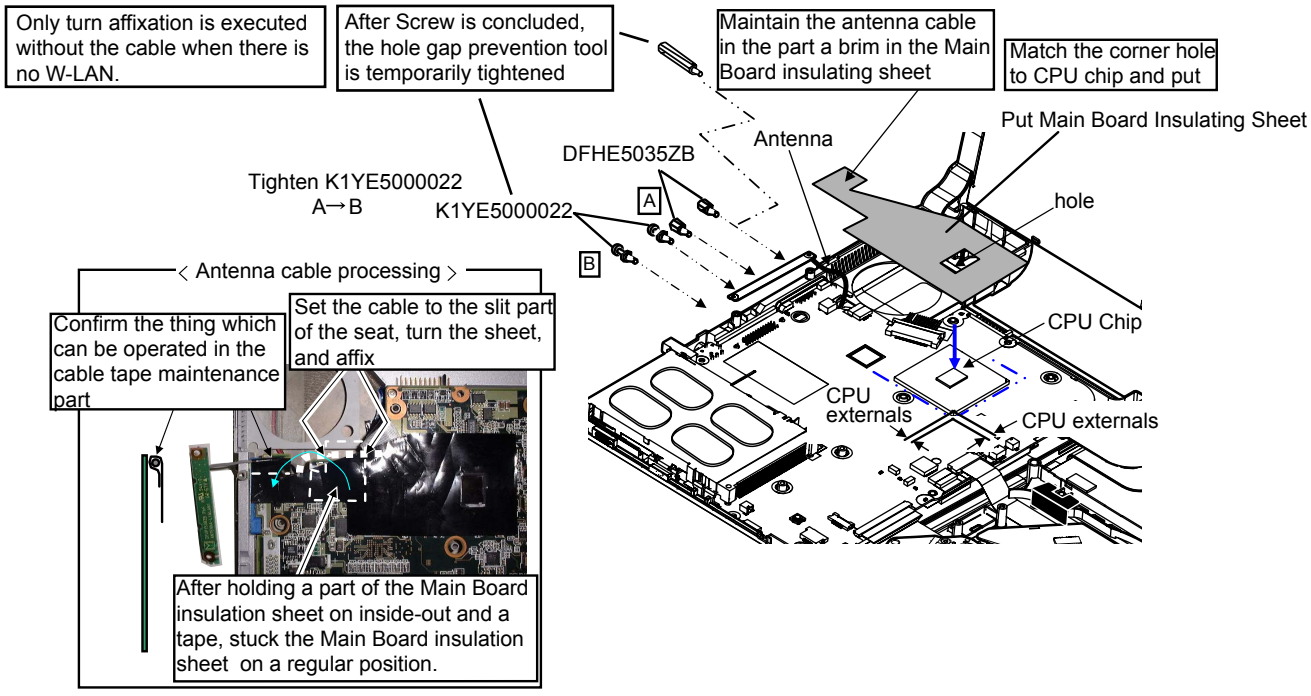
9.3.6.5. Installation of LCD Unit



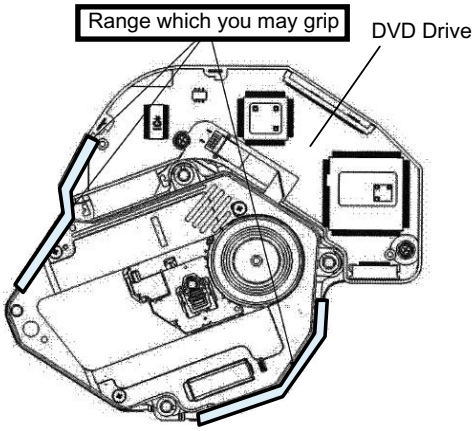
9.3.6.6. Assembly of the DC Jack Plate



9.3.6.7. Putting Main PCB Sheet



9.3.6.8. Assembly of the DVD Drive



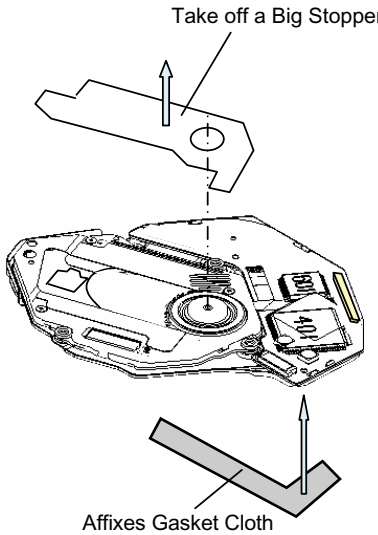


FIG1

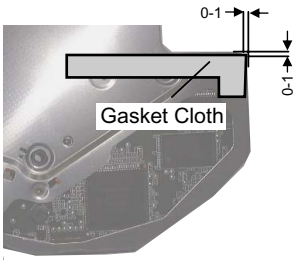
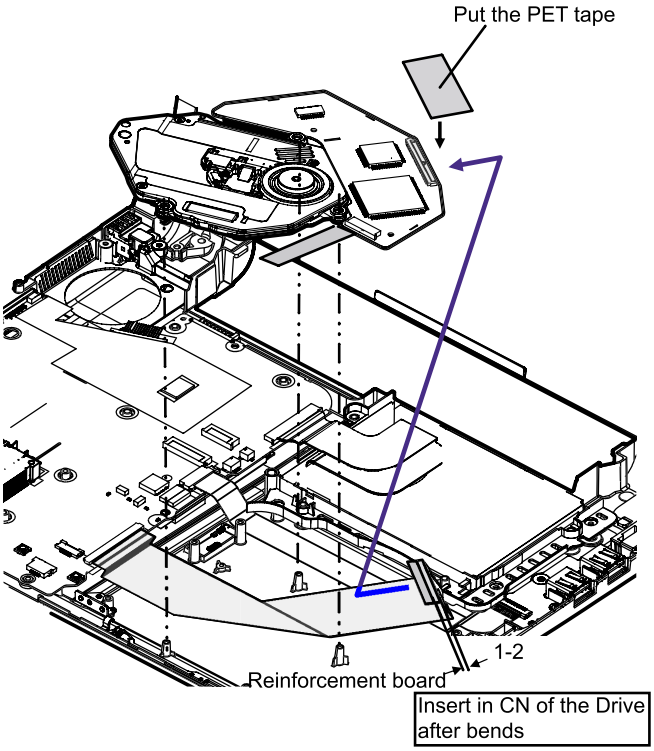
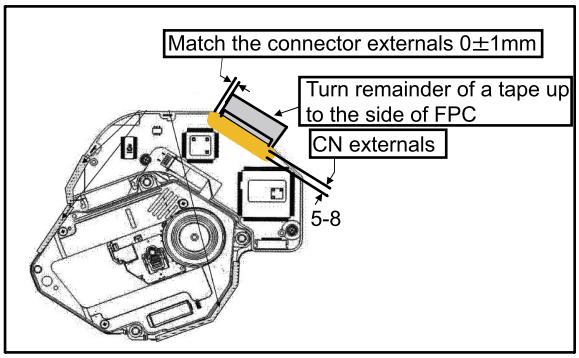
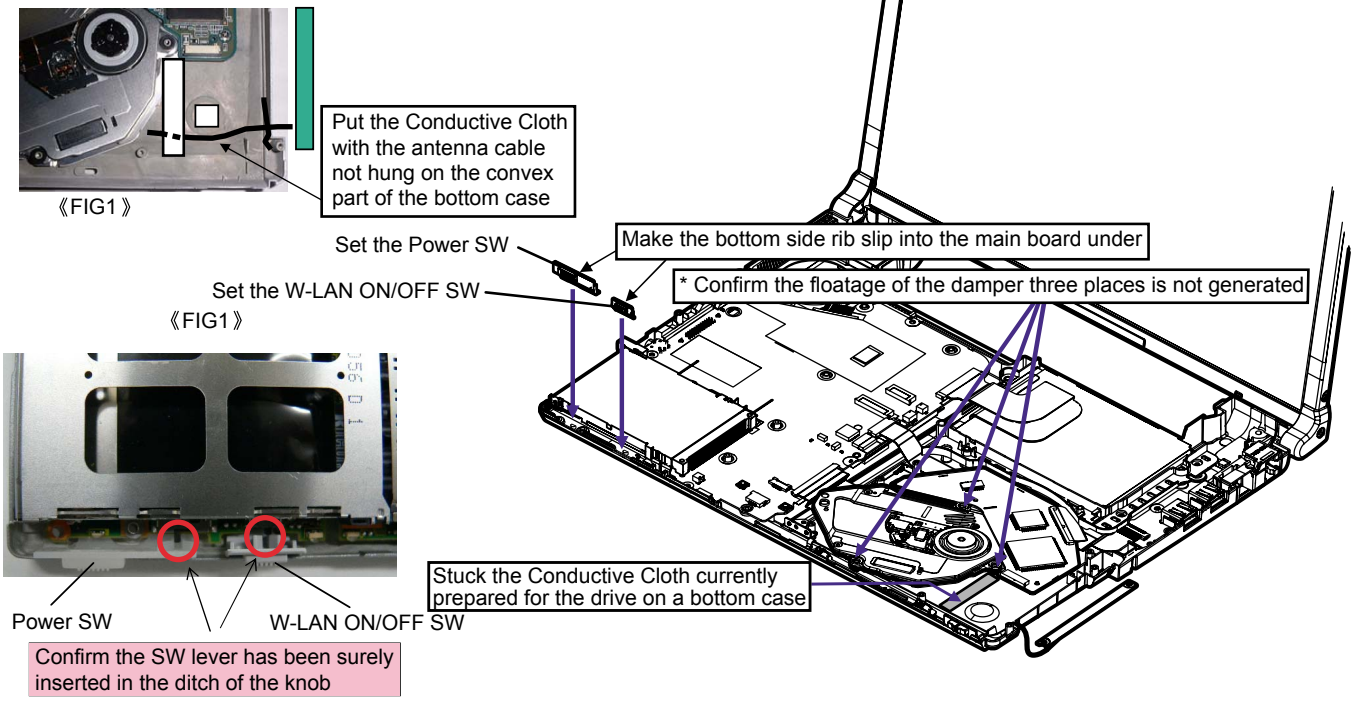


《FIG1》

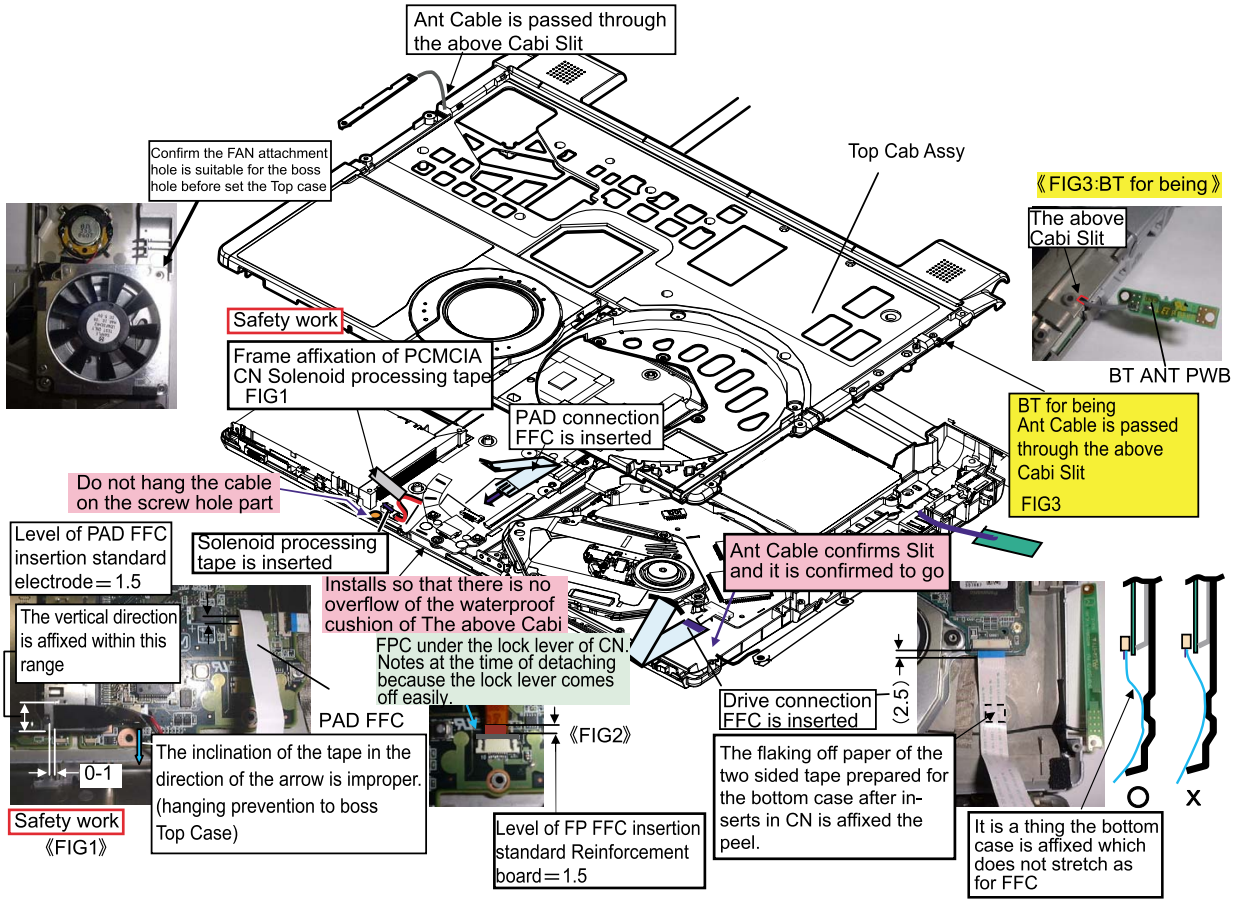




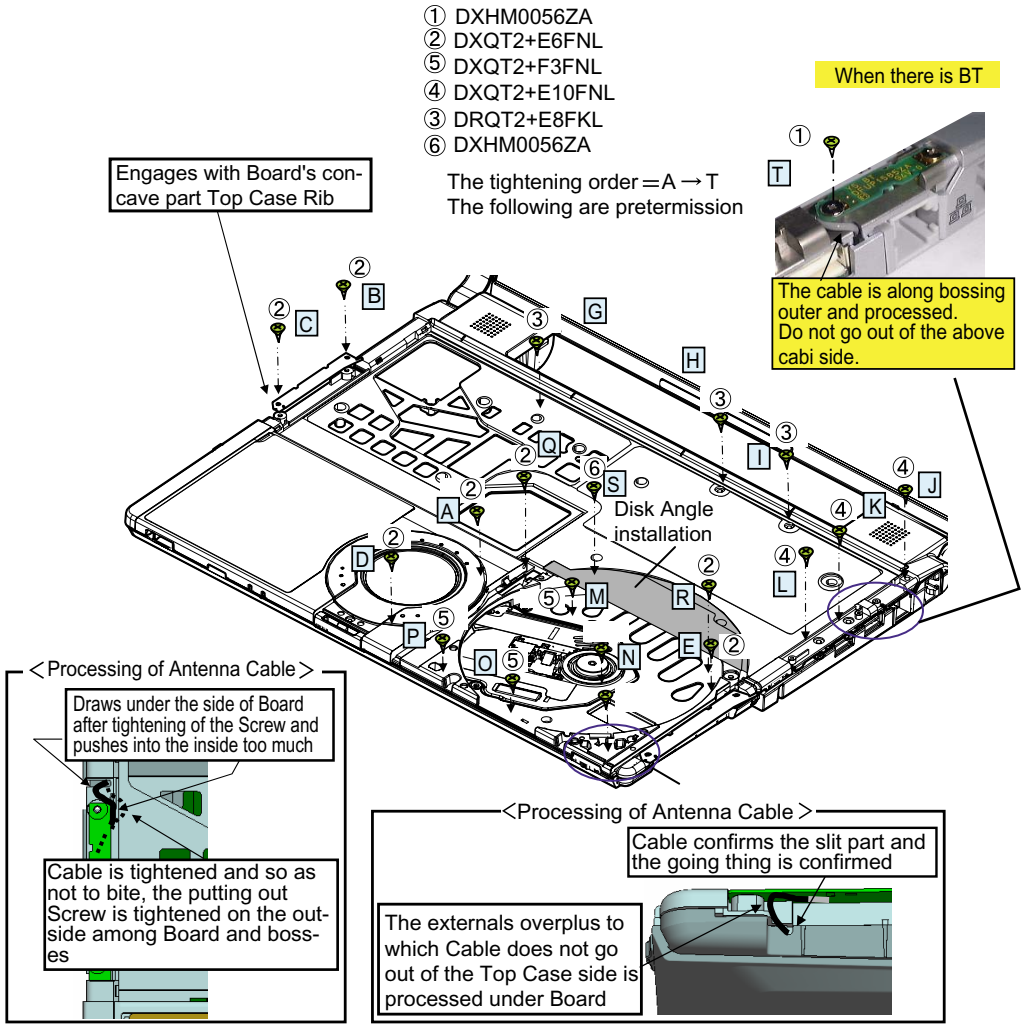
9.3.6.9. Installation of Power Knob / LAN SW Knob



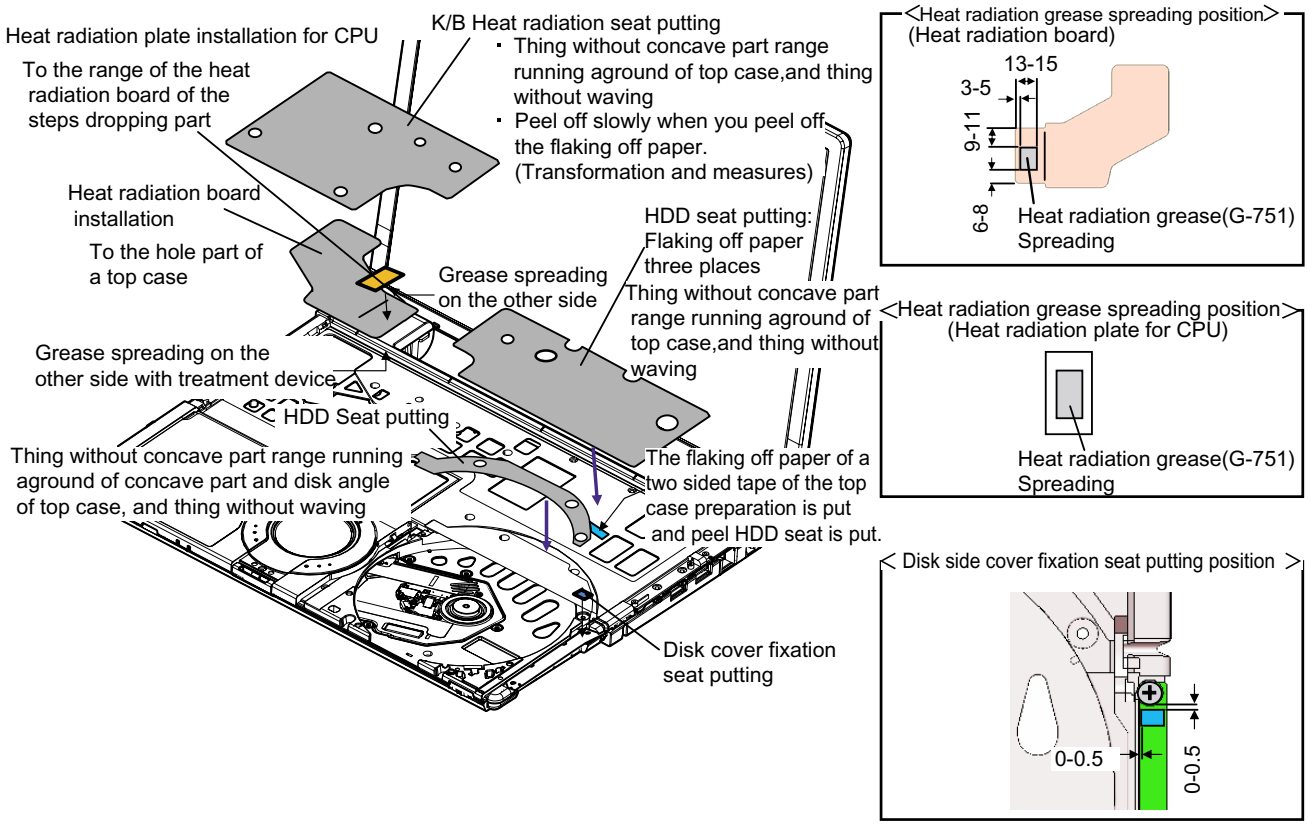
9.3.6.10. Assembly of the Body



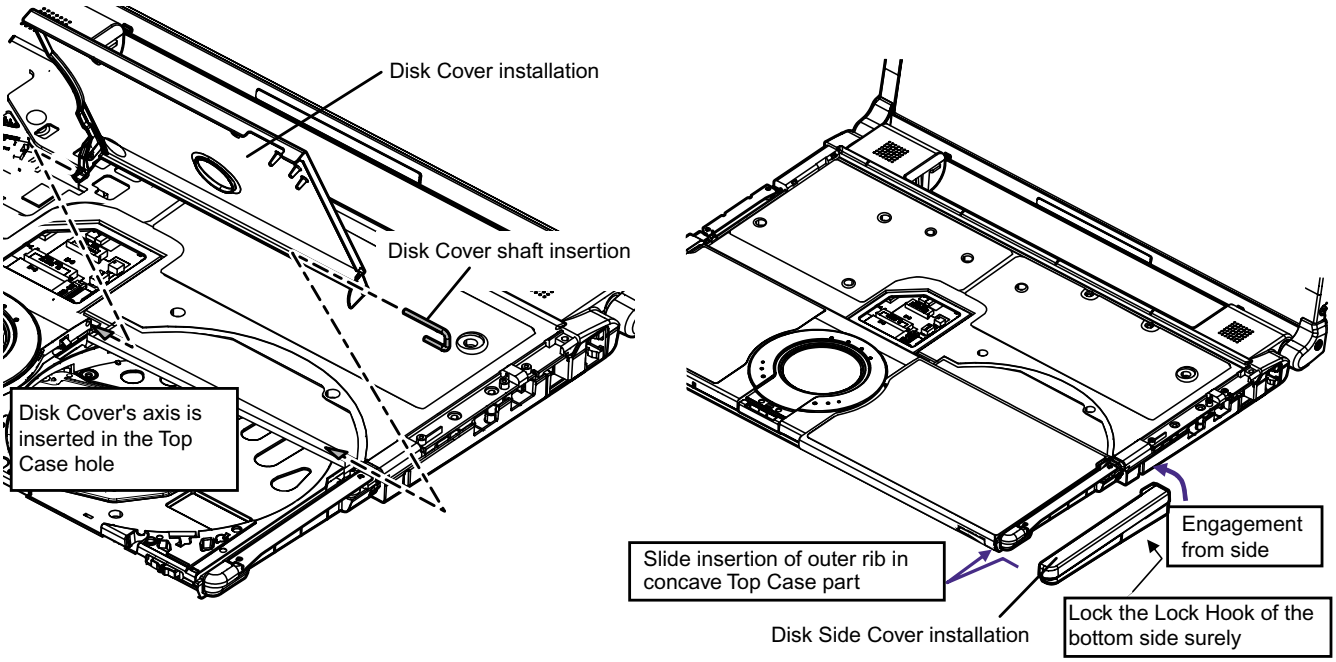
9.3.6.11. Top Case side screw tightening



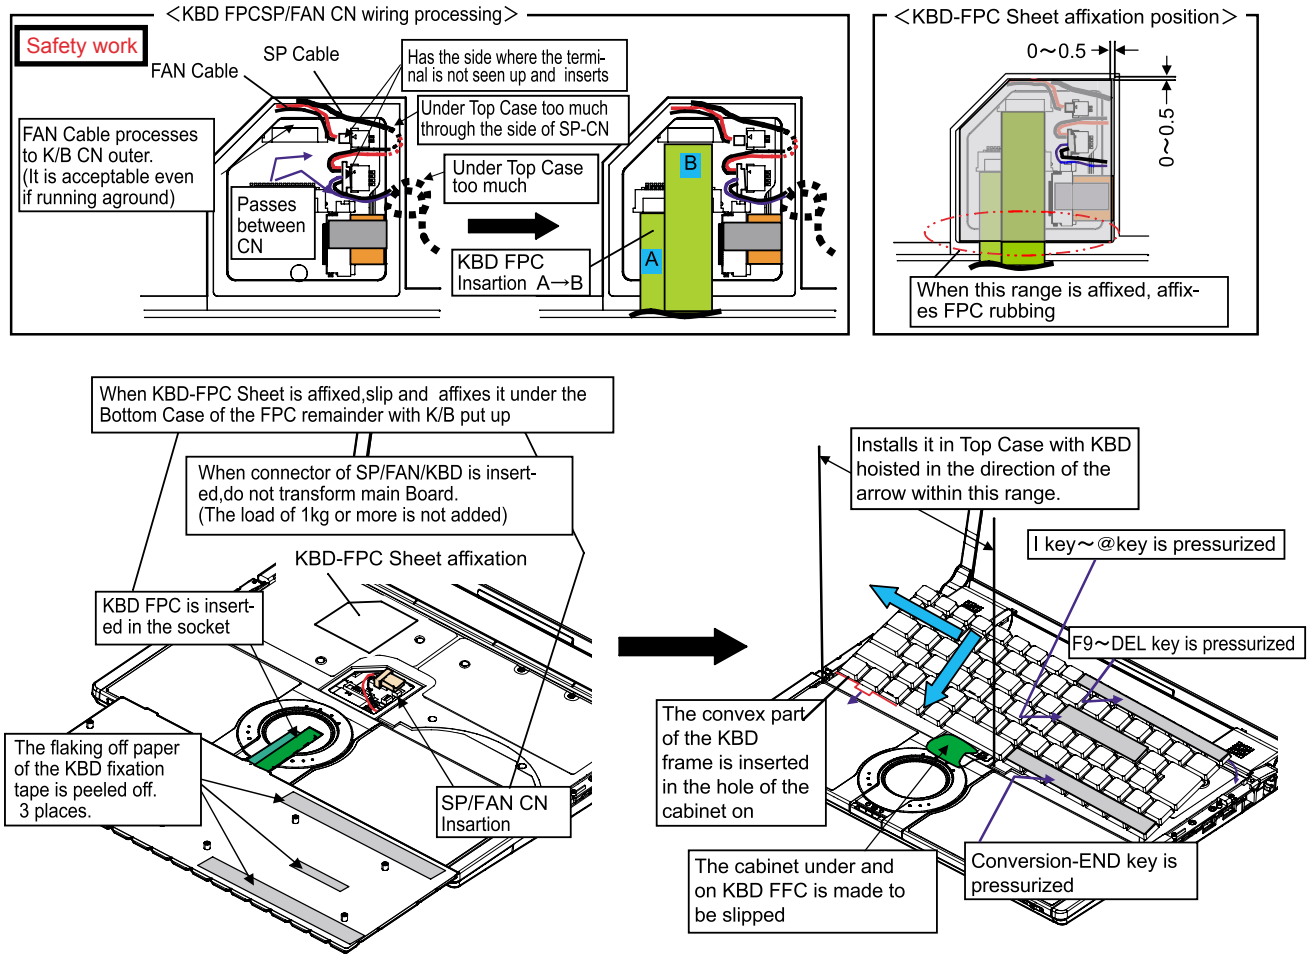
9.3.6.12. Installation of K/B Heat Spreader



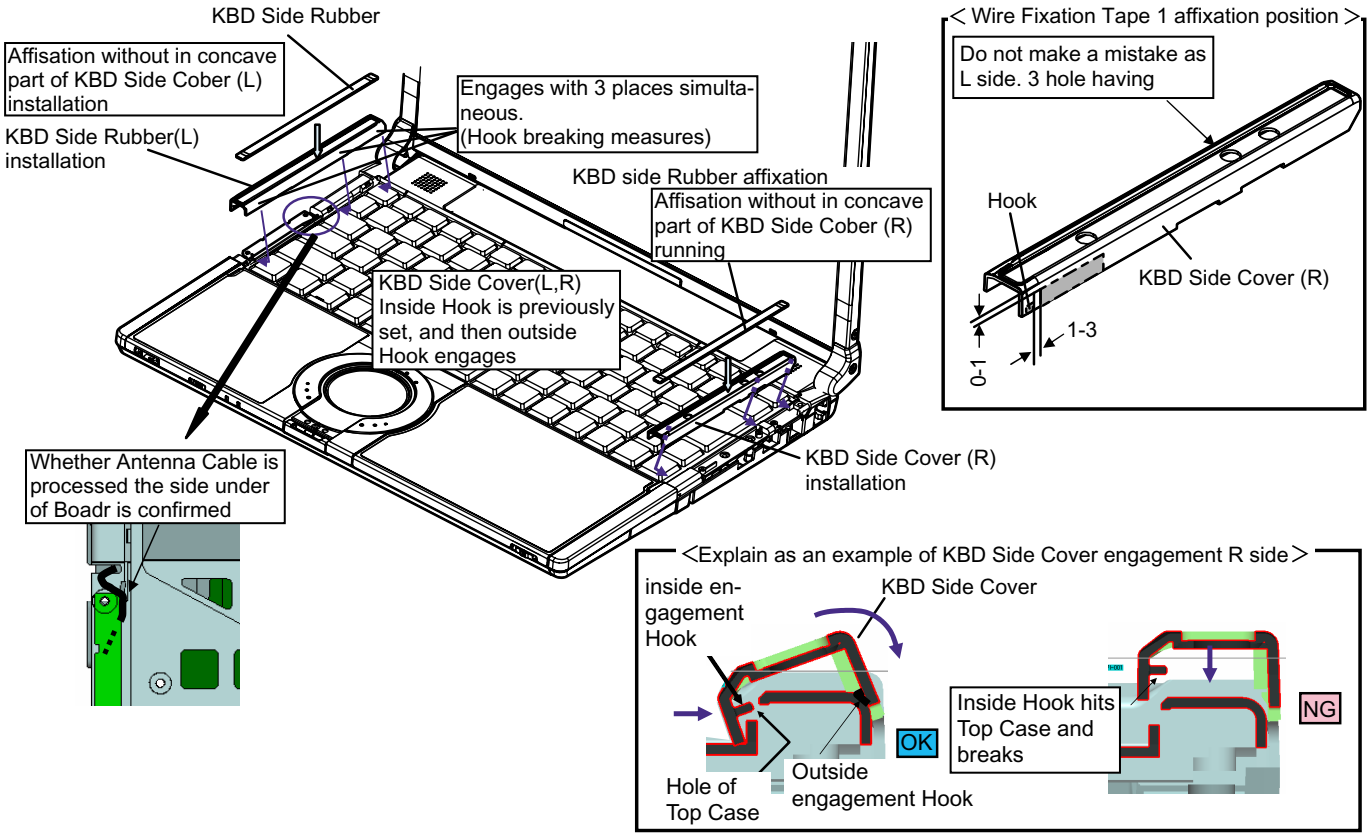
9.3.6.13. Installation of Disk Cover / Disk Side Cover



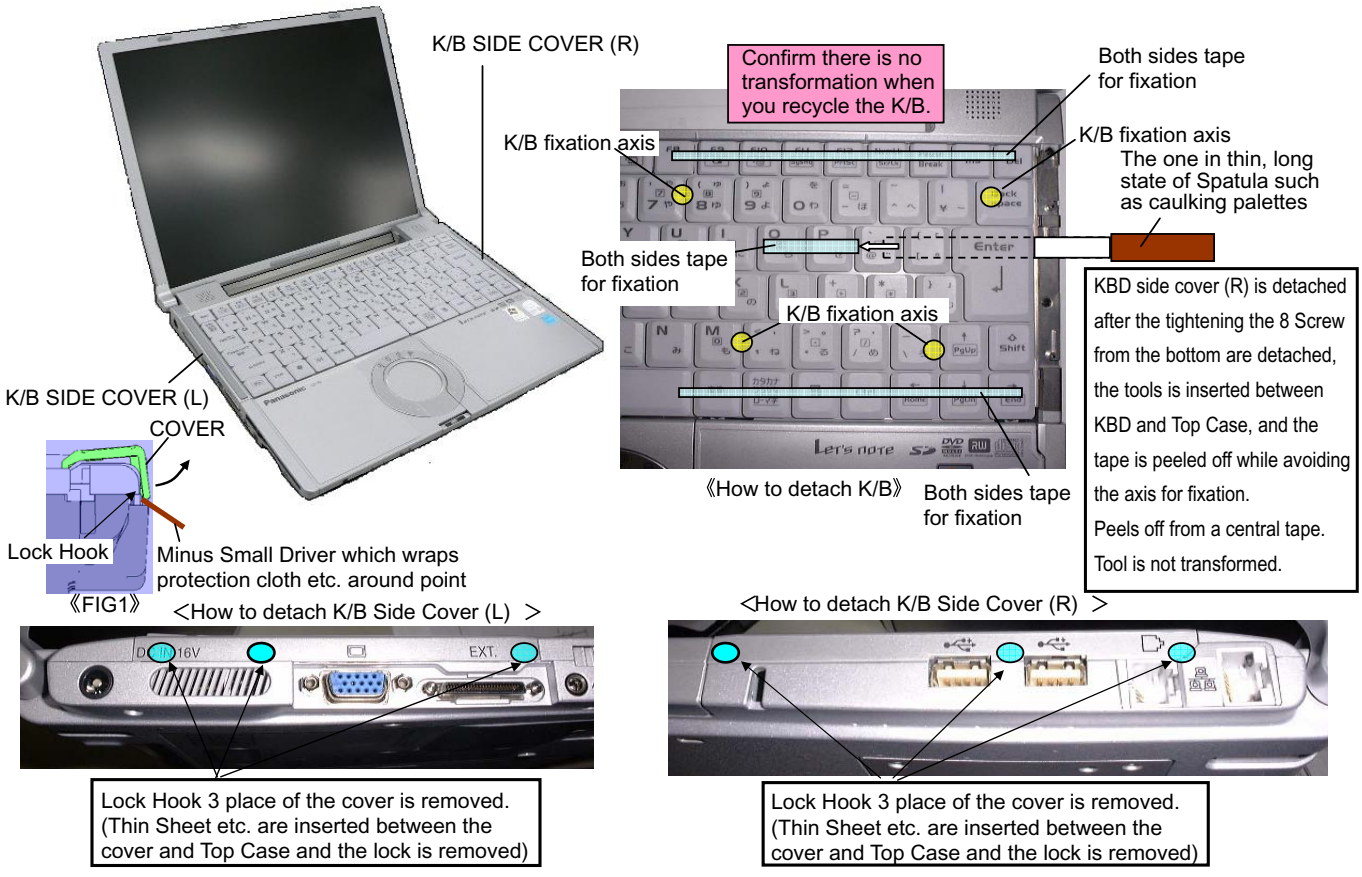
9.3.6.14. Installation of Keyboard



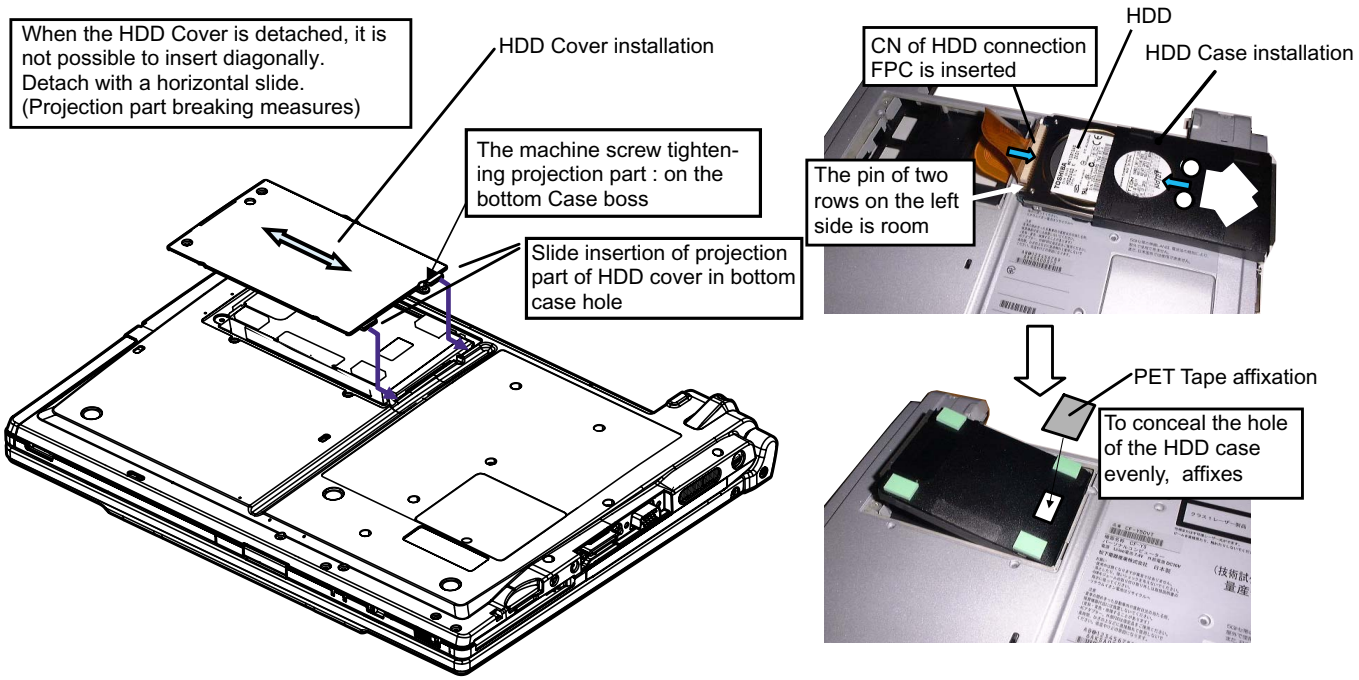
9.3.6.15. Installation of K/B Side Cover



9.3.6.16. How to detach Keyboard and K/B Side Cover



9.3.6.17. Installation of HDD



9.3.6.18. Bottom Case side screw tightening

Replacement Parts List

Note: Important Safety Notice
Components identified by ⚠ mark have special characteristics important for safety.
When replacing any of these components use only manufacturer's specified parts.

CF-Y5LWVYZBM (2006/11/16)

REF. NO and AREA		PART NO.	DESCRIPTION	Q'TY
MAIN PCB				
C 1, 212, 708, 711		EEFSX0D331ER	CAPACITOR, 2V, 330µF	4
C 2, 3, 4, 6, 7, 8, 11, 12, 13, 15, 16, 17, 19, 20, 21, 23, 24, 25, 26, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41,		F1J0J1060004	CAPACITOR, 6.3V, 10µF	36
C 5, 60, 61, 69, 89, 181,		EEFCX0D221R	CAPACITOR, 2V, 220µF	7
C 9, 10, 14, 18, 22, 27, 50, 51, 52, 57, 64, 65, 66, 68, 71, 85, 90, 92, 95, 96, 99, 100, 101, 102, 105, 106, 107, 108, 111, 112, 114, 115, 118, 119, 127, 128, 134, 135, 136, 137, 142, 143, 144, 145, 146, 147, 148, 168, 169, 170, 171, 175, 177, 178, 180, 182, 183, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 207, 208, 210, 217, 219, 221, 222, 228, 233, 234, 236, 239, 241, 243, 245, 247, 249, 252, 255, 257, 262, 275, 283, 289, 290, 291, 292, 293, 294, 295, 296, 298, 305, 310, 311, 313, 314, 315, 316, 317, 318, 319, 321, 323, 326, 328, 332, 347, 358, 364, 375, 377, 378, 379, 383, 384, 386, 392, 393, 394, 402, 406, 413, 430, 431, 434, 435, 436, 437, 438, 442, 444, 445,		F1G1C104A042	CAPACITOR, 16V, 0.1µF	156
C 46, 151, 152, 153, 154, 174, 179, 218, 230, 231, 238, 240, 260, 272, 277, 308, 312, 340, 401, 602, 605, 692, 731		F1G1E103A062	CAPACITOR, 25V, 0.01µF	23
C 48, 58, 59, 62, 63, 70, 72, 74, 87, 93, 167, 176, 206, 254, 297, 303, 304, 325, 339, 368, 395, 441, 446, 447, 668, 695		F1J0J106A016	CAPACITOR, 6.3V, 10µF	26
C 49, 251		F1G1H222A496	CAPACITOR, 50V, 2200pF	2
C 53, 54, 165, 166, 337, 342, 343, 344, 345, 729, 730		F1G1A104A014	CAPACITOR, 10V, 0.1µF	11
C 55, 56, 67, 78, 79, 94, 97, 98, 103, 104, 109, 110, 113, 116, 117, 138, 139, 140, 141, 172, 173, 184, 186, 214, 216, 237, 301, 322, 338, 346, 351, 390, 399, 606, 694, 702		F1H1A1050015	CAPACITOR, 10V, 1µF	36
C 73, 76, 88, 91		F1G1A474A018	CAPACITOR, 10V, 0.47µF	4

C 77, 80, 149, 150, 330, 341, 348, 370, 372, 373, 374, 409, 421		F1J0J4750019	CAPACITOR, 6.3V, 4.7µF	13
C 81, 82, 83, 84, 86, 129, 155, 156, 157, 158, 391, 414		F1H0J1050022	CAPACITOR, 6.3V, 1µF	12
C 120, 121		F1G1H3R3A543	CAPACITOR, 50V, 3.3pF	2
C 159, 160, 620, 623, 628, 667, 683, 686		F1G1H220A542	CAPACITOR, 50V, 22pF	8
C 213, 215		F1G1H4R0A543	CAPACITOR, 50V, 4pF	2
C 223, 224, 226, 227, 281, 282, 284, 285, 286, 287, 288		F1G1H330A542	CAPACITOR, 50V, 33pF	11
C 225, 229, 256, 360, 361, 387, 388, 389, 403, 405, 407, 408, 422, 423, 424, 425, 426, 427, 428, 429, 443, 619, 622, 626, 644, 647, 663, 665, 670, 682, 689, 714, 716		F1G1H102A496	CAPACITOR, 50V, 1000pF	33
C 235, 624, 649, 687, 718, 726		F1J0J475A009	CAPACITOR, 6.3V, 4.7µF	6
C 242, 248		F1G1H8R0A544	CAPACITOR, 50V, 8pF	2
C 279, 398, 614, 629, 705, 706, 707, 722, 723, 732, 733, 734		F1K1E106A078	CAPACITOR, 25V, 10µF	12
C 280, 306, 307, 362, 363, 385, 615, 664, 691		F1G1H1010005	CAPACITOR, 50V, 100pF	9
C 320, 324		F1G1H5R0A543	CAPACITOR, 50V, 5pF	2
C 329		F1L3D1020006	CAPACITOR, 1KV, 1000pF	1
C 333, 334, 335, 336, 349, 353, 366		F1G0J224A001	CAPACITOR, 6.3V, 0.22µF	7
C 354, 356		F1L0J107A016	CAPACITOR, 6.3V, 100µF	2
C 367, 439		F1G1H471A496	CAPACITOR, 50V, 470pF	2
C 400		F1G1A683A014	CAPACITOR, 10V, 0.068µF	1
